The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	166	4	170	2934	17.6	2992	125

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	5	0	0

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	17	3	20	289	17.8	355	13

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	9	1	10	152	17.6	176	6

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	6331	299	6630	39779	3.2	21154	3258

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.
