The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

State Excluding N.Y.C.	29	6032	208
Total State	29	6032	208

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	6401	889	7290	141165	22.6	165052	3378

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	1200	323	1523	17480	14.5	22147	1005

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	987	42	1029	17742	18.2	18690	690

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	64	1	65	803	12.6	817	59

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	2297	37	2334	48954	21.3	49730	1169

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	229	3	232	3656	15.9	3699	195

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	1	1	2	10	10.0	20	2

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.
