The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	8	0	0

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

State Excluding N.Y.C.	2	0	0
Total State	2	0	0

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	27	4	31	555	20.7	643	22

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	11	12	23	221	22.9	526	20

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

State Excluding N.Y.C.	17	2	19	262	15.4	293	11
Total State	17	2	19	262	15.4	293	11

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	43	0	43	671	15.6	671	25

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

Total State	8	13	21	114	16.1	338	18

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.

The New York City portion of the New York State data for 2003-2004 accurately reflects the full range of courses taught by individual teachers, but does not fully reflect the extent to which teachers may teach multiple sections of the same course at the same grade level. This data for 03-04 causes both the total number of classes and the total estimated registration to be under-counted for New York City and, consequently, for the State as a whole.
