

2019-2020 STEAM ESSENTIALS: “Mystery Science” Professional Development October 1 or October 4, 2019, 12:00 p.m. – 3:00 p.m.

*Office of Curriculum, Instruction & Assessment, Diocese of Buffalo Professional Development
Newman Center at the University at Buffalo North Campus, 495 Skiddersville Rd, Amherst NY 14228*

“Mystery Science” Professional Development

Each session will train Grade K-5 science teachers on the use of “Mystery Science” NGGS-aligned hands-on units. The same material is presented on both days so attendees may attend either session.

“Mystery Science” is an online science curriculum which offers fully developed lessons using video instruction and hands-on science opportunities at all K-5 grade levels. Each “Mystery” begins with a question that is explored through engaging videos and stimulating discussion questions. Through video-guided hands-on investigations, students solve the mystery. For more information about “Mystery Science”, go to <https://mysteryscience.com/>

Registering schools may only send two teachers per school in order to allow space for all interested schools.

This PD opportunity is offered on two different days;
participants may attend either session to receive 3.0 hours of NYS CTLE credit.

***Please consider bringing your own device: iPad, iPhone, laptop, Chromebook etc.**

Participants will receive 3.0 CTLE hours, if interested.
Attendance is limited to 75 persons.

Tuesday, October 1, 2019 Schedule

11:30 a.m. **Registration**
