Executive Summary

Executive Summary

Staff from CTB/McGraw-Hill conducted the New York Mathematics Standard Setting in Albany, New York, on July 17-21, 2006. The Bookmark Standard Setting Procedure (BSSP) was implemented to set standards for six grades: Grade 3-8 Mathematics. Participants in each grade participated in three or four rounds of activities in which they recommended three cut scores (*Partially Meeting Learning Standards*, *Meeting Learning Standards*, and *Meeting Learning Standards with Distinction*), which define four performance levels: *Not Meeting Learning Standards*, *Partially Meeting Learning Standards*, *Meeting Learning Standards*, and *Meeting Learning Standards with Distinction*.

Participants were recruited from across New York to recommend cut scores. Each grade had 26 participants. Within each grade, the New York State Education Department (NYSED) divided participants into four tables that were balanced in terms of relevant demographic characteristics (e.g., geographic location, school size).

Table 1 summarizes the cut scores and associated impact data recommended by participants in each grade in the final round (Round 3 or Round 4) of discussion and voting.

Table 1. Participant-recommended Cut Scores and Associated Impact Data Based on the Final Round

Grade	Impact Data					
	(Round 3) 3	(Round 3) 4	(Round 4) 5	(Round 3) 6	(Round 3) 7	(Round 4) 8
<i>Not Meeting</i>	11.4%	14.8%	13.7%	29.4%	17.8%	26.3%
<i>Partially Meeting</i>	17.0%	24.3%	36.2%	27.4%	39.8%	26.4%
<i>Meeting</i>	54.6%	34.9%	31.0%	30.0%	27.0%	29.0%
<i>Meeting with Distinction</i>	17.0%	26.0%	19.1%	13.2%	15.4%	18.3%
<i>Meeting and Above</i>	71.6%	60.9%	50.1%	43.2%	42.4%	47.3%
Cut Scores						
<i>Partially Meeting</i>	410	463	513	581	617	680
<i>Meeting</i>	430	488	549	604	653	702
<i>Meeting with Distinction</i>	476	518	577	634	681	730

The impact data in Table 1 reflect the data that were shown to participants at the time of the workshop. The impact data are based on the Spring 2006 test administration.

Vertical Articulation Panel

Table 2 shows the cut scores and associated impact data for each grade resulting from the Vertical Articulation Panel. Grades 3 and 4 Table Leaders adjusted the *Meeting* cut score in Grade 3 and the *Meeting with Distinction* cut score in Grade 4. Grade 5 and 6 Table Leaders adjusted the *Partially Meeting* and *Meeting with Distinction* cut scores in Grade 5 and the *Partially Meeting* cut score in Grade 6. Grade 7 and 8 Table Leaders adjusted the *Partially Meeting* and *Meeting with Distinction* cut scores in Grade 7 and all of the cut scores in Grade 8.

Table 2. Cut Scores and Associated Impact Data from the Vertical Articulation Panel

Grade	Impact Data					
	3	4	5	6	7	8
<i>Not Meeting</i>	11.4%	14.9%	15.5%	20.6%	20.4%	24.6%
<i>Partially Meeting</i>	25.0%	24.3%	34.4%	36.2%	37.3%	34.7%
<i>Meeting</i>	46.6%	45.9%	35.2%	30.0%	30.2%	28.4%
<i>Meeting with Distinction</i>	17.0%	15.0%	15.0%	13.2%	12.2%	12.3%
<i>Meeting and Above</i>	63.6%	60.8%	50.2%	43.3%	42.4%	40.7%
Cut Scores						
<i>Partially Meeting</i>	410	463	515	573	621	678
<i>Meeting</i>	438	488	549	604	653	707
<i>Meeting with Distinction</i>	476	529	580	634	683	739

This report summarizes the results of the New York Mathematics Standard Setting. A round-by-round synopsis is included in Section B. The Master Agenda is included in Section C. The overheads presented to Table Leaders during training and orientation are included in Section D. In Section E, detailed results are presented of the participants' judgments for each grade. In Section F, estimates are given of the percentage of students in each performance level at plus/minus one, two, and three standard errors of the participants' recommended final round cut scores for each grade. Section G contains graphical representations of participants' judgments and standard errors. All training materials given to participants are provided in Section H. Section I contains the results of the participant evaluation of the New York Mathematics Standard Setting. In Section J, estimates are given of the percentage of students in each performance level at plus/minus one, two, and three standard errors of the recommendations from the Vertical Articulation Panel for each grade. Section K contains the memoranda for each grade from the Table Leaders on the Vertical Articulation Panel.

Section B

Standard Setting Overview

New York State Mathematics Standard Setting

Staff from CTB/McGraw-Hill conducted the New York State Mathematics Standard Setting in Albany, New York, on July 17-21, 2006. The Bookmark Standard Setting Procedure (BSSP) was implemented to set standards for six grades: Grade 3-8 Mathematics. Participants in each grade participated in three or four rounds of activities in which they recommended three cut scores (*Partially Meeting Learning Standards*, *Meeting Learning Standards*, and *Meeting Learning Standards with Distinction*), which define four performance levels: *Not Meeting Learning Standards*, *Partially Meeting Learning Standards*, *Meeting Learning Standards*, and *Meeting Learning Standards with Distinction*.

Participants were recruited from across New York to recommend cut scores. Each grade had 26 participants. Within each grade, the New York State Education Department (NYSED) divided participants into four tables that were balanced in terms of relevant demographic characteristics (e.g., geographic location, school size). The standard setting participants were involved in setting standards for two grades. The grade groups were Grades 3 and 4, Grades 5 and 6, and Grades 7 and 8.

The New York Mathematics Standard Setting consisted of training, orientation, three or four rounds of judgments, vertical articulation, and description writing. The standard setting lasted five days, with the first day devoted to Table Leader training, and the remaining four days for standard setting and description writing.

Bookmark Roles

CTB Staff

Karla Egan, Ph.D., worked with staff from NYSED to design, organize, and conduct the New York Mathematics Standard Setting. Dr. Egan is a CTB Research Scientist. Adele Brandstrom, CTB Standard Setting Specialist, coordinated the materials preparation for the workshop.

Prior to the New York Standard Setting, this team prepared all materials for the workshop. During the workshop, this team was responsible for facilitating the workshop, training participants, entering participant results into a database, and tracking secure materials. Following the workshop, this team prepared the standard setting technical report.

Joanna Tomkowicz, Ph.D., is the CTB Research Project Manager for the New York contract. She attended the standard setting and assisted with data presentations during the workshop. CTB Research Associate Kevin Fatica assisted with data entry and materials collection during the standard setting workshop.

Josh Becker is the CTB Program Manager for New York State Mathematics testing program. Mr. Becker attended the standard setting. Linda Gardner, a CTB Program Office Coordinator for New York, attended the standard setting. The Program Manager and Office Coordinator arranged the logistics for the standard setting.

Shelli Klein is the CTB Development Project Manager for the New York State testing program. She assisted Dr. Egan and Ms. Brandstrom in coordinating materials for the standard setting. She also oversaw the Group Leaders for the standard setting.

Group Leaders

Group Leaders administrated the standard setting for those major portions in which participants were working. In each grade, the Group Leader served as a facilitator and was in charge of time management, focusing the participants on the task at hand, and interacting with the participants. The Group Leader also facilitated large-group discussions and was in charge of security and data management. The Group Leader collected the rating forms from participants and communicated with CTB Research and NYSED staff. The Group Leaders did not vote. The Group Leaders for each grade group were provided by CTB and are listed in Table 1.

Table 1. Group Leaders for Each Grade Group

Grade Group	Group Leader
3/4	Marjorie Bryant
5/6	David Ratcliff
7/8	Julie Smiley

Table Leaders

Each table in a grade had a Table Leader. Their primary role was to monitor the group discourse, which included keeping their groups focused on the tasks, facilitating discussions, and maintaining the schedule.

Participants

NYSED invited 26 participants per grade group from across New York to recommend cut scores for the NYSTP in Mathematics. Participants used their expertise and insight to help set performance standards and were full, voting members of their standard setting committees. Table 2 shows the number of participants in each grade group.

Table 2. Number of Participants in Each Grade Group

Grade Group	Number of Participants
3/4	26
5/6	26
7/8	26

Within each grade group NYSED divided participants into four tables that were balanced in terms of relevant demographic characteristics (e.g., geographic location, school size).

Following the standard setting, participants completed evaluations from which demographic information about the participants was summarized. Table 3 and Table 4 show the educational background and work experience, respectively, of the participants in each grade group, as self-reported on participant evaluations. Section I contains the results of the participant evaluation of the New York Mathematics Standard Setting.

Table 3. Educational Background of Participants in Each Grade Group

Grade Group	N	Bachelor's	Master's	Doctorate
Overall	78	2.6%	96.2%	1.3%
3/4	26	7.7%	92.3%	0.0%
5/6	26	0.0%	100.0%	0.0%
7/8	26	0.0%	96.2%	3.8%

Table 4. Number of Years in Current Profession of Participants in Each Grade Group

Grade Group	N	1-5	6-10	11-15	16-20	21+
Overall	78	15.4%	20.5%	19.2%	11.5%	33.3%
3/4	26	7.7%	15.4%	30.8%	7.7%	38.5%
5/6	26	19.2%	23.1%	11.5%	15.4%	30.8%
7/8	26	19.2%	23.1%	15.4%	11.5%	30.8%

Bookmark Materials

Ordered Item Booklets

The Ordered Item Booklets (OIBs) were comprised of items from the Spring 2006. The items were ordered according to their scale location using response probability of 0.67. Table 5 lists the number of score points in each OIB by grade.

Table 5. Number of Score Points in Ordered Item Booklets by Grade

Grade	Number of Score Points in OIB
3	64
4	82
5	62
6	68
7	65
8	88

Item Maps

The item maps summarize the material in the OIB. The item maps consisted of nine columns: the first column indicated the item's order of difficulty; the second column, the location; the third column, the test and session from which the item was taken; the fourth column, the item number on the test; the fifth column, the content strand that the item measures; the sixth column, the item type (MC for a multiple-choice item and CR for a constructed-response item); and the seventh column the score key (correct response for a multiple-choice item and score points for a constructed-response item). Participants filled in

the final two columns as they studied the items in the OIB. The first of these columns asks, “What does this item measure? That is, what do you know about a student who can respond successfully to this item/score point?” The second of these columns asks “Why is this item more difficult than the preceding items?”

Standard Setting: Day 1

Table Leader Training

Table Leaders were trained on the first day of the New York Mathematics Standard Setting. David Abrams, Assistant Commissioner, welcomed participants, provided a brief introduction to the week, overviewed the history of the testing program and described the review procedures that would follow the standard setting. Karla Egan, Ph.D., CTB Research Scientist, provided Table Leaders with an overview of standard setting and trained them specifically on the Bookmark Standard Setting Procedure (BSSP). Participants were given a synopsis of each day’s activities as well as their responsibilities each day. The Master Agenda is included in Section C, and the training overheads presented to the Table Leaders are included in Section D.

The Table Leaders then participated in a mock standard setting using a sample OIB. This sample OIB is included in Section H. During the mock standard setting, the Table Leaders practiced all activities that would occur in each round of the BSSP. The Group Leaders acted as Table Leaders during the mock standard setting to demonstrate the type of behavior expected of Table Leaders.

Draft Target Student Definitions

CTB Group Leaders then lead their groups in discussions of the knowledge, skills, and abilities expected of the Target Students for *Partially Meeting Learning Standards*, *Meeting Learning Standards*, and *Meeting Learning Standards with Distinction*. A Target Student is a student whose performance is equivalent to the minimum score required for entry into a particular performance level. Table Leaders were directed to use the New York State Mathematics Testing Program Guidance Pre-March/Post March documents to develop the Target Student definitions. Table Leaders created the first draft of the Target Student definitions for both of the grades in which they were to work.

Standard Setting: Day 2

Orientation

Staff from the NYSED and CTB welcomed the participants to the New York Mathematics Standard Setting. David Abrams, Assistant Commissioner, welcomed participants, provided a brief introduction to the week, overviewed the history of the testing program and described the review procedures that would follow the standard setting. Dr. Egan provided an overview of standard setting and introduced the BSSP to all participants. Participants were trained on the use of their OIBs and item maps. The training overheads are included in Section D.

Participants then moved into their breakout rooms. Participants worked on two grade levels during the standard setting. One group worked on Grades 3 and 4, another group worked on Grades 5 and 6, and the remaining group worked on Grades 7 and 8. Each grade group worked in a separate room.

The workshop was structured so participants first worked on Grades 4, 6, and 8. Once standards were set for these grades, participants then set standards for Grades 3, 5, and 7.

Standard Setting Implementation for Grades 4, 6, and 8

Take the Test

Participants spent approximately one hour taking the test for their respective grades.

Study Constructed-response Items

The Group Leader overviewed the constructed-response items, their scoring rubrics, and anchor papers, focusing on the knowledge, skills, and abilities required to achieve each score point.

Discuss Target Student Definitions

The Group Leader in each grade lead a discussion of the knowledge, skills, and abilities expected of the Target Students for *Partially Meeting Learning Standards*, *Meeting Learning Standards*, and *Meeting Learning Standards with Distinction*.

Study Items in the Ordered Item Booklet

Participants at each table studied the items in the Ordered Item booklet (OIB) in terms of what each item measures and why it is more difficult than the items preceding it.

Standard Setting: Day 3

Complete Study of the Items in the Ordered Item Booklet

All groups completed the study of the items in their OIBs at the beginning of Day 3.

Bookmark Training

Participants were given training materials and three explanations of bookmark placement. The training materials titled “Bookmark Placement” and “Frequently Asked Questions about Bookmark Placement” were read aloud. The first explanation of bookmark placement demonstrated the mechanics: participants were instructed that all items preceding the bookmark define the knowledge, skills, and abilities that a *just Meeting* student, for example, is expected to know. The second explanation of bookmark placement was more conceptual in that participants were instructed to examine each item in terms of its content and to make a judgment about the type of content that a student would need to know in order to be considered *just Meeting*. The final explanation discussed the relationship between the bookmarks and the scale scores. The bookmark training materials are included in Section H.

The participants were tested on their understanding of bookmark placement with a short check set. The check set questions and the results are presented in Table 6 and Table 7, respectively. Participants were then given the correct answers for the check set, as well as explanations of those answers. The check set (and the graphic that appears with it) is included in Section H.

Table 6. Questions in the Check Set that Followed Bookmark Training

	Question
1.	Which items does a student need to master to just make it into the <i>Meeting</i> performance level?
2.	If a student mastered only items 1 through 5, in which performance level would this student be?
3.	Suppose a student mastered items 1 through 10. Which performance level is this student in?
4.	For students who are classified as <i>Meeting</i> , with at least what likelihood will they be able to answer item 10?
5.	Will the items BEFORE the <i>Meeting</i> bookmark be more or less difficult to answer than the items AFTER the bookmark or about the same?

Table 7. Percent of Participants with Correct Answer on Check Set by Grade Group

	Grade Group			Total
	3/4	5/6	7/8	
N	26	26	26	78
Question 1	92%	100%	96.2%	96.2%
Question 2	76%	85.2%	88.5%	83.3%
Question 3	96%	92.6%	100%	96.2%
Question 4	100%	100%	100%	100%
Question 5	100%	92.6%	100%	97.4%

Round 1

Once participants demonstrated that they understood bookmark placement, they placed their Round 1 bookmarks for *Partially Meeting Learning Standards*, *Meeting Learning Standards*, and *Meeting Learning Standards with Distinction*, while keeping in mind their Target Student definitions and the New York State Mathematics Testing Program Guidance Pre-March/Post March documents. Participants were instructed that bookmark placement is always an individual activity. Participants were further instructed to place Bookmarks based on how students should perform (as opposed to how they are currently performing) in accordance with NYSED policy.

Item Response Theory Training

Approximately one hour following Bookmark training, Dr. Joanna Tomkowicz provided an hour training session on Item Response Theory (IRT). During this training, the fundamentals of IRT were covered, including the statistical models used to place students and items on the same scale. The overheads Dr. Tomkowicz presented may be found in Section H.

Round 2

During Round 2, participants discussed their bookmark placements in small groups at their tables. Participants were instructed to discuss those items for which there was disagreement at their table; thus, they discussed the range of items between the lowest and highest bookmarks for each performance level. After the discussion, participants again placed their bookmarks. Participants were reminded that bookmark placement is an individual activity.

Round 3

At the beginning of Round 3, Dr. Karla Egan and an NYSED representative presented participants with impact data based on their Round 2 bookmarks. Participants were also shown impact data from the other grade groups. For example, Grade 8 participants were shown impact data from Grades 4 and 6. Since the three groups worked at different paces, the impact data were sometimes based on Round 1 results. In addition, participants were shown historical impact data for Grades 4 and 8. CTB answered process-related questions, and NYSED answered all policy-related questions concerning the impact data. It was emphasized to the participants that the impact data were being presented as a “reality check.” Once discussion involving the impact data was complete, the Group Leaders facilitated discussion among participants on their bookmark placements. After the discussion, participants again placed their bookmarks. Participants were reminded that bookmark placement is an individual activity.

Standard Setting: Day 4

Standard Setting Implementation for Grades 3, 5, and 7

On Day 4, participants began the standard setting process for the second set of grades. Participants engaged in all Round 1 activities, including taking the test, studying the CR items and scoring guides, reviewing the Target Student definitions, and studying the OIB. Dr. Egan re-oriented participants to the task of Bookmark placement.

Participants placed their Rounds 1, 2, and 3 bookmarks on Day 4. The rounds were implemented as described previously for the first set of grades.

Standard Setting: Day 5

At the beginning of the day, the Round 3 recommendations were shared with participants. Following this presentation, the Grade 5/6 group decided to engage in a fourth round of voting for the Grade 5 test, and the Grade 7/8 group decided to engage in a fourth round of voting for the Grade 8 test. The other grade group was given the option to engage in a Round 4, but declined, stating their satisfaction with their Round 3 bookmarks.

Round 4

During the fourth round, participants in the Grade 3/4 and Grade 7/8 groups engaged in a large group discussion about their tests. Once they completed this discussion, they placed their bookmarks for Grade 5 and Grade 8.

Final Participant Recommendations

Participants were shown their final median bookmarks and associated impact data. Table 8 shows the participant-recommended cut scores and associated impact data based on the final round. Tables showing these cut scores adjusted for 1, 2, or 3 standard errors of measurement, standard errors of the cut score, and combined standard errors are included in Section F. Detailed results of the standard setting are in shown Section E. Graphical representations of participants' judgments are presented in Section G.

Table 8. Participant-recommended Cut Scores and Associated Impact Data Based on the Final Round

Grade	Impact Data					
	(Round 3) 3	(Round 3) 4	(Round 4) 5	(Round 3) 6	(Round 3) 7	(Round 4) 8
<i>Not Meeting</i>	11.4%	14.8%	13.7%	29.4%	17.8%	26.3%
<i>Partially Meeting</i>	17.0%	24.3%	36.2%	27.4%	39.8%	26.4%
<i>Meeting</i>	54.6%	34.9%	31.0%	30.0%	27.0%	29.0%
<i>Meeting with Distinction</i>	17.0%	26.0%	19.1%	13.2%	15.4%	18.3%
<i>Meeting and Above</i>	71.6%	60.9%	50.1%	43.2%	42.4%	47.3%
Cut Scores						
<i>Partially Meeting</i>	410	463	513	581	617	680
<i>Meeting</i>	430	488	549	604	653	702
<i>Meeting with Distinction</i>	476	518	577	634	681	730

Evaluations

Following the presentation of final results, participants were asked to complete an evaluation of the New York State Mathematics Standard Setting. The results are included in Section I.

Orientation to Descriptor Writing

CTB Development led each grade group through an orientation to descriptor writing. Participants wrote performance-level descriptors detailing the knowledge, skills, and abilities needed to be classified in each performance level. Following Orientation to Descriptor Writing, Table Leaders met in a separate room to engage in the Vertical Articulation Panel.

Vertical Articulation Panel

Once all groups had given their final recommendations, the Table Leaders from each grade group were convened to examine the articulation of impact data across the grades. The stated purpose of this group was to examine the impact data and to recommend changes to cut scores so that the impact data would be well-articulated across all grades. During the Orientation to the standard setting, all participants had been informed of the multi-step nature of standard setting and of the need for well-articulated data. Participants were informed that the Table Leaders would convene to smooth the cut scores.

During the vertical articulation process, the Table Leaders were directed to smooth the data beginning with the percentage of students *Meeting* and Above. They then smoothed the *Not Meeting* level, followed by the *Meeting with Distinction* level.

Grade 3 and 4 Table Leaders adjusted the *Meeting* cut score in Grade 3 and adjusted the *Meeting with Distinction* cut score in Grade 4. Grade 5 and 6 Table Leaders adjusted the *Partially Meeting* and *Meeting with Distinction* cut scores in Grade 5 and the *Partially Meeting* cut score in Grade 6. Grade 7 and 8 Table Leaders adjusted the *Partially Meeting* and *Meeting with Distinction* cut scores in Grade 7 and all of the cut scores in Grade 8.

Table 9 shows the cut scores developed by the Vertical Articulation Panel, as well as the associated impact data. Tables showing these cut scores adjusted for 1, 2, or 3 standard errors of measurement are included in Section J. Memoranda written by the Vertical Articulation Panel are included in Section K.

Table 9. Cut Scores and Associated Impact Data from the Vertical Articulation Panel

Grade	Impact Data					
	3	4	5	6	7	8
<i>Not Meeting</i>	11.4%	14.9%	15.5%	20.6%	20.4%	24.6%
<i>Partially Meeting</i>	25.0%	24.3%	34.4%	36.2%	37.3%	34.7%
<i>Meeting</i>	46.6%	45.9%	35.2%	30.0%	30.2%	28.4%
<i>Meeting with Distinction</i>	17.0%	15.0%	15.0%	13.2%	12.2%	12.3%
<i>Meeting and Above</i>	63.6%	60.8%	50.2%	43.3%	42.4%	40.7%
Cut Scores						
<i>Partially Meeting</i>	410	463	515	573	621	678
<i>Meeting</i>	438	488	549	604	653	707
<i>Meeting with Distinction</i>	476	529	580	634	683	739

Effectiveness of Training

An indication of the effectiveness of training may be found in the participants' answers to statements and questions on the evaluations. Table 10 shows the percentage of participants who agreed or disagreed that they understood how to place a bookmark. All participants agreed or strongly agreed that they understood how to place their bookmarks. Table 11 summarizes the percentage of participants who agreed or disagreed that bookmark training made the task of bookmark placement clear. Almost all participants agreed or strongly agreed that the task of bookmark placement was clear. Table 12 summarizes the percentage of participants in each grade who agreed or disagreed that the training materials were helpful. Almost all participants agreed or strongly agreed that the training materials were helpful. Table 13 shows the percentage of participants who agreed or disagreed that the Bookmark Procedure was described well. Almost all participants agreed or strongly agreed that the Bookmark Procedure was well described. Table 14 shows the percentage of participants who agreed or disagreed that the goals of the procedure were clear. Most participants agreed or strongly agreed that the goals of the process were clear.

Table 10. Participants' Agreement/Disagreement with the Statement, “I understood how to place my bookmarks.”

Grade	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall	78	0.0%	0.0%	0.0%	43.6%	56.4%
3/4	26	0.0%	0.0%	0.0%	50.0%	50.0%
5/6	26	0.0%	0.0%	0.0%	42.3%	57.7%
7/8	26	0.0%	0.0%	0.0%	38.5%	61.5%

Table 11. Participants' Agreement/Disagreement with the Statement, “The training on Bookmark placement made the task clear to me.”

Grade	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall	77	0.0%	0.0%	1.3%	44.2%	54.5%
3/4	25	0.0%	0.0%	4.0%	36.0%	60.0%
5/6	26	0.0%	0.0%	0.0%	50.0%	50.0%
7/8	26	0.0%	0.0%	0.0%	46.2%	53.8%

Table 12. Participants' Agreement/Disagreement with the Statement, “The training materials were helpful.”

7/8	26	0.0%	0.0%	0.0%	46.2%	53.8%

Table 14. Participants' Agreement/Disagreement with the Statement, "The goals for this procedure were clear."

Grade	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall	76	0.0%	0.0%	3.9%	46.1%	50.0%
3/4	25	0.0%	0.0%	0.0%	48.0%	52.0%
5/6	25	0.0%	0.0%	8.0%	48.0%	44.0%
7/8	26	0.0%	0.0%	3.8%	42.3%	53.8%

Perceived Validity

Another indication of the successfulness of the standard setting may be found in the participants' perceived validity of the BSSP itself. Table 15 shows the percentage of participants who agreed/disagreed that the Bookmark procedure produced valid cut scores. Most participants agreed or strongly agreed that the Bookmark Procedure produced valid cut scores. Table 16 shows that the participants' satisfaction with their group's final recommendations. Most participants agreed or strongly agreed that they were satisfied with their group's final recommendations.

Table 15. Participants' Agreement/Disagreement with the Statement, "I am confident that the Bookmark Procedure produced valid standards."

Grade	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall	78	1.3%	1.3%	11.5%	62.8%	23.1%
3/4	26	0.0%	0.0%	7.7%	76.9%	15.4%
5/6	26	0.0%	0.0%	11.5%	53.8%	34.6%
7/8	26	3.8%	3.8%	15.4%	57.7%	19.2%

Table 16. Participants' Agreement/Disagreement with the Statement, "Overall, I was satisfied with my group's final bookmarks."

Grade	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall	76	1.3%	1.3%	1.3%	46.1%	50.0%
3/4	26	0.0%	0.0%	0.0%	38.5%	61.5%
5/6	25	0.0%	0.0%	4.0%	48.0%	48.0%
7/8	25	4.0%	4.0%	0.0%	52.0%	40.0%

Quality Control Procedures

The CTB Standard Setting Team adheres to many quality control procedures to foster the accuracy of the materials used and the results presented during the standard setting. Prior to the workshop, the Standard Setting Team cross-checks the ordering of items in the Ordered Item Booklets, the accuracy of the information in the Item Maps, and the accuracy of the Microsoft Excel macros and Bookmark Pro software used to generate results and impact data. During the workshop, all data is scanned. Any results that appear to be questionable are further investigated by the Standard Setting Project Manager, in consultation with the Standard Setting Team and CTB Research staff.

Section C

Master Agenda

Master Agenda

**New York State Testing Program
Grades 3 through 8 Mathematics**

Bookmark Standard Setting Workshop

**July 17 – 21, 2006
Albany, New York**

Welcome to the Bookmark Standard Setting Workshop for the New York State Testing Program for Grades 3 through 8 Mathematics!

The New York State Education Department and CTB/McGraw-Hill would like to thank you for your time and expertise during this important process.

Please use this agenda during the workshop. If you have any questions or concerns, please contact a member of the CTB Standard Setting Team.

Monday, July 17

Welcome! Table Leader Training

- 8:00 AM** **Table Leader registration and continental breakfast** *****Empire Room*****
Please check in at the reception area to sign a non-disclosure agreement, get your nametag, and collect any other information.
- 9:00 AM** **Welcome and Program Overview** *****Empire Room*****
The NYSED welcomes Table Leaders, introduces key staff, and provides an overview of the New York State Testing Program and Standard Setting.
- 9:30 PM** **Table Leader training**
CTB trains Table Leaders on the Bookmark Standard Setting Procedure and their roles and responsibilities during the workshop.
- 12:00 PM** **Lunch** *****Ashley's*****
- 1:00 PM** **Target Student descriptions**
Table Leaders engage in structured discussions about the knowledge, skills, and abilities they expect to be demonstrated by students in each performance level.
- 4:00 PM** **Ordered Item Booklets & Item Maps for the NYS Mathematics Standard Setting**
Table Leaders are introduced to the materials that will be used.
- 4:45 PM** **Secure materials collection**
The Group Leader facilitates collection of the test materials from all participants.
- Table Leaders supervise the collection of secure materials at their tables. See the "Secure Materials" page in this agenda for more information.
 - Table Leaders audit materials at one other table. After all secure materials are accounted for, participants are dismissed by the Group Leader.
- 5:00 PM** **Table Leader dismissal**

Opening Session & Bookmark Activities for Grades 4, 6, and 8

7:30 AM Registration and continental breakfast ****Empire Room****
 Participants check in at the reception table. Table Leaders need not register again.

8:00 AM Opening session ****Empire Room****
 The NYSED formally welcomes all participants, introduces key staff, and provides an overview of the New York State Mathematics Testing Program and Standard Setting.

8:30 AM General training
 CTB provides a brief introduction to the Bookmark Standard Setting Procedure. After this session, participants break into their assigned grade groups.

Breakout Rooms: *Grades 3 & 4: Salon F* *Grades 5 & 6: Salon G* *Grades 7 & 8: Salon H*

9:15 AM Take the operational test for Grade 4, 6, or 8
 Participants sign out secure materials. Participants take the operational test under conditions similar to those experienced by students.

- Ensure that all participants at your table write their name on **each** piece of their secure materials. Secure materials are printed on colored paper.
- Although some discussion about individual test items is normal, focus your participants away from prolonged debate and toward taking the test.
- Use the provided index cards to record comments about test items.

10:15 AM Study constructed-response items
 The Group Leader provides an overview of the constructed-response items and their scoring rubrics and anchor papers, focusing on the knowledge, skills, and abilities required to achieve each score point.

10:45 AM Target Student discussion
 The group discusses the knowledge, skills, and abilities expected of students in each performance level.

11:30 AM Begin discussion of each item in the Ordered Item Booklet (OIB)
 Facilitate a discussion among everyone at your table of each of the items in the OIB. Start with the first item, and discuss each item in turn, focusing on what each item measures and what makes it harder than the previous items. Participants record these details on their Item Maps.

- Remember to use the index cards, as necessary.
- Ensure that each participant at your table has a chance to speak.

12:00 PM Lunch ****Salon E****

1:00 PM Continue discussion of each item in the OIB

4:45 PM Secure materials collection and audit
 The Group Leader facilitates collection of the test materials from all participants.

- Table Leaders supervise the collection of secure materials at their tables. See the “Secure Materials” page in this agenda for more information.
- Table Leaders audit materials at one other table. After all secure materials are accounted for, participants are dismissed by the Group Leader.

4:50 PM Table Leader debrief
 Table Leaders discuss the events of the day and plans for the next day with the Group Leader.

5:00 PM Table Leader dismissal

Discussion & Bookmark Ratings for Grades 4, 6, and 8

- 7:30 AM Continental breakfast** ****Empire Room****
- 8:00 AM Orientation to bookmark placement and Round 1 ratings** ****Empire Room****
 A member of the CTB Standard Setting Team introduces bookmark placement, explaining how bookmarks are placed and what bookmarks mean. After this brief presentation, a short checkset is given and discussed, followed immediately by Round 1 bookmark placement.
- See “Bookmark Placement” and “Frequently Asked Questions” for more info.
 - Remind participants that bookmark placement is always an individual activity.
 - Collect your participants’ rating forms as they complete them, ensuring that each participant has made a single, unambiguous rating for each bookmark.
 - Fill out your orange sheet and begin Round 2 discussions.
 - Give your participants’ rating forms to the Group Leader.
- 9:30 AM Discuss Round 1 as a table**
 Use the orange sheet to lead a discussion about the ratings made at your table.
- 10:30 AM Round 2 ratings**
 After your Round 1 discussion, begin Round 2 bookmark placement.
- Remind participants that bookmark placement is always an individual activity.
 - Collect your participants’ rating forms as they complete them.
 - You need *not* complete another orange sheet.
- 11:00 AM IRT Training** ****Empire Room****
 A CTB Research Scientist will provide an overview of Item Response Theory (IRT). IRT is the family of statistical procedures underlying the scoring for the NYSTP.
- 12:00 PM Lunch** ****Salon E****
- 1:00 PM Discuss Round 2 as a large group**
 The Group Leader presents a summary of the voting from each table to the entire group. Afterwards, s/he leads a discussion with the entire group of each bookmark, similar to the table-level discussions of Round 2.
- 2:30 PM Round 3 ratings**
 The Group Leader directs all participants to make their Round 3 bookmark placements.
- Remind participants that bookmark placement is always an individual activity.
 - Collect your participants’ rating forms as they complete them.
 - You need *not* complete another orange sheet.
- 3:00 PM Presentation of final recommendations**
 A summary of the Round 3 voting is presented to the entire group.

- 3:15 PM** **Take the operational test for Grade 3, 5, or 7**
Participants sign out secure materials. Participants take the operational test under conditions similar to those experienced by students.
- Ensure that all participants at your table write their name on **each** piece of their secure materials. Secure materials are printed on colored paper.
 - Although some discussion about individual test items is normal, focus your participants away from prolonged debate and toward taking the test.
 - Use the provided index cards to record comments about test items.
- 4:15 PM** **Study constructed-response items**
The Group Leader provides an overview of the constructed-response items and their scoring rubrics and anchor papers, focusing on the knowledge, skills, and abilities required to achieve each score point.
- 4:45 PM** **Secure materials collection and audit**
The Group Leader facilitates collection of the test materials from all participants.
- Table Leaders supervise the collection of secure materials at their tables. See the “Secure Materials” page in this agenda for more information.
 - Table Leaders audit materials at one other table. After all secure materials are accounted for, participants are dismissed by the Group Leader.
- 4:50 PM** **Table Leader debrief**
Table Leaders discuss the events of the day and plans for the next day with the Group Leader.
- 5:00 PM** **Table Leader dismissal**

Discussion & Bookmark Ratings for Grades 3, 5, and 7

- 7:30 AM Continental breakfast** ****Empire Room****
- 8:00 AM Target Student discussion**
The group discusses the knowledge, skills, and abilities expected of students in each performance level.
- 9:30 AM Begin discussion of each item in the Ordered Item Booklet (OIB)**
Facilitate a discussion among everyone at your table of each of the items in the OIB. Start with the first item, and discuss each item in turn, focusing on what each item measures and what makes it harder than the previous items. Participants record these details on their Item Maps.
- Remember to use the index cards, as necessary.
 - Ensure that each participant at your table has a chance to speak.
- 12:00 PM Lunch** ****Salon E****
- 1:00 PM Continue discussion of each item in the OIB**
- 2:00 PM Round 1 ratings**
After studying your OIB, begin Round 1 bookmark placement.
- Remind participants that bookmark placement is always an individual activity.
 - Collect your participants' rating forms as they complete them.
 - Complete orange sheet.
- 2:30 PM Discuss Round 1 as a table**
Use the orange sheet to lead a discussion about the ratings made at your table.
- 3:30 PM Round 2 ratings**
After your Round 1 discussion, begin Round 2 bookmark placement.
- Remind participants that bookmark placement is always an individual activity.
 - Collect your participants' rating forms as they complete them.
 - You need *not* complete another orange sheet.
- 4:00 PM Discuss Round 2 as a large group**
The Group Leader presents a summary of the voting from each table to the entire group. Afterwards, s/he leads a discussion with the entire group of each bookmark, similar to the table-level discussions of Round 2.
- 4:45 PM Secure materials collection and audit**
The Group Leader facilitates collection of the test materials from all participants.
- Table Leaders supervise the collection of secure materials at their tables. See the "Secure Materials" page in this agenda for more information.
 - Table Leaders audit materials at one other table. After all secure materials are accounted for, participants are dismissed by the Group Leader.
- 4:50 PM Table Leader debrief**
Table Leaders discuss the events of the day and plans for the next day with the Group Leader.
- 5:00 PM Table Leader dismissal**

Bookmark Ratings for Grades 3, 5, and 7 & Description Writing

- 7:30 AM** **Continental breakfast** *****Empire Room*****
- 8:00 AM** **Conclude discussions and Round 3 ratings**
The Group Leader directs all participants to make their Round 3 bookmark placements.
- Remind participants that bookmark placement is always an individual activity.
 - Collect your participants' rating forms as they complete them.
 - You need *not* complete another orange sheet.
- 9:00 AM** **Presentation of final recommendations**
A summary of the Round 3 voting is presented to the entire group.
- 9:15 AM** **Evaluations**
Each participant completes a standard setting evaluation.
- 9:30 AM** **Performance level descriptor writing training**
- The Group Leader presents instructions for writing a first draft of the long performance level descriptors.
 - *Within each breakout room, participants will be divided into two groups to write descriptors for each grade.*
- 10:00 AM** **Table Leaders meet for cross-grade smoothing**
- The rest of the participants will draft the performance level descriptors.
 - Once Table Leaders are finished with the smoothing discussion, they will join the other participants in drafting the performance level descriptors.
- 10:00 AM** **Performance level descriptors, first draft**
- Your group will receive a listing of the items you will work with.
 - Your group's descriptors should synthesize the knowledge, skills, and abilities needed to respond successfully to each item in to each performance level.
- 12:00 PM** **Lunch** *****Salon E*****
- 1:00 PM** **Performance level descriptors, second draft**
Each group presents its draft to the entire group and receives comments.
- 2:30 PM** **Performance level descriptors, final draft**
Each group writes its final draft of the performance-level descriptors.
- 4:45 PM** **Secure materials collection and audit**
The Group Leader facilitates collection of the test materials from all participants.
- Table Leaders supervise the collection of secure materials at their tables. See the "Secure Materials" page in this agenda for more information.
 - Table Leaders audit materials at one other table. After all secure materials are accounted for, participants are dismissed by the Group Leader.
- 5:00 PM** **Table Leader dismissal**

The New York State Education Department and CTB thank you for your time and participation!

Why do we do Secure Materials Collection?

A thorough collection of secure test materials protects both the reliability of the testing program and the substantial monetary investment in the assessment. A structured method of collection has been established to effectively gather all secure material at the workshop. Each day as you facilitate secure materials collection at your table, refer to this guide for instructions and suggestions.

During the collection, participants should place each secure item, one at a time, in a pile on the table in front of them. After the process, each participant will have a single stack of materials, each stacked in the same way as everyone else in the room. Please follow these steps to facilitate the process.

How do I do Secure Materials Collection?

1. Get the attention of all the participants at your table. Discourage any side conversations or inattention.
2. Using the list provided, call out each item, one at a time, and watch participants place that item on their stack. Discourage participants from moving ahead. Ensure that participants have placed the item in their stack before moving on.
3. Proceed through the list until each piece of secure material has been collected. Direct participants to place a rubber band around their stack when completed.
4. If any participants wish to leave additional items with their materials overnight, encourage them to place it beneath their stack, inside the rubber band.
5. Table Leaders will audit the secure materials at one other table.
6. Once you have supervised the collection of secure materials and are satisfied that all items have been collected, inform the Group Leader.
7. The collected materials are stored overnight and will be available in the morning.

What should I expect from Secure Materials Collection?

Generally, secure materials collection goes smoothly. If you have any questions about the collection process, or if you have a concern about test security at the standard setting workshop, please contact your Group Leader or a member of the CTB Standard Setting Team.

Standard Setting Overview

- *What is standard setting?*
 - A process that lets experts make judgments about the content that the students who are *Meeting Learning Standards* should know.
 - ▶ Also, *Meeting with Distinction, Partially Meeting, and Not Meeting* students.

Copyright © CTB/McGraw-Hill 2006

Standard Setting Overview

- *Why do standard setting?*
 - The New York State Learning Standards define what students are tested on.
 - ▶ These are things students *should* be able to do.
 - ▶ New York has established Learning Standards for grades 3 through 8 in Mathematics.
 - Performance standards define what students *can* do in each performance level.
 - ▶ You will actively discuss your expectations of the Target Student in each performance level.

Copyright © CTB/McGraw-Hill 2006

Standard Setting Overview

- *Performance Levels*
 - Specify the knowledge, skills and abilities a student needs to know in order to be classified as *Not Meeting, Partially Meeting, Meeting* and *Meeting with Distinction*.

Standard Setting Overview

- Purpose of the Standard Setting
 - Allows cut scores to be set on the test scale
 - The test scale represents the ability of students

Copyright © CTB/McGraw-Hill 2006

Standard Setting Overview

- Purpose of the Standard Setting
 - You will set a cut score on the test scale.
 - Students who meet or exceed the cut score will have enough knowledge, skills and abilities to be classified in a given performance level on the NYSTP.
 - Decisions will be based on the New York Learning Standards.

6
 Score Point
 1 of 2

7. Sam can purchase his lunch at school. Each day he wants to have juice that costs 50¢, a sandwich that costs 90¢, and fruit that costs 35¢. His mother has only \$1.00 bills. What is the least number of \$1.00 bills that his mother should give him so he will have enough money to buy lunch for 5 days?

Copyright © CTB/McGraw-Hill 2006

6 scoring guide

SOLUTION:
 For one day, the sum is \$1.75. For 5 days, the sum is \$8.75. Therefore, he should ask his mother for nine one-dollar bills (or 1 \$5 bill and 4 \$1 bills).
 Answer may be given pictorially.

Note: No explanation is asked for, so paper could have a small error, such as copying a number incorrectly and still get a score of 2, provided method and answer are correct.

SCORING GUIDE:

0 Incorrect response -- includes \$1.75 or \$2; also \$975 or \$875.00
 ① \$8.75 or 875
 OR
 One day is \$1.75 so he needs \$2 each day, so \$10 for a week (picture of \$10 bill is acceptable)
 OR
 correct method but rounded down to \$8 (this requires work to be shown)
 OR
 correct method but small error and incorrect response of \$7 to \$11, inclusive
 2 Correct response

Standard Setting Overview

- *What is standard setting?*
 - A process that lets experts make judgments about the content that the students who are *Meeting Learning Standards* should know.
 - ▶ Also, *Meeting with Distinction, Partially Meeting, and Not Meeting* students.

Copyright © CTB/McGraw-Hill 2006

Standard Setting Overview

- *Why do standard setting?*
 - The New York State Learning Standards define what students are tested on.
 - ▶ These are things students *should* be able to do.
 - ▶ New York has established Learning Standards for grades 3 through 8 in Mathematics.
 - Performance standards define what students *can* do in each performance level.
 - ▶ You will actively discuss your expectations of the Target Student in each performance level.

Copyright © CTB/McGraw-Hill 2006

Standard Setting Overview

- *Performance Levels*
 - Specify the knowledge, skills and abilities a student needs to know in order to be classified as *Not Meeting, Partially Meeting, Meeting* and *Meeting with Distinction*.

Standard Setting Overview

- Purpose of the Standard Setting
 - Allows cut scores to be set on the test scale
 - The test scale represents the ability of students

Copyright © CTB/McGraw-Hill 2006

Standard Setting Overview

- Purpose of the Standard Setting
 - You will set a cut score on the test scale.
 - Students who meet or exceed the cut score will have enough knowledge, skills and abilities to be classified in a given performance level on the NYSTP.
 - Decisions will be based on the New York Learning Standards.

2

CARTONS OF EGGS SOLD LAST MONTH

Farm A ○ ○ ○ ○ ○
Farm B ○ ○ ○ ○ ○ ○ ○
Farm C ○ ○ ○ ○

Each ○ = 100 Cartons

4. According to the graph how many cartons of eggs were sold altogether by farms A, B, and C last month?

A. 13
B. 130
C. 1,300
D. 13,000

Copyright © CTB/McGraw-Hill 2006

6
Score Point
1 of 2

7. Sam can purchase his lunch at school. Each day he wants to have juice that costs 50¢, a sandwich that costs 90¢, and fruit that costs 35¢. His mother has only \$1.00 bills. What is the least number of \$1.00 bills that his mother should give him so he will have enough money to buy lunch for 5 days?

Copyright © CTB/McGraw-Hill 2006

6 scoring guide

SOLUTION:
For one day, the sum is \$1.75. For 5 days, the sum is \$8.75. Therefore, he should ask his mother for nine one-dollar bills (or 1 \$5 bill and 4 \$1 bills).

Answer may be given pictorially.

Note: No explanation is asked for, so paper could have a small error, such as copying a number incorrectly and still get a score of 2, provided method and answer are correct.

SCORING GUIDE:

0 Incorrect response -- includes \$1.75 or \$2; also \$975 or \$875.00

① \$8.75 or 875
OR
One day is \$1.75 so he needs \$2 each day, so \$10 for a week (picture of \$10 bill is acceptable)
OR
correct method but rounded down to \$8 (this requires work to be shown)
OR
correct method but small error and incorrect response of \$7 to \$11, inclusive

2 Correct response

Copyright © CTB/McGraw-Hill 2006

6 anchor

An Introduction to Item Response Theory

CTB Research
July 2007

Goals of the training session

1. Introduce the basics of Item Response Theory (IRT)
2. Present why and how IRT is applied to state educational assessments

Item Response Theory

- Heart of the theory:
 - A mathematical model of how examinees with different ability levels should respond to an item
- Item response refers to :
 - The right or wrong answer to a multiple-choice (MC) item
 - Full or partial credit on a constructed-response (CR) item

Advantages of IRT

- Allows us to compare the performance of examinees who have taken different tests
- Allows us to build parallel test forms item by item
- Allows precise item analysis and test construction
- Allows constructed-response and multiple-choice items to be placed on the same scale
- Is a reliable scoring procedure
- Allows us to place items and students on the same scale

Who uses IRT?

- Majority of state-wide testing programs
 - Overseen by expert technical advisors
 - Used in past and current NYS assessment programs
- National Assessment of Educational Progress (NAEP)
- Computer adaptive tests (e.g., GRE)

Difference between Classical Statistics and IRT Statistics (Why use IRT?)

- Classical Statistics
 - Sample-dependent
 - Treat each item equally when scoring
- IRT Statistics
 - Sample-independent
 - Weight each item according to the item information/discrimination
 - Allow comparison of scores from two tests

Item Parameters: The Three-Parameter (3PL) Logistic IRT Model

- a-parameter (Discrimination)
- b-parameter (Difficulty)
- c-parameter (Guessing)

What do the item parameters tell us?

- a-parameter
 - The discrimination parameter indicates the degree to which an item differentiates between low- and high-performing students.
 - The discrimination parameter indicates how much information is provided by an item at a particular ability level.

What do the item parameters tell us?

- b-parameter
 - The item difficulty describes the location of the item on an ability scale. The more difficult the item, the further the curve is to the right.
 - When there is no guessing, b is the ability level for which the probability of a correct answer is 0.50, halfway between 0 to 1 on the vertical axis.

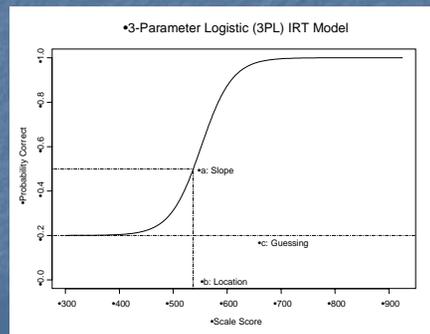

More about Location

- Location is the IRT index for item difficulty. It also indicates the level of student ability. Item difficulty and student ability are measured on the same scale.
- Item location is found at the point where the item gives the most information about a student's ability.
- The larger the location value, the more difficult the item. The larger the location value, the higher the student ability.

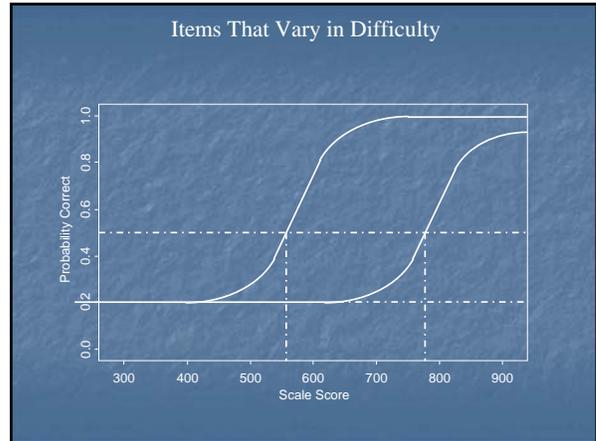

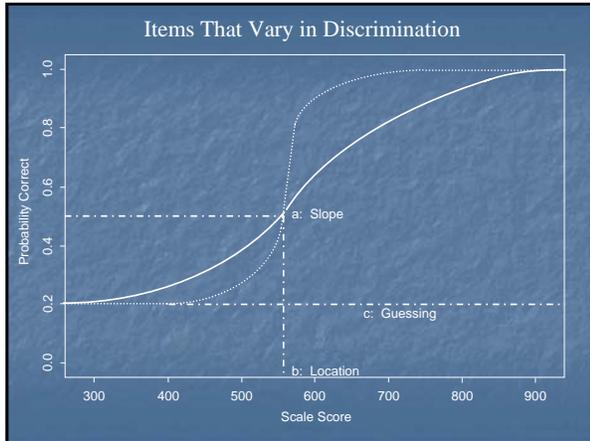

What do the item parameters tell us?

- c-parameter
 - An adjustment factor to account for the fact that students can guess the correct answer to a multiple-choice item

Item Characteristic Curve (ICC)

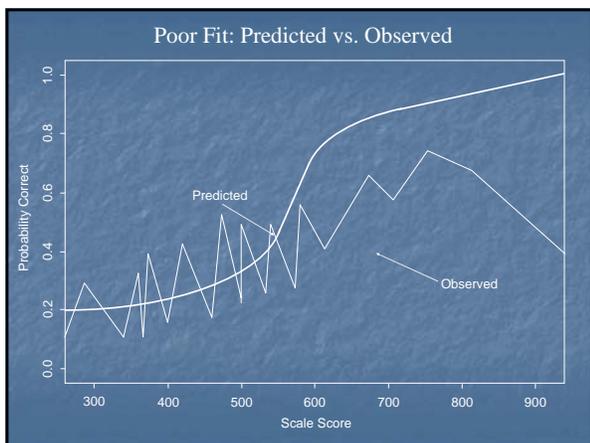

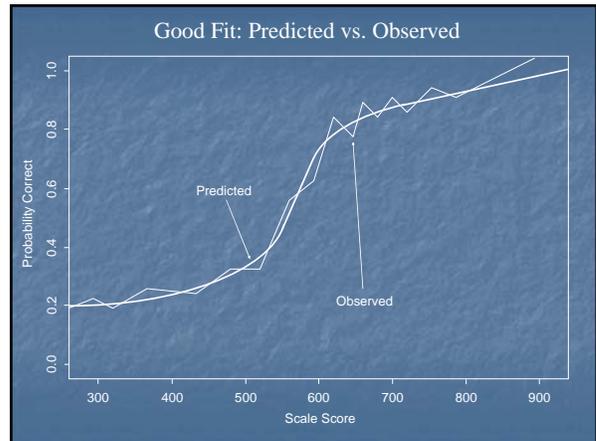

IRT Training

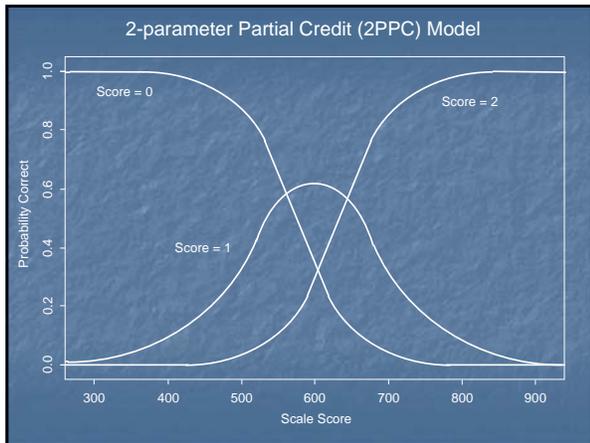

Evaluating IRT predictions against student data

- Model to Data Fit: Item fit is evaluated by comparing students' predicted and observed responses to items.

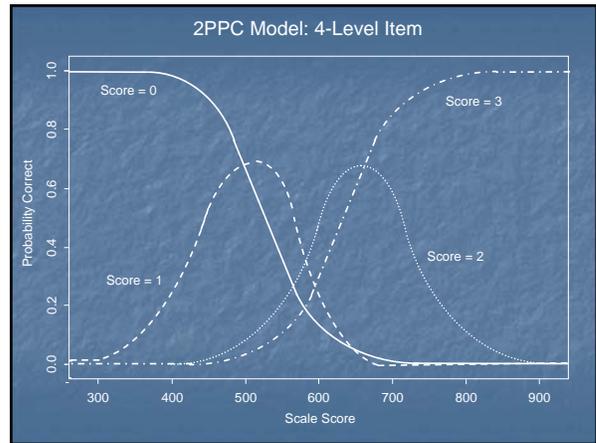

IRT & Constructed-response Items

- 2-parameter Partial Credit Model (2PPC)
- Same basic assumptions
 - Guessing is negligible

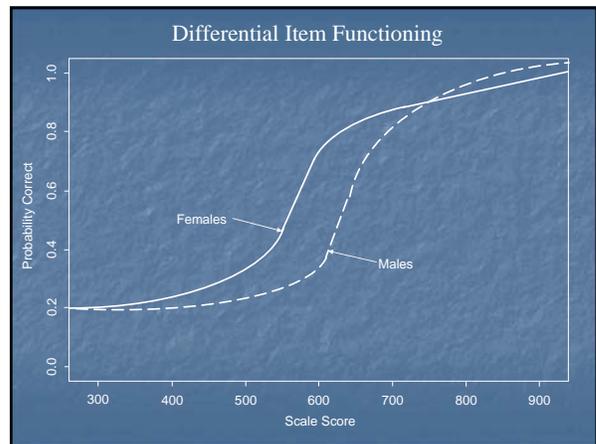

- ### Item Parameters (2PPC Model)
- f -parameter (Acceleration)
 - Common to all score levels
 - Is not the same as the discrimination parameter
 - Refers to the speed at which the probability for successive levels changes

- ### Item Parameters (2PPC Model)
- g -parameter (Threshold)
 - Marks the transition points on the ability scale where the most likely score shifts from one score point to the next score point
 - There are $n-1$ gamma parameters for an n -level CR item

- ### IRT Item Statistic helps identify potentially biased items
- Differential Item Functioning
 - In addition to content review, we look at bias in terms of differential item functioning (DIF).
 - If the item parameters are estimated for two different groups and they are significantly different from each other, DIF has been detected.
 - Possible sources include gender, ethnicity, socio-economic status, computer vs. paper-and-pencil testing, etc.

IRT – Item and Ability Scale

Is this question easy or difficult?

4 Look at the chart. Which waterfall is the highest?

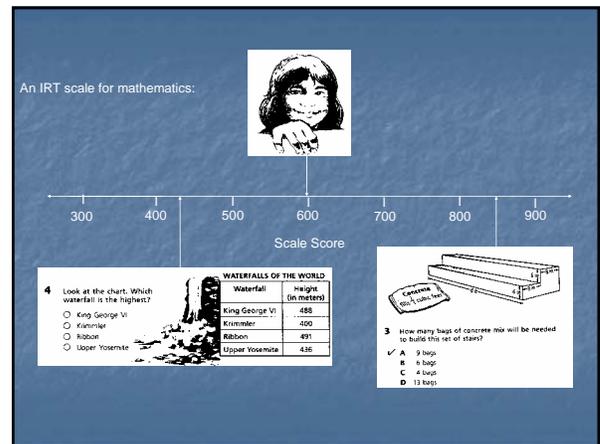

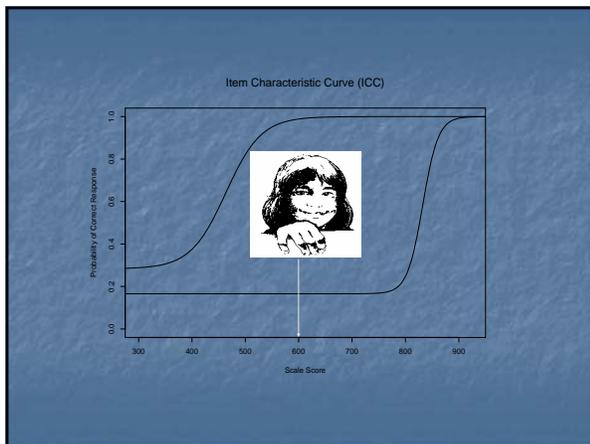

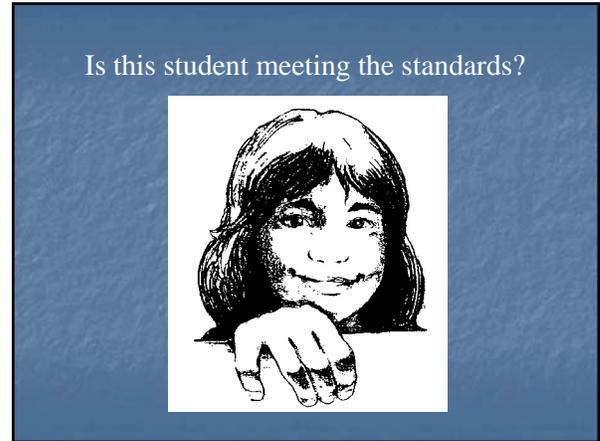

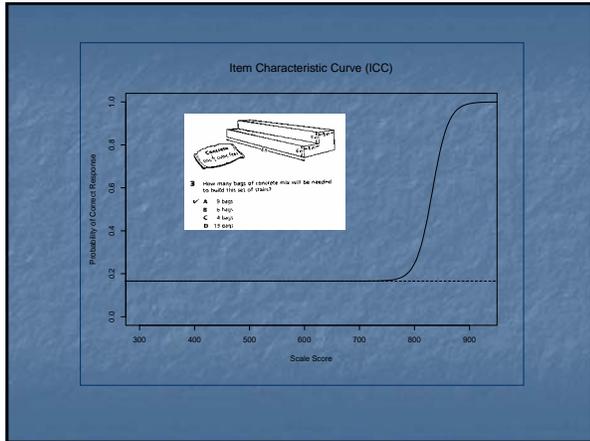

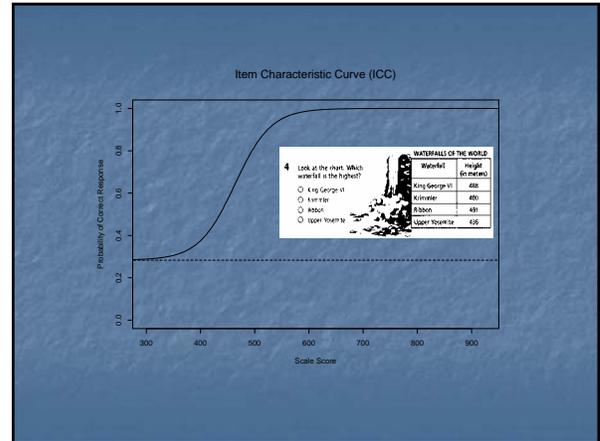

- King George VI
- Krummler
- Ribbon
- Upper Yosemite

Waterfall	Height (in meters)
King George VI	488
Krummler	400
Ribbon	491
Upper Yosemite	436

How about this one?

3 How many bags of concrete mix will be needed to build this set of stairs?

- A 9 bags
- B 6 bags
- C 4 bags
- D 13 bags

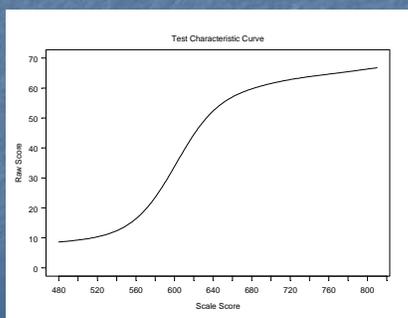

Test Characteristic Curve

- Sum of the Item Characteristic Curves
- Map of the relationship between raw score & scale score

Estimating Student Ability

- Number-correct scoring (Raw Score to Scale Score) is used in NYSTP 3-8
 - Takes into account how many score points a student earns on a test
 - Is easy to understand (students with the same raw score on a given test will receive the same scale score)

Raw Score to Scale Score (RS-SS) Conversion Table

Why we need RS-SS tables?

- Different tables every year
- Raw scores are not comparable across administrations
- Scale scores are comparable across administrations
- Test equating allows for test difficulty adjustment and scale score comparability

Using Scale Scores

- Students can be placed on an ability scale
- Students can be classified into performance levels (once cut points are established)
- Longitudinal comparisons can be made
- Performance of sub-groups can be compared

Section F

Participants' Recommended Cut Scores Plus and Minus One, Two, and Three Standard Errors with Associated Impact Data

Calculating a Meaningful Standard Error for the Bookmark Cut Score

In the Bookmark Standard Setting Procedure for a given grade and content area, participants are assigned to roughly equivalent small groups that work independently through Round 2. Thus, the set of Round 2 cut scores provide some information about the stability of consensus in Bookmark cut scores across independent small group replications. To quantify this degree of consensus, we calculate the cluster sample standard error (Cochran, 1963, p. 210) of the Round 2 mean cut score. Cluster sample standard errors are appropriate when, as may be reasonably assumed here, data are collected from groups and independence can be assumed between groups but not within groups.

For the Bookmark Procedure, the standard error of the Bookmark cut score (SE_{cut}) is based on the cluster sample standard error of the Round 2 mean cut score. Because the final Bookmark cut scores are based on the *median* of the group instead of the mean, this cluster sample standard error (SE_{cut}) is adjusted by $\sqrt{\frac{\pi}{2}}$ (Huynh, 2003). The standard error of the Bookmark cut score is:

$$SE_{cut} = \left(\sqrt{\frac{\pi}{2}} \right) \left(\sqrt{\frac{S^2}{N} \left[1 + \left(\frac{N}{n} - 1 \right) r \right]} \right),$$

where S^2 is the sample variance of individual Round 2 cut scores, r is the Round 2 intraclass correlation, N is the number of participants, and n is the number of groups. To be precise, if Y_{ik} is the cut score from the i^{th} participant in the k^{th} group, \bar{Y}_k is the average cut score for group k , and $\bar{\bar{Y}}$ is the average of all Round 2 cut scores, then

$$r = \frac{\text{Var}(\bar{Y}_k)}{\text{Var}(\bar{Y}_k) + \text{Var}(Y_{ik} - \bar{Y}_k)} \quad \text{and} \quad S^2 = \frac{1}{N-1} \sum_{n,k} (Y_{nk} - \bar{\bar{Y}})^2$$

If we have only two groups ($n=2$) and perfect dependence (agreement) within groups ($r=1$), then the cluster sample standard error simplifies to $SE_{cut} = \left(\sqrt{\frac{\pi}{2}} \right) \left(\frac{|Y_1 - Y_2|}{2} \right)$, which is the standard error formula employed by NAEP

for two independent replications of a modified Angoff procedure (ACT, 1983, pp. 4-8). If, on the other hand, individual participants acted independently of their groups ($r=0$), then the cluster sample standard error simplifies to the traditional standard error of the mean for independent observations, $SE_{cut} = \left(\sqrt{\frac{\pi}{2}} \right) \left(\sqrt{\frac{S^2}{N}} \right)$. In this

manner, SE_{cut} provides a simple, flexible, and general way to quantify the amount of uncertainty associated with final Bookmark cut scores.

It is appropriate (if statistically imprecise) to say that repeated replications of this very standard setting procedure with different judges sampled from the same population of potential judges would result in a range of cut scores, most of which would fall in a band of width $4 * SE_{cut}$. In the graphical displays of participant data, we depict such an interval centered at the median of the Round 3 cut score. The purpose of calculating statistics like SE_{cut} and producing graphs of the types displayed here is to effectively communicate the complex information that is gathered during a Bookmark Standard Setting Procedure.

Participant Training Materials

Bookmark Placement

These directions are written for placing the *Meeting* bookmark and apply analogously to the *Partially Meeting* and *Meeting with Distinction* bookmarks.

For whom am I placing this bookmark? The Target Student

When you place your *Meeting* bookmark, you are separating the highest ability *Partially Meeting* students from the lowest ability *Meeting* students. In other words, you are keeping in mind the Target Student who will just make it into the *Meeting* level.

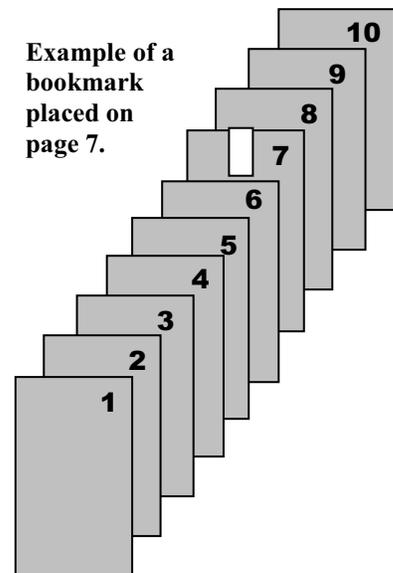

How do I place my bookmark? The Mechanics

The bookmark is exactly that: a bookmark. It separates the content students are expected to master from the content they are *not* expected to master. In the example below, a participant has placed the *Meeting* bookmark on page 7. With this bookmark placement, the participant says that a student must master the content represented by items 1 through 6 to be *Meeting*.

To place your bookmark, start at page 1 in the Ordered Item Booklet (OIB). Page through the OIB **looking at the content covered** until you find the **first** page where you think a student has demonstrated a sufficient body of evidence to indicate that the student is *Meeting* relative to the content standards. This is the content you are saying a *Meeting* Target Student needs to master to just make it into the *Meeting* level.

Hold the pages that contain the content you expect the student to master in your left hand. Place your bookmark on the page AFTER the last item you expect the student to master. This page number is your bookmark. Write it on your Rating Form.

Hint: It may be helpful to first identify the interval of items in which you are reasonably certain the bookmark should be placed; then you can place the bookmark within that interval. If you are uncertain about where to place your bookmark, make your best decision; you will have two more rounds of voting to reconsider your bookmark.

What does my *Meeting* Bookmark mean? Some Answers

- You expect *Meeting* students to master the knowledge, skills, and abilities contained in the items *before* your bookmark.
- *Meeting* students should know and be able to do the items *before* the bookmark. For multiple-choice items, *Meeting* students should know the correct response. For constructed-response items, *Meeting* students should most likely achieve the score points before the bookmark.

Is my bookmark the same as a raw score? NO

It is very important to remember that your bookmark placement is *not* equal to a raw score. In the example above, the *Meeting* bookmark was placed on page 7. The participant was *not* saying that a student must get six items correct to be classified as *Meeting*. This participant is saying that a just *Meeting* student must master the content measured by the items on pages 1 through 6. The numbers in the OIB correspond to the rank order of difficulty of each item. These numbers do *not* correspond to a raw score.

Frequently Asked Questions about Bookmark Placement

These questions are written in reference to the *Meeting* bookmark and apply analogously to the *Partially Meeting* and *Meeting with Distinction* bookmarks.

How do I know if I placed my bookmark in the “right” place?

The “right” place is a matter of judgment, *your* judgment. You are placing your bookmark based on the content you expect students to know and be able to do.

I set my bookmark based on the content I expect students to know and be able to do, that is, the content I expect students to master. What is the definition of mastery?

We look at mastery by considering the likelihood with which students will respond correctly to the items. This question is answered in more depth in the handout “Mastery.”

If a student misses some items before the *Meeting* bookmark and gets some correct after the bookmark, is that student still *Meeting*?

A student does *not* have to get every item before the bookmark correct to be *Meeting*. *Meeting* students can miss some items *before* the bookmark and correctly respond to some items *after* the bookmark.

Does the page number on which I place my bookmark correspond to the raw score a student must get on the test?

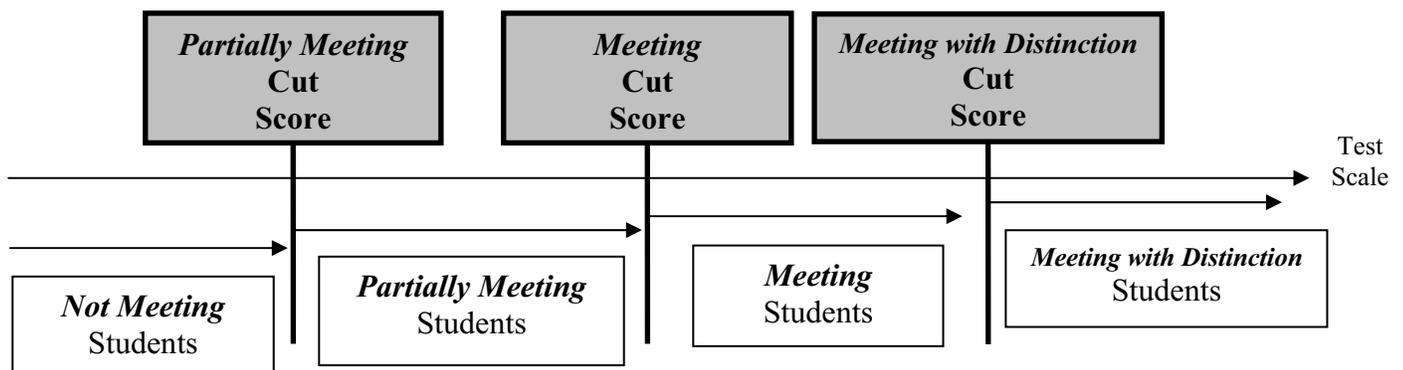

No. Remember, you are placing your bookmark based on the content you expect students to know and be able to do. You are *not* making your decision based on the number of items students must answer correctly. The bookmark is placed on a *page* in the Ordered Item Booklet. This page number corresponds to the difficulty ordering of the item, *not* to the raw score.

Should I place my bookmark in the first place in the Ordered Item Booklet where all the content standards have occurred?

Not necessarily. The test only samples the content domain. In some cases, some content standards will only be represented by difficult items that would be hard for most students to master.

How many bookmarks do I set?

You set one less bookmark than the number of performance levels. For New York State, you will set 3 bookmarks to separate students into 4 performance levels.

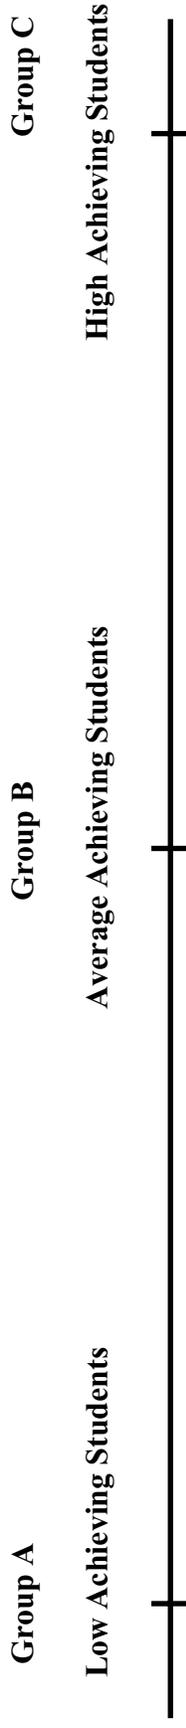

MASTERY

How Participants' Bookmark Judgments Relate to Expected Student Achievement within Each Performance Level

You are participating in this standard setting because of your experience with students and your knowledge of the state content standards, curriculum, and current instructional practices. You will be making judgments that will operationalize your expectations for the level of achievement students must demonstrate in order to place in each performance level. To understand how your judgments relate to expected student achievement within each performance level, consider the following examples.

Consider how students at various scale locations might perform on an imaginary assessment that consists of a total of 50 score points. In particular, we will consider the performance of groups of students who are at three specific points on the test scale. Group A consists of 100 low achieving students, Group B consists of 100 average achieving students, and Group C consists of 100 high achieving students. Assume that the students have all taken the assessment and that the 100 students within each group have all obtained the exact same scale score. Note the location of the obtained scale score for each of the three groups on the test scale below.

Test Scale

The following three figures show how students in each of the three groups might perform on the assessment.

Figure A shows how many students in Group A responded correctly to each item in the ordered item booklet. Observe that the students in Group A performed well on the items that appear early in the ordered item booklet but performed poorly on the items that appear later in the ordered item booklet. This makes sense, because the items appear in order of difficulty, with the easiest item first and the hardest item last. For example, 99 of the 100 Group A students responded correctly to item 1, 67 of the Group A students responded correctly to item 10, but only 1 of the Group A students responded correctly to item 50.

We say that a group of like students have demonstrated mastery of the content represented by an item if at least $\frac{2}{3}$ of the students (about 67 out of 100) in the group can be expected to respond successfully to the item. According to Figure A, Group A students have demonstrated mastery of items 1 through 10, but have not demonstrated mastery of items 11 through 50.

Figure A. The number (or percent) of Group A students who responded correctly to each item in the ordered item booklet.

item	item	item	item	item	item	item	item	item	item	item

Definition of Mastery

We say that a group of like students have demonstrated mastery of the content represented by an item if at least 2/3 (67/100) of the students in the group can be expected to respond successfully to the item.

Figure B shows how many students in Group B responded correctly to each item in the ordered item booklet. Observe that the students in Group B performed much better than students in Group A. That makes sense because Group B students are average achieving students while Group A students are low achieving students.

Before you read further, use Figure B and the definition of mastery stated in the box above to determine which items Group B has mastered.

Group B students have demonstrated mastery of the content reflected in items 1 through 30 of the ordered item booklet, but have not demonstrated mastery of the content reflected by items 31 through 50. This is true according to the definition, because at least 67 of the 100 Group B students responded successfully to each of items 1 through 30, but fewer than 67 of them responded correctly to items 31 through 50.

Figure B. The number (or percent) of Group B students who responded correctly to each item in the ordered item booklet.

Definition of Mastery

We say that a group of like students have demonstrated mastery of the content represented by an item if at least 2/3 (67/100) of the students in the group can be expected to respond successfully to the item.

Figure C shows how many students in Group C responded correctly to each item in the ordered item booklet. Observe that Group C performed much better than Groups A or B. That makes sense because Group C consists of high achieving students while Groups A and B consist of low and average achieving students, respectively.

Before you read further, use Figure C and the definition of mastery stated in the box above to determine which items Group C has mastered. Group C students have demonstrated mastery of the content reflected in items 1 through 45 of the ordered item booklet, but have not demonstrated mastery of the content reflected by items 46 through 50. This is true according to the definition, because at least 67 of the 100 Group C students responded successfully to each of items 1 through 45, but fewer than 67 of them responded correctly to items 46 through 50.

Figure C. The number (or percent) of Group C students who responded correctly to each item in the ordered item booklet.

| item |

| item |
|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|
| 31 | 32 | 33 | 34 | 35 | 36 | 37 | 38 | 39 | 40 | 41 | 42 | 43 | 44 | 45 | 46 | 47 | 48 | 49 | 50 |
| <u>83</u> | <u>81</u> | <u>81</u> | <u>81</u> | <u>80</u> | <u>80</u> | <u>79</u> | <u>78</u> | <u>77</u> | <u>75</u> | <u>74</u> | <u>72</u> | <u>70</u> | <u>68</u> | <u>67</u> | <u>64</u> | <u>58</u> | <u>53</u> | <u>49</u> | <u>46</u> |
| 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 | 100 |

You have seen from the above examples that by using a specific definition of mastery, we can identify the content in the ordered item booklet that students at any location of the test scale have mastered.

Also, if *you* identify a set of items in the ordered item booklet, the specific point on the test scale at which students have demonstrated mastery of the content you have specified can be determined. This is how the various cut scores are ascertained.

As experts, you will first specify the content in the ordered item booklet that you expect students to master in order to be classified as *Meeting*. This means that you will identify the items that reflect the knowledge, skills, and abilities you expect all *Meeting* students to master. When you have made that judgment, the point on the scale at which students achieve that level of mastery can be identified.

SAMPLE Mathematics Item Map

SAMPLE

Standard Setting Workshop

**Grade 4
Mathematics**

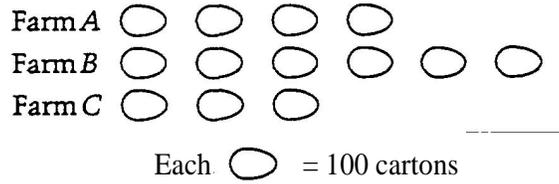

Ordered Item Booklet

**Publicly released items from the National Assessment of Educational
Progress 1996 State Assessment Program in Mathematics.**

**The Bookmark Standard Setting Procedure ©
Copyright 1999 by CTB/McGraw-Hill.**

1. Kitty is taking a trip on which she plans to drive 300 miles each day. Her trip is 1,723 miles long. She has already driven 849 miles. How much farther must she drive?
- Ⓐ 574 miles
 - Ⓑ 874 miles
 - Ⓒ 1,423 miles
 - Ⓓ 2,872 miles

CARTONS OF EGGS SOLD LAST MONTH

4. According to the graph, how many cartons of eggs were sold altogether by farms A, B, and C last month?
- Ⓐ 13
 - Ⓑ 130
 - Ⓒ 1,300
 - Ⓓ 13,000

3. N stands for the number of stamps John had. He gave 12 stamps to his sister. Which expression tells how many stamps John has now?

A $N+12$

B $N-12$

C $12- N$

D $12 \times N$

2. A whole number is multiplied by 5. Which of these could be the result?

A 652

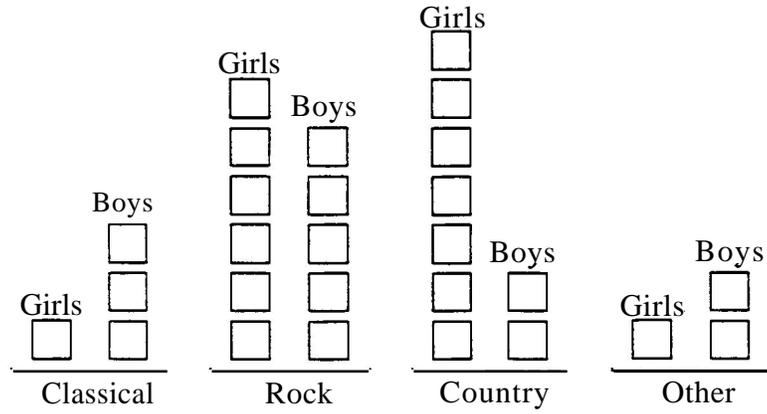

B 562

C 526

D 265

4. Each boy and girl in the class voted for his or her favorite kind of music. Here are the results.

☐ = 1 student

Which kind of music did most students in the class prefer?

- Ⓐ Classical
- Ⓑ Rock
- Ⓒ Country
- Ⓓ Other

7. Sam can purchase his lunch at school. Each day he wants to have juice that costs 50¢ , a sandwich that costs 90¢ , and fruit that costs 35¢ . His mother has only $\$1.00$ bills. What is the least number of $\$1.00$ bills that his mother should give him so he will have enough money to buy lunch for 5 days?

6 rubric

Item Number: 7 Accession Number: AP000522

Key: None

Classification Codes:

N25M 1 A 04 a PS RECM 02

Open Codes: NA NA NA 3

Rationale Text:

SOLUTION:

For one day the sum is \$1.75. For 5 days, the sum is \$8.75. Therefore he should ask his mother for nine one-dollar bills (or 1 \$5 bill and 4 \$1 bills)

Answer may be given pictorially.

Note: No explanation is asked for, so paper could have small error, such as copying a number incorrectly and still get a score of 2, provided method and answer are correct.

Scoring Guide:

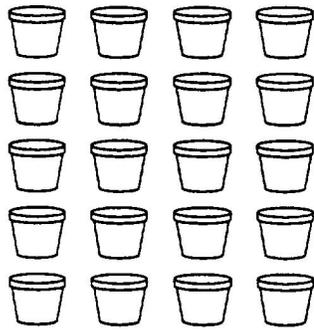

- 0 Incorrect response -- includes \$1.75 or \$2: also \$875 or \$875.00
- ① \$8.75 or 875
OR
One day is \$1.75 so he needs \$2 each day, so \$10 for a week
(picture of \$10 bill is acceptable)
OR
correct method but rounded down to \$8 (this requires work to be shown)
OR
correct method but small error and incorrect response of \$7 to \$11, inclusive
- 2 Correct response

6 exemplar

Student Sample Response

7. Sam can purchase his lunch at school. Each day he wants to have juice that costs 50¢, a sandwich that costs 90¢, and fruit that costs 35¢. His mother has only \$1.00 bills. What is the least number of \$1.00 bills that his mother should give him so he will have enough money to buy lunch for 5 days? $\$0.75$

Level:
Partial (1)

5. The picture shows the flowerpots in which Kevin will plant flower seeds. He needs 3 seeds for each pot. Which of the following number sentences shows how many seeds Kevin will need for all of the pots?

Ⓐ $5 \times 4 \times 3 = \square$

Ⓑ $(5 \times 4) + 3 = \square$

Ⓒ $(5 + 4) \times 3 = \square$

Ⓓ $5 + 4 + 3 = \square$

7. Sam can purchase his lunch at school. Each day he wants to have juice that costs 50¢ , a sandwich that costs 90¢ , and fruit that costs 35¢ . His mother has only $\$1.00$ bills. New York State 2006

Suppose the bookmarks were placed in this sample ordered item booklet as follows:

	<i>Partially Meeting</i> Bookmark on Page #	<i>Meeting</i> Bookmark on Page #	<i>Meeting with Distinction</i> Bookmark on Page #
Round 1	7	11	14

- Which items does a student need to master to just make it into the *Meeting* performance level?

1 to 6 1 to 7 1 to 10 1 to 11
- If a student mastered only items 1 through 5, in which performance level would this student be?

Not Meeting *Partially Meeting* *Meeting* *Meeting with Distinction*
- Suppose a student mastered items 1 through 10. Which performance level is this student in?

Not Meeting *Partially Meeting* *Meeting* *Meeting with Distinction*
- For students who are classified as *Meeting*, with at least what likelihood will they be able to answer item 10?

1/3 1/2 2/3 3/4
- Will the items BEFORE the *Meeting* bookmark be more or less difficult to answer than the items AFTER the bookmark or about the same?

More difficult to answer About the same Less difficult to answer

34. Have you taught Special Education?
 Yes
 No

35. Have you taught ESL/ELL?
 Yes
 No

36. Have you taught Vocational Education?
 Yes
 No

37. Have you taught Alternative Education?
 Yes
 No

38. Have you taught Adult Education?
 Yes
 No

39. Which grade did you work on during this standard setting?
 4
 6
 8

On the back of this evaluation, please add your comments. Thank you!

**New York State Mathematics
Bookmark Standard Setting July 2006
Evaluation Results**

About these results

Each question is shown, along with its answer choices and associated response percentages. For Likert-type questions, there are five possible responses: "Strongly Disagree," "Disagree," "Neutral," "Agree," and "Strongly Agree." For each question, the number of respondents is shown in the column labeled "N." Grade 4 participants also set standards for Grade 3, Grade 6 for Grade 5, and Grade 8 for Grade 7.

Question 1

During Round 1, I placed my bookmarks without consulting other participants.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	0.0%	2.6%	0.0%	21.8%	75.6%
	Grade 4	26	0.0%	0.0%	0.0%	30.8%	69.2%
	Grade 6	26	0.0%	3.8%	0.0%	19.2%	76.9%
	Grade 8	26	0.0%	3.8%	0.0%	15.4%	80.8%

Question 2

I am confident that the Bookmark Procedure produced valid standards.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	1.3%	1.3%	11.5%	62.8%	23.1%
	Grade 4	26	0.0%	0.0%	7.7%	76.9%	15.4%
	Grade 6	26	0.0%	0.0%	11.5%	53.8%	34.6%
	Grade 8	26	3.8%	3.8%	15.4%	57.7%	19.2%

Question 3

I considered the Content Standards when I placed my bookmarks.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	0.0%	0.0%	0.0%	28.2%	71.8%
	Grade 4	26	0.0%	0.0%	0.0%	30.8%	69.2%
	Grade 6	26	0.0%	0.0%	0.0%	30.8%	69.2%
	Grade 8	26	0.0%	0.0%	0.0%	23.1%	76.9%

Question 4

I felt that this procedure was fair.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	0.0%	1.3%	2.6%	44.9%	51.3%
	Grade 4	26	0.0%	0.0%	0.0%	50.0%	50.0%
	Grade 6	26	0.0%	0.0%	3.8%	50.0%	46.2%
	Grade 8	26	0.0%	3.8%	3.8%	34.6%	57.7%

Question 5

I had enough time to consider my Round 1 bookmarks.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	0.0%	0.0%	0.0%	11.5%	88.5%
	Grade 4	26	0.0%	0.0%	0.0%	11.5%	88.5%
	Grade 6	26	0.0%	0.0%	0.0%	15.4%	84.6%
	Grade 8	26	0.0%	0.0%	0.0%	7.7%	92.3%

Question 6

I learned how to do the Bookmark placement as I went along, so my later ones may not be comparable to my earlier ones.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		77	19.5%	37.7%	10.4%	22.1%	10.4%
	Grade 4	25	20.0%	24.0%	8.0%	36.0%	12.0%
	Grade 6	26	23.1%	53.8%	11.5%	11.5%	0.0%
	Grade 8	26	15.4%	34.6%	11.5%	19.2%	19.2%

Question 7

I understood how to place my bookmarks.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	0.0%	0.0%	0.0%	43.6%	56.4%
	Grade 4	26	0.0%	0.0%	0.0%	50.0%	50.0%
	Grade 6	26	0.0%	0.0%	0.0%	42.3%	57.7%
	Grade 8	26	0.0%	0.0%	0.0%	38.5%	61.5%

Question 8

Overall, I believe that my opinions were considered and valued by my group.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	0.0%	1.3%	1.3%	30.8%	66.7%
	Grade 4	26	0.0%	0.0%	0.0%	23.1%	76.9%
	Grade 6	26	0.0%	0.0%	0.0%	42.3%	57.7%
	Grade 8	26	0.0%	3.8%	3.8%	26.9%	65.4%

Question 9

Overall, I valued the conference as a professional development experience.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	0.0%	0.0%	0.0%	12.8%	87.2%
	Grade 4	26	0.0%	0.0%	0.0%	7.7%	92.3%
	Grade 6	26	0.0%	0.0%	0.0%	19.2%	80.8%
	Grade 8	26	0.0%	0.0%	0.0%	11.5%	88.5%

Question 10

Overall, I was satisfied with my group's final bookmarks.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		76	1.3%	1.3%	1.3%	46.1%	50.0%
	Grade 4	26	0.0%	0.0%	0.0%	38.5%	61.5%
	Grade 6	25	0.0%	0.0%	4.0%	48.0%	48.0%
	Grade 8	25	4.0%	4.0%	0.0%	52.0%	40.0%

Question 11

Overall, my table's discussions were open and honest.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	0.0%	0.0%	1.3%	15.4%	83.3%
	Grade 4	26	0.0%	0.0%	0.0%	15.4%	84.6%
	Grade 6	26	0.0%	0.0%	0.0%	15.4%	84.6%
	Grade 8	26	0.0%	0.0%	3.8%	15.4%	80.8%

Question 12

Participating in the Bookmark Standard Setting Procedure increased my understanding of the test.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		77	0.0%	1.3%	2.6%	13.0%	83.1%
	Grade 4	25	0.0%	0.0%	0.0%	12.0%	88.0%
	Grade 6	26	0.0%	3.8%	7.7%	15.4%	73.1%

	Grade 8	26	0.0%	0.0%	0.0%	11.5%	88.5%
--	---------	----	------	------	------	-------	-------

Question 13

Reviewing the Target Student helped me place my bookmarks.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	0.0%	0.0%	3.8%	48.7%	47.4%
	Grade 4	26	0.0%	0.0%	3.8%	53.8%	42.3%
	Grade 6	26	0.0%	0.0%	0.0%	53.8%	46.2%
	Grade 8	26	0.0%	0.0%	7.7%	38.5%	53.8%

Question 14

Taking the test helped me place my bookmarks.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	1.3%	9.0%	17.9%	35.9%	35.9%
	Grade 4	26	0.0%	7.7%	19.2%	42.3%	30.8%
	Grade 6	26	0.0%	11.5%	26.9%	19.2%	42.3%
	Grade 8	26	3.8%	7.7%	7.7%	46.2%	34.6%

Question 15

The Bookmark Standard Setting Procedure was well described.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	0.0%	0.0%	1.3%	42.3%	56.4%
	Grade 4	26	0.0%	0.0%	0.0%	34.6%	65.4%
	Grade 6	26	0.0%	0.0%	3.8%	46.2%	50.0%
	Grade 8	26	0.0%	0.0%	0.0%	46.2%	53.8%

Question 16

The conference was well organized.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	0.0%	0.0%	2.6%	26.9%	70.5%
	Grade 4	26	0.0%	0.0%	0.0%	19.2%	80.8%
	Grade 6	26	0.0%	0.0%	3.8%	26.9%	69.2%
	Grade 8	26	0.0%	0.0%	3.8%	34.6%	61.5%

Question 17

The goals for this procedure were clear.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		76	0.0%	0.0%	3.9%	46.1%	50.0%
	Grade 4	25	0.0%	0.0%	0.0%	48.0%	52.0%
	Grade 6	25	0.0%	0.0%	8.0%	48.0%	44.0%
	Grade 8	26	0.0%	0.0%	3.8%	42.3%	53.8%

Question 18

The ordering of items in the ordered item booklet agreed with my perception of the relative difficulty of the items.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		76	1.3%	27.6%	19.7%	43.4%	7.9%
	Grade 4	25	0.0%	36.0%	16.0%	40.0%	8.0%
	Grade 6	26	0.0%	11.5%	23.1%	57.7%	7.7%
	Grade 8	25	4.0%	36.0%	20.0%	32.0%	8.0%

Question 19

The training materials were helpful.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	0.0%	0.0%	5.1%	51.3%	43.6%
	Grade 4	26	0.0%	0.0%	0.0%	53.8%	46.2%
	Grade 6	26	0.0%	0.0%	3.8%	57.7%	38.5%
	Grade 8	26	0.0%	0.0%	11.5%	42.3%	46.2%

Question 20

The presentation of the impact data was helpful to me.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	1.3%	2.6%	23.1%	41.0%	32.1%
	Grade 4	26	3.8%	3.8%	19.2%	42.3%	30.8%
	Grade 6	26	0.0%	0.0%	19.2%	34.6%	46.2%
	Grade 8	26	0.0%	3.8%	30.8%	46.2%	19.2%

Question 21

The training on Bookmark placement made the task clear to me.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		77	0.0%	0.0%	1.3%	44.2%	54.5%
	Grade 4	25	0.0%	0.0%	4.0%	36.0%	60.0%
	Grade 6	26	0.0%	0.0%	0.0%	50.0%	50.0%
	Grade 8	26	0.0%	0.0%	0.0%	46.2%	53.8%

Question 22

This experience will help me target instruction for the students in my classroom.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		76	0.0%	2.6%	7.9%	27.6%	61.8%
	Grade 4	25	0.0%	0.0%	8.0%	24.0%	68.0%
	Grade 6	26	0.0%	3.8%	15.4%	26.9%	53.8%
	Grade 8	25	0.0%	4.0%	0.0%	32.0%	64.0%

Question 23

I would defend the Partially Meeting cut score against criticism that it is too high.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	1.3%	5.1%	6.4%	51.3%	35.9%
	Grade 4	26	0.0%	0.0%	11.5%	53.8%	34.6%
	Grade 6	26	0.0%	3.8%	3.8%	50.0%	42.3%
	Grade 8	26	3.8%	11.5%	3.8%	50.0%	30.8%

Question 24

I would defend the Partially Meeting cut score against criticism that it is too low.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	1.3%	6.4%	3.8%	52.6%	35.9%
	Grade 4	26	0.0%	3.8%	7.7%	53.8%	34.6%
	Grade 6	26	0.0%	11.5%	0.0%	50.0%	38.5%
	Grade 8	26	3.8%	3.8%	3.8%	53.8%	34.6%

Question 25

I would defend the Meeting cut score against criticism that it is too high.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		77	1.3%	3.9%	5.2%	53.2%	36.4%
	Grade 4	25	0.0%	0.0%	4.0%	52.0%	44.0%
	Grade 6	26	0.0%	3.8%	7.7%	50.0%	38.5%
	Grade 8	26	3.8%	7.7%	3.8%	57.7%	26.9%

Question 26

I would defend the Meeting cut score against criticism that it is too low.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	1.3%	5.1%	2.6%	53.8%	37.2%
	Grade 4	26	0.0%	3.8%	3.8%	53.8%	38.5%
	Grade 6	26	3.8%	7.7%	0.0%	50.0%	38.5%
	Grade 8	26	0.0%	3.8%	3.8%	57.7%	34.6%

Question 27

I would defend the Meeting with Distinction cut score against criticism that it is too high.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	2.6%	2.6%	7.7%	50.0%	37.2%
	Grade 4	26	0.0%	0.0%	3.8%	50.0%	46.2%
	Grade 6	26	0.0%	3.8%	11.5%	46.2%	38.5%
	Grade 8	26	7.7%	3.8%	7.7%	53.8%	26.9%

Question 28

I would defend the Meeting with Distinction cut score against criticism that it is too low.

Content Area	Grade Level	N	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Overall		78	0.0%	3.8%	7.7%	52.6%	35.9%
	Grade 4	26	0.0%	0.0%	7.7%	57.7%	34.6%
	Grade 6	26	0.0%	7.7%	7.7%	46.2%	38.5%
	Grade 8	26	0.0%	3.8%	7.7%	53.8%	34.6%

Question 29

What is your occupation?

Content Area	Grade Level	N	Teacher	Administrator	Other
Overall		78	78.2%	15.4%	6.4%
	Grade 4	26	88.5%	3.8%	7.7%
	Grade 6	26	84.6%	11.5%	3.8%
	Grade 8	26	61.5%	30.8%	7.7%

Question 30

How many years in your current position?

Content Area	Grade Level	N	1-5	6-10	11-15
Overall		78	15.4%	20.5%	19.2%
	Grade 4	26	7.7%	15.4%	30.8%
	Grade 6	26	19.2%	23.1%	11.5%
	Grade 8	26	19.2%	23.1%	15.4%

Content Area	Grade Level	N	16-20	21+
Overall		78	11.5%	33.3%
	Grade 4	26	7.7%	38.5%
	Grade 6	26	15.4%	30.8%
	Grade 8	26	11.5%	30.8%

Question 31

What is your educational level?

Content Area	Grade Level	N	Bachelor's	Master's	Doctorate
Overall		78	2.6%	96.2%	1.3%
	Grade 4	26	7.7%	92.3%	0.0%
	Grade 6	26	0.0%	100.0%	0.0%
	Grade 8	26	0.0%	96.2%	3.8%

Question 32

What is your gender?

Content Area	Grade Level	N	Male	Female
Overall		78	19.2%	80.8%
	Grade 4	26	19.2%	80.8%
	Grade 6	26	11.5%	88.5%
	Grade 8	26	26.9%	73.1%

Question 33

What is your racial/ethnic background?

Content Area	Grade Level	N	Asian/Pacific Islander	African American	American Indian
Overall		78	2.6%	10.3%	0.0%
	Grade 4	26	3.8%	7.7%	0.0%
	Grade 6	26	0.0%	11.5%	0.0%
	Grade 8	26	3.8%	11.5%	0.0%

Content Area	Grade Level	N	Hispanic	White	Other
Overall		78	3.8%	83.3%	0.0%
	Grade 4	26	7.7%	80.8%	0.0%
	Grade 6	26	0.0%	88.5%	0.0%
	Grade 8	26	3.8%	80.8%	0.0%

Question 34

Have you taught Special Education?

Content Area	Grade Level	N	Yes	No
Overall		78	65.4%	34.6%
	Grade 4	26	61.5%	38.5%
	Grade 6	26	42.3%	57.7%
	Grade 8	26	92.3%	7.7%

Question 35

Have you taught ESL/ELL?

Content Area	Grade Level	N	Yes	No
Overall		78	32.1%	67.9%
	Grade 4	26	38.5%	61.5%
	Grade 6	26	26.9%	73.1%
	Grade 8	26	30.8%	69.2%

Question 36

Have you taught Vocational Education?

Content Area	Grade Level	N	Yes	No
Overall		78	7.7%	92.3%
	Grade 4	26	7.7%	92.3%
	Grade 6	26	7.7%	92.3%
	Grade 8	26	7.7%	92.3%

Question 37

Have you taught Alternative Education?

Content Area	Grade Level	N	Yes	No
Overall		78	16.7%	83.3%
	Grade 4	26	15.4%	84.6%
	Grade 6	26	15.4%	84.6%
	Grade 8	26	19.2%	80.8%

Question 38

Have you taught Adult Education?

Content Area	Grade Level	N	Yes	No
Overall		78	33.3%	66.7%
	Grade 4	26	34.6%	65.4%
	Grade 6	26	19.2%	80.8%
	Grade 8	26	46.2%	53.8%

Question 39

Which grade did you work on during this standard setting?

Content Area	Grade Level	N	Grade 4	Grade 6
Overall		78	33.3%	33.3%
	Grade 4	26	100.0%	0.0%
	Grade 6	26	0.0%	100.0%
	Grade 8	26	0.0%	0.0%

Content Area	Grade Level	N	Grade 8
Overall		78	33.3%
	Grade 4	26	0.0%
	Grade 6	26	0.0%
	Grade 8	26	100.0%

Section K

Memoranda from Table Leaders on the Vertical Articulation Panel

Memoranda from Table Leaders on Vertical Articulation Panel

Grade 3: The grade 3/4 table leaders have agreed to move our *Meets* bookmark from question 45 to question 48. We feel that higher level *Partially Meets* students could handle the content from question 45 to 48.

Grade 4: The grade 3/4 table leaders have unanimously decided to move our *Meets with Distinction* bookmark from question 72 to question 77. Our rationale for the move is solely based on content. Through our discussion we felt that high achieving *Meeting* students could successfully answer questions 72-76.

We also noticed that all of those questions were field tested and not included on the operational test. Therefore, we made the move and we ALL feel comfortable with the change.

Grade 5: *Partially Meets* from 513 → 515. Our rationale for moving 513 to 515 under *Partially Meeting* was to increase the percentage of students not meeting standards more in line with 4th and 6th grade percentages.

Meets with Distinction from 577 → 580. We raised the standard to bring the percent more in line with the other grade levels for *Meets with Distinction*.

Grade 6: *Partially Meets* from 581 → 573. We lowered the percentage at *Does Not Meet* to be more in line with the other grade levels.

Grade 7: Location cut scores for the 7th grade were changed in the following manner.

- *Partially Meets* from 617 to 621. By raising it did not affect a jump that included another question.
- *Meets* from 653 was unchanged.
- *With Distinction* 681 to 683. Moved only one question and review the next three or four. We determined a student could make up point in one of these.

Grade 8:

- *Partially* 680 to 678. Affected only one question (#11) and did not impact location.
- *Meets* 702-707. Smooth between 6, 7, and 8. Increase number of student who would get AIS service and increase success rate on commencement testing requirement and h.s. graduation rate.
- *Distinction* 730-739. Incorporated leap of 3 question skills and concepts that a student of distinction should master i.e. proportional reasoning, addition questions beyond they could score make up points.
