

## Smart Schools Investment Plan - Revised - HPS-SSIP18

SSIP Overview

---

## Institution ID

800000049875

## 1. Please enter the name of the person to contact regarding this submission.

Dr. Ahunna M. Akoma

## 1a. Please enter their phone number for follow up questions.

5164344101

## 1b. Please enter their e-mail address for follow up contact.

aakoma@hempsteadschools.org

## 2. Please indicate below whether this is the first submission, a new or supplemental submission or an amended submission of an approved Smart Schools Investment Plan.

First submission

## 3. All New York State public school districts are required to complete and submit a District Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations. Districts that include investments in high-speed broadband or wireless connectivity and/or learning technology equipment or facilities as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.

By checking this box, you certify that the school district has an approved District Instructional Technology Plan survey on file with the New York State Education Department.

☒ District Educational Technology Plan Submitted to SED and Approved

## 4. Pursuant to the requirements of the Smart Schools Bond Act, the planning process must include consultation with parents, teachers, students, community members, other stakeholders and any nonpublic schools located in the district.

By checking the boxes below, you are certifying that you have engaged with those required stakeholders. Each box must be checked prior to submitting your Smart Schools Investment Plan.

- ☒ Parents
- ☒ Teachers
- ☒ Students
- ☒ Community members

## 5. Did your district contain nonpublic schools in 2014-15?

- ☒ Yes
- ☐ Yes, but they have all since closed, moved out of district or are declining use of SSBA funds
- ☐ No

## 6. Certify that the following required steps have taken place by checking the boxes below: Each box must be checked prior to submitting your Smart Schools Investment Plan.

- ☒ The district developed and the school board approved a preliminary Smart Schools Investment Plan.
- ☒ The preliminary plan was posted on the district website for at least 30 days. The district included an address to which any written comments on the plan should be sent.
- ☒ The school board conducted a hearing that enabled stakeholders to respond to the preliminary plan. This hearing may have occurred as part of a normal Board meeting, but adequate notice of the event must have been provided through local media and the district website for at least two weeks prior to the meeting.
- ☒ The district prepared a final plan for school board approval and such plan has been approved by the school board.
- ☒ The final proposed plan that has been submitted has been posted on the district's website.

## Smart Schools Investment Plan - Revised - HPS-SSIP18

## SSIP Overview

- 6a. Please upload the proposed Smart Schools Investment Plan (SSIP) that was posted on the district's website, along with any supporting materials. Note that this should be different than your recently submitted Educational Technology Survey. The Final SSIP, as approved by the School Board, should also be posted on the website and remain there during the course of the projects contained therein.

HUFSD Final Smart Schools Bond Act Investment Plan-BOE Approved.pdf

- 6b. Enter the webpage address where the final Smart Schools Investment Plan is posted. The Plan should remain posted for the life of the included projects.

www.hempsteadschools.org

7. Please enter an estimate of the total number of students and staff that will benefit from this Smart Schools Investment Plan based on the cumulative projects submitted to date.

7,424

8. An LEA/School District may partner with one or more other LEA/School Districts to form a consortium to pool Smart Schools Bond Act funds for a project that meets all other Smart School Bond Act requirements. Each school district participating in the consortium will need to file an approved Smart Schools Investment Plan for the project and submit a signed Memorandum of Understanding that sets forth the details of the consortium including the roles of each respective district.

☐ The district plans to participate in a consortium to partner with other school district(s) to implement a Smart Schools project.

9. Please enter the name and 6-digit SED Code for each LEA/School District participating in the Consortium.

Partner LEA/District	SED BEDS Code
(No Response)	(No Response)

10. Please upload a signed Memorandum of Understanding with all of the participating Consortium partners.

(No Response)

11. Your district's Smart Schools Bond Act Allocation is:

\$9,726,134

12. Final 2014-15 BEDS Enrollment to calculate Nonpublic Sharing Requirement

	Public Enrollment	Nonpublic Enrollment	Total Enrollment	Nonpublic Percentage
Enrollment	7,401	1,024	8,425.00	12.15

13. This table compares each category budget total, as entered in that category's page, to the total expenditures listed in the category's expenditure table. Any discrepancies between the two must be resolved before submission.

	Sub-Allocations	Expenditure Totals	Difference
School Connectivity	310,273.00	310,273.00	0.00
Connectivity Projects for Communities	0.00	0.00	0.00
Classroom Technology	1,844,550.00	1,844,550.00	0.00
Pre-Kindergarten Classrooms	0.00	0.00	0.00
Replace Transportable Classrooms	0.00	0.00	0.00
High-Tech Security Features	2,858,564.00	2,858,564.00	0.00
Nonpublic Loan	256,000.00	256,000.00	0.00
<b>Totals:</b>

## Smart Schools Investment Plan - Revised - HPS-SSIP18

## School Connectivity

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that:
- sufficient infrastructure that meets the Federal Communications Commission's 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or
  - is a planned use of a portion of Smart Schools Bond Act funds, or
  - is under development through another funding source.

Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

1. Specifically codified in a service contract with a provider, and
2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

The District recently increased its Internet bandwidth from 300 Mb/ps to 800 Mb/ps to meet increasing demand for online learning tools.

- 1a. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.

☐ By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2. **Connectivity Speed Calculator (Required).** If the district currently meets the required speed, enter "Currently Met" in the last box: Expected Date When Required Speed Will be Met.

	Number of Students	Required Speed in Mbps	Current Speed in Mbps	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	7,424	742.40	800	1000	Met

3. **Describe how you intend to use Smart Schools Bond Act funds for high-speed broadband and/or wireless connectivity projects in school buildings.**

We started upgrading all switches to 10-G Cisco switches, and cabling and installing wireless access points in every classroom to increase WiFi connectivity and speed of internal connections. This project has been completed in six of ten schools and these schools are now ready for 10-G network, with wireless access points in every classroom. The SFP Modules/fiber transceivers included in this School Connectivity section of Smart Schools Investment Plan allow for 10-G connections between data centers and switch closets, twelve additional Cisco switches to replace older models not included in the current project and increase capacity for expansion, additional access points to increase wireless coverage.

**Smart Schools Investment Plan - Revised - HPS-SSIP18****School Connectivity**

4. **Describe the linkage between the district's District Instructional Technology Plan and how the proposed projects will improve teaching and learning. (There should be a link between your response to this question and your responses to Question 1 in Section IV - NYSED Initiatives Alignment: "Explain how the district use of instructional technology will serve as a part of a comprehensive and sustained effort to support rigorous academic standards attainment and performance improvement for students.")**

**Your answer should also align with your answers to the questions in Section II - Strategic Technology Planning and the associated Action Steps in Section III - Action Plan.)**

The proposed technology projects will improve teaching and learning by helping the District in the realization of the mission, vision and goals outlined in our multi-year District Technology Plan. The projects will help the District to provide a technologically enhanced learning environment that enables students to acquire life-long skills. The goals include: 1. Upgrading the network infrastructure to support curricula and online learning for all students in a safe environment; 2. Providing instructional technology learning tools, both devices and software/apps that support teaching and learning for all students. 3. Providing professional development to all teachers and staff on methodologies that will support student creativity, critical thinking, collaboration and intellectual engagement.

The District is committed to provide the tools and access to resources that will empower all students (general education, students with disabilities, and students of English as a new language) as well as help teachers do their jobs efficiently in delivering curricula using new methodologies that focus more on student-centered and active learning environments. Our learning environment includes new infrastructure upgrades (Wi-Fi upgrade, increase of Internet bandwidth, upgrade to 10-GB switches with optics, security system upgrades for safety), newly deployed devices (iPads, Windows tablets, desktops, interactive whiteboards, and more), and ongoing professional development for teachers and staff. The District's ENL teachers were provided class sets of tablets to engage students in online tools for English language acquisition. iPads in carts were acquired for special education to engage students in assistive technology applications. We are engaged in a continuous improvement cycle that will include upgrading Cisco phone systems with safety features, expansion of classroom technologies and automation of administrative procedures for efficient management of educational processes, all in support of student learning.

With new tools provided to students and teachers, and training on new methodologies for active and personalized learning, and upcoming initiative to integrate technology into every curricula area, the District will realize the objective of using technology to support rigorous academic standards attainment and performance improvement for all students.

5. **If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.**

**Please describe how you have quantified this demand and how you plan to meet this demand.**

We recently upgraded our bandwidth to 800 Mb/ps. This adequately meets the State's requirement of 100 Mb/ps for every 1,000 students. Our student population is 7,424, which leaves some bandwidth for staff. It is our plan to increase the Internet bandwidth to 1,000 within the next 12 months using local and E-rate funds. This will help support additional devices we will be adding to our network using our Smart Schools Bond Act funds.

6. **Smart Schools plans with any expenditures in the School Connectivity category require a project number from the Office of Facilities Planning. Districts must submit an SSBA LOI and receive project numbers prior to submitting the SSIP. As indicated on the LOI, some projects may be eligible for a streamlined review and will not require a building permit.**

**Please indicate on a separate row each project number given to you by the Office of Facilities Planning.**

Project Number
28-02-01-03-7-999-BA1

## Smart Schools Investment Plan - Revised - HPS-SSIP18

## School Connectivity

7. Certain high-tech security and connectivity infrastructure projects may be eligible for an expedited review process as determined by the Office of Facilities Planning.

Was your project deemed eligible for streamlined review?

Yes

- 7a. Districts that choose the Streamlined Review Process will be required to certify that they have reviewed all installations with their licensed architect or engineer of record and provide that person's name and license number. The licensed professional must review the products and proposed method of installation prior to implementation and review the work during and after completion in order to affirm that the work was code-compliant, if requested.

☒ I certify that I have reviewed all installations with a licensed architect or engineer of record.

8. Include the name and license number of the architect or engineer of record.

Name	License Number
Frederick W. Seeba, P.E., LEED AP, BBS Architects	68018

9. Public Expenditures – Loanable (Counts toward the nonpublic loan calculation)

Select the allowable expenditure type. Repeat to add another item under each type.	<b>PUBLIC</b> Items to be Purchased	Quantity	Cost Per Item	Total Cost
Network/Access Costs	Wireless Access Points (Aruba)	15	1,079.00	16,185.00
Internal Components and Connections	10-G Fiber Optic Transceivers	30	900.00	27,000.00
Network/Access Costs	Cisco 10 G Switches (24-Port)	2	6,000.00	12,000.00
Internal Components and Connections	10-G TwinX Cables (Integrated Electronics Fiber Cables)	50	200.00	10,000.00
Network/Access Costs	Cisco Access Switches (Full PoE)	10	4,000.00	40,000.00
		<b>107</b>	<b>12,179.00</b>	<b>105,185</b>

10. Public Expenditures – Non-Loanable (Does not count toward nonpublic loan calculation)

Select the allowable expenditure type. Repeat to add another item under each type.	<b>PUBLIC</b> Items to be purchased	Quantity	Cost per Item	Total Cost
Connections/Components	Setup and Installation of Network Devices & Transceivers	120	125.00	15,000.00

## Smart Schools Investment Plan - Revised - HPS-SSIP18

## Community Connectivity (Broadband and Wireless)

1. Describe how you intend to use Smart Schools Bond Act funds for high-speed broadband and/or wireless connectivity projects in the community.

(No Response)

2. Please describe how the proposed project(s) will promote student achievement and increase student and/or staff access to the Internet in a manner that enhances student learning and/or instruction outside of the school day and/or school building.

(No Response)

3. Community connectivity projects must comply with all the necessary local building codes and regulations (building and related permits are not required prior to plan submission).

☐ I certify that we will comply with all the necessary local building codes and regulations.

4. Please describe the physical location of the proposed investment.

(No Response)

5. Please provide the initial list of partners participating in the Community Connectivity Broadband Project, along with their Federal Tax Identification (Employer Identification) number.

Project Partners	Federal ID #
(No Response)	(No Response)

6. Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.

Select the allowable expenditure type. Repeat to add another item under each type.	Item to be purchased	Quantity	Cost per Item	Total Cost
(No Response)	(No Response)	(No Response)	(No Response)	0.00
		0	0.00	0

7. If you are submitting an allocation for Community Connectivity, complete this table.

Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Network/Access Costs	0.00
Outside Plant Costs	0.00
Tower Costs	0.00
Customer Premises Equipment	0.00
Professional Services	0.00
Testing	0.00
Other Upfront Costs	0.00
Other Costs	0.00
<b>Totals:</b>	<b>0.00</b>

## Smart Schools Investment Plan - Revised - HPS-SSIP18

## Classroom Learning Technology

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that sufficient infrastructure that meets the Federal Communications Commission's 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or is a planned use of a portion of Smart Schools Bond Act funds, or is under development through another funding source. Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

1. Specifically codified in a service contract with a provider, and
2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

The District obtains its Internet services through a BOCES consortium and E-Rate funding discounts. We are connected to the Nassau County BOCES Wide Area Network, a 10-G fiber network and 800 Mb/ps Internet services. We are adding laptop carts to increase access to online learning and assessment tools in the classrooms.

Our current speed of 800 mb/ps exceeds the NYS requirement of 742 Mb/ps. In the next 12 months, we plan to increase the Internet bandwidth to 1000 Mb/ps to accommodate expected increase in usage as we provide more digital tools to the schools.

- 1a. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.

☐ By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2. **Connectivity Speed Calculator (Required).** If the district currently meets the required speed, enter "Currently Met" in the last box: Expected Date When Required Speed Will be Met.

	Number of Students	Required Speed in Mbps	Current Speed in Mbps	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	7,424	742.40	800	1000	Met

3. If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.

Please describe how you have quantified this demand and how you plan to meet this demand.

We currently have 7,424 students. We increased the Internet Bandwidth to 800 Mb/ps. This bandwidth is currently adequate the population. However, it is our goal to increase the bandwidth to 1000 Mb/ps during the next E-Rate application cycle since we will be adding hundreds of more laptops in the schools in order to increase students' access to online learning and assessment tools.

4. All New York State public school districts are required to complete and submit an Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations.

Districts that include educational technology purchases as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.

☒ By checking this box, you are certifying that the school district has an approved Instructional Technology Plan survey on file with the New York State Education Department.

**Smart Schools Investment Plan - Revised - HPS-SSIP18****Classroom Learning Technology**

---

- 5. Describe the devices you intend to purchase and their compatibility with existing or planned platforms or systems. Specifically address the adequacy of each facility's electrical, HVAC and other infrastructure necessary to install and support the operation of the planned technology.**

The proposed purchases include the following:

Interactive White Boards (Promethean) with stands or mounting kits, storage and charging carts for laptops and ipads, laptops (PCs/Mac based), and printers.

We recently upgraded our WiFi infrastructure and wired every classrooms with four additional network drops, one for wireless access point, and three extra network drops for the phone and computers. We also upgraded the switches and working with our Facilities Dept. to upgrade the HVAC system in all data closets. Prior to this WiFi upgrade, it would have been impossible to add laptop carts and other Wi-Fi dependent devices in our learning environment because of inadequate wireless coverage. We've deployed iPad and laptop carts in the schools.

The devices we intend to purchase with our SSBA funds in the Classroom Learning Technology Category will be compatible with existing platforms and upgraded systems, along with adequate network drops and Wi-Fi coverage for effective utilization of resources.

- 6. Describe how the proposed technology purchases will:**

- > **enhance differentiated instruction;**
- > **expand student learning inside and outside the classroom;**
- > **benefit students with disabilities and English language learners; and**
- > **contribute to the reduction of other learning gaps that have been identified within the district.**

**The expectation is that districts will place a priority on addressing the needs of students who struggle to succeed in a rigorous curriculum. Responses in this section should specifically address this concern and align with the district's Instructional Technology Plan (in particular Question 2 of E. Curriculum and Instruction: "Does the district's instructional technology plan address the needs of students with disabilities to ensure equitable access to instruction, materials and assessments?" and Question 3 of the same section: "Does the district's instructional technology plan address the provision of assistive technology specifically for students with disabilities to ensure access to and participation in the general curriculum?")**

**In addition, describe how the district ensures equitable access to instruction, materials and assessments and participation in the general curriculum for both SWD and English Language Learners/Multilingual Learners (ELL/MLL) students.**

We are planning to purchase interactive whiteboards to replace 10-year old units in the schools which have reached their end of life. Laptop carts/devices and online tools will increase access to technology in the classrooms so that the teachers can differentiate instruction, and all students can be intellectually engaged in research and other problem-solving projects as appropriate. ENL learners will have access to learning materials and students with disabilities will engage in assistive technology activities. With online learning and assessment tools, teachers will have access to data to inform instruction. The District bought iPads and assistive technology tools for students with disabilities to use with their instructional software as recommended through the IEPs.

Students with disabilities in the District are provided both hardware and software resources as prescribed in IEPs. Classified students receive every technology resource that the District provides to general education students, as well as additional assistive technology tools provided through IDEA and other funding sources. The District uses technology-based diagnostic tools to assess and gather baseline and progress-monitoring data for every student. These tools include Right Reason Technologies, Mastery Connect, NWEA, AimsWeb, iReady, RAZ Kids, GoMath, Science Dimensions, and more. The students with disabilities receive additional support and instructional programming. Some of the programs used by SWDs included Castle Learning, System44, Read 180, IEP prescribed iPad applications, TouchChat, Dragon Speaking, and more. Teachers of SWDs use iPad apps and Microsoft reading tools to provide additional assistance in acquisition of foundational reading skills as fluency, accuracy and rate. Microsoft provides the Immersive Reader which reads aloud documents and web content to students. Many of these tools are adaptive, responding to the learner's answers and helps teachers to differentiate instruction by reducing the amount of time it takes to obtain student performance data and allowing more time to assist students in closing learning gaps. The systems enable students to learn at their own paces, without judgment, and to experience success.

Depending on the need, students are assigned their own personal iPads to take home. There are many programs in the District that support students with disabilities with academic and social-emotional skills attainment. Related services providers, speech and language therapists and occupational therapists incorporate apps to support the therapy process and track progress toward reaching the goals of students educational plans.

ELLs are also provided additional technology resources to help close learning gaps and expand opportunities for language acquisition. Tablets are provided to support writers in the classroom, Microsoft Immersive Reader and other literacy tools are utilized to help students improve their English literacy skills. Teachers use these tools to differentiate instruction based on students' needs and achievement levels. Interactive technologies are used in the classroom by teachers to engage all students based on their learning styles and needs. Online communication and collaboration tools, such as Microsoft Office 365 Teams, are being utilized by students and teachers to improve student academic experiences in the classroom and beyond.

## Smart Schools Investment Plan - Revised - HPS-SSIP18

## Classroom Learning Technology

7. Where appropriate, describe how the proposed technology purchases will enhance ongoing communication with parents and other stakeholders and help the district facilitate technology-based regional partnerships, including distance learning and other efforts.

Increased access to technology resources to students will enhance communications with parents and stakeholders. Students and teachers are collaborating using PowerSchool Unified Classroom, Office 365 collaboration tools and other online learning resources. This year, we have provided our students with user accounts and Office 365 productivity and communications tools. Parents and students now have access to the student/parent portal of both our SIS and Office 365 collaboration tools. Even though local funds are used to fund the communications and collaboration tools, the classroom devices and personalized student access to resources will enable parent and stakeholder involvement in learning. Parents can log in online and view students' work, update contact information, and more. Teachers share information with students and parents in a secured space.

8. Describe the district's plan to provide professional development to ensure that administrators, teachers and staff can employ the technology purchased to enhance instruction successfully.

**Note: This response should be aligned and expanded upon in accordance with your district's response to Question 1 of F. Professional Development of your Instructional Technology Plan: "Please provide a summary of professional development offered to teachers and staff, for the time period covered by this plan, to support technology to enhance teaching and learning. Please include topics, audience and method of delivery within your summary."**

The District provides training to teachers through vendors, BOCES, software experts, and District's turnkey trainers and professional development specialist on various using technology tools to deliver instruction, assessment of learning, communication and collaboration. The District upgraded its PowerSchool to Unified classroom and provided training to teachers both in both small and large group settings. Teachers and staff also received training on Office 365, online learning tools such as iReady, ThinkCentral math and ELA, Learning/Reading A-Z, online formative assessment tools, assistive technology tools, System 44, and more. These trainings are ongoing throughout the year. We also use BOCES Model Schools' training and other trainers to deliver training. Recently, we started piloting the new Promethean flat panels in several classrooms in each school and provided training through the vendor. Professional development is an integral part of all new hardware and software deployments.

9. Districts must contact one of the SUNY/CUNY teacher preparation programs listed on the document on the left side of the page that supplies the largest number of the district's new teachers to request advice on innovative uses and best practices at the intersection of pedagogy and educational technology.

☒ By checking this box, you certify that you have contacted the SUNY/CUNY teacher preparation program that supplies the largest number of your new teachers to request advice on these issues.

- 9a. Please enter the name of the SUNY or CUNY Institution that you contacted.

Old Westbury SUNY

- 9b. Enter the primary Institution phone number.

516-334-2537

- 9c. Enter the name of the contact person with whom you consulted and/or will be collaborating with on innovative uses of technology and best practices.

Vince Juba

10. To ensure the sustainability of technology purchases made with Smart Schools funds, districts must demonstrate a long-term plan to maintain and replace technology purchases supported by Smart Schools Bond Act funds. This sustainability plan shall demonstrate a district's capacity to support recurring costs of use that are ineligible for Smart Schools Bond Act funding such as device maintenance, technical support, Internet and wireless fees, maintenance of hotspots, staff professional development, building maintenance and the replacement of incidental items. Further, such a sustainability plan shall include a long-term plan for the replacement of purchased devices and equipment at the end of their useful life with other funding sources.

☒ By checking this box, you certify that the district has a sustainability plan as described above.

## Smart Schools Investment Plan - Revised - HPS-SSIP18

## Classroom Learning Technology

11. Districts must ensure that devices purchased with Smart Schools Bond funds will be distributed, prepared for use, maintained and supported appropriately. Districts must maintain detailed device inventories in accordance with generally accepted accounting principles.

☒ By checking this box, you certify that the district has a distribution and inventory management plan and system in place.

12. Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.

Select the allowable expenditure type. Repeat to add another item under each type.	Item to be Purchased	Quantity	Cost per Item	Total Cost

## Smart Schools Investment Plan - Revised - HPS-SSIP18

## Pre-Kindergarten Classrooms

1. Provide information regarding how and where the district is currently serving pre-kindergarten students and justify the need for additional space with enrollment projections over 3 years.

(No Response)

2. Describe the district's plan to construct, enhance or modernize education facilities to accommodate pre-kindergarten programs. Such plans must include:

- Specific descriptions of what the district intends to do to each space;
- An affirmation that new pre-kindergarten classrooms will contain a minimum of 900 square feet per classroom;
- The number of classrooms involved;
- The approximate construction costs per classroom; and
- Confirmation that the space is district-owned or has a long-term lease that exceeds the probable useful life of the improvements.

(No Response)

3. Smart Schools Bond Act funds may only be used for capital construction costs. Describe the type and amount of additional funds that will be required to support ineligible ongoing costs (e.g. instruction, supplies) associated with any additional pre-kindergarten classrooms that the district plans to add.

(No Response)

4. All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number
(No Response)

5. Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.

Select the allowable expenditure type. Repeat to add another item under each type.	Item to be purchased	Quantity	Cost per Item	Total Cost
(No Response)	(No Response)	(No Response)	(No Response)	0.00
		0	0.00	0

6. If you have made an allocation for Pre-Kindergarten Classrooms, complete this table.  
Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Construct Pre-K Classrooms	0.00
Enhance/Modernize Educational Facilities	0.00
Other Costs	0.00
<b>Totals:</b>	<b>0.00</b>

## Smart Schools Investment Plan - Revised - HPS-SSIP18

## Replace Transportable Classrooms

1. Describe the district's plan to construct, enhance or modernize education facilities to provide high-quality instructional space by replacing transportable classrooms.

(No Response)

2. All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number
(No Response)

3. For large projects that seek to blend Smart Schools Bond Act dollars with other funds, please note that Smart Schools Bond Act funds can be allocated on a pro rata basis depending on the number of new classrooms built that directly replace transportable classroom units.

If a district seeks to blend Smart Schools Bond Act dollars with other funds describe below what other funds are being used and what portion of the money will be Smart Schools Bond Act funds.

(No Response)

4. Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.

Select the allowable expenditure type. Repeat to add another item under each type.	Item to be purchased	Quantity	Cost per Item	Total Cost
(No Response)	(No Response)	(No Response)	(No Response)	0.00
		0	0.00	0

5. If you have made an allocation for Replace Transportable Classrooms, complete this table.  
Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Construct New Instructional Space	0.00
Enhance/Modernize Existing Instructional Space	0.00
Other Costs	0.00
<b>Totals:</b>	<b>0.00</b>

## Smart Schools Investment Plan - Revised - HPS-SSIP18

## High-Tech Security Features

**1. Describe how you intend to use Smart Schools Bond Act funds to install high-tech security features in school buildings and on school campuses.**

The funds allocated for high tech security improvements will be used to implement projects that will improve student and staff safety. We will upgrade our phone communication systems and to continue the security camera infrastructure improvement. Our communications servers will be upgraded with safety features that will integrate with PA and phone systems for emergency calls/paging, lockdown alerts, paging alerts, and notifications. The current Cisco VOIP server has reached its end-of-life and needs to be replaced. Teachers' classroom phones need safety and 911 features. In collaboration with the Nassau BOCES and Hempstead Police Dept., the District conducted a recent 911 test call from all the schools, which yielded errors. The buildings showed wrong phone number and address to the police 911 call recipient. With the help of our BOCES and vendors, these errors were corrected, and a follow-up 911 test call yielded positive results. It is critical that the District's phones work correctly during emergency calls. The current VOIP call manager server was already antiquated and no longer in production when it was installed. We will upgrade the entire communications system to provide reliable phones with safety features and enable staff members to make announcement and emergency lockdowns from any phone in any room, with alerts to administrators displaying where the source of the calls and alert law enforcement.

In addition, we will continue to upgrade the security camera and access control systems. District has security cameras that are over ten years old, already obsolete and at end of life. Many cameras have been broken for years and are not covered under any support or maintenance agreement. There are also disparate security systems by different vendors based on the preference of the tech leaders through the years. Supporting obsolete systems have been impossible when there are no continuity plans or information for continuous maintenance. The District, in response to safety concerns, used District funds to contract with Nassau BOCES and its vendor to implement Phase I of security infrastructure upgrade to rebuild the security infrastructure and replace security servers, switches, standardize to one camera management software in all the schools, and replace some of existing cameras in critical areas. Using the SSBA funds for Phase II, the District will replace all remaining cameras not replaced in Phase I and to add other security features such as PA system mass notification, door monitoring and access controls, emergency notification lockdown, visitor management, intercom upgrade, and an additional X-Ray machine for the high school. Our intent is to provide a safe environment for students, staff and the school community by upgrading to high definition cameras in our buildings and to provide door access cards/fobs to all staff for entry into the buildings and key areas.

**2. All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Smart Schools plans with any expenditures in the High-Tech Security category require a project number from the Office of Facilities Planning. Districts must submit an SSBA LOI and receive project numbers prior to submitting the SSIP. As indicated on the LOI, some projects may be eligible for a streamlined review and will not require a building permit. Please indicate on a separate row each project number given to you by the Office of Facilities Planning.**

Project Number
28-02-01-03-7-999-BA1

**3. Was your project deemed eligible for streamlined Review?**

- ☒ Yes  
☐ No

**3a. Districts with streamlined projects must certify that they have reviewed all installations with their licensed architect or engineer of record, and provide that person's name and license number. The licensed professional must review the products and proposed method of installation prior to implementation and review the work during and after completion in order to affirm that the work was code-compliant, if requested.**

☒ By checking this box, you certify that the district has reviewed all installations with a licensed architect or engineer of record.

**4. Include the name and license number of the architect or engineer of record.**

Name	License Number
Frederick W. Seeba, P.E., LEED AP, BBS Architects	68018

**5. Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.**

6. If you have made an allocation for High-Tech Security Features, complete this table.  
Enter each Sub-category Public Allocation based on the the expenditures listed in Table #5.

	Sub-Allocation
Capital-Intensive Security Project (Standard Review)	(No Response)
Electronic Security System	2,104,489.00
Entry Control System	754,075.00
Approved Door Hardening Project	0.00
Other Costs	0.00
<b>Totals:</b>	<b>2,858,564.00</b>

## Smart Schools Investment Plan - Revised - HPS-SSIP18

## Non-Public Schools

1. Describe your plan to utilize SSBA funds to purchase devices and loan to the nonpublic schools within your district. Please specify what devices have been requested by the nonpublic schools. If the nonpublic schools have not finalized requests, the district should provide the date nonpublic schools will submit the request by.

Our SSBA plan includes acquisition of classroom learning technologies that will help provide a technologically enhanced learning environment to all students in both our public and non-public schools. During the planning process, we met with the non-public schools' representatives and based on their funding allocation, they requested the following classroom technology items: Interactive whiteboards, desktop computers, laptops (both Windows based and Macbooks), iPad devices, printers, and other peripheral devices such as Elmo presenters, Epson projectors, mounting kits, speakers, and connectors.

2. A final Smart Schools Investment Plan cannot be approved until school authorities have adopted regulations specifying the date by which requests from nonpublic schools for the purchase and loan of Smart Schools Bond Act classroom technology must be received by the district.

☒ By checking this box, you certify that you have such a plan and associated regulations in place that have been made public.

- 2a. Please enter the date each year nonpublic schools must request loanable items from the school district. This date cannot be earlier than June 1 of the previous school year.

July 31

3. Final 2014-15 BEDS Enrollment to calculate Nonpublic Sharing Requirement (no changes allowed.)

	Public Enrollment	Nonpublic Enrollment	Total Enrollment	Nonpublic Percentage
Enrollment	7,401	1,024	8,425.00	12.15

4. Nonpublic Loan Calculator

	Loanable School Connectivity	Loanable Classroom Technology	Additional Nonpublic Loan (Optional)	Estimated Per Pupil Amount - This Plan	Previously Approved Per Pupil Amount(s)	Cumulative Per Pupil Loan Amount	Final Per Pupil Loan Amount - This Plan	Final Total Loan Amount - This Plan
Required Nonpublic Loan	118,995.78	2,086,739.22		250.00	0.00	250.00	250.00	256,000.00
Final Adjusted Loan - (If additional loan funds)	118,995.78	2,086,739.22	(No Response)	250.00	0.00	250.00	250.00	256,000.00

5. Nonpublic Share

	Final Per Pupil Amount	Final Nonpublic Loan Amount
Pending and Previously Approved Plans	0.00	0.00
This Plan	250.00	256,000.00
Total	250.00	256,000.00

6. Distribution of Nonpublic Loan Amount by School

Nonpublic School Name	2018-19 K-12 Enrollment	Special Ed School? If Yes, not eligible
CRESCENT SCHOOL	196	No
SACRED HEART ACADEMY	872	No

7. Please detail the type, quantity and per unit cost of the eligible items under each sub-category.
