1b.	Please enter their e-mail address for follow up contact.
	lori.mulford@sufsdny.org
Ple	ease indicate below whether this is the first submission, a new submission or an amended submission of a
	nart Schools Investment Plan.
	First submission
Pla pe wii Pla Ed By	New York State public school districts are required to complete and submit a District Instructional Technology on survey to the New York State Education Department in compliance with Section 753 of the Education Law and report 100.12 of the Commissioner's Regulations. Districts that include investments in high-speed broadband or reless connectivity and/or learning technology equipment or facilities as part of their Smart Schools Investment on must have a submitted and approved Instructional Technology Plan survey on file with the New York State ucation Department. Checking this box, you certify that the school district has an approved District Instructional Technology Plan
Su	rvey on file with the New York State Education Department. District Educational Technology Plan Submitted to SED and Approved
pa dis By	rsuant to the requirements of the Smart Schools Bond Act, the planning process must include consultation with rents, teachers, students, community members, other stakeholders and any nonpublic schools located in the strict. checking the boxes below, you are certifying that you have engaged with those required stakeholders. Each x must be checked prior to submitting your Smart Schools Investment Plan. Parents Teachers Students Community members
4a.	If your district contains non-public schools, have you provided a timely opportunity for consultation with these stakeholders?
	 ✓ Yes □ No □ N/A
Се	rtify that the following required steps have taken place by checking the boxes below: Each box must be checked
pri	or to submitting your Smart Schools Investment Plan.
9	The district developed and the school board approved a preliminary Smart Schools Investment Plan. The preliminary plan was posted on the district website for at least 30 days. The district included an address to which any written comments on the plan should be sent.
☑	The school board conducted a hearing that enabled stakeholders to respond to the preliminary plan. This hearing may have occured as part of a normal Board meeting, but adequate notice of the event must have been provided through local media and the district website for at least two weeks prior to the meeting.
✓	The district prepared a final plan for school board approval and such plan has been approved by the school board.
	The final proposed plan that has been submitted has been posted on the district's website

SSIP Overview

5a. Please upload the proposed Smart Schools Investment Plan (SSIP) that was posted on the district's website. Note that this should be different than your recently submitted Educational Technology Survey. The Final SSIP, as approved by the School Board, should also be posted on the website and remain there during the course of the projects contained therein.

Status Date: 05/10/2016 09:10 AM

2015 Final SSBA Investment Plan.pdf

6.	Please enter an estimate of the total number of students and staff that will benefit from this Smart Schools
	Investment Plan based on the cumulative projects submitted to date.

350

- 7. An LEA/School District may partner with one or more other LEA/School Districts to form a consortium to pool Smart Schools Bond Act funds for a project that meets all other Smart School Bond Act requirements. Each school district participating in the consortium will need to file an approved Smart Schools Investment Plan for the project and submit a signed Memorandum of Understanding that sets forth the details of the consortium including the roles of each respective district.
 - ☐ The district plans to participate in a consortium to partner with other school district(s) to implement a Smart Schools project.
- 8. Please enter the name and 6-digit SED Code for each LEA/School District participating in the Consortium.

Partner LEA/District	SED BEDS Code
(No Response)	(No Response)

9. Please upload a signed Memorandum of Understanding with all of the participating Consortium partners.

(No Response)

10. Your district's Smart Schools Bond Act Allocation is:

\$752,800

11. Enter the budget sub-allocations by category that you are submitting for approval at this time. If you are not budgeting SSBA funds for a category, please enter 0 (zero.) If the value entered is \$0, you will not be required to complete that survey question.

	Sub- Allocations
School Connectivity	0
Connectivity Projects for Communities	0
Classroom Technology	123,003
Pre-Kindergarten Classrooms	0
Replace Transportable Classrooms	0
High-Tech Security Features	0
Totals:	123,003.00

Smart Schools Investment Plan -

School Connectivity

 In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that:

Status Date: 05/10/2016 09:10 AM

- sufficient infrastructure that meets the Federal Communications Commission's 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or
- is a planned use of a portion of Smart Schools Bond Act funds, or
- is under development through another funding source.

Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

- 1. Specifically codified in a service contract with a provider, and
- 2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

(No Response)

- 1a. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.
 - ☐ By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.
- 2. Connectivity Speed Calculator (Required)

	Number of Students	Multiply by 100 Kbps	Divide by 1000 to Convert to Required Speed in Mb	in Mb	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	(No Response)	(No Response)	(No Response)	(No Response)	(No Response)	(No Response)

3. Briefly describe how you intend to use Smart Schools Bond Act funds for high-speed broadband and/or wireless connectivity projects in school buildings.

(No Response)

4. Briefly describe the linkage between the district's District Instructional Technology Plan and the proposed projects. (There should be a link between your response to this question and your response to Question 1 in Part E. Curriculum and Instruction "What are the district's plans to use digital connectivity and technology to improve teaching and learning?)

(No Response)

5. If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.

Please describe how you have quantified this demand and how you plan to meet this demand.

(No Response)

Classroom Learning Technology

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that sufficient infrastructure that meets the Federal Communications Commission's 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or is a planned use of a portion of Smart Schools Bond Act funds, or is under development through another funding source.

Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

Status Date: 05/10/2016 09:10 AM

- 1. Specifically codified in a service contract with a provider, and
- 2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

We currently exceed the FCC minimum speed and have a 200MB connection for approximately 1,600 students from our provider and between all of our four buildings.

- 1a. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.
 - ☐ By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.
- 2. Connectivity Speed Calculator (Required)

	Number of Students	Multiply by 100 Kbps	Divide by 1000 to Convert to Required Speed in Mb	Current Speed in Mb	Speed to be Attained Within	Expected Date When Required Speed Will be Met
Calculated Speed	1,546	154,600	154.6	200	(No Response)	(No Response)

3. If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.

Please describe how you have quantified this demand and how you plan to meet this demand.

We spent the last few years installing wireless access points in all of our classrooms in anticipation of the growing use of wireless devices. We currently have the coverage and bandwidth to support a class full of devices in each room.

4. All New York State public school districts are required to complete and submit an Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations.

Districts that include educational technology purchases as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.

☑ By checking this box, you are certifying that the school district has an approved Instructional Technology Plan survey on file with the New York State Education Department.

05/10/2016 01:35 PM Page 6 of 14

Classroom Learning Technology

Describe the devices you intend to purchase and their compatibility with existing or planned platforms or systems.
 Specifically address the adequacy of each facility's electrical, HVAC and other infrastructure necessary to install and support the operation of the planned technology.

We are a Google Apps for Education district. We are planning on purchasing Dell Chromebooks for each of our students in our middle school (grades 6-8). The Chromebooks work seemlessly with Google Apps for Education.

Status Date: 05/10/2016 09:10 AM

05/10/2016 01:35 PM Page 7 of 14

Classroom Learning Technology

- 6. Describe how the proposed technology purchases will:
 - > enhance differentiated instruction;
 - > expand student learning inside and outside the classroom;
 - > benefit students with disabilities and English language learners; and
 - > contribute to the reduction of other learning gaps that have been identified within the district.

The expectation is that districts will place a priority on addressing the needs of students who struggle to succeed in a rigorous curriculum. Responses in this section should specifically address this concern and align with the district's Instructional Technology Plan (in particular Question 2 of E. Curriculum and Instruction: "Does the district's instructional technology plan address the needs of students with disabilities to ensure equitable access to instruction, materials and assessments?" and Question 3 of the same section: "Does the district's instructional technology plan address the provision of assistive technology specifically for students with disabilities to ensure access to and participation in the general curriculum?"

Status Date: 05/10/2016 09:10 AM

Differentiated Instruction:

Technology allows for differentiated instruction in that teachers are able to create learning activities that are individualized for each child. For example, students in grades K-8 participate in NWEA MAP testing. Based on how the students perform on their MAP, individualized learning paths are created for each student. Students are then able to work individually or in small groups on instructional activities at their instructional level. Teachers are able to assess student understanding of content by asking them to create instructional videos, answer questions electronically, engage in a blog conversations, and create avatars depicting characters in literature, for example.

Expand Student Learning Inside and Outside the Classroom:

Technology provides a gateway to the outside the school and classroom environments. Unit and lesson plans can include making connections with students around the world. Technology allows for the ability to travel anywhere in the world within the four walls in the classroom. Students are not able to not only write to students in schools around the world, but also interact with them via Facetime or Skype. Learning has moved from reading and writing to communication that takes many forms.

Benefit students with disabilities and English language learners:

Technology benefits all students in so many ways. For English language learners, technology allows for translation of their native language into English. Software such as reading and writing remedial programs allow for students to work at their own pace and at academically and developmentally appropriate levels.

Contribute to the reduction of other learning gaps that have been identified within the district:

Learning gaps that exist within the district fall between classified and nonclassified students. There are two schools within the district identified as schools in need of Local Assistance Plans (LAP). For students with writing, reading, and math deficits, technology is used as a supplemental tool to help students close their academic gaps. For example, graphic organizer software allows for students to brainstorm and organize their ideas for writing assignments. Websites such as the Kahn Academy allow for students to learn math from an on-line visual tutorial.

All students with disabilities have equal access to the curricula in all four of our school buildings (K-2), (3-5), (6-8), and (9-12). Assistive technology tools such as hardware, software, web-based instructional programs and apps are used to help students communicate, express their thoughts and opinions, and help compensate for written expression weaknesses. For our students with visual and hearing impairments, technology is being used to ensure that they are accessing the curricula in meaningful ways, just as their non-disabled peers. For example, students were reading Braille via an iPad. For students with hearing impairments, visual schedules are being developed via apps on iPads and Chromebooks.

When developing Individualized Education Programs (IEPs) and section 504 plans for students with disabilities, each student's present level of performance (PLOP) is developed. As a result of the PLOP, individualized goals are developed. In order for students to attain their goals, assistive technology devices, tools, etc. are recommended and implemented, regardless of the environment (inclusion or self-contained).

As indicated, assistive technology tools are used to help all students obtain a free and appropriate public education and have equal access to the curricula. In order for all students to access the curricula, the Committee on Preschool Special Education (CPSE) and Committee on Special Education (CSE) recommends the appropriate assistive technology, whether it be assistive technology services, hardware, and/or software.

05/10/2016 01:35 PM Page 8 of 14

Classroom Learning Technology

There are two nonpublic schools located within the district and the district is responsible for providing the appropriate assistive technology services, hardware, and/or software for those students in attendance in those two schools. The representatives in the two nonpublic schools communicate regularly with the district and the assistive technology needs of those students are met. For students who require an assistive technology evaluation, the district contracts with BOCES and/or considers an independent evaluator.

Status Date: 05/10/2016 09:10 AM

FEEDBACK: Please specifically address how the laptops being purchased will benefit all students described. Additional Information From Feedback:

The Chromebooks will benefit all of the students described as they will allow for students to access their school work from home or any location at any time. In addition, students will be able to use their Chromebooks to conduct research via the internet. The devices will allow students to expand upon learning that occurs during the typical school day because they have their own tool to complete the work. Students will be able to use Chromebooks to complete written assignments and use applications, such as speech to text, during the school day and at home. The Chromebooks will also help our students to become proficient in using technology. This is obviously an important skill when it comes to competitive employment after graduation.

7. Where appropriate, briefly describe how the proposed technology purchases will enhance ongoing communication with parents and other stakeholders and help the district facilitate technology-based regional partnerships, including distance learning and other efforts.

Our technology purchases will enhance ongoing communication with parents and other stakeholders and help the district facilitate technology-based regional partnerships, including distance learning and other efforts. The district will communicate the 1:1 Chromebook initiative with parents via informational sessions. Communication and a partnership with parents is essential for the success of any technology program. Although the district doesn't currently offer a technology based distance learning program, the devices will enable us to do this in the future.

Feedback: Please include more specific information regarding how the district will enhance communication from the purchase of the laptops.

Additional Information From Feedback:

Technology will enhance communication with parents and other stakeholders in a variety of ways. When students have their own personal device, students and parents will be able to access the District parent portal and view information about their child at any time. Some households don't currently have access to devices; the Chromebooks will ensure that there is communication equity across households in the district. Students and parents will have access to the District website which will also help to increase communication between households and the district. In addition, applications such as Google Classroom, will allow for teachers, students, and parents to view assignments/schoolwork, etc. at any time.

8. Describe the district's plan to provide professional development to ensure that administrators, teachers and staff can employ the technology purchased to enhance instruction successfully.

Note: This response should be aligned and expanded upon in accordance with your district's response to Question 1 of F. Professional Development of your Instructional Technology Plan: "Please provide a summary of professional development offered to teachers and staff, for the time period covered by this plan, to support technology to enhance teaching and learning. Please include topics, audience and method of delivery within your summary."

All technology-based professional development will be on-going without a foreseeable end date. Depending upon the needs of the district, professional development is either delivered by in-district experts or outside consultants. The district hopes to hire a technology integrator beginning in the 2015-2016 school year.

Google Apps (everyone, in-house training). As a Google school district, we are selecting professional development topics that are most beneficial for students and teachers. For example, Google docs as it appears to be the most commonly used app. Compass (everyone, in-district training). NWEA (K-8 teachers, in-district training). Castle Learning - K-12, outside provider). Assistive Technology Hardware and Software (technology integrator). Parent Portal (K-12, in-district training). Atlas Curriculum Mapping (K-12, webinar). IEP Direct (K-12, in-district training). Teachers are receiving ongoing training regarding the usage of IEP Direct. RTIM (K-12, in-district training). Ipad usage (K-2, in-person). Integrating Technology into Classrooms (K-12, in-person). eSchool Student Management System (K-12, in-person)

 Districts must contact the SUNY/CUNY teacher preparation program that supplies the largest number of the district's new teachers to request advice on innovative uses and best practices at the intersection of pedagogy and educational technology.

05/10/2016 01:35 PM Page 9 of 14

By checking this box, you certify that you have contacted the SUNY/CUNY teacher preparation program that supplies the largest number of your new teachers to request advice on these issues.

Smart Schools Investment Plan -

Are there nonpublic schools within your school district?

Classroom Learning Technology

A district whose Smart Schools Investment Plan proposes the purchase of technology devices and other hardware 10. must account for nonpublic schools in the district.

Status Date: 05/10/2016 09:10 AM

10a.	Describe your plan to loan purchased hardware to nonpublic schools within your district. The plan should use you district's nonpublic per-student loan amount calculated below, within the framework of the guidance. Please enter the date by which nonpublic schools must request classroom technology items. Also, specify in your response the devices that the nonpublic schools have requested, as well as in the in the Budget and the Expenditure Table at the end of the page.
	The two non-public schools, Oakwood Friends and Faith Christian Academy within our district were contacted (Faith Christian Academy moved into the district in January 2014). Neither of them were aware for this bond act and were not prepared to provide a list of equipment they would like to use. The district informed them that it is not spending all the funds this school year. They are aware that they will have opportunities each spring to request equipment up to the \$250 limit provided for in the Bond act. The district will adopt a resolution specifying that the annual date for requests of technology be received by the district by June 1st of each year of the program. Both non-public schools plan to make requests before the next deadline in the spring.

11. Nonpublic Classroom Technology Loan Calculator

> The Smart Schools Bond Act provides that any Classroom Learning Technology purchases made using Smart Schools funds shall be lent, upon request, to nonpublic schools in the district. However, no school district shall be required to loan technology in amounts greater than the total obtained and spent on technology pursuant to the Smart Schools Bond Act and the value of such loan may not exceed the total of \$250 multiplied by the nonpublic school enrollment in the base year at the time of enactment. See:

http://www.p12.nysed.gov/mgtserv/smart schools/docs/Smart Schools Bond Act Guidance 04.27.15 Final.pdf.

	Classroom Technology Sub-allocation	2. Public Enrollment (2014-15)		Public and	Pupil Sub-	6. Total Nonpublic Loan Amount
Calculated Nonpublic Loan Amount	123,003	1,457	337	1,794	69	23,253

12. To ensure the sustainability of technology purchases made with Smart Schools funds, districts must demonstrate a long-term plan to maintain and replace technology purchases supported by Smart Schools Bond Act funds. This sustainability plan shall demonstrate a district's capacity to support recurring costs of use that are ineligible for Smart Schools Bond Act funding such as device maintenance, technical support, Internet and wireless fees, maintenance of hotspots, staff professional development, building maintenance and the replacement of incidental items. Further, such a sustainability plan shall include a long-term plan for the replacement of purchased devices and equipment at the end of their useful life with other funding sources.

☑ By checking this box, you certify that the district has a sustainability plan as described above.

05/10/2016 01:35 PM Page 10 of 14

Classroom Learning Technology

13. Districts must ensure that devices purchased with Smart Schools Bond funds will be distributed, prepared for use, maintained and supported appropriately. Districts must maintain detailed device inventories in accordance with generally accepted accounting principles.

Status Date: 05/10/2016 09:10 AM

- 🗵 By checking this box, you certify that the district has a distribution and inventory management plan and system in place.
- 14. If you are submitting an allocation for Classroom Learning Technology complete this table.
 Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Interactive Whiteboards	(No Response)

Smart Schools Investment Plan -

Pre-Kindergarten Classrooms

1.	Provide information regarding how and where the district is currently serving pre-kindergarten students and justify
	the need for additional space with enrollment projections over 3 years.

Status Date: 05/10/2016 09:10 AM

(No Response)

- 2. Describe the district's plan to construct, enhance or modernize education facilities to accommodate prekindergarten programs. Such plans must include:
 - Specific descriptions of what the district intends to do to each space;
 - An affirmation that pre-kindergarten classrooms will contain a minimum of 900 square feet per classroom;
 - The number of classrooms involved;
 - The approximate construction costs per classroom; and
 - Confirmation that the space is district-owned or has a long-term lease that exceeds the probable useful life of the improvements.

(No Response)

3. Smart Schools Bond Act funds may only be used for capital construction costs. Describe the type and amount of additional funds that will be required to support ineligible ongoing costs (e.g. instruction, supplies) associated with any additional pre-kindergarten classrooms that the district plans to add.

(No Response)

5.

4. All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.

Project Number		
(No Response)		

If you have made an allocation for Pre-Kindergarten Classrooms, complete this table.

Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

Replace Transportable Classrooms

1.	Describe the district's plan to construct, enhance or modernize education facilities to provide high-quality
	instructional space by replacing transportable classrooms.

(No Response)

 All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.

Project Number
(No Response)

Status Date: 05/10/2016 09:10 AM

 For large projects that seek to blend Smart Schools Bond Act dollars with other funds, please note that Smart Schools Bond Act funds can be allocated on a pro rata basis depending on the number of new classrooms built that directly replace transportable classroom units.

If a district seeks to blend Smart Schools Bond Act dollars with other funds describe below what other funds are being used and what portion of the money will be Smart Schools Bond Act funds.

(No Response)

4. If you have made an allocation for Replace Transportable Classrooms, complete this table.
Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Construct New Instructional Space	(No Response)
Enhance/Modernize Existing Instructional Space	(No Response)
Other Costs	(No Response)
Totals:	

To the extent possible, please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.

Select the allowable expenditure	Item to be purchased	Quantity	Cost per Item	Total Cost
type.				
Repeat to add another item under				
each type.
