

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	39	0	0

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	311	28	339	6765	22.2	7521	208

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	83	0	0

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

State Excluding N.Y.C.	2315	61	2376	46293	20.0	47526	1259
Total State	2426	352	2778	49322	21.1	58542	1655

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

State Excluding N.Y.C.	83	0	0
Total State	90	0	0

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.
