

June 24, 2015

To Whom It May Concern:

The New York City Department of Education (NYCDOE) intends to submit applications for the School Improvement Grant (SIG) Cohort 6 to the New York State Department of Education (NYSED).

The NYCDOE currently intends to submit applications for the following six (6) schools with the following intervention models:

DBN	School Name	BEDS Code	Intervention Model
30Q111	PS 111 JACOB BLACKWELL	343000010111	Innovation Framework
07X520	FOREIGN LANG ACAD OF GLOBAL STUDIES	320700011520	Innovation Framework
14K322	FOUNDATIONS ACADEMY	331400011322	Innovation Framework
16K455	BOYS AND GIRLS HIGH SCHOOL	331600011455	Innovation Framework
25Q460	FLUSHING HIGH SCHOOL	342500011460	Innovation Framework
09X313	IS 313 SCHOOL OF LEADERSHIP DEV	320900010313	Innovation Framework

We may also submit additional applications; we are currently finalizing the selection of any other schools and intervention models. Please feel free to contact us with questions. Thank you for this opportunity to support our schools.

Sincerely,

Mary Doyle
Executive Director
State School Improvement & Innovation Grants
Office of State/Federal Education Policy & School Improvement Programs
MDoyle5@schools.nyc.gov

Certification and Approval

I hereby certify that I am the applicant's Chief Administrative Officer, and that the information contained in this application is, to the best of my knowledge, complete and accurate. I further certify, to the best of my knowledge, that any ensuing program and activity will be conducted in accordance with all applicable application guidelines and instructions, and that the requested budget amounts are necessary for the implementation of this project. I understand that this application constitutes an offer and, if accepted by the NYSED or renegotiated to acceptance, will form a binding agreement. I also agree that immediate written notice will be provided to NYSED if at any time I learn that this certification was erroneous when submitted, or has become erroneous by reason of changed circumstances.

A. District Overview

The LEA must demonstrate a commitment to success in the turnaround of its lowest achieving schools and the capacity to implement the model proposed. The district overview must contain the following elements:

- i. Describe the district motivation/intention as well as the theories of action guiding key district strategies to support its lowest achieving schools and ensuring that all students graduate high school ready for college and careers.
- ii. Provide a clear and cogent district approach and set of actions in supporting the turnaround of its lowest achieving schools and its desired impact on Priority Schools.
- iii. Describe the evidence of district readiness to build upon its current strengths and identify opportunities for system-wide improvement in its Priority Schools.

Under the leadership of Schools Chancellor Carmen Fariña, the New York City Department of Education (NYCDOE) is fundamentally changing the way in which it partners with and provides support to schools, and holds everyone in the system accountable for results. The NYCDOE created *Strong Schools, Strong Communities* (see plan [here](#)), which outlines the motivation/intention and theories of action guiding NYCDOE strategies to support the lowest achieving schools and ensure that all students graduate high school ready for college and careers. The plan describes a new approach to supporting New York City's public schools and all of our students, which consists of three key components:

1. The Framework for Great Schools – a roadmap to school improvement for school leaders
2. School Quality Reports that give schools and families well-rounded and actionable information about school performance
3. A streamlined system to deliver customized support to schools

The Framework for Great Schools provides the NYCDOE approach in supporting the turnaround of our lowest achieving schools and ensuring that all students graduate high school ready for college and careers. There are six essential interconnected elements of the framework which are the foundation for our approach:

1. **Rigorous instruction:** Classes are driven by high educational standards and engage students by emphasizing the application of knowledge.
2. **Collaborative Teachers:** The staff is committed to the school, receives strong professional development, and works together to improve the school.
3. **Supportive Environment:** The school is safe and orderly. Teachers have high expectations for students. Students are socially and emotionally supported by their teachers and peers.
4. **Strong Family-Community Ties:** The entire school staff builds strong relationships with families and communities to support learning.
5. **Effective Leaders:** The principal and other school leaders work with fellow teachers and school staff, families, and students to implement a clear and strategic vision for school success.
6. **Trust:** The entire school community works to establish and maintain trusting relationships that will enable students, families, teachers, and principals to take the risks necessary to mount ambitious improvement efforts.

The NYCDOE School Renewal Program was recently created for the most struggling schools, including Priority Schools. All of the schools for which the NYCDOE is applying for the School Improvement Grant (SIG) Cohort 6 opportunity are Renewal Schools. The School Renewal Program provides a more targeted approach for school improvement, and demonstrates the readiness of the NYCDOE to build upon current strengths and identify further opportunities for improvement. The NYCDOE is working intensively with each Renewal School community over three years, setting clear goals and holding each school community accountable for rapid improvement. More information about the School Renewal Program is [here](#).

Renewal Schools are transforming into Community Schools as the New York City Community Schools Initiative is a central element of Mayor Bill de Blasio's vision to re-imagine the City's school system; this direction is aligned with the New York State Education Department (NYSED) state-determined SIG model: the Innovation Framework Community-Oriented School Design, the model selected for NYCDOE SIG Cohort 6 applications. Community Schools are neighborhood hubs where students receive high-quality academic instruction, families can access social services, and communities congregate to share resources and address common challenges. The Mayor has pledged to create more than 100 Community Schools over the next several years, including this school. More information on the Community Schools Initiative is [here](#).

This SIG plan is based on the school's unique Renewal Schools Comprehensive Education Plan (RSCEP), which was crafted this past spring based on needs assessments for each school and includes a Community School description along with SCEP required information. NYCDOE Renewal Schools will be transformed into Community Schools, have an additional hour of instruction each day, increase professional development in key areas like student writing, and launch a summer learning program – with concrete targets in student achievement. This SIG plan will support key improvement strategies in the Renewal School.

Another strength of the NYCDOE includes control of the schools under the Chancellor and Mayor, which ultimately has given more independence to principals. One of the most important reforms has been giving principals control over hiring and budget decisions. An opportunity for improvement, however, is that while some principals were able to use this autonomy to drive achievement in their schools, others struggled without direction on how to improve, particularly in struggling schools. Moving forward, each NYCDOE Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results. Superintendents will utilize a school's performance data, the Framework for Great Schools, and the professional judgment they have gained through experience to raise student achievement in struggling schools.

The Mayor, Chancellor, and NYCDOE leadership will closely monitor Renewal School progress via regular data reports and frequent visits to the school. Renewal Schools have at most three years to show significant improvement before the NYCDOE considers restructuring the school. If the school fails to meet benchmarks each year, or the Superintendent loses confidence in the school leadership, the Superintendent will make the changes necessary to ensure that each child in the school has a high-quality education. Such changes may include school consolidation/merger or closure.

The NYCDOE is monitoring schools with low student enrollment for possible consolidations/mergers. By the end of the 2014-15 school year, proposals to consolidate four low enrollment schools were announced for proposal to the Panel on Educational Policy (PEP) in fall 2015. In addition, there are other schools that could benefit from consolidation, and school leaders are working closely with their communities and Superintendents with the intention of aligning resources and building consensus for consolidation. We anticipate making further announcements this fall if there are viable school redesigns, which may include SIG Cohort 6 schools. Our budget requests for schools with currently less than a 200 student enrollment reflect a reduced amount for school year 2015-16 as we took into consideration the relatively low student enrollment. We believe that our school redesign efforts will ultimately provide a much richer educational experience for our students.

B. Operational Autonomies

The LEA must provide operational autonomies for Priority Schools in exchange for greater accountability for performance results in the following areas: 1) staffing; 2) school-based budgeting; 3) use of time during and after school; 4) program selection; and 5) educational partner selection. In addition to providing quality responses to each element requested in this section of the Project Narrative, the Priority School must have school-level autonomy in at least two of these areas for an *acceptable* rating in this category. Applications that provide quality responses and that are granted anywhere from 3 to 5 of these autonomies will receive a rating of *exemplary* for this category. The LEA must respond to each of the following:

- i. Describe the operational autonomies the LEA has created for the Priority School in this application. Articulate how these autonomies are different and unique from those of the other schools within the district and what accountability measures the district has put in place in exchange for these autonomies.
- ii. Provide as evidence formally adopted Board of Education policies and/or procedures for providing the school the appropriate autonomy, operating flexibility, resources, and support to reduce barriers and overly burdensome compliance requirements.
- iii. Submit as additional evidence, supporting labor-management documentation such as formally executed thin-contracts or election-to-work agreements, or school-based options, that state the conditions for work that match the design needs of Priority School.

As a Renewal School, the school is provided increased supports for increased accountability for performance results. Key elements of the School Renewal Program are:

- Transforming Renewal Schools into Community Schools
- Creating expanded learning time
- Supplying resources and supports to ensure effective school leadership and rigorous instruction with collaborative teachers
- Underperforming schools will undergo needs assessments in six elements of the Framework for Great Schools to identify key areas for additional resources
- Bringing increased oversight and accountability including strict goals and clear consequences for schools that do not meet them

Budgeting: A budget for the school is based on the Fair Student Funding (FSF) formula. Funding follows each student to the school that he or she attends based on student grade level, with additional dollars based on need (academic intervention, English Language Learners, special

education, high school program). Recently the NYCDOE committed \$60 million in additional funding to ensure that struggling schools have the resources they need to succeed. Renewal Schools will be brought to 100 percent of their FSF recommendation within two years. Also as a Priority School, the school receives funding through Title I allocations to support its goals outlined in its school improvement plan as a struggling school. Priority Schools select to use this funding towards identified areas of need, for example expanding learning time. Priority Schools may also receive School Achievement Funding from the NYCDOE to improve instructional programs.

A description of Fair Student Funding, which can be used at principal discretion, is posted [here](#). A description of School Achievement Funding can be found [here](#). The Priority School receives funding in its budget to use flexibly and an additional funding allocation to support its school improvement activities, documented in a NYCDOE procedure known as a School Allocation Memorandum (SAM). The Priority and Focus Schools SAM for school year 2014-15 is posted [here](#) and is also attached.

Staffing: Renewal School principals select staff to fill vacancies. Principal staffing actions include additional pay for certified staff for expanded learning as required by NYSED as a Priority School. Schools participate in NYCDOE teacher leadership programs to support the retention and development of expert teachers at their school. The NYCDOE provides organizational assistance to Priority Schools. The Office of State/Federal Education Policy & School Improvement Programs is designated to work with Priority Schools to select and implement their whole school reform models and assist the schools with compliance requirements. School Implementation Managers (SIMs) work with SIG schools on school improvement efforts and SIG compliance requirements.

Renewal School principals and their leadership teams were targeted by NYCDOE central for ongoing consultation recruitment and retention needs as well as a series of trainings, workshops, and activities that are customized to fit the specific needs of the school. Focus areas include recruitment and marketing to candidates, determining “right-fit” teachers, teacher selection, and supporting and retaining new and existing teachers.

Through the 2014 teachers’ contract and subsequent amendments (see the attached UFT MOA) three new teacher leader roles were created. All Renewal Schools had the opportunity to establish teacher leader roles with a designated funding allocation; below is additional information on three key new roles.

- Model Teacher: Takes on additional responsibilities such as establishing a laboratory classroom; demonstrating lessons; exploring emerging instructional practices; reflecting on and debriefing a visit from a colleague.
- Peer Collaborative Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the professional learning of their colleagues through peer coaching and intervisitation.
- Master Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the entire school or across multiple schools; responsible for school-level progress.

Teacher leaders are integral to the school improvement process as well as a way to retain high-performing teachers, recruit and attract experienced educators, create opportunities for collaboration, and further develop and refine teacher practice. As one principal explained, “Having a distributed leadership structure in this school is not only effective for building effective teaching practices, but also for running a school. It makes my day and my job infinitely easier. One example is planning [professional learning time] on Mondays... it is a big task. Knowing that we have teacher leaders working with teachers who are putting forth things they would like to work on makes that time more effective and the teachers more invested.”

Each school will receive up to \$27,500 to fund a team of teacher leaders. The allocation will be issued through a SAM following the completion of the teacher leader selection and staffing cycle. The selection process is a joint UFT-NYCDOE designed and implemented process. In addition, only teachers rated Effective and Highly Effective are eligible to apply.

Guidance provided by the NYCDOE includes that schools may use the allocation to fund one Peer Collaborative Teacher and two Model Teachers:

- Schools where teacher leadership has been the most successful in building school culture have staffed more than one teacher leader role at their school – ideally a team of at least three. Having more than one teacher leader at a school, formalizes teacher leadership to the rest of the staff and makes the work of the teacher leaders a larger part of the school culture.
- Given that the Peer Collaborative Teacher has release time, they are well positioned to organize the teacher leadership team in a way that broadens the impact of the teacher leader team and increases the potential supports for other teachers in the school. The Model Teachers act as key partners in the work to support growth through sharing their classroom with other teachers in the building.

Program selection: NYCDOE was among the first large urban school districts in the nation to recommend new high-quality Core Curriculum materials, with English Language Learner supports, for grades K-8 in ELA and math that align to the CCLS and promote the instructional shifts. The NYCDOE conducted an extensive research and review process in order to identify high-quality Core Curriculum materials that align to the CCLS and promote the Common Core Instructional Shifts for ELA and Mathematics. Additional information on NYCDOE and the Common Core may be found [here](#).

Each Renewal School participated in a needs assessment, which included the Surveys of Enacted Curriculum (SEC), a research-based, nationally validated set of online surveys that align teacher-reported data on ELA and mathematics instruction against the Common Core standards. The SEC is used as one set of data to help inform the school how what is happening in the classroom—the enacted curriculum—compares to the written curriculum and tested curriculum, including state assessments. It helps begin conversations about how to better align the three types of curricula. Reports were provided to each school to inform their SIG Cohort 6 plan.

There are differentiated professional supports provided to Renewal Schools. Teachers in K-8 schools are provided professional development through the Teacher's College Writing Project and the ReadyGen Independent Reading Initiative. Teachers in high schools are provided with professional development through the WITsi (Writing is Thinking Through Strategic Inquiry) process, included in the school-level SIG plans. Effective strategies for teaching expository writing will be taught explicitly up front and integrated into the strategic inquiry process. The rationale for their central role is that they are high-leverage strategies that target struggling students' deficiencies and that improve content knowledge, academic vocabulary, written language, oral language and reading comprehension simultaneously. They also help teachers pinpoint what struggling students need and how to provide it. The strategy is to begin (year 1) with a focus on the 9th grade and to focus on one additional grade each subsequent year (9th and 10th in year 2; 9th through 11th in year 3).

Schools are also selecting programs to improve school climate and safety with the goal of decreasing incident rates, suspension rates, and disruptive behavior, and an increase in teachers' ability to manage challenging student behaviors and an increase in student academic achievement. To help strengthen school communities and improve academic outcomes, staff members need support to understand and anticipate behavior issues before they escalate. The Positive Learning Collaborative (PLC) is a joint initiative between the NYCDOE and teachers' union, UFT, which provides intensive training and direct consultation to educators in order to develop the skills that prevent crises and help students focus on academic goals. Information about PLCs will be shared with SIG Cohort 6 schools for consideration of implementation.

Educational partner selection: As part of being a Renewal School and under the Community-Oriented School Design model, the school has selected partnerships with community-based organizations (CBOs) that offer tailored whole-student supports, including mental health services and after school programs. Principals have discretion over selecting educational partners, including those outlined in the SIG plan, that have been formally contracted by the NYCDOE after a vetting process. The NYCDOE oversees a request for proposal process from organizations experienced in working with schools in need of school improvement. Accountability plans for the partner must be included based on annual evaluations of student progress in the Priority School. If progress is not evident, then the work with the partner is discontinued.

Educational partner selection from pre-qualified organizations is accomplished through the Multiple Task Award Contract (MTAC) procedure, which provides a streamlined process for schools to follow, posted below. All RFPs are on the NYCDOE public website [here](#). Renewal Schools have selected from the following community-based organizations (CBOs) listed [here](#). CBOs selected for SIG Cohort 6 applicant schools include Zone 26, Grand Street Settlement, Center for Supportive Schools, Phipps Neighborhood, Good Shepard Services, Fordham University, the Child Care Center of New York, Westhab, and El Puente. More information about the chosen CBO is in Attachment Z.

The MOUs submitted under the SIG Innovation Framework for each school and CBO outline their partnership. The CBO selected is the lead partner in the SIG Innovation Framework

Community-Oriented School Design. The process for CBO selection involved the NYCDOE issuing a request for proposals to CBOs to partner with Renewal Schools. Once the pool of CBOs was selected, School Leadership Teams (SLTs) were able to interview CBO representatives to determine fit with the school. The SLT utilized a rubric that included questions on whether the CBO could support the vision of the school through understanding the student population and needs. The CBO works in collaboration with the school principal, SLT, and the community school director assigned to the school to coordinate resources.

Use of Time During and After School: The school has a variety of opportunities for changing the use of time during and after school. NYCDOE Priority Schools are implementing an additional 200 hours of Expanded Learning Time (ELT). NYCDOE created guidance for schools to implement ELT called Guidelines for Implementing Expanded Learning Time at Priority Schools; see [here](#). The Priority School has the option to have ELT providers support students through extended learning time.

All students in Renewal Schools will be given an opportunity for an additional hour of supplemental instruction each school day, beginning next school year; a separate budget allocation is provided for this purpose. The approach is that at least one hour of ELT is offered to every student, known as the Renewal Hour. Schools may offer both the Renewal Hour and other ELT programming. In addition, the lead CBO has funds budgeted in their Community Schools contract to hire staff for the ELT initiative. There are two basic models for the Renewal Hour: integration into the regular student school day or offering the ELT before or after the school day. The attachment “Guidance for Use of Expanded Learning Time” outlines the options for the implementation of Expanded Learning Time that Renewal Schools in more detail.

Schools can utilize a School-Based Option (SBO) to create flexible use of time. The SBO process allows individual schools to modify certain provisions in the teachers’ union (UFT)/NYCDOE Collective Bargaining Agreement. In the SBO process, the school community creates a plan for how to effectively implement extended learning time. The principal and school-based UFT chapter leader must agree to the proposed modification which is presented to school union members for vote. Fifty-five percent of the UFT voting members must affirm the proposed SBO in order for it to pass. The intent of the SBO process is to empower the school community on how to best make use of time before, during, and after school. The SBO process is described in the NYCDOE/UFT Collective Bargaining Agreement on page 46 [here](#) and is also attached.

C. District Accountability and Support

The LEA must have the organizational structures and functions in place at the district-level to provide quality oversight and support for its identified Priority Schools in the implementation of their SIG plans. The LEA plan for accountability and support must contain each of the following elements:

- i. Describe in detail the manner by which the district ensures that all federal requirements of a school’s chosen model are fulfilled and continue to be fulfilled throughout the duration of the grant.
- ii. Identify specific senior leadership that will direct and coordinate district’s turnaround efforts and submit an organizational chart (or charts) identifying the management structures at the district-level that are responsible for providing oversight and support to the LEA’s lowest achieving schools.

- iii. Describe in detail how the structures identified in “i” of this section function in a coordinated manner, to provide high quality accountability and support. Describe and discuss the specific cycle of planning, action, evaluation, feedback, and adaptation between the district and the school leadership. This response should be very specific about the type, nature, and frequency of interaction between the district personnel with school leadership and identified external partner organizations in this specific Priority School application.
- iv. For each planned interaction, provide a timeframe and identify the specific person responsible for delivery.

The central Office of State/Federal Education Policy & School Improvement Programs (organizational chart attached) works to identify and monitor Priority School whole school reform model selection and SIG progress monitoring. The School Implementation Manager (SIM) ensures SIG application development, implementation, and monitoring of the approved plan. Specific activities of the SIM include:

- Review quantitative and qualitative data to assess student strengths and weaknesses;
- Investigate root causes or contributing factors for low student achievement;
- Align resources to maximize benefits to students;
- Monitor plan implementation and make mid-course adjustments, as needed; and
- Evaluate the impact of improvement interventions and external partners.

Schools Chancellor Carmen Fariña assumed leadership of the NYCDOE in January 2014. Dr. Dorita Gibson is the Senior Deputy Chancellor and the Chancellor’s second in command overseeing all aspects of school support, Superintendents, support for struggling schools, District 75 and 79 programs, and school communications. Phil Weinberg is the Deputy Chancellor for Teaching and Learning overseeing professional development and curriculum, performance and accountability, Common Core and college-readiness initiatives, Career and Technical Education, and instructional support. Attached is a copy of the NYCDOE senior leadership organizational chart which also includes leadership in Family Engagement, Operations, Students with Disabilities, and English Language Learners, all of which play an integral role in coordinating turnaround efforts.

The NYCDOE is transitioning to a new school support structure now that will be in place and operational for the first day of school in September 2015. The new approach to school support is guided by six critical principles:

- 1) Clear lines of authority and accountability so all schools improve.
- 2) Families have one place to call if they cannot resolve problems at the school.
- 3) School leaders maintain the critical independence over budget and human resources they have had, so they can continue to drive improvement.
- 4) Provide customized support so school leaders can focus on those improvement efforts most likely to boost achievement.
- 5) Provide one-stop support to school leaders.
- 6) Create equity in the system by providing more intensive support to schools that need it most.

The new school support structure consists of four major parts:

- 1) Superintendent's Offices: each Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results
- 2) Borough Field Support Centers: each of the seven geographically located Borough Field Support Centers will utilize a BOCES model (Board of Collaborative Educational Services) in the provision of support to schools. An organizational chart is attached.
- 3) Central Teams
- 4) Affinity Groups, formerly called Partnership Support Organizations

As Renewal Schools, under the direction of the Superintendent, the Principal Leadership Facilitators and Directors for School Renewal (DSRs) are the core drivers of school improvement and implementation for Renewal Schools within their district. The DSR oversees and supervises the coordination and delivery of intensive supports to persistently low achieving schools. The DSR assists with needs-aligned instructional and operational supports to a number of underperforming schools, including professional development, intensive interventions, summer programming and extended learning opportunities, to ensure accelerated academic achievement for the schools served. Attached is a copy of the Renewal Schools Program organizational chart.

DSRs work with Renewal Schools to coordinate all school improvement efforts; SIMs work in collaboration with DSRs on SIG requirements. Community School Directors (CSDs) are assigned to each Renewal School to coordinate resources at the school-level with the CBO and school. The attached "Stages of Development in a NYC Community School" provides a rubric for schools to move from exploring to excelling in the features of a community school. Staff are held accountable through performance reviews and grant monitoring. External partner organizations working with Priority Schools are evaluated by schools and the NYCDOE based on performance targets. Regular meetings take place with partners to ensure effectiveness, and through the SIG Innovation Framework Community-Oriented School Design the NYCDOE will convene all lead partners and school leaders as done with its School Innovation Fund (SIF) lead partners last year to share expectations of SIG and as a lead partner.

Interactions with the Renewal School include weekly coaching visits to schools by DSRs and content specialist instructional coaches. There are frequent observations with timely, accurate, and actionable feedback. Superintendents provide professional development for school leaders through organizing bi-monthly, collaborative Principal meetings. Superintendents also conduct school visits and provide feedback to school leaders. Leadership coaches who are former successful principals have been assigned to Renewal School principals. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor ongoing progress; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent.

SIMs have a caseload of approximately a dozen schools implementing SIG Cohorts 2-6 and SIF. SIMs are in each of their schools at least twice per month, communicate with school teams on progress monitoring, and represent their schools to NYSED in the progress monitoring process. Benchmarks have already been set for the school through the RSCEP, which align to SIG benchmarks, and require an increased level of accountability. Using these measures, Renewal Schools will be further evaluated by their superintendent at the conclusion of each of the next two school years, in June 2016 and June 2017.

One Renewal School benchmark of note is that of student attendance which is also reviewed by NYSED in SIG progress monitoring. This measure is required for all Renewal Schools as it is a key indicator of schools' progress. NYCDOE had 81 schools implementing SIG and SIF grants in school year 2014-15 and participated in U.S. Department of Education SIG monitoring of NYSED to outline its SIG development, implementation, and monitoring process. SIG Cohort 6 school plans outline strategies that will lead to successful outcomes in the leading indicators that are measured in NYSED SIG monitoring, including improvements in the areas of student attendance, teacher attendance, discipline referrals, ELT opportunities, and academic data.

In November 2014, NYCDOE released two new school quality reports, which present information about the school's practices, learning environment, and performance results. The School Quality Snapshot is designed specifically for families, and provides a concise summary of each school's practices, environment, and performance. The School Quality Guide is a more detailed report with additional information, including multiple years of data to show the school's progress over time. The Guide also sets rigorous and realistic targets that are based on the historical performance of schools with similar populations and the city as a whole for schools in areas including student achievement, student progress, and college and career readiness.

Each Renewal School was provided a menu from which they chose leading indicators and student achievement benchmarks. Generally the targets included in the NYCDOE [High School](#) and [Elementary/Middle School](#) Quality Guides were used as the basis for setting these benchmarks. The attached shows samples from the benchmarks menus provided 1) for an elementary/middle school and 2) for a high school. The guidelines for choosing benchmarks are similar; the leading indicators and student achievement benchmarks are different based on the school grade level.

Schools began receiving new data tools this year to help them track student progress and school improvement. The Progress to Graduation Tracker provides high schools and transfer high schools with credit and Regents data to more easily track individual students' progress toward graduation. The Tracker is updated on a daily basis so that educators can use the most up-to-date information possible when identifying students who may be in need of additional supports and interventions to help them succeed. The School Performance Data Explorer allows elementary, middle and high schools to easily search, sort, and monitor metrics for current students across subgroups and overtime. The tool includes information on how former students are doing academically since they have left the school. By allowing educators to examine both whole-school and individual-student metrics and trends, the Data Explorer is meant to help schools

better identify and support struggling students earlier than ever before, identify and address performance trends at their school, and track current and former students' progress over time.

The following chart summarizes the interactions, timeframe, and persons responsible that are discussed in this section:

Planned School Improvement Interaction	Timeframe	Person Responsible
Professional development for school leaders. School visits & feedback for school leaders.	Bi-monthly collaborative Principal meetings On-site school visits	Superintendent
Professional support to implement feedback provided by the Superintendent. Monitor progress and help to make adjustments when necessary.	On-going	Principal Leadership Facilitator (PLF)
Supervises the coordination and delivery of multiple supports from NYCDOE. Provides instructional and operational support for schools. Supports professional development needs of the school. Supports interventions, summer programming and extended learning opportunities for schools. Provides content coaching and classroom observations and feedback.	Weekly visits to School	Director for School Renewal (DSR)
Coordinate resources at the school-level with the CBO and school.	On-site daily	Community School Director (CSD)
Support and monitors SIG implementation. Coordinate with Superintendent teams on school improvement initiatives for SIG	Bi-monthly on site visits	School Implementation Manager (SIM)

D. Teacher and Leader Pipeline

The LEA must have a clear understanding of the type and nature of teachers and leaders that are needed to create dramatic improvement in its lowest-achieving schools. In addition, the LEA must have a coherent set of goals and actions that lead to the successful recruitment, training, and retention of teachers and leaders who are effective in low-achieving schools. The LEA's plan must include each of the following elements:

- i. Identify and describe recruitment goals and strategies for high poverty and high minority schools to ensure that students in those schools have equal access to high-quality leaders and teachers.
- ii. Describe the district processes for altering hiring procedures and budget timelines to ensure that the appropriate number and types of teachers and principals can be recruited and hired in time to bring schools through dramatic change.
- iii. Identify and describe any district-wide training programs designed to build the capacity of *leaders* to be successful in leading dramatic change in low-achieving schools. In addition, describe how these programs are aligned to the implementation of the specific model chosen (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*). Provide a history of these or similarly purposed programs in the district, how they are or have been funded, and identify whether the school principals chosen to lead the new school designs proposed in this application have emerged as a direct result of these programs. Please identify the goals in terms of quantity and quality of effective leader development.*
- iv. Identify and describe any district-wide training programs designed to build the capacity of *teachers* to be effective specifically in low-achieving schools. Provide a history of these programs in the district, how they are or have been funded, and identify whether the instructional staff chosen for the new school designs proposed in this application have emerged as a direct result of these programs. If the programs are newly proposed, please identify the goals in terms of quantity and quality of effective teacher development.*
- v. Identify in chart form, the district-offered training events for items "iii & iv" above, scheduled during the year-one implementation period (September 1, 2015 to June 30, 2016). For each planned event, identify the specific agent/organization responsible for delivery, the desired measurable outcomes, and the method by which outcomes will be analyzed and reported. Provide a rationale for each planned event and why it will be critical to the successful implementation of the SIG plan.

*The district-wide training and professional development programs to be identified in this section are those that are offered by the district to a group or cluster of like schools (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*) and/or to cohorts of teachers and leaders who will serve in them (e.g., training for turnaround leaders; training for teachers who need to accelerate learning in Priority Schools where students are several levels below proficiency; training for school climate and culture in Priority Schools, etc.). NYSED's Strengthening Teacher and Leader Effectiveness (STLE) grant may provide suitable examples of the types of training and professional development expected in this section. See <https://www.engageny.org/resource/improving-practice>. School-specific and embedded training and professional-development should be detailed in Section II. I.

The NYCDOE believes in its talent: the teachers, school leaders, and other personnel who work with our city's 1.1 million students. The mission of the [Office of Leadership](#) is to build and sustain a leadership pipeline that yields high-quality leaders at all levels of the system, including teacher leaders, assistant principals, principals, and systems-level leaders. The pipeline structure has systemic supports and effective leadership development programs at each stage to identify and cultivate:

1. Strong teachers to meet the citywide instructional expectations and move into more formal teacher leadership development programs;
2. Effective teacher leaders and assistant principals to move into principal pipeline programs and then into principal positions;

3. Quality support for novice principals; and
4. Opportunities for experienced principals to mentor aspiring leaders.

The NYCDOE seeks to ensure that every student has the opportunity to learn from a high-quality educator in a school with a strong school leader, particularly in Priority Schools where the need is great. To accomplish this goal, we developed a pipeline of expert teachers and leaders and provide them with targeted support. To increase the number of candidates who are well-prepared to become principals, we have strengthened our principal preparation programs. Simultaneously, we have shifted our focus toward identifying talented educators and nurturing their leadership skills while they remain in teacher leadership roles. Our theory of action is that if we invest in providing job-embedded leadership development opportunities for our most promising emerging leaders and supporting our strongest current leaders to build leadership capacity in others, then we will build a leadership pipeline that is more cost-effective and sustainable, and produces more high quality next-level leaders.

The NYCDOE created the Principal Candidate Pool selection process to make clear the expectations for principals in the recruitment process. The process is used to discern all candidates' readiness for the position of principal and ability to impact student achievement. The NYCDOE has launched an enhanced version of the Principal Candidate Pool process in order to meet the following objectives:

- Align the screening process to clear, high standards that are consistent with the expectations to which principals will be held accountable under 3012-c.
- Offer participants an opportunity to receive high-quality professional development about the NYCDOE's expectations of principals.
- Provide hiring managers with multi-dimensional information to help enhance strategic placement hiring decisions related to principals.

To recruit expert teachers, NYCDOE creates a diverse candidate pool. For subject-shortage areas in which there are not enough traditionally-certified teachers to meet the needs of schools, we developed alternative-certification programs such as the New York City Teaching Fellows, which draws skilled professionals and recent college graduates to teach in high-need schools. Begun in 2000, since then the program has provided schools with more than 17,000 teachers. In addition to the NYC Teaching Fellows program, the NYCDOE has created an innovative residency program called the NYC Teaching Collaborative that recruits and trains a cohort of 50 new teachers annually through a practice-based teacher training model in hard-to-staff schools. This program is modeled after the nationally known program run by AUSL in Chicago. Additionally, the NYCDOE recruits annually a cohort of new hires that have been identified as top tier recruits to fill positions in struggling schools called the "Select Recruits" program.

The NYCDOE created teacher recruitment initiatives to build a pipeline of teachers prepared to turnaround the performance of our lowest-performing schools and teacher leadership programs for experienced educators to support professional development in their schools. In June 2014 the NYCDOE and UFT negotiated a set of teacher leadership positions and those positions have been focused in a subset of schools to serve as a vehicle to attract new talent to struggling schools and create leadership opportunities for current teachers on staff. In spring 2015 a cohort

of school participated in a foundational teacher leadership professional learning series that oriented teachers to the new positions and provided opportunities for foundational skill development in key teacher leadership skills. The NYCDOE also leverages the state-funded Teachers of Tomorrow grant to provide recruitment and retention incentives for teachers to work in our highest-need schools.

To support schools in recruiting and retaining this new talent at the school level, the DOE produces annual “Smart Retention” reports which create a picture of a school’s history in retaining talent year over year. Alongside the report, NYCDOE offers coaching in recruitment and retention strategies for a subset of identified schools. Each year the NYCDOE sets hiring policies to ensure that teachers and principals can be recruited and placed into our schools. Principals are typically in place in schools by July before the start of the next school year to begin year-long planning and school improvement efforts and teachers in place by September. Once selected, principals are empowered to make certain staffing decisions for their schools. Schools receive their budgets for the new fiscal year by June.

Annual hiring exceptions are set to ensure that hard-to-staff schools are staffed appropriately. These exceptions are made on the basis of the following factors: hard to staff subject areas, geographic districts, and grade level (elementary, middle, high). The timeline allows school leaders the ability to plan for any staffing needs or adjustments in concert with the citywide hiring process which begins in the spring and continues into the summer.

The NYCDOE creates and collaborates with partners on principal training programs to build a pipeline of principals with the ability to drive teaching quality and student achievement district-wide, particularly in schools with the greatest need. Our principal preparation programs share the following characteristics: 1) a carefully-developed recruitment process to screen for highly qualified participants, 2) required completion of a practical residency period, and 3) projects capturing evidence of impact on leadership development and student gains. The NYCDOE is now committed to hiring principals with at least seven years of education experience. LEAP, launched in 2009, is a rigorous 12-month on-the-job program. LEAP develops school leaders within their existing school environments and creates opportunities to harness existing relationships including those with current principals and school communities. The LEAP curriculum differentiates learning based on individual needs and is aligned with the NYCDOE’s instructional initiatives and the CCLS.

Leadership coaches who are former successful principals have been assigned to Renewal School Principals that are leading high schools. The DSRs collaborate closely with the ELI Principal Leadership Coaches and Leadership Academy coaches. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor the ongoing progress of the Renewal efforts; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent to stay apprised of all the initiatives.

K-8 Renewal School principals are provided professional development and support through the School Renewal Principal Learning Community, which meets five times per year around thematically organized sessions designed to engage school leaders in their own professional learning. The sessions also involve guest speakers and experts in the field. Renewal Principals Study Groups are led by a panel of advisory principals and focus on developing leadership expertise in one or more of the following areas: budgeting, data analysis, curriculum and instruction, parent engagement and rebranding which involves re-visiting the mission and vision. Please see Attachment Z: School-Level Information for District-Level Plan for information about the principal chosen to lead the school design.

The NYCDOE believes that to support teachers in their growth and development, it is important to have a common language and understanding of what quality teaching looks like. We have invested significant resources into beginning the work of developing principals' and teachers' understanding of Charlotte Danielson's Framework for Teaching, while training principals to do more frequent cycles of classroom observations and feedback. Resources to begin this work are provided to principals and educators in a number of ways: central and school-based professional development opportunities, online courses, and Teacher Evaluation and Development Coaches (TDECs) who work across multiple schools within their district. In addition, the NYCDOE has developed district-wide training programs to build the capacity of specific groups of teachers, including new teachers, teacher leaders, and teachers that work with special populations.

As of July 1, 2015, the NYCDOE Talent Coach and MOSL Specialist positions have been combined to create a new role: the Teacher Development and Evaluation Coach (TDEC). TDECs are supervised by superintendents and as such support school leaders throughout their district with *Advance*, NYCDOE's teacher development and evaluation system. Teacher Development and Evaluation Coaches (TDECs) collaborate with and support instructional leaders in using *Advance* to assess teacher practice, utilize measures of student learning to assess teacher effectiveness, and deliver high-quality developmental feedback to improve teacher effectiveness and student learning. Coaches also inform central efforts to develop and refine systems, research tools and program policies that support school leaders across New York City in providing meaningful evaluations and targeted professional development to teachers.

New teachers who work in low-achieving schools are provided differentiated levels of support, depending on their pathway to teaching. The New York City Teaching Collaborative offers a subsidized Master's degree program and focuses on supporting our highest-need schools, provides intensive training and school placement during the spring, with ongoing mentoring and training throughout the fall.

Several district-wide training programs are also available for teacher leaders who work in low-achieving schools. We are looking to improve the teacher leadership programs that we offer and are now working to create career ladders for teachers. All of the programs have developed continuous feedback loops (surveys, focus groups, school-based visits) to ensure that professional development is effectively being delivered and meeting the needs of new teachers and teacher leaders. Current programs that exist include the Teacher Incentive Fund (TIF) Program, the three new identified teacher leadership positions, and the Learning Partners Program which allow teachers to stay in the classroom while collaborating with colleagues

within and across schools. Professional development is also offered through collaboration with the UFT Teacher Center. More information about teacher career pathways is [here](#).

A chart is included as an attachment on NYCDOE trainings offered, and additional information is included as an attachment as “Programs and Partnerships 2015.”

E. External Partner Recruitment, Screening, and Matching

The LEA must have a rigorous process for identifying, screening, selecting, matching, and evaluating partner organizations that provide critical services to Priority Schools.

- i. Describe the rigorous process and formal LEA mechanisms for identifying, screening, selecting, matching, and evaluating external partner organizations that are providing support to this Priority school.
- ii. Describe the LEA processes for procurement and budget timelines (and/or any modifications to standard processes) that will ensure this Priority School will have access to effective external partner support prior to or directly at the start of the year-one pre-implementation period and subsequent implementation periods.
- iii. Describe the role of the district and the role of the school principal in terms of identifying, screening, selecting, matching, and evaluating partner organizations supporting this school. Describe the level of choice that the school principal has in terms of the educational partners available and how those options are accessible in a timeline that matches the preparation and start-up of the new school year.
- iv. If the model chosen is *Restart*, the LEA/school must describe in detail the rigorous review process that includes a determination by the LEA that the selected CMO or EMO is likely to produce strong results for the school. See federal definition of ‘strong results’ at <http://www2.ed.gov/programs/sif/index.html>. Federal Register, vol. 80, no. 26, pg. 7242.

To identify, screen, select, match, and evaluate external partner organizations, the NYCDOE uses a Pre-Qualified Solicitation (PQS) process. PQS is an ongoing open call-for-proposals process by which the NYCDOE selects potential partners. Each partner undergoes a screening process, which includes a proposal evaluation by a committee of three program experts who independently evaluate partner proposals in terms of project narrative, organizational capacity, qualifications and experience, and pricing level. The result is a pool of highly-qualified partner organizations which are approved and fully contracted. The Priority School is then able to select services from any of the pre-qualified external partner organizations by soliciting proposals and choosing the best fit according to its needs. If a principal is interested in a specific partner that has not already been approved, then she/he can recommend that the partner engage in the qualification process with the NYCDOE.

In addition, the NYCDOE uses a specific solicitation process called Whole School Reform, which seeks proposals from organizations experienced in working with schools in need of school intervention. The goal is for the partners to support the school to build capacity and enable the school to continue improvement efforts on its own. Partner proposals must offer a variety of methods and strategies grounded in best practices to achieve substantial gains. Potential partners provide accountability plans that include annual evaluations on student achievement progress and the process for enabling schools to continue the reform efforts beyond the contract period, along with at least three references from current or past client schools. Once partner proposals are reviewed by the evaluation committee and recommended for approval, further due diligence is done before formal recommendation for the Panel for Educational Policy for approval. Principals have discretion to select approved partners based on their scope of service needs.

Please see Attachment Z: School-Level Information for District-Level Plan for information about the CBO that is providing support to this Priority School. The school-level plan for this Priority School describes the particular design framework proposed and the scope of the re-design, as well as our rationale for selecting the chosen external partner as a solution to address identified gaps.

Priority Schools receive budget allocations for the new fiscal year by June, well in advance of the start of the new fiscal year in July and the start of the school year in September. The NYCDOE budget process provides principals with ample time to secure external partner support through the above-mentioned systems. Principals may secure services from a list of external partners that have already been thoroughly vetted by NYCDOE. Individual principals create a scope of service and solicit proposals from partners based on their specific needs. Once received, principals score proposals and award contracts to the most competitive and cost-effective partners. Priority Schools secure support from effective external Whole School Reform partners as early as May or June, well in advance of the year-one implementation period.

The NYCDOE manages the initial process of screening potential partner organizations so that principals can focus on selecting partner organizations based on their budget and service needs. NYCDOE manages an ongoing call-for-proposals process for select categories of services to schools. All proposals received by the NYCDOE must first be reviewed to determine if they meet all of the submission qualifications prescribed in the call for proposal. Proposals meeting these requirements are evaluated and rated by a district-based evaluation committee.

As needed, the NYCDOE may conduct site visits to verify information contained in a proposal and may require a potential partner to make a presentation on their services or submit additional written material in support of a proposal. Once the NYCDOE recommends a vendor for award, the recommendation is reviewed by the Division of Contracts and Purchasing for approval and then the Panel for Educational Policy for review and final approval.

Priority School principals are able to contract services from any of the approved pre-qualified educational partners by developing a specific scope of work, soliciting proposals using a user-friendly online tool and choosing the most competitive partner according to their specific needs. Once school principals receive school budgets for the new fiscal year in June, they are able to begin negotiating with potential partners for services in the new school year. The process allows principals sufficient time to solicit vendors and establish contracts in time for the new school year and possible preparation activities during the summer.

At the end of each school year, each school principal evaluates the services of the vendors – based on the objectives, proposed scope of services, and outcomes from the services – and determines whether to continue the partnership. Central staff assist the Priority School in evaluating the impact of chosen partners toward meeting the school’s improvement goals.

F. Enrollment and Retention Policies, Practices, and Strategies

The LEA must have clear policies, practices, and strategies for managing student enrollment and retention to ensure that Priority Schools are not receiving disproportionately high numbers of students with disabilities, English-language learners, and students performing below proficiency.

- i. Identify and describe similarities and differences in the school enrollment of SWDs, ELLs, and students performing below proficiency in this Priority School as compared with other schools within the district. Discuss the reasons why these similarities and differences exist.
- ii. Describe the district policies and practices that help to ensure SWDs, ELLs, and students performing below proficiency have increasing access to diverse and high quality school programs across the district.
- iii. Describe specific strategies employed by the district to ensure that Priority schools in the district are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency.

Please see Attachment Z: School-Level Information for District-Level Plan for information about this Priority School's enrollment as compared with other schools.

The NYCDOE operates a school choice-based system for students and families from Pre-Kindergarten to high school. In the past several years, the NYCDOE has worked to increase equitable access to high quality programs at all grade levels. All students, including students with disabilities, English Language Learners, and students performing below proficiency have access to all public schools as part of the choice-based enrollment system. Students participating in Pre-Kindergarten admissions can access NYCDOE district schools and New York City Early Education Centers (NYCEECs). The NYCDOE works to make as many pre-K programs as possible available to families. This year, families had the benefit of a new streamlined application process. This single application process allowed families to rank their options in order of preference, including both NYCDOE district schools and NYCEECs. Students participating in Kindergarten admissions can access all elementary choice and zoned schools. Zoned schools give priority to students who live in the geographic zoned area. Choice schools are schools that do not have a zone and give priority to applicants based on sibling status, district of residence, and in some cases, other criteria. The Kindergarten application process is a single application that allows parents to rank their school options in order of preference, including both zoned and choice schools.

At the middle school level, families also may submit a single application that allows them to rank their school options in order of preference. Some community school districts maintain primarily zoned middle schools, which give priority to students in the geographic zone. Most districts also have choice schools which have admissions methods based on academic or artistic ability, language proficiency, demonstrated interest, or a lottery (unscreened). At the high school level, approximately 75,000 students participate annually in a single application process that covers over 400 schools. The citywide choice process provides an opportunity for all participants to select up to 12 choices from across the five boroughs. The process consistently matches the majority of students to their top choice schools; for the previous five years, high school admissions has matched over 80% of students to one of their top five choices. Students may participate for both 9th grade and 10th grade admissions.

Since the 2012-13 school year, students with disabilities who have IEPs have benefited from improved access to zoned and choice schools. Rather than being assigned to a school based solely on availability of their recommended special education program, students with IEPs participated fully in the standard Kindergarten, middle school, and high school admissions process alongside their peers. This increased level of access will continue to scale up until the NYCDOE can ensure all students with disabilities have access to the schools they would otherwise attend if they did not have an IEP and, furthermore, that their special education programs, supports, and services be available in the schools to which they are matched.

Throughout the 2013-14 and 2014-15 school years, the Division of Specialized Instruction and Student Support (DSISS) partnered with field-based school support teams and schools to proactively support students with disabilities in the following four areas: student engagement in rigorous curriculum with full access to community schools and classrooms, development and implementation of quality IEPs, infusing school-wide and individualized positive behavioral supports, and effective transition planning. For the 2015-16 school year, DSISS will continue this work. All stakeholders will continue to be responsible for ensuring students with disabilities are educated in the most appropriate, least restrictive environment. To that end, through the NYCDOE's special education reform work, schools will engage in professional learning opportunities that focus on the continued commitment to supporting all educators in their understanding and facility with learner variability, access to content, rigorous expectations, inclusion, and the essential knowledge and skills needed for students to be college and career ready. Priorities for professional development are built on themes that reflect research- and evidence-based best practices and are fully integrated with the Common Core Learning Standards and *Advance*.

The NYCDOE has begun to put in place policies and practices designed to ensure that Students with Disabilities (SWDs), English Language Learners (ELLs), and students performing below proficiency have increasing access to diverse and high quality school options across the district. Our current SWD and ELL policies and guidance not only support schools in focusing their programming practices around student needs, but also encourage schools to develop a deep knowledge and understanding of their students' strengths, needs, and preferences in order to drive programmatic planning and/or shifts. Schools are supported in expanding their continuum of services to provide differentiated and individualized levels of support rather than stand-alone special education programs, so that students may receive recommended services based on individual needs at their schools of choice. For ELLs specifically, the NYCDOE encourages families of eligible students to request a bilingual program in their schools, knowing that if there is sufficient interest then schools will create and sustain bilingual programs that benefit not only ELLs, but also students interested in learning a second language.

In addition, for students with specific disabilities who may benefit from specialized instructional and/or social-emotional strategies, the NYCDOE continues to create and expand specialized programs in community schools and specialized schools. For SWDs, the NYCDOE has grown the number of District 75 (D75) specialized schools for students with disabilities, specialized programs in community schools for students with Autism Spectrum Disorders (ASD) known as the ASD Nest Program and the ASD Horizon Program, specialized programs in community schools for students with intellectual disability or multiple disabilities known as Academic,

Career, and Essential Skills (ACES) Programs, and also Bilingual Special Education (BSE) Programs for ELLs with IEPs who are recommended for a special education program in their home/native language. Families of students with specific disabilities may also elect to enroll in their zoned school.

District 75 provides citywide educational, vocational, and behavior support programs for students who are on the autism spectrum, have significant cognitive delays, are severely emotionally challenged, sensory impaired and/or multiply disabled at more than 310 sites. Specialized Programs in community schools (ASD Nest, ASD Horizon, ACES, and BSE Programs) are intended to increase access to community schools even further, for students with these specific disabilities for whom a District 75 school was historically more likely to be recommended. The ASD Nest Program and ASD Horizon Program are two different programs in community schools that serve admitted students with a disability classification of autism. Each program is designed to develop students' academic and social skills, but has different service delivery models and admissions criteria. The ASD Nest Program is primarily designed to support students with ASD who would benefit from intensive social skills development. As the result of significant growth in these programs, in 2014-15, a student on the autism spectrum was more than three times as likely (from 9% to 29%) to attend a community school than in 2007-8. This is especially significant given that over the same time period, the numbers of students classified as autistic has more than doubled, from 5,365 to 13,161 students.

The NYCDOE offers a range of high-quality programs for students performing below proficiency. The Office of Postsecondary Readiness works to support over-age and under-credited students, students enrolled in Career and Technical Education programs and Black and Latino students. The NYCDOE has Transfer Schools, which are small, academically rigorous, full-time high schools designated to re-engage students who have dropped out or who have fallen behind in credits. CTE is delivered in two ways across the NYCDOE: at designated CTE high schools and CTE programs in other high schools. CTE programs offered in high schools are developed in response to future employment opportunities and the potential for career growth in New York City. Currently, CTE programs are offered in fields ranging from aviation technology and culinary arts to emergency management and multimedia production.

In addition to expanding access to high-quality school and program options for SWDs, ELLs, and students performing below proficiency, the NYCDOE is committed to supporting schools in meeting students' unique learning needs. The NYCDOE previously made modifications to the Fair Student Funding formula to provide weights, which provide additional funding, for students who require additional support in order to succeed, including weights for Academic Intervention Services (AIS), ELLs, and Special Education Services. In 2011-12, the NYCDOE revised the funding methodology to provide additional weights to traditional high schools serving overage under-credited (OAUC) students. Providing schools with additional funding for AIS and OAUC further supports students that are performing below proficiency.

Meeting the needs of ELLs and SWDs is an area of special need in our schools. The UFT Teacher Center will support educators in SIG Cohort 6 schools through customized professional learning opportunities targeted to meet the unique needs of each school. Three Teacher Center Field Liaisons will collaborate with administrators and the school-based staff development committee to design learning opportunities to meet the needs of all learners, including ELLs and

SWDs.

The UFT Teacher Center Field Liaison will work in participating schools with Master/Peer Collaborative and Model Teachers and school-based site staff to:

- Design customized professional development
- Provide intensive, ongoing, job-embedded professional development, including one-on-one coaching, in-classroom support and coaching, demonstration lessons, co-teaching, classroom learning labs, study groups and work sessions, to impact student achievement
- Collect, analyze and interpret data for making instructional decisions
- Use data and facilitate the creation of action plans for data-driven professional development, learning laboratories and study groups, etc.
- Integrate instructional technology into teaching and learning

The NYCDOE employs specific strategies to ensure that Priority Schools are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency. One important strategy is the reform of the over-the-counter (OTC) process, which has been critical to managing disproportionately high enrollment of SWDs, ELLs, and students performing below proficiency in Priority Schools. Each summer, the NYCDOE opens temporary registration centers across the city to assist families seeking placement or hardship transfers (primarily in high school grades) during the period before the start of school. Approximately 15,000 new or returning students are placed during this peak OTC period and many are higher-needs students. For the past several years, the NYCDOE has added seats to every high school's OTC count. As a result, the impact of OTC placements at low-performing schools, including Priority Schools, was minimized, and there was an increase in student access to more programs.

For fall 2015, the NYCDOE Chancellor has publicly committed to reducing OTC in Renewal Schools, including all the schools applying for SIG Cohort 6. Additionally, in 2014-15, NYCDOE implemented a one-year elimination of OTC enrollment for the two State-identified Out of Time schools.

Another important strategy is the NYCDOE enrollment "targets" for Students with Disabilities, in which elementary, middle, and high schools allot a percentage of their seats to SWDs, equivalent to the district or borough rate of SWDs. In 2014, students with recommendations of services for 20% or more of their day were included in these targets. This strategy has contributed to an impressive decline in the number of schools serve few SWDs. Between 2007-08 and 2014-15, the percentage of schools that enroll SWDs at a rate of 10% or less has been cut in half, from 19% of schools in 2007-08 to just 9% of schools in 2014-15.

Furthermore, to increase access to some of NYCDOE's highest performing schools, NYCDOE has reduced the screening requirements for seats in selective programs that maintain unfilled seats. Typically, schools that have screened programs are allowed to rank students who meet that program's admissions criteria, and only those students who are ranked may be matched to that school. Since 2012, the NYCDOE has worked with screened schools to increase the number of SWDs ranked and matched to their programs. In situations where schools do not rank a sufficient number of SWDs, additional SWDs are matched to the unfilled seats in order to provide greater

access for these students to high-quality schools. In its first year, this work resulted in 20 programs placing approximately 900 additional students into academically screened seats that would have otherwise gone unfilled. For students entering high school in 2013, the NYCDOE placed almost 1,300 students were placed into these programs. The NYCDOE will continue this work in the upcoming school year.

The Public School Choice transfer process is another strategy that NYCDOE uses to help reduce the number of higher-needs, lower-performing students in Priority schools. Through Public School Choice, all students attending Priority schools are given the opportunity to transfer out of their current school and into a school that is “In Good Standing.” Students submit an application in the spring listing their choices, and they receive an offer over the summer for the upcoming fall. Lower-performing students and lower-income students are prioritized to receive an offer of their choosing. Furthermore, the NYCDOE has slightly revised the process in recent years to make the following two changes: the lowest-performing students within Priority Schools are more accurately identified through the use of indicators beyond merely test scores (including a promotion-in-doubt indicator based on grades and an indicator for students in temporary housing); students attending Priority Schools are prioritized to receive an offer above students attending Focus Schools. In 2014, over 6,500 families applied for transfers through Public School Choice and over 4,500 students received an offer.

G. District-level Labor and Management Consultation and Collaboration

The LEA/school must fully and transparently consult and collaborate with recognized district leaders of the principals’ and teachers’ labor unions about district Priority Schools and the development and implementation of the plan proposed for this specific Priority School proposed in this application. The evidence of consultation and collaboration provided by the LEA must contain each of the following elements:

- i. Describe in detail the steps that have occurred to consult and collaborate in the development of the district and school-level implementation plans.
- ii. Complete the Consultation and Collaboration Form and submit with this application (Attachment A).

The NYCDOE has consulted and collaborated with key stakeholders on the development of SIG Cohort 6 plans. Application and NYCDOE-developed guidance materials were shared directly by staff with the parent leadership group, CPAC; the principals’ union, CSA; and the teachers’ union, UFT. The engagement process with each group took place via meetings, phone calls, and emails about the applications. School Leadership Team (SLT) meetings took place to discuss school plans, which includes the principal, parent representatives, and UFT school leadership.

NYCDOE staff met with the Chancellor’s Parent Advisory Council (CPAC) in a full meeting on June 11 to discuss SIG Cohort 6. CPAC is the group of parent leaders in the NYCDOE; it is comprised of presidents of the district presidents’ councils. The role of CPAC is to consult with the district presidents’ councils to identify concerns, trends, and policy issues, and it advises the Chancellor on NYCDOE policies. NYCDOE staff met with UFT leadership on June 29 and engaged in multiple phone calls and emails with UFT regarding plan and overall school feedback subsequent to this meeting. CSA was also consulted with via phone calls and emails. All groups received district and school drafts for review and feedback.

The NYCDOE is committed to collaboration in its efforts to improve Renewal Schools. Teacher leaders in particular are integral to the successful implementation of all other school improvement measures. They serve as indispensable colleagues for school leaders, ensuring that the school community retains its most effective teachers, is supportive of all teachers' growth, and increases student achievement. School-level plans include information about faculty senates or other structures to promote shared school-based governance, responsibility, and collaboration in the interests of furthering the educational mission of each school. Moreover, the success of these schools depends largely on developing in parents an ownership and leadership in schools. This means shifting the paradigm from parents as participants to parents as leaders and decision-makers who work hand-in-hand with school staff and CBOs. Stakeholder collaboration will continue to be a focus for each SIG Cohort 6 school.

In addition to the district-level Attachment A, NYCDOE asked that schools submit a school-level Attachment A, the Consultation & Collaboration Documentation Form, in order to ensure consultation and collaboration took place on the school-level plans with staff and parent stakeholder groups. Signatures include the school's principal, parent group president, and UFT representative. These school-level forms are also attached in addition to the required district-level Attachment A. The district-level form is signed by the president/leaders of the teachers' union, principals' union, and district parent body as of July 17 and July 20. The individuals who signed are Michael Mulgrew, UFT President; Ernest Logan, CSA President; and Nancy Northrup, CPAC Co-Chair.

A. District Overview

The LEA must demonstrate a commitment to success in the turnaround of its lowest achieving schools and the capacity to implement the model proposed. The district overview must contain the following elements:

- i. Describe the district motivation/intention as well as the theories of action guiding key district strategies to support its lowest achieving schools and ensuring that all students graduate high school ready for college and careers.
- ii. Provide a clear and cogent district approach and set of actions in supporting the turnaround of its lowest achieving schools and its desired impact on Priority Schools.
- iii. Describe the evidence of district readiness to build upon its current strengths and identify opportunities for system-wide improvement in its Priority Schools.

Under the leadership of Schools Chancellor Carmen Fariña, the New York City Department of Education (NYCDOE) is fundamentally changing the way in which it partners with and provides support to schools, and holds everyone in the system accountable for results. The NYCDOE created *Strong Schools, Strong Communities* (see plan [here](#)), which outlines the motivation/intention and theories of action guiding NYCDOE strategies to support the lowest achieving schools and ensure that all students graduate high school ready for college and careers. The plan describes a new approach to supporting New York City's public schools and all of our students, which consists of three key components:

1. The Framework for Great Schools – a roadmap to school improvement for school leaders
2. School Quality Reports that give schools and families well-rounded and actionable information about school performance
3. A streamlined system to deliver customized support to schools

The Framework for Great Schools provides the NYCDOE approach in supporting the turnaround of our lowest achieving schools and ensuring that all students graduate high school ready for college and careers. There are six essential interconnected elements of the framework which are the foundation for our approach:

1. **Rigorous instruction:** Classes are driven by high educational standards and engage students by emphasizing the application of knowledge.
2. **Collaborative Teachers:** The staff is committed to the school, receives strong professional development, and works together to improve the school.
3. **Supportive Environment:** The school is safe and orderly. Teachers have high expectations for students. Students are socially and emotionally supported by their teachers and peers.
4. **Strong Family-Community Ties:** The entire school staff builds strong relationships with families and communities to support learning.
5. **Effective Leaders:** The principal and other school leaders work with fellow teachers and school staff, families, and students to implement a clear and strategic vision for school success.
6. **Trust:** The entire school community works to establish and maintain trusting relationships that will enable students, families, teachers, and principals to take the risks necessary to mount ambitious improvement efforts.

The NYCDOE School Renewal Program was recently created for the most struggling schools, including Priority Schools. All of the schools for which the NYCDOE is applying for the School Improvement Grant (SIG) Cohort 6 opportunity are Renewal Schools. The School Renewal Program provides a more targeted approach for school improvement, and demonstrates the readiness of the NYCDOE to build upon current strengths and identify further opportunities for improvement. The NYCDOE is working intensively with each Renewal School community over three years, setting clear goals and holding each school community accountable for rapid improvement. More information about the School Renewal Program is [here](#).

Renewal Schools are transforming into Community Schools as the New York City Community Schools Initiative is a central element of Mayor Bill de Blasio's vision to re-imagine the City's school system; this direction is aligned with the New York State Education Department (NYSED) state-determined SIG model: the Innovation Framework Community-Oriented School Design, the model selected for NYCDOE SIG Cohort 6 applications. Community Schools are neighborhood hubs where students receive high-quality academic instruction, families can access social services, and communities congregate to share resources and address common challenges. The Mayor has pledged to create more than 100 Community Schools over the next several years, including this school. More information on the Community Schools Initiative is [here](#).

This SIG plan is based on the school's unique Renewal Schools Comprehensive Education Plan (RSCEP), which was crafted this past spring based on needs assessments for each school and includes a Community School description along with SCEP required information. NYCDOE Renewal Schools will be transformed into Community Schools, have an additional hour of instruction each day, increase professional development in key areas like student writing, and launch a summer learning program – with concrete targets in student achievement. This SIG plan will support key improvement strategies in the Renewal School.

Another strength of the NYCDOE includes control of the schools under the Chancellor and Mayor, which ultimately has given more independence to principals. One of the most important reforms has been giving principals control over hiring and budget decisions. An opportunity for improvement, however, is that while some principals were able to use this autonomy to drive achievement in their schools, others struggled without direction on how to improve, particularly in struggling schools. Moving forward, each NYCDOE Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results. Superintendents will utilize a school's performance data, the Framework for Great Schools, and the professional judgment they have gained through experience to raise student achievement in struggling schools.

The Mayor, Chancellor, and NYCDOE leadership will closely monitor Renewal School progress via regular data reports and frequent visits to the school. Renewal Schools have at most three years to show significant improvement before the NYCDOE considers restructuring the school. If the school fails to meet benchmarks each year, or the Superintendent loses confidence in the school leadership, the Superintendent will make the changes necessary to ensure that each child in the school has a high-quality education. Such changes may include school consolidation/merger or closure.

The NYCDOE is monitoring schools with low student enrollment for possible consolidations/mergers. By the end of the 2014-15 school year, proposals to consolidate four low enrollment schools were announced for proposal to the Panel on Educational Policy (PEP) in fall 2015. In addition, there are other schools that could benefit from consolidation, and school leaders are working closely with their communities and Superintendents with the intention of aligning resources and building consensus for consolidation. We anticipate making further announcements this fall if there are viable school redesigns, which may include SIG Cohort 6 schools. Our budget requests for schools with currently less than a 200 student enrollment reflect a reduced amount for school year 2015-16 as we took into consideration the relatively low student enrollment. We believe that our school redesign efforts will ultimately provide a much richer educational experience for our students.

B. Operational Autonomies

The LEA must provide operational autonomies for Priority Schools in exchange for greater accountability for performance results in the following areas: 1) staffing; 2) school-based budgeting; 3) use of time during and after school; 4) program selection; and 5) educational partner selection. In addition to providing quality responses to each element requested in this section of the Project Narrative, the Priority School must have school-level autonomy in at least two of these areas for an *acceptable* rating in this category. Applications that provide quality responses and that are granted anywhere from 3 to 5 of these autonomies will receive a rating of *exemplary* for this category. The LEA must respond to each of the following:

- i. Describe the operational autonomies the LEA has created for the Priority School in this application. Articulate how these autonomies are different and unique from those of the other schools within the district and what accountability measures the district has put in place in exchange for these autonomies.
- ii. Provide as evidence formally adopted Board of Education policies and/or procedures for providing the school the appropriate autonomy, operating flexibility, resources, and support to reduce barriers and overly burdensome compliance requirements.
- iii. Submit as additional evidence, supporting labor-management documentation such as formally executed thin-contracts or election-to-work agreements, or school-based options, that state the conditions for work that match the design needs of Priority School.

As a Renewal School, the school is provided increased supports for increased accountability for performance results. Key elements of the School Renewal Program are:

- Transforming Renewal Schools into Community Schools
- Creating expanded learning time
- Supplying resources and supports to ensure effective school leadership and rigorous instruction with collaborative teachers
- Underperforming schools will undergo needs assessments in six elements of the Framework for Great Schools to identify key areas for additional resources
- Bringing increased oversight and accountability including strict goals and clear consequences for schools that do not meet them

Budgeting: A budget for the school is based on the Fair Student Funding (FSF) formula. Funding follows each student to the school that he or she attends based on student grade level, with additional dollars based on need (academic intervention, English Language Learners, special

education, high school program). Recently the NYCDOE committed \$60 million in additional funding to ensure that struggling schools have the resources they need to succeed. Renewal Schools will be brought to 100 percent of their FSF recommendation within two years. Also as a Priority School, the school receives funding through Title I allocations to support its goals outlined in its school improvement plan as a struggling school. Priority Schools select to use this funding towards identified areas of need, for example expanding learning time. Priority Schools may also receive School Achievement Funding from the NYCDOE to improve instructional programs.

A description of Fair Student Funding, which can be used at principal discretion, is posted [here](#). A description of School Achievement Funding can be found [here](#). The Priority School receives funding in its budget to use flexibly and an additional funding allocation to support its school improvement activities, documented in a NYCDOE procedure known as a School Allocation Memorandum (SAM). The Priority and Focus Schools SAM for school year 2014-15 is posted [here](#) and is also attached.

Staffing: Renewal School principals select staff to fill vacancies. Principal staffing actions include additional pay for certified staff for expanded learning as required by NYSED as a Priority School. Schools participate in NYCDOE teacher leadership programs to support the retention and development of expert teachers at their school. The NYCDOE provides organizational assistance to Priority Schools. The Office of State/Federal Education Policy & School Improvement Programs is designated to work with Priority Schools to select and implement their whole school reform models and assist the schools with compliance requirements. School Implementation Managers (SIMs) work with SIG schools on school improvement efforts and SIG compliance requirements.

Renewal School principals and their leadership teams were targeted by NYCDOE central for ongoing consultation recruitment and retention needs as well as a series of trainings, workshops, and activities that are customized to fit the specific needs of the school. Focus areas include recruitment and marketing to candidates, determining “right-fit” teachers, teacher selection, and supporting and retaining new and existing teachers.

Through the 2014 teachers’ contract and subsequent amendments (see the attached UFT MOA) three new teacher leader roles were created. All Renewal Schools had the opportunity to establish teacher leader roles with a designated funding allocation; below is additional information on three key new roles.

- Model Teacher: Takes on additional responsibilities such as establishing a laboratory classroom; demonstrating lessons; exploring emerging instructional practices; reflecting on and debriefing a visit from a colleague.
- Peer Collaborative Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the professional learning of their colleagues through peer coaching and intervisitation.
- Master Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the entire school or across multiple schools; responsible for school-level progress.

Teacher leaders are integral to the school improvement process as well as a way to retain high-performing teachers, recruit and attract experienced educators, create opportunities for collaboration, and further develop and refine teacher practice. As one principal explained, “Having a distributed leadership structure in this school is not only effective for building effective teaching practices, but also for running a school. It makes my day and my job infinitely easier. One example is planning [professional learning time] on Mondays... it is a big task. Knowing that we have teacher leaders working with teachers who are putting forth things they would like to work on makes that time more effective and the teachers more invested.”

Each school will receive up to \$27,500 to fund a team of teacher leaders. The allocation will be issued through a SAM following the completion of the teacher leader selection and staffing cycle. The selection process is a joint UFT-NYCDOE designed and implemented process. In addition, only teachers rated Effective and Highly Effective are eligible to apply.

Guidance provided by the NYCDOE includes that schools may use the allocation to fund one Peer Collaborative Teacher and two Model Teachers:

- Schools where teacher leadership has been the most successful in building school culture have staffed more than one teacher leader role at their school – ideally a team of at least three. Having more than one teacher leader at a school, formalizes teacher leadership to the rest of the staff and makes the work of the teacher leaders a larger part of the school culture.
- Given that the Peer Collaborative Teacher has release time, they are well positioned to organize the teacher leadership team in a way that broadens the impact of the teacher leader team and increases the potential supports for other teachers in the school. The Model Teachers act as key partners in the work to support growth through sharing their classroom with other teachers in the building.

Program selection: NYCDOE was among the first large urban school districts in the nation to recommend new high-quality Core Curriculum materials, with English Language Learner supports, for grades K-8 in ELA and math that align to the CCLS and promote the instructional shifts. The NYCDOE conducted an extensive research and review process in order to identify high-quality Core Curriculum materials that align to the CCLS and promote the Common Core Instructional Shifts for ELA and Mathematics. Additional information on NYCDOE and the Common Core may be found [here](#).

Each Renewal School participated in a needs assessment, which included the Surveys of Enacted Curriculum (SEC), a research-based, nationally validated set of online surveys that align teacher-reported data on ELA and mathematics instruction against the Common Core standards. The SEC is used as one set of data to help inform the school how what is happening in the classroom—the enacted curriculum—compares to the written curriculum and tested curriculum, including state assessments. It helps begin conversations about how to better align the three types of curricula. Reports were provided to each school to inform their SIG Cohort 6 plan.

There are differentiated professional supports provided to Renewal Schools. Teachers in K-8 schools are provided professional development through the Teacher's College Writing Project and the ReadyGen Independent Reading Initiative. Teachers in high schools are provided with professional development through the WITsi (Writing is Thinking Through Strategic Inquiry) process, included in the school-level SIG plans. Effective strategies for teaching expository writing will be taught explicitly up front and integrated into the strategic inquiry process. The rationale for their central role is that they are high-leverage strategies that target struggling students' deficiencies and that improve content knowledge, academic vocabulary, written language, oral language and reading comprehension simultaneously. They also help teachers pinpoint what struggling students need and how to provide it. The strategy is to begin (year 1) with a focus on the 9th grade and to focus on one additional grade each subsequent year (9th and 10th in year 2; 9th through 11th in year 3).

Schools are also selecting programs to improve school climate and safety with the goal of decreasing incident rates, suspension rates, and disruptive behavior, and an increase in teachers' ability to manage challenging student behaviors and an increase in student academic achievement. To help strengthen school communities and improve academic outcomes, staff members need support to understand and anticipate behavior issues before they escalate. The Positive Learning Collaborative (PLC) is a joint initiative between the NYCDOE and teachers' union, UFT, which provides intensive training and direct consultation to educators in order to develop the skills that prevent crises and help students focus on academic goals. Information about PLCs will be shared with SIG Cohort 6 schools for consideration of implementation.

Educational partner selection: As part of being a Renewal School and under the Community-Oriented School Design model, the school has selected partnerships with community-based organizations (CBOs) that offer tailored whole-student supports, including mental health services and after school programs. Principals have discretion over selecting educational partners, including those outlined in the SIG plan, that have been formally contracted by the NYCDOE after a vetting process. The NYCDOE oversees a request for proposal process from organizations experienced in working with schools in need of school improvement. Accountability plans for the partner must be included based on annual evaluations of student progress in the Priority School. If progress is not evident, then the work with the partner is discontinued.

Educational partner selection from pre-qualified organizations is accomplished through the Multiple Task Award Contract (MTAC) procedure, which provides a streamlined process for schools to follow, posted below. All RFPs are on the NYCDOE public website [here](#). Renewal Schools have selected from the following community-based organizations (CBOs) listed [here](#). CBOs selected for SIG Cohort 6 applicant schools include Zone 26, Grand Street Settlement, Center for Supportive Schools, Phipps Neighborhood, Good Shepard Services, Fordham University, the Child Care Center of New York, Westhab, and El Puente. More information about the chosen CBO is in Attachment Z.

The MOUs submitted under the SIG Innovation Framework for each school and CBO outline their partnership. The CBO selected is the lead partner in the SIG Innovation Framework

Community-Oriented School Design. The process for CBO selection involved the NYCDOE issuing a request for proposals to CBOs to partner with Renewal Schools. Once the pool of CBOs was selected, School Leadership Teams (SLTs) were able to interview CBO representatives to determine fit with the school. The SLT utilized a rubric that included questions on whether the CBO could support the vision of the school through understanding the student population and needs. The CBO works in collaboration with the school principal, SLT, and the community school director assigned to the school to coordinate resources.

Use of Time During and After School: The school has a variety of opportunities for changing the use of time during and after school. NYCDOE Priority Schools are implementing an additional 200 hours of Expanded Learning Time (ELT). NYCDOE created guidance for schools to implement ELT called Guidelines for Implementing Expanded Learning Time at Priority Schools; see [here](#). The Priority School has the option to have ELT providers support students through extended learning time.

All students in Renewal Schools will be given an opportunity for an additional hour of supplemental instruction each school day, beginning next school year; a separate budget allocation is provided for this purpose. The approach is that at least one hour of ELT is offered to every student, known as the Renewal Hour. Schools may offer both the Renewal Hour and other ELT programming. In addition, the lead CBO has funds budgeted in their Community Schools contract to hire staff for the ELT initiative. There are two basic models for the Renewal Hour: integration into the regular student school day or offering the ELT before or after the school day. The attachment “Guidance for Use of Expanded Learning Time” outlines the options for the implementation of Expanded Learning Time that Renewal Schools in more detail.

Schools can utilize a School-Based Option (SBO) to create flexible use of time. The SBO process allows individual schools to modify certain provisions in the teachers’ union (UFT)/NYCDOE Collective Bargaining Agreement. In the SBO process, the school community creates a plan for how to effectively implement extended learning time. The principal and school-based UFT chapter leader must agree to the proposed modification which is presented to school union members for vote. Fifty-five percent of the UFT voting members must affirm the proposed SBO in order for it to pass. The intent of the SBO process is to empower the school community on how to best make use of time before, during, and after school. The SBO process is described in the NYCDOE/UFT Collective Bargaining Agreement on page 46 [here](#) and is also attached.

C. District Accountability and Support

The LEA must have the organizational structures and functions in place at the district-level to provide quality oversight and support for its identified Priority Schools in the implementation of their SIG plans. The LEA plan for accountability and support must contain each of the following elements:

- i. Describe in detail the manner by which the district ensures that all federal requirements of a school’s chosen model are fulfilled and continue to be fulfilled throughout the duration of the grant.
- ii. Identify specific senior leadership that will direct and coordinate district’s turnaround efforts and submit an organizational chart (or charts) identifying the management structures at the district-level that are responsible for providing oversight and support to the LEA’s lowest achieving schools.

- iii. Describe in detail how the structures identified in “i” of this section function in a coordinated manner, to provide high quality accountability and support. Describe and discuss the specific cycle of planning, action, evaluation, feedback, and adaptation between the district and the school leadership. This response should be very specific about the type, nature, and frequency of interaction between the district personnel with school leadership and identified external partner organizations in this specific Priority School application.
- iv. For each planned interaction, provide a timeframe and identify the specific person responsible for delivery.

The central Office of State/Federal Education Policy & School Improvement Programs (organizational chart attached) works to identify and monitor Priority School whole school reform model selection and SIG progress monitoring. The School Implementation Manager (SIM) ensures SIG application development, implementation, and monitoring of the approved plan. Specific activities of the SIM include:

- Review quantitative and qualitative data to assess student strengths and weaknesses;
- Investigate root causes or contributing factors for low student achievement;
- Align resources to maximize benefits to students;
- Monitor plan implementation and make mid-course adjustments, as needed; and
- Evaluate the impact of improvement interventions and external partners.

Schools Chancellor Carmen Fariña assumed leadership of the NYCDOE in January 2014. Dr. Dorita Gibson is the Senior Deputy Chancellor and the Chancellor’s second in command overseeing all aspects of school support, Superintendents, support for struggling schools, District 75 and 79 programs, and school communications. Phil Weinberg is the Deputy Chancellor for Teaching and Learning overseeing professional development and curriculum, performance and accountability, Common Core and college-readiness initiatives, Career and Technical Education, and instructional support. Attached is a copy of the NYCDOE senior leadership organizational chart which also includes leadership in Family Engagement, Operations, Students with Disabilities, and English Language Learners, all of which play an integral role in coordinating turnaround efforts.

The NYCDOE is transitioning to a new school support structure now that will be in place and operational for the first day of school in September 2015. The new approach to school support is guided by six critical principles:

- 1) Clear lines of authority and accountability so all schools improve.
- 2) Families have one place to call if they cannot resolve problems at the school.
- 3) School leaders maintain the critical independence over budget and human resources they have had, so they can continue to drive improvement.
- 4) Provide customized support so school leaders can focus on those improvement efforts most likely to boost achievement.
- 5) Provide one-stop support to school leaders.
- 6) Create equity in the system by providing more intensive support to schools that need it most.

The new school support structure consists of four major parts:

- 1) Superintendent's Offices: each Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results
- 2) Borough Field Support Centers: each of the seven geographically located Borough Field Support Centers will utilize a BOCES model (Board of Collaborative Educational Services) in the provision of support to schools. An organizational chart is attached.
- 3) Central Teams
- 4) Affinity Groups, formerly called Partnership Support Organizations

As Renewal Schools, under the direction of the Superintendent, the Principal Leadership Facilitators and Directors for School Renewal (DSRs) are the core drivers of school improvement and implementation for Renewal Schools within their district. The DSR oversees and supervises the coordination and delivery of intensive supports to persistently low achieving schools. The DSR assists with needs-aligned instructional and operational supports to a number of underperforming schools, including professional development, intensive interventions, summer programming and extended learning opportunities, to ensure accelerated academic achievement for the schools served. Attached is a copy of the Renewal Schools Program organizational chart.

DSRs work with Renewal Schools to coordinate all school improvement efforts; SIMs work in collaboration with DSRs on SIG requirements. Community School Directors (CSDs) are assigned to each Renewal School to coordinate resources at the school-level with the CBO and school. The attached "Stages of Development in a NYC Community School" provides a rubric for schools to move from exploring to excelling in the features of a community school. Staff are held accountable through performance reviews and grant monitoring. External partner organizations working with Priority Schools are evaluated by schools and the NYCDOE based on performance targets. Regular meetings take place with partners to ensure effectiveness, and through the SIG Innovation Framework Community-Oriented School Design the NYCDOE will convene all lead partners and school leaders as done with its School Innovation Fund (SIF) lead partners last year to share expectations of SIG and as a lead partner.

Interactions with the Renewal School include weekly coaching visits to schools by DSRs and content specialist instructional coaches. There are frequent observations with timely, accurate, and actionable feedback. Superintendents provide professional development for school leaders through organizing bi-monthly, collaborative Principal meetings. Superintendents also conduct school visits and provide feedback to school leaders. Leadership coaches who are former successful principals have been assigned to Renewal School principals. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor ongoing progress; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent.

SIMs have a caseload of approximately a dozen schools implementing SIG Cohorts 2-6 and SIF. SIMs are in each of their schools at least twice per month, communicate with school teams on progress monitoring, and represent their schools to NYSED in the progress monitoring process. Benchmarks have already been set for the school through the RSCEP, which align to SIG benchmarks, and require an increased level of accountability. Using these measures, Renewal Schools will be further evaluated by their superintendent at the conclusion of each of the next two school years, in June 2016 and June 2017.

One Renewal School benchmark of note is that of student attendance which is also reviewed by NYSED in SIG progress monitoring. This measure is required for all Renewal Schools as it is a key indicator of schools' progress. NYCDOE had 81 schools implementing SIG and SIF grants in school year 2014-15 and participated in U.S. Department of Education SIG monitoring of NYSED to outline its SIG development, implementation, and monitoring process. SIG Cohort 6 school plans outline strategies that will lead to successful outcomes in the leading indicators that are measured in NYSED SIG monitoring, including improvements in the areas of student attendance, teacher attendance, discipline referrals, ELT opportunities, and academic data.

In November 2014, NYCDOE released two new school quality reports, which present information about the school's practices, learning environment, and performance results. The School Quality Snapshot is designed specifically for families, and provides a concise summary of each school's practices, environment, and performance. The School Quality Guide is a more detailed report with additional information, including multiple years of data to show the school's progress over time. The Guide also sets rigorous and realistic targets that are based on the historical performance of schools with similar populations and the city as a whole for schools in areas including student achievement, student progress, and college and career readiness.

Each Renewal School was provided a menu from which they chose leading indicators and student achievement benchmarks. Generally the targets included in the NYCDOE [High School](#) and [Elementary/Middle School](#) Quality Guides were used as the basis for setting these benchmarks. The attached shows samples from the benchmarks menus provided 1) for an elementary/middle school and 2) for a high school. The guidelines for choosing benchmarks are similar; the leading indicators and student achievement benchmarks are different based on the school grade level.

Schools began receiving new data tools this year to help them track student progress and school improvement. The Progress to Graduation Tracker provides high schools and transfer high schools with credit and Regents data to more easily track individual students' progress toward graduation. The Tracker is updated on a daily basis so that educators can use the most up-to-date information possible when identifying students who may be in need of additional supports and interventions to help them succeed. The School Performance Data Explorer allows elementary, middle and high schools to easily search, sort, and monitor metrics for current students across subgroups and overtime. The tool includes information on how former students are doing academically since they have left the school. By allowing educators to examine both whole-school and individual-student metrics and trends, the Data Explorer is meant to help schools

better identify and support struggling students earlier than ever before, identify and address performance trends at their school, and track current and former students' progress over time.

The following chart summarizes the interactions, timeframe, and persons responsible that are discussed in this section:

Planned School Improvement Interaction	Timeframe	Person Responsible
Professional development for school leaders. School visits & feedback for school leaders.	Bi-monthly collaborative Principal meetings On-site school visits	Superintendent
Professional support to implement feedback provided by the Superintendent. Monitor progress and help to make adjustments when necessary.	On-going	Principal Leadership Facilitator (PLF)
Supervises the coordination and delivery of multiple supports from NYCDOE. Provides instructional and operational support for schools. Supports professional development needs of the school. Supports interventions, summer programming and extended learning opportunities for schools. Provides content coaching and classroom observations and feedback.	Weekly visits to School	Director for School Renewal (DSR)
Coordinate resources at the school-level with the CBO and school.	On-site daily	Community School Director (CSD)
Support and monitors SIG implementation. Coordinate with Superintendent teams on school improvement initiatives for SIG	Bi-monthly on site visits	School Implementation Manager (SIM)

D. Teacher and Leader Pipeline

The LEA must have a clear understanding of the type and nature of teachers and leaders that are needed to create dramatic improvement in its lowest-achieving schools. In addition, the LEA must have a coherent set of goals and actions that lead to the successful recruitment, training, and retention of teachers and leaders who are effective in low-achieving schools. The LEA's plan must include each of the following elements:

- i. Identify and describe recruitment goals and strategies for high poverty and high minority schools to ensure that students in those schools have equal access to high-quality leaders and teachers.
- ii. Describe the district processes for altering hiring procedures and budget timelines to ensure that the appropriate number and types of teachers and principals can be recruited and hired in time to bring schools through dramatic change.
- iii. Identify and describe any district-wide training programs designed to build the capacity of *leaders* to be successful in leading dramatic change in low-achieving schools. In addition, describe how these programs are aligned to the implementation of the specific model chosen (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*). Provide a history of these or similarly purposed programs in the district, how they are or have been funded, and identify whether the school principals chosen to lead the new school designs proposed in this application have emerged as a direct result of these programs. Please identify the goals in terms of quantity and quality of effective leader development.*
- iv. Identify and describe any district-wide training programs designed to build the capacity of *teachers* to be effective specifically in low-achieving schools. Provide a history of these programs in the district, how they are or have been funded, and identify whether the instructional staff chosen for the new school designs proposed in this application have emerged as a direct result of these programs. If the programs are newly proposed, please identify the goals in terms of quantity and quality of effective teacher development.*
- v. Identify in chart form, the district-offered training events for items "iii & iv" above, scheduled during the year-one implementation period (September 1, 2015 to June 30, 2016). For each planned event, identify the specific agent/organization responsible for delivery, the desired measurable outcomes, and the method by which outcomes will be analyzed and reported. Provide a rationale for each planned event and why it will be critical to the successful implementation of the SIG plan.

*The district-wide training and professional development programs to be identified in this section are those that are offered by the district to a group or cluster of like schools (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*) and/or to cohorts of teachers and leaders who will serve in them (e.g., training for turnaround leaders; training for teachers who need to accelerate learning in Priority Schools where students are several levels below proficiency; training for school climate and culture in Priority Schools, etc.). NYSED's Strengthening Teacher and Leader Effectiveness (STLE) grant may provide suitable examples of the types of training and professional development expected in this section. See <https://www.engageny.org/resource/improving-practice>. School-specific and embedded training and professional-development should be detailed in Section II. I.

The NYCDOE believes in its talent: the teachers, school leaders, and other personnel who work with our city's 1.1 million students. The mission of the [Office of Leadership](#) is to build and sustain a leadership pipeline that yields high-quality leaders at all levels of the system, including teacher leaders, assistant principals, principals, and systems-level leaders. The pipeline structure has systemic supports and effective leadership development programs at each stage to identify and cultivate:

1. Strong teachers to meet the citywide instructional expectations and move into more formal teacher leadership development programs;
2. Effective teacher leaders and assistant principals to move into principal pipeline programs and then into principal positions;

3. Quality support for novice principals; and
4. Opportunities for experienced principals to mentor aspiring leaders.

The NYCDOE seeks to ensure that every student has the opportunity to learn from a high-quality educator in a school with a strong school leader, particularly in Priority Schools where the need is great. To accomplish this goal, we developed a pipeline of expert teachers and leaders and provide them with targeted support. To increase the number of candidates who are well-prepared to become principals, we have strengthened our principal preparation programs. Simultaneously, we have shifted our focus toward identifying talented educators and nurturing their leadership skills while they remain in teacher leadership roles. Our theory of action is that if we invest in providing job-embedded leadership development opportunities for our most promising emerging leaders and supporting our strongest current leaders to build leadership capacity in others, then we will build a leadership pipeline that is more cost-effective and sustainable, and produces more high quality next-level leaders.

The NYCDOE created the Principal Candidate Pool selection process to make clear the expectations for principals in the recruitment process. The process is used to discern all candidates' readiness for the position of principal and ability to impact student achievement. The NYCDOE has launched an enhanced version of the Principal Candidate Pool process in order to meet the following objectives:

- Align the screening process to clear, high standards that are consistent with the expectations to which principals will be held accountable under 3012-c.
- Offer participants an opportunity to receive high-quality professional development about the NYCDOE's expectations of principals.
- Provide hiring managers with multi-dimensional information to help enhance strategic placement hiring decisions related to principals.

To recruit expert teachers, NYCDOE creates a diverse candidate pool. For subject-shortage areas in which there are not enough traditionally-certified teachers to meet the needs of schools, we developed alternative-certification programs such as the New York City Teaching Fellows, which draws skilled professionals and recent college graduates to teach in high-need schools. Begun in 2000, since then the program has provided schools with more than 17,000 teachers. In addition to the NYC Teaching Fellows program, the NYCDOE has created an innovative residency program called the NYC Teaching Collaborative that recruits and trains a cohort of 50 new teachers annually through a practice-based teacher training model in hard-to-staff schools. This program is modeled after the nationally known program run by AUSL in Chicago. Additionally, the NYCDOE recruits annually a cohort of new hires that have been identified as top tier recruits to fill positions in struggling schools called the "Select Recruits" program.

The NYCDOE created teacher recruitment initiatives to build a pipeline of teachers prepared to turnaround the performance of our lowest-performing schools and teacher leadership programs for experienced educators to support professional development in their schools. In June 2014 the NYCDOE and UFT negotiated a set of teacher leadership positions and those positions have been focused in a subset of schools to serve as a vehicle to attract new talent to struggling schools and create leadership opportunities for current teachers on staff. In spring 2015 a cohort

of school participated in a foundational teacher leadership professional learning series that oriented teachers to the new positions and provided opportunities for foundational skill development in key teacher leadership skills. The NYCDOE also leverages the state-funded Teachers of Tomorrow grant to provide recruitment and retention incentives for teachers to work in our highest-need schools.

To support schools in recruiting and retaining this new talent at the school level, the DOE produces annual “Smart Retention” reports which create a picture of a school’s history in retaining talent year over year. Alongside the report, NYCDOE offers coaching in recruitment and retention strategies for a subset of identified schools. Each year the NYCDOE sets hiring policies to ensure that teachers and principals can be recruited and placed into our schools. Principals are typically in place in schools by July before the start of the next school year to begin year-long planning and school improvement efforts and teachers in place by September. Once selected, principals are empowered to make certain staffing decisions for their schools. Schools receive their budgets for the new fiscal year by June.

Annual hiring exceptions are set to ensure that hard-to-staff schools are staffed appropriately. These exceptions are made on the basis of the following factors: hard to staff subject areas, geographic districts, and grade level (elementary, middle, high). The timeline allows school leaders the ability to plan for any staffing needs or adjustments in concert with the citywide hiring process which begins in the spring and continues into the summer.

The NYCDOE creates and collaborates with partners on principal training programs to build a pipeline of principals with the ability to drive teaching quality and student achievement district-wide, particularly in schools with the greatest need. Our principal preparation programs share the following characteristics: 1) a carefully-developed recruitment process to screen for highly qualified participants, 2) required completion of a practical residency period, and 3) projects capturing evidence of impact on leadership development and student gains. The NYCDOE is now committed to hiring principals with at least seven years of education experience. LEAP, launched in 2009, is a rigorous 12-month on-the-job program. LEAP develops school leaders within their existing school environments and creates opportunities to harness existing relationships including those with current principals and school communities. The LEAP curriculum differentiates learning based on individual needs and is aligned with the NYCDOE’s instructional initiatives and the CCLS.

Leadership coaches who are former successful principals have been assigned to Renewal School Principals that are leading high schools. The DSRs collaborate closely with the ELI Principal Leadership Coaches and Leadership Academy coaches. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor the ongoing progress of the Renewal efforts; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent to stay apprised of all the initiatives.

K-8 Renewal School principals are provided professional development and support through the School Renewal Principal Learning Community, which meets five times per year around thematically organized sessions designed to engage school leaders in their own professional learning. The sessions also involve guest speakers and experts in the field. Renewal Principals Study Groups are led by a panel of advisory principals and focus on developing leadership expertise in one or more of the following areas: budgeting, data analysis, curriculum and instruction, parent engagement and rebranding which involves re-visiting the mission and vision. Please see Attachment Z: School-Level Information for District-Level Plan for information about the principal chosen to lead the school design.

The NYCDOE believes that to support teachers in their growth and development, it is important to have a common language and understanding of what quality teaching looks like. We have invested significant resources into beginning the work of developing principals' and teachers' understanding of Charlotte Danielson's Framework for Teaching, while training principals to do more frequent cycles of classroom observations and feedback. Resources to begin this work are provided to principals and educators in a number of ways: central and school-based professional development opportunities, online courses, and Teacher Evaluation and Development Coaches (TDECs) who work across multiple schools within their district. In addition, the NYCDOE has developed district-wide training programs to build the capacity of specific groups of teachers, including new teachers, teacher leaders, and teachers that work with special populations.

As of July 1, 2015, the NYCDOE Talent Coach and MOSL Specialist positions have been combined to create a new role: the Teacher Development and Evaluation Coach (TDEC). TDECs are supervised by superintendents and as such support school leaders throughout their district with *Advance*, NYCDOE's teacher development and evaluation system. Teacher Development and Evaluation Coaches (TDECs) collaborate with and support instructional leaders in using *Advance* to assess teacher practice, utilize measures of student learning to assess teacher effectiveness, and deliver high-quality developmental feedback to improve teacher effectiveness and student learning. Coaches also inform central efforts to develop and refine systems, research tools and program policies that support school leaders across New York City in providing meaningful evaluations and targeted professional development to teachers.

New teachers who work in low-achieving schools are provided differentiated levels of support, depending on their pathway to teaching. The New York City Teaching Collaborative offers a subsidized Master's degree program and focuses on supporting our highest-need schools, provides intensive training and school placement during the spring, with ongoing mentoring and training throughout the fall.

Several district-wide training programs are also available for teacher leaders who work in low-achieving schools. We are looking to improve the teacher leadership programs that we offer and are now working to create career ladders for teachers. All of the programs have developed continuous feedback loops (surveys, focus groups, school-based visits) to ensure that professional development is effectively being delivered and meeting the needs of new teachers and teacher leaders. Current programs that exist include the Teacher Incentive Fund (TIF) Program, the three new identified teacher leadership positions, and the Learning Partners Program which allow teachers to stay in the classroom while collaborating with colleagues

within and across schools. Professional development is also offered through collaboration with the UFT Teacher Center. More information about teacher career pathways is [here](#).

A chart is included as an attachment on NYCDOE trainings offered, and additional information is included as an attachment as “Programs and Partnerships 2015.”

E. External Partner Recruitment, Screening, and Matching

The LEA must have a rigorous process for identifying, screening, selecting, matching, and evaluating partner organizations that provide critical services to Priority Schools.

- i. Describe the rigorous process and formal LEA mechanisms for identifying, screening, selecting, matching, and evaluating external partner organizations that are providing support to this Priority school.
- ii. Describe the LEA processes for procurement and budget timelines (and/or any modifications to standard processes) that will ensure this Priority School will have access to effective external partner support prior to or directly at the start of the year-one pre-implementation period and subsequent implementation periods.
- iii. Describe the role of the district and the role of the school principal in terms of identifying, screening, selecting, matching, and evaluating partner organizations supporting this school. Describe the level of choice that the school principal has in terms of the educational partners available and how those options are accessible in a timeline that matches the preparation and start-up of the new school year.
- iv. If the model chosen is *Restart*, the LEA/school must describe in detail the rigorous review process that includes a determination by the LEA that the selected CMO or EMO is likely to produce strong results for the school. See federal definition of ‘strong results’ at <http://www2.ed.gov/programs/sif/index.html>. Federal Register, vol. 80, no. 26, pg. 7242.

To identify, screen, select, match, and evaluate external partner organizations, the NYCDOE uses a Pre-Qualified Solicitation (PQS) process. PQS is an ongoing open call-for-proposals process by which the NYCDOE selects potential partners. Each partner undergoes a screening process, which includes a proposal evaluation by a committee of three program experts who independently evaluate partner proposals in terms of project narrative, organizational capacity, qualifications and experience, and pricing level. The result is a pool of highly-qualified partner organizations which are approved and fully contracted. The Priority School is then able to select services from any of the pre-qualified external partner organizations by soliciting proposals and choosing the best fit according to its needs. If a principal is interested in a specific partner that has not already been approved, then she/he can recommend that the partner engage in the qualification process with the NYCDOE.

In addition, the NYCDOE uses a specific solicitation process called Whole School Reform, which seeks proposals from organizations experienced in working with schools in need of school intervention. The goal is for the partners to support the school to build capacity and enable the school to continue improvement efforts on its own. Partner proposals must offer a variety of methods and strategies grounded in best practices to achieve substantial gains. Potential partners provide accountability plans that include annual evaluations on student achievement progress and the process for enabling schools to continue the reform efforts beyond the contract period, along with at least three references from current or past client schools. Once partner proposals are reviewed by the evaluation committee and recommended for approval, further due diligence is done before formal recommendation for the Panel for Educational Policy for approval. Principals have discretion to select approved partners based on their scope of service needs.

Please see Attachment Z: School-Level Information for District-Level Plan for information about the CBO that is providing support to this Priority School. The school-level plan for this Priority School describes the particular design framework proposed and the scope of the re-design, as well as our rationale for selecting the chosen external partner as a solution to address identified gaps.

Priority Schools receive budget allocations for the new fiscal year by June, well in advance of the start of the new fiscal year in July and the start of the school year in September. The NYCDOE budget process provides principals with ample time to secure external partner support through the above-mentioned systems. Principals may secure services from a list of external partners that have already been thoroughly vetted by NYCDOE. Individual principals create a scope of service and solicit proposals from partners based on their specific needs. Once received, principals score proposals and award contracts to the most competitive and cost-effective partners. Priority Schools secure support from effective external Whole School Reform partners as early as May or June, well in advance of the year-one implementation period.

The NYCDOE manages the initial process of screening potential partner organizations so that principals can focus on selecting partner organizations based on their budget and service needs. NYCDOE manages an ongoing call-for-proposals process for select categories of services to schools. All proposals received by the NYCDOE must first be reviewed to determine if they meet all of the submission qualifications prescribed in the call for proposal. Proposals meeting these requirements are evaluated and rated by a district-based evaluation committee.

As needed, the NYCDOE may conduct site visits to verify information contained in a proposal and may require a potential partner to make a presentation on their services or submit additional written material in support of a proposal. Once the NYCDOE recommends a vendor for award, the recommendation is reviewed by the Division of Contracts and Purchasing for approval and then the Panel for Educational Policy for review and final approval.

Priority School principals are able to contract services from any of the approved pre-qualified educational partners by developing a specific scope of work, soliciting proposals using a user-friendly online tool and choosing the most competitive partner according to their specific needs. Once school principals receive school budgets for the new fiscal year in June, they are able to begin negotiating with potential partners for services in the new school year. The process allows principals sufficient time to solicit vendors and establish contracts in time for the new school year and possible preparation activities during the summer.

At the end of each school year, each school principal evaluates the services of the vendors – based on the objectives, proposed scope of services, and outcomes from the services – and determines whether to continue the partnership. Central staff assist the Priority School in evaluating the impact of chosen partners toward meeting the school’s improvement goals.

F. Enrollment and Retention Policies, Practices, and Strategies

The LEA must have clear policies, practices, and strategies for managing student enrollment and retention to ensure that Priority Schools are not receiving disproportionately high numbers of students with disabilities, English-language learners, and students performing below proficiency.

- i. Identify and describe similarities and differences in the school enrollment of SWDs, ELLs, and students performing below proficiency in this Priority School as compared with other schools within the district. Discuss the reasons why these similarities and differences exist.
- ii. Describe the district policies and practices that help to ensure SWDs, ELLs, and students performing below proficiency have increasing access to diverse and high quality school programs across the district.
- iii. Describe specific strategies employed by the district to ensure that Priority schools in the district are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency.

Please see Attachment Z: School-Level Information for District-Level Plan for information about this Priority School's enrollment as compared with other schools.

The NYCDOE operates a school choice-based system for students and families from Pre-Kindergarten to high school. In the past several years, the NYCDOE has worked to increase equitable access to high quality programs at all grade levels. All students, including students with disabilities, English Language Learners, and students performing below proficiency have access to all public schools as part of the choice-based enrollment system. Students participating in Pre-Kindergarten admissions can access NYCDOE district schools and New York City Early Education Centers (NYCEECs). The NYCDOE works to make as many pre-K programs as possible available to families. This year, families had the benefit of a new streamlined application process. This single application process allowed families to rank their options in order of preference, including both NYCDOE district schools and NYCEECs. Students participating in Kindergarten admissions can access all elementary choice and zoned schools. Zoned schools give priority to students who live in the geographic zoned area. Choice schools are schools that do not have a zone and give priority to applicants based on sibling status, district of residence, and in some cases, other criteria. The Kindergarten application process is a single application that allows parents to rank their school options in order of preference, including both zoned and choice schools.

At the middle school level, families also may submit a single application that allows them to rank their school options in order of preference. Some community school districts maintain primarily zoned middle schools, which give priority to students in the geographic zone. Most districts also have choice schools which have admissions methods based on academic or artistic ability, language proficiency, demonstrated interest, or a lottery (unscreened). At the high school level, approximately 75,000 students participate annually in a single application process that covers over 400 schools. The citywide choice process provides an opportunity for all participants to select up to 12 choices from across the five boroughs. The process consistently matches the majority of students to their top choice schools; for the previous five years, high school admissions has matched over 80% of students to one of their top five choices. Students may participate for both 9th grade and 10th grade admissions.

Since the 2012-13 school year, students with disabilities who have IEPs have benefited from improved access to zoned and choice schools. Rather than being assigned to a school based solely on availability of their recommended special education program, students with IEPs participated fully in the standard Kindergarten, middle school, and high school admissions process alongside their peers. This increased level of access will continue to scale up until the NYCDOE can ensure all students with disabilities have access to the schools they would otherwise attend if they did not have an IEP and, furthermore, that their special education programs, supports, and services be available in the schools to which they are matched.

Throughout the 2013-14 and 2014-15 school years, the Division of Specialized Instruction and Student Support (DSISS) partnered with field-based school support teams and schools to proactively support students with disabilities in the following four areas: student engagement in rigorous curriculum with full access to community schools and classrooms, development and implementation of quality IEPs, infusing school-wide and individualized positive behavioral supports, and effective transition planning. For the 2015-16 school year, DSISS will continue this work. All stakeholders will continue to be responsible for ensuring students with disabilities are educated in the most appropriate, least restrictive environment. To that end, through the NYCDOE's special education reform work, schools will engage in professional learning opportunities that focus on the continued commitment to supporting all educators in their understanding and facility with learner variability, access to content, rigorous expectations, inclusion, and the essential knowledge and skills needed for students to be college and career ready. Priorities for professional development are built on themes that reflect research- and evidence-based best practices and are fully integrated with the Common Core Learning Standards and *Advance*.

The NYCDOE has begun to put in place policies and practices designed to ensure that Students with Disabilities (SWDs), English Language Learners (ELLs), and students performing below proficiency have increasing access to diverse and high quality school options across the district. Our current SWD and ELL policies and guidance not only support schools in focusing their programming practices around student needs, but also encourage schools to develop a deep knowledge and understanding of their students' strengths, needs, and preferences in order to drive programmatic planning and/or shifts. Schools are supported in expanding their continuum of services to provide differentiated and individualized levels of support rather than stand-alone special education programs, so that students may receive recommended services based on individual needs at their schools of choice. For ELLs specifically, the NYCDOE encourages families of eligible students to request a bilingual program in their schools, knowing that if there is sufficient interest then schools will create and sustain bilingual programs that benefit not only ELLs, but also students interested in learning a second language.

In addition, for students with specific disabilities who may benefit from specialized instructional and/or social-emotional strategies, the NYCDOE continues to create and expand specialized programs in community schools and specialized schools. For SWDs, the NYCDOE has grown the number of District 75 (D75) specialized schools for students with disabilities, specialized programs in community schools for students with Autism Spectrum Disorders (ASD) known as the ASD Nest Program and the ASD Horizon Program, specialized programs in community schools for students with intellectual disability or multiple disabilities known as Academic,

Career, and Essential Skills (ACES) Programs, and also Bilingual Special Education (BSE) Programs for ELLs with IEPs who are recommended for a special education program in their home/native language. Families of students with specific disabilities may also elect to enroll in their zoned school.

District 75 provides citywide educational, vocational, and behavior support programs for students who are on the autism spectrum, have significant cognitive delays, are severely emotionally challenged, sensory impaired and/or multiply disabled at more than 310 sites. Specialized Programs in community schools (ASD Nest, ASD Horizon, ACES, and BSE Programs) are intended to increase access to community schools even further, for students with these specific disabilities for whom a District 75 school was historically more likely to be recommended. The ASD Nest Program and ASD Horizon Program are two different programs in community schools that serve admitted students with a disability classification of autism. Each program is designed to develop students' academic and social skills, but has different service delivery models and admissions criteria. The ASD Nest Program is primarily designed to support students with ASD who would benefit from intensive social skills development. As the result of significant growth in these programs, in 2014-15, a student on the autism spectrum was more than three times as likely (from 9% to 29%) to attend a community school than in 2007-8. This is especially significant given that over the same time period, the numbers of students classified as autistic has more than doubled, from 5,365 to 13,161 students.

The NYCDOE offers a range of high-quality programs for students performing below proficiency. The Office of Postsecondary Readiness works to support over-age and under-credited students, students enrolled in Career and Technical Education programs and Black and Latino students. The NYCDOE has Transfer Schools, which are small, academically rigorous, full-time high schools designated to re-engage students who have dropped out or who have fallen behind in credits. CTE is delivered in two ways across the NYCDOE: at designated CTE high schools and CTE programs in other high schools. CTE programs offered in high schools are developed in response to future employment opportunities and the potential for career growth in New York City. Currently, CTE programs are offered in fields ranging from aviation technology and culinary arts to emergency management and multimedia production.

In addition to expanding access to high-quality school and program options for SWDs, ELLs, and students performing below proficiency, the NYCDOE is committed to supporting schools in meeting students' unique learning needs. The NYCDOE previously made modifications to the Fair Student Funding formula to provide weights, which provide additional funding, for students who require additional support in order to succeed, including weights for Academic Intervention Services (AIS), ELLs, and Special Education Services. In 2011-12, the NYCDOE revised the funding methodology to provide additional weights to traditional high schools serving overage under-credited (OAUC) students. Providing schools with additional funding for AIS and OAUC further supports students that are performing below proficiency.

Meeting the needs of ELLs and SWDs is an area of special need in our schools. The UFT Teacher Center will support educators in SIG Cohort 6 schools through customized professional learning opportunities targeted to meet the unique needs of each school. Three Teacher Center Field Liaisons will collaborate with administrators and the school-based staff development committee to design learning opportunities to meet the needs of all learners, including ELLs and

SWDs.

The UFT Teacher Center Field Liaison will work in participating schools with Master/Peer Collaborative and Model Teachers and school-based site staff to:

- Design customized professional development
- Provide intensive, ongoing, job-embedded professional development, including one-on-one coaching, in-classroom support and coaching, demonstration lessons, co-teaching, classroom learning labs, study groups and work sessions, to impact student achievement
- Collect, analyze and interpret data for making instructional decisions
- Use data and facilitate the creation of action plans for data-driven professional development, learning laboratories and study groups, etc.
- Integrate instructional technology into teaching and learning

The NYCDOE employs specific strategies to ensure that Priority Schools are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency. One important strategy is the reform of the over-the-counter (OTC) process, which has been critical to managing disproportionately high enrollment of SWDs, ELLs, and students performing below proficiency in Priority Schools. Each summer, the NYCDOE opens temporary registration centers across the city to assist families seeking placement or hardship transfers (primarily in high school grades) during the period before the start of school. Approximately 15,000 new or returning students are placed during this peak OTC period and many are higher-needs students. For the past several years, the NYCDOE has added seats to every high school's OTC count. As a result, the impact of OTC placements at low-performing schools, including Priority Schools, was minimized, and there was an increase in student access to more programs.

For fall 2015, the NYCDOE Chancellor has publicly committed to reducing OTC in Renewal Schools, including all the schools applying for SIG Cohort 6. Additionally, in 2014-15, NYCDOE implemented a one-year elimination of OTC enrollment for the two State-identified Out of Time schools.

Another important strategy is the NYCDOE enrollment "targets" for Students with Disabilities, in which elementary, middle, and high schools allot a percentage of their seats to SWDs, equivalent to the district or borough rate of SWDs. In 2014, students with recommendations of services for 20% or more of their day were included in these targets. This strategy has contributed to an impressive decline in the number of schools serve few SWDs. Between 2007-08 and 2014-15, the percentage of schools that enroll SWDs at a rate of 10% or less has been cut in half, from 19% of schools in 2007-08 to just 9% of schools in 2014-15.

Furthermore, to increase access to some of NYCDOE's highest performing schools, NYCDOE has reduced the screening requirements for seats in selective programs that maintain unfilled seats. Typically, schools that have screened programs are allowed to rank students who meet that program's admissions criteria, and only those students who are ranked may be matched to that school. Since 2012, the NYCDOE has worked with screened schools to increase the number of SWDs ranked and matched to their programs. In situations where schools do not rank a sufficient number of SWDs, additional SWDs are matched to the unfilled seats in order to provide greater

access for these students to high-quality schools. In its first year, this work resulted in 20 programs placing approximately 900 additional students into academically screened seats that would have otherwise gone unfilled. For students entering high school in 2013, the NYCDOE placed almost 1,300 students were placed into these programs. The NYCDOE will continue this work in the upcoming school year.

The Public School Choice transfer process is another strategy that NYCDOE uses to help reduce the number of higher-needs, lower-performing students in Priority schools. Through Public School Choice, all students attending Priority schools are given the opportunity to transfer out of their current school and into a school that is “In Good Standing.” Students submit an application in the spring listing their choices, and they receive an offer over the summer for the upcoming fall. Lower-performing students and lower-income students are prioritized to receive an offer of their choosing. Furthermore, the NYCDOE has slightly revised the process in recent years to make the following two changes: the lowest-performing students within Priority Schools are more accurately identified through the use of indicators beyond merely test scores (including a promotion-in-doubt indicator based on grades and an indicator for students in temporary housing); students attending Priority Schools are prioritized to receive an offer above students attending Focus Schools. In 2014, over 6,500 families applied for transfers through Public School Choice and over 4,500 students received an offer.

G. District-level Labor and Management Consultation and Collaboration

The LEA/school must fully and transparently consult and collaborate with recognized district leaders of the principals’ and teachers’ labor unions about district Priority Schools and the development and implementation of the plan proposed for this specific Priority School proposed in this application. The evidence of consultation and collaboration provided by the LEA must contain each of the following elements:

- i. Describe in detail the steps that have occurred to consult and collaborate in the development of the district and school-level implementation plans.
- ii. Complete the Consultation and Collaboration Form and submit with this application (Attachment A).

The NYCDOE has consulted and collaborated with key stakeholders on the development of SIG Cohort 6 plans. Application and NYCDOE-developed guidance materials were shared directly by staff with the parent leadership group, CPAC; the principals’ union, CSA; and the teachers’ union, UFT. The engagement process with each group took place via meetings, phone calls, and emails about the applications. School Leadership Team (SLT) meetings took place to discuss school plans, which includes the principal, parent representatives, and UFT school leadership.

NYCDOE staff met with the Chancellor’s Parent Advisory Council (CPAC) in a full meeting on June 11 to discuss SIG Cohort 6. CPAC is the group of parent leaders in the NYCDOE; it is comprised of presidents of the district presidents’ councils. The role of CPAC is to consult with the district presidents’ councils to identify concerns, trends, and policy issues, and it advises the Chancellor on NYCDOE policies. NYCDOE staff met with UFT leadership on June 29 and engaged in multiple phone calls and emails with UFT regarding plan and overall school feedback subsequent to this meeting. CSA was also consulted with via phone calls and emails. All groups received district and school drafts for review and feedback.

The NYCDOE is committed to collaboration in its efforts to improve Renewal Schools. Teacher leaders in particular are integral to the successful implementation of all other school improvement measures. They serve as indispensable colleagues for school leaders, ensuring that the school community retains its most effective teachers, is supportive of all teachers' growth, and increases student achievement. School-level plans include information about faculty senates or other structures to promote shared school-based governance, responsibility, and collaboration in the interests of furthering the educational mission of each school. Moreover, the success of these schools depends largely on developing in parents an ownership and leadership in schools. This means shifting the paradigm from parents as participants to parents as leaders and decision-makers who work hand-in-hand with school staff and CBOs. Stakeholder collaboration will continue to be a focus for each SIG Cohort 6 school.

In addition to the district-level Attachment A, NYCDOE asked that schools submit a school-level Attachment A, the Consultation & Collaboration Documentation Form, in order to ensure consultation and collaboration took place on the school-level plans with staff and parent stakeholder groups. Signatures include the school's principal, parent group president, and UFT representative. These school-level forms are also attached in addition to the required district-level Attachment A. The district-level form is signed by the president/leaders of the teachers' union, principals' union, and district parent body as of July 17 and July 20. The individuals who signed are Michael Mulgrew, UFT President; Ernest Logan, CSA President; and Nancy Northrup, CPAC Co-Chair.

AGREEMENT

between

THE BOARD OF EDUCATION

of the

City School District

of the

City of New York

and

UNITED FEDERATION OF TEACHERS

Local 2, American Federation
of Teachers, AFL-CIO

covering

TEACHERS

October 13, 2007 - October 31, 2009

school to another, the Board and the Union agree that transfers shall be based upon the following principles:

A. General Transfers

Effective school year 2005-2006, principals will advertise all vacancies. Interviews will be conducted by school-based human resources committees (made up of pedagogues and administration) with the final decision to be made by the principal. Vacancies are defined as positions to which no teacher has been appointed, except where a non-appointed teacher is filling in for an appointed teacher on leave. Vacancies will be posted as early as April 15 of each year and will continue being posted throughout the spring and summer. Candidates (teachers wishing to transfer and excessed teachers) will apply to specifically posted vacancies and will be considered, for example, through job fairs and/or individual application to the school. Candidates may also apply to schools that have not advertised vacancies in their license areas so that their applications are on file at the school should a vacancy arise.

Selections for candidates may be made at any time; however, transfers after August 7th require the release of the teacher's current principal. Teachers who have repeatedly been unsuccessful in obtaining transfers or obtaining regular teaching positions after being excessed, will, upon request, receive individualized assistance from the Division of Human Resources and/or the Peer Intervention Program on how to maximize their chances of success in being selected for a transfer.

B. Hardship Transfers

In addition to the vacancies available for transfer pursuant to Section A of this Article, transfers on grounds of hardship shall be allowed in accordance with the following:

Transfers of teachers after three years of service on regular appointment may be made on grounds of hardship on the basis of the circumstances of each particular case, except that travel time by public transportation of more than one hour and thirty minutes each way between a teacher's home (or City line in the case of a teacher residing outside the City) and school shall be deemed to constitute a "hardship" entitling the applicant to a transfer to a school to be designated by the Division of Human Resources which shall be within one hour and thirty minutes travel time by public transportation from the teacher's home, or City line in the case of a teacher residing outside the City.

C. Voluntary Teacher Exchange

The Chancellor shall issue a memorandum promoting the exchange of new ideas and methodology and encouraging teachers to share their special skills with students and colleagues in other schools. To facilitate achievement of this goal, the Board and the Union agree to allow teachers to exchange positions for a one year period provided that the principals of both schools agree to the exchange. The exchange may be renewed for an additional one year period. For all purposes other than payroll distribution, the teachers will remain on the organizations of their home schools.

D. Staffing New or Redesigned Schools⁹

The following applies to staffing of new or redesigned schools ("Schools")

1. A Personnel Committee shall be established, consisting of two Union representatives designated by the UFT President, two representatives designated by the community superintendent for community school district schools or by the Chancellor for

⁹ The rights of teachers to staff the New Programs in District 79 are set forth in Appendix I, paragraph 2.

schools/programs under his/her jurisdiction, a Principal/or Project Director, and where appropriate a School Planning Committee Representative and a parent.

2. For its first year of operation the School's staff shall be selected by the Personnel Committee which should, to the extent possible, make its decisions in a consensual manner.

In the first year of staffing a new school, the UFT Personnel Committee members shall be school-based staff designated from a school other than the impacted school or another school currently in the process of being phased out. The Union will make its best effort to designate representatives from comparable schools who share the instructional vision and mission of the new school, and who will seek to ensure that first year hiring supports the vision and mission identified in the approved new school application.

In the second and subsequent years, the Union shall designate representatives from the new school to serve on its Personnel Committee.

3. If another school(s) is impacted (i.e., closed or phased out), staff from the impacted school(s) will be guaranteed the right to apply and be considered for positions in the School. If sufficient numbers of displaced staff apply, at least fifty percent of the School's pedagogical positions shall be selected from among the appropriately licensed most senior applicants from the impacted school(s), who meet the School's qualifications. The Board will continue to hire pursuant to this provision of the Agreement until the impacted school is closed.

4. Any remaining vacancies will be filled by the Personnel Committee from among transferees, excesses, and/or new hires. In performing its responsibilities, the Personnel Committee shall adhere to all relevant legal and contractual requirements including the hiring of personnel holding the appropriate credentials.

5. In the event the Union is unable to secure the participation of members on the Personnel Committee, the Union will consult with the Board to explore other alternatives. However the Union retains the sole right to designate the two UFT representatives on the Personnel Committee.

ARTICLE NINETEEN UNION ACTIVITIES, PRIVILEGES AND RESPONSIBILITIES

A. Restriction on Union Activities

No teacher shall engage in Union activities during the time he/she is assigned to teaching or other duties, except that members of the Union's negotiating committee and its special consultants shall, upon proper application, be excused without loss of pay for working time spent in negotiations with the Board or its representatives.

B. Time for Union Representatives

1. Chapter leaders shall be allowed time per week as follows for investigation of grievances and for other appropriate activities relating to the administration of the Agreement and to the duties of their office:

a. In the elementary schools, four additional preparation periods.

b. In the junior high schools, and in the high schools, relief from professional activity periods. In the junior high schools, chapter leaders shall be assigned the same number of teaching periods as homeroom teachers.

AGREEMENT

between

THE BOARD OF EDUCATION

of the

City School District

of the

City of New York

and

UNITED FEDERATION OF TEACHERS

Local 2, American Federation
of Teachers, AFL-CIO

covering

TEACHERS

October 13, 2007 - October 31, 2009

b. All votes of non-supervisory school based staff concerning participating in SBM / SDM shall be conducted by the UFT chapter.

c. Schools involved in SBM / SDM shall conduct ongoing self-evaluation and modify the program as needed.

2. SBM / SDM Teams

a. Based upon a peer selection process, participating schools shall establish an SBM / SDM team. For schools that come into the program after September 1993, the composition will be determined at the local level. Any schools with a team in place as of September 1993 will have an opportunity each October to revisit the composition of its team.

b. The UFT chapter leader shall be a member of the SBM / SDM team.

c. Each SBM / SDM team shall determine the range of issues it will address and the decision-making process it will use.

3. Staff Development

The Board shall be responsible for making available appropriate staff development, technical assistance and support requested by schools involved in SBM / SDM, as well as schools expressing an interest in future involvement in the program. The content and design of centrally offered staff development and technical assistance programs shall be developed in consultation with the Union.

4. Waivers

a. Requests for waivers of existing provisions of this Agreement or Board regulations must be approved in accordance with the procedure set forth in Article Eight B (School Based Options) of this Agreement i.e. approval of fifty-five (55) percent of those UFT chapter members voting and agreement of the school principal, UFT district representative, appropriate superintendent, the President of the Union and the Chancellor.

b. Waivers or modifications of existing provisions of this Agreement or Board regulations applied for by schools participating in SBM / SDM are not limited to those areas set forth in Article Eight B (School-Based Options) of this Agreement.

c. Existing provisions of this Agreement and Board regulations not specifically modified or waived, as provided above, shall continue in full force and effect in all SBM / SDM schools.

d. In schools that vote to opt out of SBM / SDM, continuation of waivers shall be determined jointly by the President of the Union and the Chancellor.

e. All School-Based Option votes covered by this Agreement, including those in Circular 6R, shall require an affirmative vote of fifty-five percent (55%) of those voting.

B. School-Based Options

The Union chapter in a school and the principal may agree to modify the existing provisions of this Agreement or Board regulations concerning class size, rotation of assignments/classes, teacher schedules and/or rotation of paid coverages for the entire school year. By the May preceding the year in which the proposal will be in effect, the proposal will be submitted for ratification in the school in accordance with Union procedures which will require approval of fifty-five (55) percent of those voting. Resources available to the school shall be maintained at the same level which would be required if the proposal were not in effect. The Union District Representative, the President of the Union, the appropriate Superintendent and the Chancellor must approve

the proposal and should be kept informed as the proposal is developed. The proposal will be in effect for one school year.

Should problems arise in the implementation of the proposal and no resolution is achieved at the school level, the District Representative and the Superintendent will attempt to resolve the problem. If they are unable to do so, it will be resolved by the Chancellor and the Union President. Issues arising under this provision are not subject to the grievance and arbitration procedures of the Agreement.

C. School Allocations

Before the end of June and by the opening of school in September, to involve faculties and foster openness about the use of resources, the principal shall meet with the chapter leader and UFT chapter committee to discuss, explain and seek input on the use of the school allocations. As soon as they are available, copies of the school allocations will be provided to the chapter leader and UFT chapter committee.

Any budgetary modifications regarding the use of the school allocations shall be discussed by the principal and chapter committee.

The Board shall utilize its best efforts to develop the capacity to include, in school allocations provided pursuant to this Article 8C, the specific extracurricular activities budgeted by each school.

D. Students' Grades

The teacher's judgment in grading students is to be respected; therefore if the principal changes a student's grade in any subject for a grading period, the principal shall notify the teacher of the reason for the change in writing.

E. Lesson Plan Format

The development of lesson plans by and for the use of the teacher is a professional responsibility vital to effective teaching. The organization, format, notation and other physical aspects of the lesson plan are appropriately within the discretion of each teacher. A principal or supervisor may suggest, but not require, a particular format or organization, except as part of a program to improve deficiencies of teachers who receive U-ratings or formal warnings.

F. Joint Efforts

The Board of Education and the Union recognize that a sound educational program requires not only the efficient use of existing resources but also constant experimentation with new methods and organization. The Union agrees that experimentation presupposes flexibility in assigning and programming pedagogical and other professional personnel. Hence, the Union will facilitate its members' voluntary participation in new ventures that may depart from usual procedures. The Board agrees that educational experimentation will be consistent with the standards of working conditions prescribed in this Agreement.

The Board and the Union will continue to participate in joint efforts to promote staff integration.

The parties will meet with a view toward drafting their collective bargaining agreements to reflect and embody provisions appropriate to the new and/or nontraditional school program organizational structures that have developed in the last several years, including as a result of this Agreement.

G. Professional Support for New Teachers

The Union and the Board agree that all teachers new to the New York City Public Schools are entitled to collegial support as soon as they commence service. The New

A. District Overview

The LEA must demonstrate a commitment to success in the turnaround of its lowest achieving schools and the capacity to implement the model proposed. The district overview must contain the following elements:

- i. Describe the district motivation/intention as well as the theories of action guiding key district strategies to support its lowest achieving schools and ensuring that all students graduate high school ready for college and careers.
- ii. Provide a clear and cogent district approach and set of actions in supporting the turnaround of its lowest achieving schools and its desired impact on Priority Schools.
- iii. Describe the evidence of district readiness to build upon its current strengths and identify opportunities for system-wide improvement in its Priority Schools.

Under the leadership of Schools Chancellor Carmen Fariña, the New York City Department of Education (NYCDOE) is fundamentally changing the way in which it partners with and provides support to schools, and holds everyone in the system accountable for results. The NYCDOE created *Strong Schools, Strong Communities* (see plan [here](#)), which outlines the motivation/intention and theories of action guiding NYCDOE strategies to support the lowest achieving schools and ensure that all students graduate high school ready for college and careers. The plan describes a new approach to supporting New York City's public schools and all of our students, which consists of three key components:

1. The Framework for Great Schools – a roadmap to school improvement for school leaders
2. School Quality Reports that give schools and families well-rounded and actionable information about school performance
3. A streamlined system to deliver customized support to schools

The Framework for Great Schools provides the NYCDOE approach in supporting the turnaround of our lowest achieving schools and ensuring that all students graduate high school ready for college and careers. There are six essential interconnected elements of the framework which are the foundation for our approach:

1. **Rigorous instruction:** Classes are driven by high educational standards and engage students by emphasizing the application of knowledge.
2. **Collaborative Teachers:** The staff is committed to the school, receives strong professional development, and works together to improve the school.
3. **Supportive Environment:** The school is safe and orderly. Teachers have high expectations for students. Students are socially and emotionally supported by their teachers and peers.
4. **Strong Family-Community Ties:** The entire school staff builds strong relationships with families and communities to support learning.
5. **Effective Leaders:** The principal and other school leaders work with fellow teachers and school staff, families, and students to implement a clear and strategic vision for school success.
6. **Trust:** The entire school community works to establish and maintain trusting relationships that will enable students, families, teachers, and principals to take the risks necessary to mount ambitious improvement efforts.

The NYCDOE School Renewal Program was recently created for the most struggling schools, including Priority Schools. All of the schools for which the NYCDOE is applying for the School Improvement Grant (SIG) Cohort 6 opportunity are Renewal Schools. The School Renewal Program provides a more targeted approach for school improvement, and demonstrates the readiness of the NYCDOE to build upon current strengths and identify further opportunities for improvement. The NYCDOE is working intensively with each Renewal School community over three years, setting clear goals and holding each school community accountable for rapid improvement. More information about the School Renewal Program is [here](#).

Renewal Schools are transforming into Community Schools as the New York City Community Schools Initiative is a central element of Mayor Bill de Blasio's vision to re-imagine the City's school system; this direction is aligned with the New York State Education Department (NYSED) state-determined SIG model: the Innovation Framework Community-Oriented School Design, the model selected for NYCDOE SIG Cohort 6 applications. Community Schools are neighborhood hubs where students receive high-quality academic instruction, families can access social services, and communities congregate to share resources and address common challenges. The Mayor has pledged to create more than 100 Community Schools over the next several years, including this school. More information on the Community Schools Initiative is [here](#).

This SIG plan is based on the school's unique Renewal Schools Comprehensive Education Plan (RSCEP), which was crafted this past spring based on needs assessments for each school and includes a Community School description along with SCEP required information. NYCDOE Renewal Schools will be transformed into Community Schools, have an additional hour of instruction each day, increase professional development in key areas like student writing, and launch a summer learning program – with concrete targets in student achievement. This SIG plan will support key improvement strategies in the Renewal School.

Another strength of the NYCDOE includes control of the schools under the Chancellor and Mayor, which ultimately has given more independence to principals. One of the most important reforms has been giving principals control over hiring and budget decisions. An opportunity for improvement, however, is that while some principals were able to use this autonomy to drive achievement in their schools, others struggled without direction on how to improve, particularly in struggling schools. Moving forward, each NYCDOE Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results. Superintendents will utilize a school's performance data, the Framework for Great Schools, and the professional judgment they have gained through experience to raise student achievement in struggling schools.

The Mayor, Chancellor, and NYCDOE leadership will closely monitor Renewal School progress via regular data reports and frequent visits to the school. Renewal Schools have at most three years to show significant improvement before the NYCDOE considers restructuring the school. If the school fails to meet benchmarks each year, or the Superintendent loses confidence in the school leadership, the Superintendent will make the changes necessary to ensure that each child in the school has a high-quality education. Such changes may include school consolidation/merger or closure.

The NYCDOE is monitoring schools with low student enrollment for possible consolidations/mergers. By the end of the 2014-15 school year, proposals to consolidate four low enrollment schools were announced for proposal to the Panel on Educational Policy (PEP) in fall 2015. In addition, there are other schools that could benefit from consolidation, and school leaders are working closely with their communities and Superintendents with the intention of aligning resources and building consensus for consolidation. We anticipate making further announcements this fall if there are viable school redesigns, which may include SIG Cohort 6 schools. Our budget requests for schools with currently less than a 200 student enrollment reflect a reduced amount for school year 2015-16 as we took into consideration the relatively low student enrollment. We believe that our school redesign efforts will ultimately provide a much richer educational experience for our students.

B. Operational Autonomies

The LEA must provide operational autonomies for Priority Schools in exchange for greater accountability for performance results in the following areas: 1) staffing; 2) school-based budgeting; 3) use of time during and after school; 4) program selection; and 5) educational partner selection. In addition to providing quality responses to each element requested in this section of the Project Narrative, the Priority School must have school-level autonomy in at least two of these areas for an *acceptable* rating in this category. Applications that provide quality responses and that are granted anywhere from 3 to 5 of these autonomies will receive a rating of *exemplary* for this category. The LEA must respond to each of the following:

- i. Describe the operational autonomies the LEA has created for the Priority School in this application. Articulate how these autonomies are different and unique from those of the other schools within the district and what accountability measures the district has put in place in exchange for these autonomies.
- ii. Provide as evidence formally adopted Board of Education policies and/or procedures for providing the school the appropriate autonomy, operating flexibility, resources, and support to reduce barriers and overly burdensome compliance requirements.
- iii. Submit as additional evidence, supporting labor-management documentation such as formally executed thin-contracts or election-to-work agreements, or school-based options, that state the conditions for work that match the design needs of Priority School.

As a Renewal School, the school is provided increased supports for increased accountability for performance results. Key elements of the School Renewal Program are:

- Transforming Renewal Schools into Community Schools
- Creating expanded learning time
- Supplying resources and supports to ensure effective school leadership and rigorous instruction with collaborative teachers
- Underperforming schools will undergo needs assessments in six elements of the Framework for Great Schools to identify key areas for additional resources
- Bringing increased oversight and accountability including strict goals and clear consequences for schools that do not meet them

Budgeting: A budget for the school is based on the Fair Student Funding (FSF) formula. Funding follows each student to the school that he or she attends based on student grade level, with additional dollars based on need (academic intervention, English Language Learners, special

education, high school program). Recently the NYCDOE committed \$60 million in additional funding to ensure that struggling schools have the resources they need to succeed. Renewal Schools will be brought to 100 percent of their FSF recommendation within two years. Also as a Priority School, the school receives funding through Title I allocations to support its goals outlined in its school improvement plan as a struggling school. Priority Schools select to use this funding towards identified areas of need, for example expanding learning time. Priority Schools may also receive School Achievement Funding from the NYCDOE to improve instructional programs.

A description of Fair Student Funding, which can be used at principal discretion, is posted [here](#). A description of School Achievement Funding can be found [here](#). The Priority School receives funding in its budget to use flexibly and an additional funding allocation to support its school improvement activities, documented in a NYCDOE procedure known as a School Allocation Memorandum (SAM). The Priority and Focus Schools SAM for school year 2014-15 is posted [here](#) and is also attached.

Staffing: Renewal School principals select staff to fill vacancies. Principal staffing actions include additional pay for certified staff for expanded learning as required by NYSED as a Priority School. Schools participate in NYCDOE teacher leadership programs to support the retention and development of expert teachers at their school. The NYCDOE provides organizational assistance to Priority Schools. The Office of State/Federal Education Policy & School Improvement Programs is designated to work with Priority Schools to select and implement their whole school reform models and assist the schools with compliance requirements. School Implementation Managers (SIMs) work with SIG schools on school improvement efforts and SIG compliance requirements.

Renewal School principals and their leadership teams were targeted by NYCDOE central for ongoing consultation recruitment and retention needs as well as a series of trainings, workshops, and activities that are customized to fit the specific needs of the school. Focus areas include recruitment and marketing to candidates, determining “right-fit” teachers, teacher selection, and supporting and retaining new and existing teachers.

Through the 2014 teachers’ contract and subsequent amendments (see the attached UFT MOA) three new teacher leader roles were created. All Renewal Schools had the opportunity to establish teacher leader roles with a designated funding allocation; below is additional information on three key new roles.

- Model Teacher: Takes on additional responsibilities such as establishing a laboratory classroom; demonstrating lessons; exploring emerging instructional practices; reflecting on and debriefing a visit from a colleague.
- Peer Collaborative Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the professional learning of their colleagues through peer coaching and intervisitation.
- Master Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the entire school or across multiple schools; responsible for school-level progress.

Teacher leaders are integral to the school improvement process as well as a way to retain high-performing teachers, recruit and attract experienced educators, create opportunities for collaboration, and further develop and refine teacher practice. As one principal explained, “Having a distributed leadership structure in this school is not only effective for building effective teaching practices, but also for running a school. It makes my day and my job infinitely easier. One example is planning [professional learning time] on Mondays... it is a big task. Knowing that we have teacher leaders working with teachers who are putting forth things they would like to work on makes that time more effective and the teachers more invested.”

Each school will receive up to \$27,500 to fund a team of teacher leaders. The allocation will be issued through a SAM following the completion of the teacher leader selection and staffing cycle. The selection process is a joint UFT-NYCDOE designed and implemented process. In addition, only teachers rated Effective and Highly Effective are eligible to apply.

Guidance provided by the NYCDOE includes that schools may use the allocation to fund one Peer Collaborative Teacher and two Model Teachers:

- Schools where teacher leadership has been the most successful in building school culture have staffed more than one teacher leader role at their school – ideally a team of at least three. Having more than one teacher leader at a school, formalizes teacher leadership to the rest of the staff and makes the work of the teacher leaders a larger part of the school culture.
- Given that the Peer Collaborative Teacher has release time, they are well positioned to organize the teacher leadership team in a way that broadens the impact of the teacher leader team and increases the potential supports for other teachers in the school. The Model Teachers act as key partners in the work to support growth through sharing their classroom with other teachers in the building.

Program selection: NYCDOE was among the first large urban school districts in the nation to recommend new high-quality Core Curriculum materials, with English Language Learner supports, for grades K-8 in ELA and math that align to the CCLS and promote the instructional shifts. The NYCDOE conducted an extensive research and review process in order to identify high-quality Core Curriculum materials that align to the CCLS and promote the Common Core Instructional Shifts for ELA and Mathematics. Additional information on NYCDOE and the Common Core may be found [here](#).

Each Renewal School participated in a needs assessment, which included the Surveys of Enacted Curriculum (SEC), a research-based, nationally validated set of online surveys that align teacher-reported data on ELA and mathematics instruction against the Common Core standards. The SEC is used as one set of data to help inform the school how what is happening in the classroom—the enacted curriculum—compares to the written curriculum and tested curriculum, including state assessments. It helps begin conversations about how to better align the three types of curricula. Reports were provided to each school to inform their SIG Cohort 6 plan.

There are differentiated professional supports provided to Renewal Schools. Teachers in K-8 schools are provided professional development through the Teacher's College Writing Project and the ReadyGen Independent Reading Initiative. Teachers in high schools are provided with professional development through the WITsi (Writing is Thinking Through Strategic Inquiry) process, included in the school-level SIG plans. Effective strategies for teaching expository writing will be taught explicitly up front and integrated into the strategic inquiry process. The rationale for their central role is that they are high-leverage strategies that target struggling students' deficiencies and that improve content knowledge, academic vocabulary, written language, oral language and reading comprehension simultaneously. They also help teachers pinpoint what struggling students need and how to provide it. The strategy is to begin (year 1) with a focus on the 9th grade and to focus on one additional grade each subsequent year (9th and 10th in year 2; 9th through 11th in year 3).

Schools are also selecting programs to improve school climate and safety with the goal of decreasing incident rates, suspension rates, and disruptive behavior, and an increase in teachers' ability to manage challenging student behaviors and an increase in student academic achievement. To help strengthen school communities and improve academic outcomes, staff members need support to understand and anticipate behavior issues before they escalate. The Positive Learning Collaborative (PLC) is a joint initiative between the NYCDOE and teachers' union, UFT, which provides intensive training and direct consultation to educators in order to develop the skills that prevent crises and help students focus on academic goals. Information about PLCs will be shared with SIG Cohort 6 schools for consideration of implementation.

Educational partner selection: As part of being a Renewal School and under the Community-Oriented School Design model, the school has selected partnerships with community-based organizations (CBOs) that offer tailored whole-student supports, including mental health services and after school programs. Principals have discretion over selecting educational partners, including those outlined in the SIG plan, that have been formally contracted by the NYCDOE after a vetting process. The NYCDOE oversees a request for proposal process from organizations experienced in working with schools in need of school improvement. Accountability plans for the partner must be included based on annual evaluations of student progress in the Priority School. If progress is not evident, then the work with the partner is discontinued.

Educational partner selection from pre-qualified organizations is accomplished through the Multiple Task Award Contract (MTAC) procedure, which provides a streamlined process for schools to follow, posted below. All RFPs are on the NYCDOE public website [here](#). Renewal Schools have selected from the following community-based organizations (CBOs) listed [here](#). CBOs selected for SIG Cohort 6 applicant schools include Zone 26, Grand Street Settlement, Center for Supportive Schools, Phipps Neighborhood, Good Shepard Services, Fordham University, the Child Care Center of New York, Westhab, and El Puente. More information about the chosen CBO is in Attachment Z.

The MOUs submitted under the SIG Innovation Framework for each school and CBO outline their partnership. The CBO selected is the lead partner in the SIG Innovation Framework

Community-Oriented School Design. The process for CBO selection involved the NYCDOE issuing a request for proposals to CBOs to partner with Renewal Schools. Once the pool of CBOs was selected, School Leadership Teams (SLTs) were able to interview CBO representatives to determine fit with the school. The SLT utilized a rubric that included questions on whether the CBO could support the vision of the school through understanding the student population and needs. The CBO works in collaboration with the school principal, SLT, and the community school director assigned to the school to coordinate resources.

Use of Time During and After School: The school has a variety of opportunities for changing the use of time during and after school. NYCDOE Priority Schools are implementing an additional 200 hours of Expanded Learning Time (ELT). NYCDOE created guidance for schools to implement ELT called Guidelines for Implementing Expanded Learning Time at Priority Schools; see [here](#). The Priority School has the option to have ELT providers support students through extended learning time.

All students in Renewal Schools will be given an opportunity for an additional hour of supplemental instruction each school day, beginning next school year; a separate budget allocation is provided for this purpose. The approach is that at least one hour of ELT is offered to every student, known as the Renewal Hour. Schools may offer both the Renewal Hour and other ELT programming. In addition, the lead CBO has funds budgeted in their Community Schools contract to hire staff for the ELT initiative. There are two basic models for the Renewal Hour: integration into the regular student school day or offering the ELT before or after the school day. The attachment “Guidance for Use of Expanded Learning Time” outlines the options for the implementation of Expanded Learning Time that Renewal Schools in more detail.

Schools can utilize a School-Based Option (SBO) to create flexible use of time. The SBO process allows individual schools to modify certain provisions in the teachers’ union (UFT)/NYCDOE Collective Bargaining Agreement. In the SBO process, the school community creates a plan for how to effectively implement extended learning time. The principal and school-based UFT chapter leader must agree to the proposed modification which is presented to school union members for vote. Fifty-five percent of the UFT voting members must affirm the proposed SBO in order for it to pass. The intent of the SBO process is to empower the school community on how to best make use of time before, during, and after school. The SBO process is described in the NYCDOE/UFT Collective Bargaining Agreement on page 46 [here](#) and is also attached.

C. District Accountability and Support

The LEA must have the organizational structures and functions in place at the district-level to provide quality oversight and support for its identified Priority Schools in the implementation of their SIG plans. The LEA plan for accountability and support must contain each of the following elements:

- i. Describe in detail the manner by which the district ensures that all federal requirements of a school’s chosen model are fulfilled and continue to be fulfilled throughout the duration of the grant.
- ii. Identify specific senior leadership that will direct and coordinate district’s turnaround efforts and submit an organizational chart (or charts) identifying the management structures at the district-level that are responsible for providing oversight and support to the LEA’s lowest achieving schools.

- iii. Describe in detail how the structures identified in “i” of this section function in a coordinated manner, to provide high quality accountability and support. Describe and discuss the specific cycle of planning, action, evaluation, feedback, and adaptation between the district and the school leadership. This response should be very specific about the type, nature, and frequency of interaction between the district personnel with school leadership and identified external partner organizations in this specific Priority School application.
- iv. For each planned interaction, provide a timeframe and identify the specific person responsible for delivery.

The central Office of State/Federal Education Policy & School Improvement Programs (organizational chart attached) works to identify and monitor Priority School whole school reform model selection and SIG progress monitoring. The School Implementation Manager (SIM) ensures SIG application development, implementation, and monitoring of the approved plan. Specific activities of the SIM include:

- Review quantitative and qualitative data to assess student strengths and weaknesses;
- Investigate root causes or contributing factors for low student achievement;
- Align resources to maximize benefits to students;
- Monitor plan implementation and make mid-course adjustments, as needed; and
- Evaluate the impact of improvement interventions and external partners.

Schools Chancellor Carmen Fariña assumed leadership of the NYCDOE in January 2014. Dr. Dorita Gibson is the Senior Deputy Chancellor and the Chancellor’s second in command overseeing all aspects of school support, Superintendents, support for struggling schools, District 75 and 79 programs, and school communications. Phil Weinberg is the Deputy Chancellor for Teaching and Learning overseeing professional development and curriculum, performance and accountability, Common Core and college-readiness initiatives, Career and Technical Education, and instructional support. Attached is a copy of the NYCDOE senior leadership organizational chart which also includes leadership in Family Engagement, Operations, Students with Disabilities, and English Language Learners, all of which play an integral role in coordinating turnaround efforts.

The NYCDOE is transitioning to a new school support structure now that will be in place and operational for the first day of school in September 2015. The new approach to school support is guided by six critical principles:

- 1) Clear lines of authority and accountability so all schools improve.
- 2) Families have one place to call if they cannot resolve problems at the school.
- 3) School leaders maintain the critical independence over budget and human resources they have had, so they can continue to drive improvement.
- 4) Provide customized support so school leaders can focus on those improvement efforts most likely to boost achievement.
- 5) Provide one-stop support to school leaders.
- 6) Create equity in the system by providing more intensive support to schools that need it most.

The new school support structure consists of four major parts:

- 1) Superintendent's Offices: each Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results
- 2) Borough Field Support Centers: each of the seven geographically located Borough Field Support Centers will utilize a BOCES model (Board of Collaborative Educational Services) in the provision of support to schools. An organizational chart is attached.
- 3) Central Teams
- 4) Affinity Groups, formerly called Partnership Support Organizations

As Renewal Schools, under the direction of the Superintendent, the Principal Leadership Facilitators and Directors for School Renewal (DSRs) are the core drivers of school improvement and implementation for Renewal Schools within their district. The DSR oversees and supervises the coordination and delivery of intensive supports to persistently low achieving schools. The DSR assists with needs-aligned instructional and operational supports to a number of underperforming schools, including professional development, intensive interventions, summer programming and extended learning opportunities, to ensure accelerated academic achievement for the schools served. Attached is a copy of the Renewal Schools Program organizational chart.

DSRs work with Renewal Schools to coordinate all school improvement efforts; SIMs work in collaboration with DSRs on SIG requirements. Community School Directors (CSDs) are assigned to each Renewal School to coordinate resources at the school-level with the CBO and school. The attached "Stages of Development in a NYC Community School" provides a rubric for schools to move from exploring to excelling in the features of a community school. Staff are held accountable through performance reviews and grant monitoring. External partner organizations working with Priority Schools are evaluated by schools and the NYCDOE based on performance targets. Regular meetings take place with partners to ensure effectiveness, and through the SIG Innovation Framework Community-Oriented School Design the NYCDOE will convene all lead partners and school leaders as done with its School Innovation Fund (SIF) lead partners last year to share expectations of SIG and as a lead partner.

Interactions with the Renewal School include weekly coaching visits to schools by DSRs and content specialist instructional coaches. There are frequent observations with timely, accurate, and actionable feedback. Superintendents provide professional development for school leaders through organizing bi-monthly, collaborative Principal meetings. Superintendents also conduct school visits and provide feedback to school leaders. Leadership coaches who are former successful principals have been assigned to Renewal School principals. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor ongoing progress; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent.

SIMs have a caseload of approximately a dozen schools implementing SIG Cohorts 2-6 and SIF. SIMs are in each of their schools at least twice per month, communicate with school teams on progress monitoring, and represent their schools to NYSED in the progress monitoring process. Benchmarks have already been set for the school through the RSCEP, which align to SIG benchmarks, and require an increased level of accountability. Using these measures, Renewal Schools will be further evaluated by their superintendent at the conclusion of each of the next two school years, in June 2016 and June 2017.

One Renewal School benchmark of note is that of student attendance which is also reviewed by NYSED in SIG progress monitoring. This measure is required for all Renewal Schools as it is a key indicator of schools' progress. NYCDOE had 81 schools implementing SIG and SIF grants in school year 2014-15 and participated in U.S. Department of Education SIG monitoring of NYSED to outline its SIG development, implementation, and monitoring process. SIG Cohort 6 school plans outline strategies that will lead to successful outcomes in the leading indicators that are measured in NYSED SIG monitoring, including improvements in the areas of student attendance, teacher attendance, discipline referrals, ELT opportunities, and academic data.

In November 2014, NYCDOE released two new school quality reports, which present information about the school's practices, learning environment, and performance results. The School Quality Snapshot is designed specifically for families, and provides a concise summary of each school's practices, environment, and performance. The School Quality Guide is a more detailed report with additional information, including multiple years of data to show the school's progress over time. The Guide also sets rigorous and realistic targets that are based on the historical performance of schools with similar populations and the city as a whole for schools in areas including student achievement, student progress, and college and career readiness.

Each Renewal School was provided a menu from which they chose leading indicators and student achievement benchmarks. Generally the targets included in the NYCDOE [High School](#) and [Elementary/Middle School](#) Quality Guides were used as the basis for setting these benchmarks. The attached shows samples from the benchmarks menus provided 1) for an elementary/middle school and 2) for a high school. The guidelines for choosing benchmarks are similar; the leading indicators and student achievement benchmarks are different based on the school grade level.

Schools began receiving new data tools this year to help them track student progress and school improvement. The Progress to Graduation Tracker provides high schools and transfer high schools with credit and Regents data to more easily track individual students' progress toward graduation. The Tracker is updated on a daily basis so that educators can use the most up-to-date information possible when identifying students who may be in need of additional supports and interventions to help them succeed. The School Performance Data Explorer allows elementary, middle and high schools to easily search, sort, and monitor metrics for current students across subgroups and overtime. The tool includes information on how former students are doing academically since they have left the school. By allowing educators to examine both whole-school and individual-student metrics and trends, the Data Explorer is meant to help schools

better identify and support struggling students earlier than ever before, identify and address performance trends at their school, and track current and former students' progress over time.

The following chart summarizes the interactions, timeframe, and persons responsible that are discussed in this section:

Planned School Improvement Interaction	Timeframe	Person Responsible
Professional development for school leaders. School visits & feedback for school leaders.	Bi-monthly collaborative Principal meetings On-site school visits	Superintendent
Professional support to implement feedback provided by the Superintendent. Monitor progress and help to make adjustments when necessary.	On-going	Principal Leadership Facilitator (PLF)
Supervises the coordination and delivery of multiple supports from NYCDOE. Provides instructional and operational support for schools. Supports professional development needs of the school. Supports interventions, summer programming and extended learning opportunities for schools. Provides content coaching and classroom observations and feedback.	Weekly visits to School	Director for School Renewal (DSR)
Coordinate resources at the school-level with the CBO and school.	On-site daily	Community School Director (CSD)
Support and monitors SIG implementation. Coordinate with Superintendent teams on school improvement initiatives for SIG	Bi-monthly on site visits	School Implementation Manager (SIM)

D. Teacher and Leader Pipeline

The LEA must have a clear understanding of the type and nature of teachers and leaders that are needed to create dramatic improvement in its lowest-achieving schools. In addition, the LEA must have a coherent set of goals and actions that lead to the successful recruitment, training, and retention of teachers and leaders who are effective in low-achieving schools. The LEA's plan must include each of the following elements:

- i. Identify and describe recruitment goals and strategies for high poverty and high minority schools to ensure that students in those schools have equal access to high-quality leaders and teachers.
- ii. Describe the district processes for altering hiring procedures and budget timelines to ensure that the appropriate number and types of teachers and principals can be recruited and hired in time to bring schools through dramatic change.
- iii. Identify and describe any district-wide training programs designed to build the capacity of *leaders* to be successful in leading dramatic change in low-achieving schools. In addition, describe how these programs are aligned to the implementation of the specific model chosen (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*). Provide a history of these or similarly purposed programs in the district, how they are or have been funded, and identify whether the school principals chosen to lead the new school designs proposed in this application have emerged as a direct result of these programs. Please identify the goals in terms of quantity and quality of effective leader development.*
- iv. Identify and describe any district-wide training programs designed to build the capacity of *teachers* to be effective specifically in low-achieving schools. Provide a history of these programs in the district, how they are or have been funded, and identify whether the instructional staff chosen for the new school designs proposed in this application have emerged as a direct result of these programs. If the programs are newly proposed, please identify the goals in terms of quantity and quality of effective teacher development.*
- v. Identify in chart form, the district-offered training events for items "iii & iv" above, scheduled during the year-one implementation period (September 1, 2015 to June 30, 2016). For each planned event, identify the specific agent/organization responsible for delivery, the desired measurable outcomes, and the method by which outcomes will be analyzed and reported. Provide a rationale for each planned event and why it will be critical to the successful implementation of the SIG plan.

*The district-wide training and professional development programs to be identified in this section are those that are offered by the district to a group or cluster of like schools (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*) and/or to cohorts of teachers and leaders who will serve in them (e.g., training for turnaround leaders; training for teachers who need to accelerate learning in Priority Schools where students are several levels below proficiency; training for school climate and culture in Priority Schools, etc.). NYSED's Strengthening Teacher and Leader Effectiveness (STLE) grant may provide suitable examples of the types of training and professional development expected in this section. See <https://www.engageny.org/resource/improving-practice>. School-specific and embedded training and professional-development should be detailed in Section II. I.

The NYCDOE believes in its talent: the teachers, school leaders, and other personnel who work with our city's 1.1 million students. The mission of the [Office of Leadership](#) is to build and sustain a leadership pipeline that yields high-quality leaders at all levels of the system, including teacher leaders, assistant principals, principals, and systems-level leaders. The pipeline structure has systemic supports and effective leadership development programs at each stage to identify and cultivate:

1. Strong teachers to meet the citywide instructional expectations and move into more formal teacher leadership development programs;
2. Effective teacher leaders and assistant principals to move into principal pipeline programs and then into principal positions;

3. Quality support for novice principals; and
4. Opportunities for experienced principals to mentor aspiring leaders.

The NYCDOE seeks to ensure that every student has the opportunity to learn from a high-quality educator in a school with a strong school leader, particularly in Priority Schools where the need is great. To accomplish this goal, we developed a pipeline of expert teachers and leaders and provide them with targeted support. To increase the number of candidates who are well-prepared to become principals, we have strengthened our principal preparation programs. Simultaneously, we have shifted our focus toward identifying talented educators and nurturing their leadership skills while they remain in teacher leadership roles. Our theory of action is that if we invest in providing job-embedded leadership development opportunities for our most promising emerging leaders and supporting our strongest current leaders to build leadership capacity in others, then we will build a leadership pipeline that is more cost-effective and sustainable, and produces more high quality next-level leaders.

The NYCDOE created the Principal Candidate Pool selection process to make clear the expectations for principals in the recruitment process. The process is used to discern all candidates' readiness for the position of principal and ability to impact student achievement. The NYCDOE has launched an enhanced version of the Principal Candidate Pool process in order to meet the following objectives:

- Align the screening process to clear, high standards that are consistent with the expectations to which principals will be held accountable under 3012-c.
- Offer participants an opportunity to receive high-quality professional development about the NYCDOE's expectations of principals.
- Provide hiring managers with multi-dimensional information to help enhance strategic placement hiring decisions related to principals.

To recruit expert teachers, NYCDOE creates a diverse candidate pool. For subject-shortage areas in which there are not enough traditionally-certified teachers to meet the needs of schools, we developed alternative-certification programs such as the New York City Teaching Fellows, which draws skilled professionals and recent college graduates to teach in high-need schools. Begun in 2000, since then the program has provided schools with more than 17,000 teachers. In addition to the NYC Teaching Fellows program, the NYCDOE has created an innovative residency program called the NYC Teaching Collaborative that recruits and trains a cohort of 50 new teachers annually through a practice-based teacher training model in hard-to-staff schools. This program is modeled after the nationally known program run by AUSL in Chicago. Additionally, the NYCDOE recruits annually a cohort of new hires that have been identified as top tier recruits to fill positions in struggling schools called the "Select Recruits" program.

The NYCDOE created teacher recruitment initiatives to build a pipeline of teachers prepared to turnaround the performance of our lowest-performing schools and teacher leadership programs for experienced educators to support professional development in their schools. In June 2014 the NYCDOE and UFT negotiated a set of teacher leadership positions and those positions have been focused in a subset of schools to serve as a vehicle to attract new talent to struggling schools and create leadership opportunities for current teachers on staff. In spring 2015 a cohort

of school participated in a foundational teacher leadership professional learning series that oriented teachers to the new positions and provided opportunities for foundational skill development in key teacher leadership skills. The NYCDOE also leverages the state-funded Teachers of Tomorrow grant to provide recruitment and retention incentives for teachers to work in our highest-need schools.

To support schools in recruiting and retaining this new talent at the school level, the DOE produces annual “Smart Retention” reports which create a picture of a school’s history in retaining talent year over year. Alongside the report, NYCDOE offers coaching in recruitment and retention strategies for a subset of identified schools. Each year the NYCDOE sets hiring policies to ensure that teachers and principals can be recruited and placed into our schools. Principals are typically in place in schools by July before the start of the next school year to begin year-long planning and school improvement efforts and teachers in place by September. Once selected, principals are empowered to make certain staffing decisions for their schools. Schools receive their budgets for the new fiscal year by June.

Annual hiring exceptions are set to ensure that hard-to-staff schools are staffed appropriately. These exceptions are made on the basis of the following factors: hard to staff subject areas, geographic districts, and grade level (elementary, middle, high). The timeline allows school leaders the ability to plan for any staffing needs or adjustments in concert with the citywide hiring process which begins in the spring and continues into the summer.

The NYCDOE creates and collaborates with partners on principal training programs to build a pipeline of principals with the ability to drive teaching quality and student achievement district-wide, particularly in schools with the greatest need. Our principal preparation programs share the following characteristics: 1) a carefully-developed recruitment process to screen for highly qualified participants, 2) required completion of a practical residency period, and 3) projects capturing evidence of impact on leadership development and student gains. The NYCDOE is now committed to hiring principals with at least seven years of education experience. LEAP, launched in 2009, is a rigorous 12-month on-the-job program. LEAP develops school leaders within their existing school environments and creates opportunities to harness existing relationships including those with current principals and school communities. The LEAP curriculum differentiates learning based on individual needs and is aligned with the NYCDOE’s instructional initiatives and the CCLS.

Leadership coaches who are former successful principals have been assigned to Renewal School Principals that are leading high schools. The DSRs collaborate closely with the ELI Principal Leadership Coaches and Leadership Academy coaches. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor the ongoing progress of the Renewal efforts; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent to stay apprised of all the initiatives.

K-8 Renewal School principals are provided professional development and support through the School Renewal Principal Learning Community, which meets five times per year around thematically organized sessions designed to engage school leaders in their own professional learning. The sessions also involve guest speakers and experts in the field. Renewal Principals Study Groups are led by a panel of advisory principals and focus on developing leadership expertise in one or more of the following areas: budgeting, data analysis, curriculum and instruction, parent engagement and rebranding which involves re-visiting the mission and vision. Please see Attachment Z: School-Level Information for District-Level Plan for information about the principal chosen to lead the school design.

The NYCDOE believes that to support teachers in their growth and development, it is important to have a common language and understanding of what quality teaching looks like. We have invested significant resources into beginning the work of developing principals' and teachers' understanding of Charlotte Danielson's Framework for Teaching, while training principals to do more frequent cycles of classroom observations and feedback. Resources to begin this work are provided to principals and educators in a number of ways: central and school-based professional development opportunities, online courses, and Teacher Evaluation and Development Coaches (TDECs) who work across multiple schools within their district. In addition, the NYCDOE has developed district-wide training programs to build the capacity of specific groups of teachers, including new teachers, teacher leaders, and teachers that work with special populations.

As of July 1, 2015, the NYCDOE Talent Coach and MOSL Specialist positions have been combined to create a new role: the Teacher Development and Evaluation Coach (TDEC). TDECs are supervised by superintendents and as such support school leaders throughout their district with *Advance*, NYCDOE's teacher development and evaluation system. Teacher Development and Evaluation Coaches (TDECs) collaborate with and support instructional leaders in using *Advance* to assess teacher practice, utilize measures of student learning to assess teacher effectiveness, and deliver high-quality developmental feedback to improve teacher effectiveness and student learning. Coaches also inform central efforts to develop and refine systems, research tools and program policies that support school leaders across New York City in providing meaningful evaluations and targeted professional development to teachers.

New teachers who work in low-achieving schools are provided differentiated levels of support, depending on their pathway to teaching. The New York City Teaching Collaborative offers a subsidized Master's degree program and focuses on supporting our highest-need schools, provides intensive training and school placement during the spring, with ongoing mentoring and training throughout the fall.

Several district-wide training programs are also available for teacher leaders who work in low-achieving schools. We are looking to improve the teacher leadership programs that we offer and are now working to create career ladders for teachers. All of the programs have developed continuous feedback loops (surveys, focus groups, school-based visits) to ensure that professional development is effectively being delivered and meeting the needs of new teachers and teacher leaders. Current programs that exist include the Teacher Incentive Fund (TIF) Program, the three new identified teacher leadership positions, and the Learning Partners Program which allow teachers to stay in the classroom while collaborating with colleagues

within and across schools. Professional development is also offered through collaboration with the UFT Teacher Center. More information about teacher career pathways is [here](#).

A chart is included as an attachment on NYCDOE trainings offered, and additional information is included as an attachment as “Programs and Partnerships 2015.”

E. External Partner Recruitment, Screening, and Matching

The LEA must have a rigorous process for identifying, screening, selecting, matching, and evaluating partner organizations that provide critical services to Priority Schools.

- i. Describe the rigorous process and formal LEA mechanisms for identifying, screening, selecting, matching, and evaluating external partner organizations that are providing support to this Priority school.
- ii. Describe the LEA processes for procurement and budget timelines (and/or any modifications to standard processes) that will ensure this Priority School will have access to effective external partner support prior to or directly at the start of the year-one pre-implementation period and subsequent implementation periods.
- iii. Describe the role of the district and the role of the school principal in terms of identifying, screening, selecting, matching, and evaluating partner organizations supporting this school. Describe the level of choice that the school principal has in terms of the educational partners available and how those options are accessible in a timeline that matches the preparation and start-up of the new school year.
- iv. If the model chosen is *Restart*, the LEA/school must describe in detail the rigorous review process that includes a determination by the LEA that the selected CMO or EMO is likely to produce strong results for the school. See federal definition of ‘strong results’ at <http://www2.ed.gov/programs/sif/index.html>. Federal Register, vol. 80, no. 26, pg. 7242.

To identify, screen, select, match, and evaluate external partner organizations, the NYCDOE uses a Pre-Qualified Solicitation (PQS) process. PQS is an ongoing open call-for-proposals process by which the NYCDOE selects potential partners. Each partner undergoes a screening process, which includes a proposal evaluation by a committee of three program experts who independently evaluate partner proposals in terms of project narrative, organizational capacity, qualifications and experience, and pricing level. The result is a pool of highly-qualified partner organizations which are approved and fully contracted. The Priority School is then able to select services from any of the pre-qualified external partner organizations by soliciting proposals and choosing the best fit according to its needs. If a principal is interested in a specific partner that has not already been approved, then she/he can recommend that the partner engage in the qualification process with the NYCDOE.

In addition, the NYCDOE uses a specific solicitation process called Whole School Reform, which seeks proposals from organizations experienced in working with schools in need of school intervention. The goal is for the partners to support the school to build capacity and enable the school to continue improvement efforts on its own. Partner proposals must offer a variety of methods and strategies grounded in best practices to achieve substantial gains. Potential partners provide accountability plans that include annual evaluations on student achievement progress and the process for enabling schools to continue the reform efforts beyond the contract period, along with at least three references from current or past client schools. Once partner proposals are reviewed by the evaluation committee and recommended for approval, further due diligence is done before formal recommendation for the Panel for Educational Policy for approval. Principals have discretion to select approved partners based on their scope of service needs.

Please see Attachment Z: School-Level Information for District-Level Plan for information about the CBO that is providing support to this Priority School. The school-level plan for this Priority School describes the particular design framework proposed and the scope of the re-design, as well as our rationale for selecting the chosen external partner as a solution to address identified gaps.

Priority Schools receive budget allocations for the new fiscal year by June, well in advance of the start of the new fiscal year in July and the start of the school year in September. The NYCDOE budget process provides principals with ample time to secure external partner support through the above-mentioned systems. Principals may secure services from a list of external partners that have already been thoroughly vetted by NYCDOE. Individual principals create a scope of service and solicit proposals from partners based on their specific needs. Once received, principals score proposals and award contracts to the most competitive and cost-effective partners. Priority Schools secure support from effective external Whole School Reform partners as early as May or June, well in advance of the year-one implementation period.

The NYCDOE manages the initial process of screening potential partner organizations so that principals can focus on selecting partner organizations based on their budget and service needs. NYCDOE manages an ongoing call-for-proposals process for select categories of services to schools. All proposals received by the NYCDOE must first be reviewed to determine if they meet all of the submission qualifications prescribed in the call for proposal. Proposals meeting these requirements are evaluated and rated by a district-based evaluation committee.

As needed, the NYCDOE may conduct site visits to verify information contained in a proposal and may require a potential partner to make a presentation on their services or submit additional written material in support of a proposal. Once the NYCDOE recommends a vendor for award, the recommendation is reviewed by the Division of Contracts and Purchasing for approval and then the Panel for Educational Policy for review and final approval.

Priority School principals are able to contract services from any of the approved pre-qualified educational partners by developing a specific scope of work, soliciting proposals using a user-friendly online tool and choosing the most competitive partner according to their specific needs. Once school principals receive school budgets for the new fiscal year in June, they are able to begin negotiating with potential partners for services in the new school year. The process allows principals sufficient time to solicit vendors and establish contracts in time for the new school year and possible preparation activities during the summer.

At the end of each school year, each school principal evaluates the services of the vendors – based on the objectives, proposed scope of services, and outcomes from the services – and determines whether to continue the partnership. Central staff assist the Priority School in evaluating the impact of chosen partners toward meeting the school’s improvement goals.

F. Enrollment and Retention Policies, Practices, and Strategies

The LEA must have clear policies, practices, and strategies for managing student enrollment and retention to ensure that Priority Schools are not receiving disproportionately high numbers of students with disabilities, English-language learners, and students performing below proficiency.

- i. Identify and describe similarities and differences in the school enrollment of SWDs, ELLs, and students performing below proficiency in this Priority School as compared with other schools within the district. Discuss the reasons why these similarities and differences exist.
- ii. Describe the district policies and practices that help to ensure SWDs, ELLs, and students performing below proficiency have increasing access to diverse and high quality school programs across the district.
- iii. Describe specific strategies employed by the district to ensure that Priority schools in the district are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency.

Please see Attachment Z: School-Level Information for District-Level Plan for information about this Priority School's enrollment as compared with other schools.

The NYCDOE operates a school choice-based system for students and families from Pre-Kindergarten to high school. In the past several years, the NYCDOE has worked to increase equitable access to high quality programs at all grade levels. All students, including students with disabilities, English Language Learners, and students performing below proficiency have access to all public schools as part of the choice-based enrollment system. Students participating in Pre-Kindergarten admissions can access NYCDOE district schools and New York City Early Education Centers (NYCEECs). The NYCDOE works to make as many pre-K programs as possible available to families. This year, families had the benefit of a new streamlined application process. This single application process allowed families to rank their options in order of preference, including both NYCDOE district schools and NYCEECs. Students participating in Kindergarten admissions can access all elementary choice and zoned schools. Zoned schools give priority to students who live in the geographic zoned area. Choice schools are schools that do not have a zone and give priority to applicants based on sibling status, district of residence, and in some cases, other criteria. The Kindergarten application process is a single application that allows parents to rank their school options in order of preference, including both zoned and choice schools.

At the middle school level, families also may submit a single application that allows them to rank their school options in order of preference. Some community school districts maintain primarily zoned middle schools, which give priority to students in the geographic zone. Most districts also have choice schools which have admissions methods based on academic or artistic ability, language proficiency, demonstrated interest, or a lottery (unscreened). At the high school level, approximately 75,000 students participate annually in a single application process that covers over 400 schools. The citywide choice process provides an opportunity for all participants to select up to 12 choices from across the five boroughs. The process consistently matches the majority of students to their top choice schools; for the previous five years, high school admissions has matched over 80% of students to one of their top five choices. Students may participate for both 9th grade and 10th grade admissions.

Since the 2012-13 school year, students with disabilities who have IEPs have benefited from improved access to zoned and choice schools. Rather than being assigned to a school based solely on availability of their recommended special education program, students with IEPs participated fully in the standard Kindergarten, middle school, and high school admissions process alongside their peers. This increased level of access will continue to scale up until the NYCDOE can ensure all students with disabilities have access to the schools they would otherwise attend if they did not have an IEP and, furthermore, that their special education programs, supports, and services be available in the schools to which they are matched.

Throughout the 2013-14 and 2014-15 school years, the Division of Specialized Instruction and Student Support (DSISS) partnered with field-based school support teams and schools to proactively support students with disabilities in the following four areas: student engagement in rigorous curriculum with full access to community schools and classrooms, development and implementation of quality IEPs, infusing school-wide and individualized positive behavioral supports, and effective transition planning. For the 2015-16 school year, DSISS will continue this work. All stakeholders will continue to be responsible for ensuring students with disabilities are educated in the most appropriate, least restrictive environment. To that end, through the NYCDOE's special education reform work, schools will engage in professional learning opportunities that focus on the continued commitment to supporting all educators in their understanding and facility with learner variability, access to content, rigorous expectations, inclusion, and the essential knowledge and skills needed for students to be college and career ready. Priorities for professional development are built on themes that reflect research- and evidence-based best practices and are fully integrated with the Common Core Learning Standards and *Advance*.

The NYCDOE has begun to put in place policies and practices designed to ensure that Students with Disabilities (SWDs), English Language Learners (ELLs), and students performing below proficiency have increasing access to diverse and high quality school options across the district. Our current SWD and ELL policies and guidance not only support schools in focusing their programming practices around student needs, but also encourage schools to develop a deep knowledge and understanding of their students' strengths, needs, and preferences in order to drive programmatic planning and/or shifts. Schools are supported in expanding their continuum of services to provide differentiated and individualized levels of support rather than stand-alone special education programs, so that students may receive recommended services based on individual needs at their schools of choice. For ELLs specifically, the NYCDOE encourages families of eligible students to request a bilingual program in their schools, knowing that if there is sufficient interest then schools will create and sustain bilingual programs that benefit not only ELLs, but also students interested in learning a second language.

In addition, for students with specific disabilities who may benefit from specialized instructional and/or social-emotional strategies, the NYCDOE continues to create and expand specialized programs in community schools and specialized schools. For SWDs, the NYCDOE has grown the number of District 75 (D75) specialized schools for students with disabilities, specialized programs in community schools for students with Autism Spectrum Disorders (ASD) known as the ASD Nest Program and the ASD Horizon Program, specialized programs in community schools for students with intellectual disability or multiple disabilities known as Academic,

Career, and Essential Skills (ACES) Programs, and also Bilingual Special Education (BSE) Programs for ELLs with IEPs who are recommended for a special education program in their home/native language. Families of students with specific disabilities may also elect to enroll in their zoned school.

District 75 provides citywide educational, vocational, and behavior support programs for students who are on the autism spectrum, have significant cognitive delays, are severely emotionally challenged, sensory impaired and/or multiply disabled at more than 310 sites. Specialized Programs in community schools (ASD Nest, ASD Horizon, ACES, and BSE Programs) are intended to increase access to community schools even further, for students with these specific disabilities for whom a District 75 school was historically more likely to be recommended. The ASD Nest Program and ASD Horizon Program are two different programs in community schools that serve admitted students with a disability classification of autism. Each program is designed to develop students' academic and social skills, but has different service delivery models and admissions criteria. The ASD Nest Program is primarily designed to support students with ASD who would benefit from intensive social skills development. As the result of significant growth in these programs, in 2014-15, a student on the autism spectrum was more than three times as likely (from 9% to 29%) to attend a community school than in 2007-8. This is especially significant given that over the same time period, the numbers of students classified as autistic has more than doubled, from 5,365 to 13,161 students.

The NYCDOE offers a range of high-quality programs for students performing below proficiency. The Office of Postsecondary Readiness works to support over-age and under-credited students, students enrolled in Career and Technical Education programs and Black and Latino students. The NYCDOE has Transfer Schools, which are small, academically rigorous, full-time high schools designated to re-engage students who have dropped out or who have fallen behind in credits. CTE is delivered in two ways across the NYCDOE: at designated CTE high schools and CTE programs in other high schools. CTE programs offered in high schools are developed in response to future employment opportunities and the potential for career growth in New York City. Currently, CTE programs are offered in fields ranging from aviation technology and culinary arts to emergency management and multimedia production.

In addition to expanding access to high-quality school and program options for SWDs, ELLs, and students performing below proficiency, the NYCDOE is committed to supporting schools in meeting students' unique learning needs. The NYCDOE previously made modifications to the Fair Student Funding formula to provide weights, which provide additional funding, for students who require additional support in order to succeed, including weights for Academic Intervention Services (AIS), ELLs, and Special Education Services. In 2011-12, the NYCDOE revised the funding methodology to provide additional weights to traditional high schools serving overage under-credited (OAUC) students. Providing schools with additional funding for AIS and OAUC further supports students that are performing below proficiency.

Meeting the needs of ELLs and SWDs is an area of special need in our schools. The UFT Teacher Center will support educators in SIG Cohort 6 schools through customized professional learning opportunities targeted to meet the unique needs of each school. Three Teacher Center Field Liaisons will collaborate with administrators and the school-based staff development committee to design learning opportunities to meet the needs of all learners, including ELLs and

SWDs.

The UFT Teacher Center Field Liaison will work in participating schools with Master/Peer Collaborative and Model Teachers and school-based site staff to:

- Design customized professional development
- Provide intensive, ongoing, job-embedded professional development, including one-on-one coaching, in-classroom support and coaching, demonstration lessons, co-teaching, classroom learning labs, study groups and work sessions, to impact student achievement
- Collect, analyze and interpret data for making instructional decisions
- Use data and facilitate the creation of action plans for data-driven professional development, learning laboratories and study groups, etc.
- Integrate instructional technology into teaching and learning

The NYCDOE employs specific strategies to ensure that Priority Schools are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency. One important strategy is the reform of the over-the-counter (OTC) process, which has been critical to managing disproportionately high enrollment of SWDs, ELLs, and students performing below proficiency in Priority Schools. Each summer, the NYCDOE opens temporary registration centers across the city to assist families seeking placement or hardship transfers (primarily in high school grades) during the period before the start of school. Approximately 15,000 new or returning students are placed during this peak OTC period and many are higher-needs students. For the past several years, the NYCDOE has added seats to every high school's OTC count. As a result, the impact of OTC placements at low-performing schools, including Priority Schools, was minimized, and there was an increase in student access to more programs.

For fall 2015, the NYCDOE Chancellor has publicly committed to reducing OTC in Renewal Schools, including all the schools applying for SIG Cohort 6. Additionally, in 2014-15, NYCDOE implemented a one-year elimination of OTC enrollment for the two State-identified Out of Time schools.

Another important strategy is the NYCDOE enrollment "targets" for Students with Disabilities, in which elementary, middle, and high schools allot a percentage of their seats to SWDs, equivalent to the district or borough rate of SWDs. In 2014, students with recommendations of services for 20% or more of their day were included in these targets. This strategy has contributed to an impressive decline in the number of schools serve few SWDs. Between 2007-08 and 2014-15, the percentage of schools that enroll SWDs at a rate of 10% or less has been cut in half, from 19% of schools in 2007-08 to just 9% of schools in 2014-15.

Furthermore, to increase access to some of NYCDOE's highest performing schools, NYCDOE has reduced the screening requirements for seats in selective programs that maintain unfilled seats. Typically, schools that have screened programs are allowed to rank students who meet that program's admissions criteria, and only those students who are ranked may be matched to that school. Since 2012, the NYCDOE has worked with screened schools to increase the number of SWDs ranked and matched to their programs. In situations where schools do not rank a sufficient number of SWDs, additional SWDs are matched to the unfilled seats in order to provide greater

access for these students to high-quality schools. In its first year, this work resulted in 20 programs placing approximately 900 additional students into academically screened seats that would have otherwise gone unfilled. For students entering high school in 2013, the NYCDOE placed almost 1,300 students were placed into these programs. The NYCDOE will continue this work in the upcoming school year.

The Public School Choice transfer process is another strategy that NYCDOE uses to help reduce the number of higher-needs, lower-performing students in Priority schools. Through Public School Choice, all students attending Priority schools are given the opportunity to transfer out of their current school and into a school that is “In Good Standing.” Students submit an application in the spring listing their choices, and they receive an offer over the summer for the upcoming fall. Lower-performing students and lower-income students are prioritized to receive an offer of their choosing. Furthermore, the NYCDOE has slightly revised the process in recent years to make the following two changes: the lowest-performing students within Priority Schools are more accurately identified through the use of indicators beyond merely test scores (including a promotion-in-doubt indicator based on grades and an indicator for students in temporary housing); students attending Priority Schools are prioritized to receive an offer above students attending Focus Schools. In 2014, over 6,500 families applied for transfers through Public School Choice and over 4,500 students received an offer.

G. District-level Labor and Management Consultation and Collaboration

The LEA/school must fully and transparently consult and collaborate with recognized district leaders of the principals’ and teachers’ labor unions about district Priority Schools and the development and implementation of the plan proposed for this specific Priority School proposed in this application. The evidence of consultation and collaboration provided by the LEA must contain each of the following elements:

- i. Describe in detail the steps that have occurred to consult and collaborate in the development of the district and school-level implementation plans.
- ii. Complete the Consultation and Collaboration Form and submit with this application (Attachment A).

The NYCDOE has consulted and collaborated with key stakeholders on the development of SIG Cohort 6 plans. Application and NYCDOE-developed guidance materials were shared directly by staff with the parent leadership group, CPAC; the principals’ union, CSA; and the teachers’ union, UFT. The engagement process with each group took place via meetings, phone calls, and emails about the applications. School Leadership Team (SLT) meetings took place to discuss school plans, which includes the principal, parent representatives, and UFT school leadership.

NYCDOE staff met with the Chancellor’s Parent Advisory Council (CPAC) in a full meeting on June 11 to discuss SIG Cohort 6. CPAC is the group of parent leaders in the NYCDOE; it is comprised of presidents of the district presidents’ councils. The role of CPAC is to consult with the district presidents’ councils to identify concerns, trends, and policy issues, and it advises the Chancellor on NYCDOE policies. NYCDOE staff met with UFT leadership on June 29 and engaged in multiple phone calls and emails with UFT regarding plan and overall school feedback subsequent to this meeting. CSA was also consulted with via phone calls and emails. All groups received district and school drafts for review and feedback.

The NYCDOE is committed to collaboration in its efforts to improve Renewal Schools. Teacher leaders in particular are integral to the successful implementation of all other school improvement measures. They serve as indispensable colleagues for school leaders, ensuring that the school community retains its most effective teachers, is supportive of all teachers' growth, and increases student achievement. School-level plans include information about faculty senates or other structures to promote shared school-based governance, responsibility, and collaboration in the interests of furthering the educational mission of each school. Moreover, the success of these schools depends largely on developing in parents an ownership and leadership in schools. This means shifting the paradigm from parents as participants to parents as leaders and decision-makers who work hand-in-hand with school staff and CBOs. Stakeholder collaboration will continue to be a focus for each SIG Cohort 6 school.

In addition to the district-level Attachment A, NYCDOE asked that schools submit a school-level Attachment A, the Consultation & Collaboration Documentation Form, in order to ensure consultation and collaboration took place on the school-level plans with staff and parent stakeholder groups. Signatures include the school's principal, parent group president, and UFT representative. These school-level forms are also attached in addition to the required district-level Attachment A. The district-level form is signed by the president/leaders of the teachers' union, principals' union, and district parent body as of July 17 and July 20. The individuals who signed are Michael Mulgrew, UFT President; Ernest Logan, CSA President; and Nancy Northrup, CPAC Co-Chair.

STRONG SCHOOLS, STRONG COMMUNITIES

OVERVIEW

As Chancellor Fariña announced in January, we are launching our Strong Schools, Strong Communities support structure for school year 2015-16. This new school support structure will ensure that every NYC public school student graduates prepared for college, career, and independent living. The new school support model helps us to achieve this vision by aligning supports to supervision, tailoring supports to individual school needs, and bringing expertise closer to school.

The Strong Schools, Strong Communities support structure is driven by a capacity building approach. The new support structure will provide you and your staff the resources needed to implement meaningful change through continuous cycles of improvement. The new structure includes the following components:

Central Teams

- DOE leadership will work with Borough Field Support Centers and Superintendents to guide policy implementation, provide training, and lead initiatives

Superintendents

- Work to ensure that schools meet student achievement goals and identify areas of focus for support; accountable for all schools in their districts

Borough Field Support Centers

- 7 centers will provide tailored, coordinated delivery of instructional, operational, and student services to schools

Affinity Groups

- 6 providers will work with groups of Secondary and High Schools under a Superintendent and provide integrated supports to schools for a period of 3 years

BOROUGH FIELD SUPPORT CENTERS

Each of the 7 Borough Field Support Centers – overseen by Directors – will provide high-quality, differentiated support in the areas of instruction, operations, student services such as safety, health, and wellness, and support for English Language Learners and Students with Special Needs.

Bronx (Districts 7, 8, 9, 10, 11, 12): Jose Ruiz (JRuiz2@schools.nyc.gov) – 1 Fordham Plaza, Bronx, NY 10458 and 1230 Zerega Ave., Bronx, NY 10462

Brooklyn (Districts 13, 14, 15, 16, 19, 23, 32): Bernadette Fitzgerald (BFitzge2@schools.nyc.gov) – 131 Livingston St., Brooklyn, NY 11201

Brooklyn (Districts 17, 18, 20, 21, 22): Cheryl Watson-Harris (CWatsonHarris@gmail.com) – 415 89th St., Brooklyn, 11209 and 4390 Flatlands Ave., Brooklyn, NY 11234

Manhattan (Districts 1, 2, 3, 4, 5, 6): Yuet Chu (YChu@schools.nyc.gov) – 333 7th Avenue, Manhattan, NY 10001

Queens (Districts 24, 25, 26, 30): Lawrence Pendergast (LPender@schools.nyc.gov) – 28-11 Queens Plaza North, Queens, NY 11101

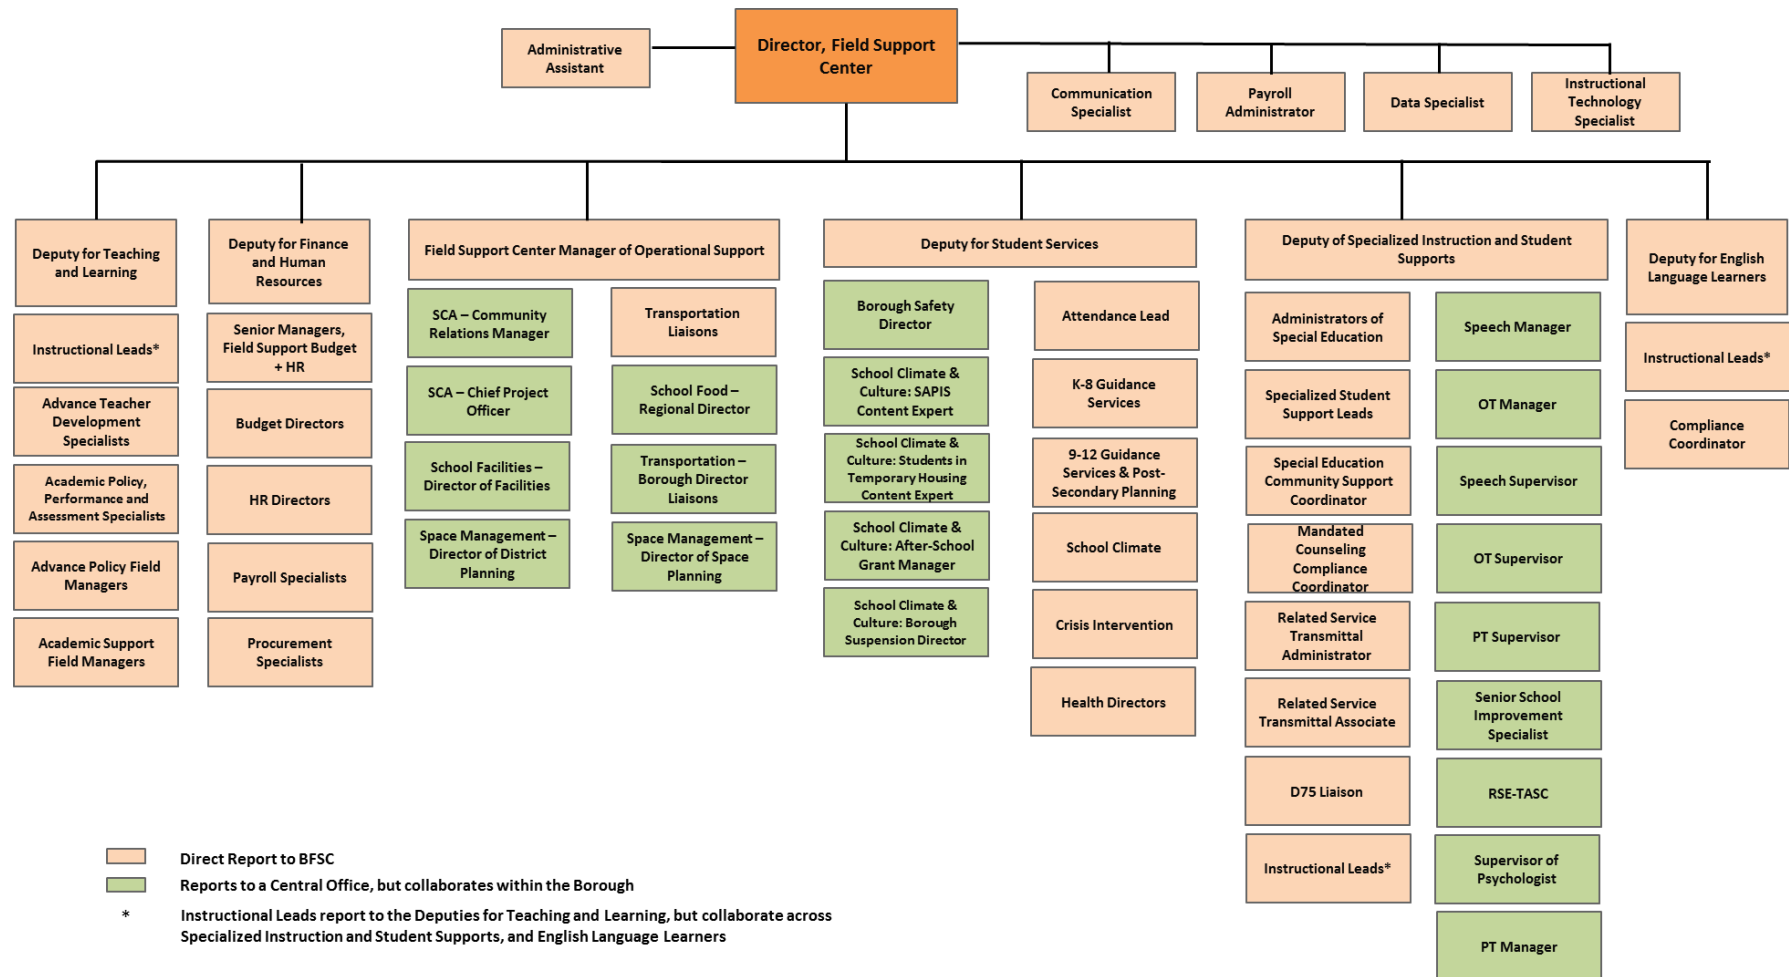

Queens (Districts 27, 28, 29): Marlene Wilks (MWilks@schools.nyc.gov) – 8201 Rockaway Blvd., Queens, NY 11416

Staten Island (District 31): Kevin Moran (KMoran2@schools.nyc.gov) – Petrides Complex, 715 Ocean Terrace Staten Island, NY 10301

For additional information, please visit our Strong Schools For Staff Intranet page:
<http://schools.nyc.gov/StrongSchoolsForStaff>

STRONG SCHOOLS, STRONG COMMUNITIES

In the new **Borough Field Support Centers**, supports will be integrated and provided from a capacity building approach tailored to each school's needs, with expertise closer to schools. The organization chart denotes how these supports will be organized within the Centers, and demonstrates a pathway for guidance that you can reference. Additional information about each of these roles can be found at <http://schools.nyc.gov/StrongSchoolsForStaff>

For additional information, please visit our Strong Schools For Staff Intranet page:
<http://schools.nyc.gov/StrongSchoolsForStaff>

A. District Overview

The LEA must demonstrate a commitment to success in the turnaround of its lowest achieving schools and the capacity to implement the model proposed. The district overview must contain the following elements:

- i. Describe the district motivation/intention as well as the theories of action guiding key district strategies to support its lowest achieving schools and ensuring that all students graduate high school ready for college and careers.
- ii. Provide a clear and cogent district approach and set of actions in supporting the turnaround of its lowest achieving schools and its desired impact on Priority Schools.
- iii. Describe the evidence of district readiness to build upon its current strengths and identify opportunities for system-wide improvement in its Priority Schools.

Under the leadership of Schools Chancellor Carmen Fariña, the New York City Department of Education (NYCDOE) is fundamentally changing the way in which it partners with and provides support to schools, and holds everyone in the system accountable for results. The NYCDOE created *Strong Schools, Strong Communities* (see plan [here](#)), which outlines the motivation/intention and theories of action guiding NYCDOE strategies to support the lowest achieving schools and ensure that all students graduate high school ready for college and careers. The plan describes a new approach to supporting New York City's public schools and all of our students, which consists of three key components:

1. The Framework for Great Schools – a roadmap to school improvement for school leaders
2. School Quality Reports that give schools and families well-rounded and actionable information about school performance
3. A streamlined system to deliver customized support to schools

The Framework for Great Schools provides the NYCDOE approach in supporting the turnaround of our lowest achieving schools and ensuring that all students graduate high school ready for college and careers. There are six essential interconnected elements of the framework which are the foundation for our approach:

1. **Rigorous instruction:** Classes are driven by high educational standards and engage students by emphasizing the application of knowledge.
2. **Collaborative Teachers:** The staff is committed to the school, receives strong professional development, and works together to improve the school.
3. **Supportive Environment:** The school is safe and orderly. Teachers have high expectations for students. Students are socially and emotionally supported by their teachers and peers.
4. **Strong Family-Community Ties:** The entire school staff builds strong relationships with families and communities to support learning.
5. **Effective Leaders:** The principal and other school leaders work with fellow teachers and school staff, families, and students to implement a clear and strategic vision for school success.
6. **Trust:** The entire school community works to establish and maintain trusting relationships that will enable students, families, teachers, and principals to take the risks necessary to mount ambitious improvement efforts.

The NYCDOE School Renewal Program was recently created for the most struggling schools, including Priority Schools. All of the schools for which the NYCDOE is applying for the School Improvement Grant (SIG) Cohort 6 opportunity are Renewal Schools. The School Renewal Program provides a more targeted approach for school improvement, and demonstrates the readiness of the NYCDOE to build upon current strengths and identify further opportunities for improvement. The NYCDOE is working intensively with each Renewal School community over three years, setting clear goals and holding each school community accountable for rapid improvement. More information about the School Renewal Program is [here](#).

Renewal Schools are transforming into Community Schools as the New York City Community Schools Initiative is a central element of Mayor Bill de Blasio's vision to re-imagine the City's school system; this direction is aligned with the New York State Education Department (NYSED) state-determined SIG model: the Innovation Framework Community-Oriented School Design, the model selected for NYCDOE SIG Cohort 6 applications. Community Schools are neighborhood hubs where students receive high-quality academic instruction, families can access social services, and communities congregate to share resources and address common challenges. The Mayor has pledged to create more than 100 Community Schools over the next several years, including this school. More information on the Community Schools Initiative is [here](#).

This SIG plan is based on the school's unique Renewal Schools Comprehensive Education Plan (RSCEP), which was crafted this past spring based on needs assessments for each school and includes a Community School description along with SCEP required information. NYCDOE Renewal Schools will be transformed into Community Schools, have an additional hour of instruction each day, increase professional development in key areas like student writing, and launch a summer learning program – with concrete targets in student achievement. This SIG plan will support key improvement strategies in the Renewal School.

Another strength of the NYCDOE includes control of the schools under the Chancellor and Mayor, which ultimately has given more independence to principals. One of the most important reforms has been giving principals control over hiring and budget decisions. An opportunity for improvement, however, is that while some principals were able to use this autonomy to drive achievement in their schools, others struggled without direction on how to improve, particularly in struggling schools. Moving forward, each NYCDOE Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results. Superintendents will utilize a school's performance data, the Framework for Great Schools, and the professional judgment they have gained through experience to raise student achievement in struggling schools.

The Mayor, Chancellor, and NYCDOE leadership will closely monitor Renewal School progress via regular data reports and frequent visits to the school. Renewal Schools have at most three years to show significant improvement before the NYCDOE considers restructuring the school. If the school fails to meet benchmarks each year, or the Superintendent loses confidence in the school leadership, the Superintendent will make the changes necessary to ensure that each child in the school has a high-quality education. Such changes may include school consolidation/merger or closure.

The NYCDOE is monitoring schools with low student enrollment for possible consolidations/mergers. By the end of the 2014-15 school year, proposals to consolidate four low enrollment schools were announced for proposal to the Panel on Educational Policy (PEP) in fall 2015. In addition, there are other schools that could benefit from consolidation, and school leaders are working closely with their communities and Superintendents with the intention of aligning resources and building consensus for consolidation. We anticipate making further announcements this fall if there are viable school redesigns, which may include SIG Cohort 6 schools. Our budget requests for schools with currently less than a 200 student enrollment reflect a reduced amount for school year 2015-16 as we took into consideration the relatively low student enrollment. We believe that our school redesign efforts will ultimately provide a much richer educational experience for our students.

B. Operational Autonomies

The LEA must provide operational autonomies for Priority Schools in exchange for greater accountability for performance results in the following areas: 1) staffing; 2) school-based budgeting; 3) use of time during and after school; 4) program selection; and 5) educational partner selection. In addition to providing quality responses to each element requested in this section of the Project Narrative, the Priority School must have school-level autonomy in at least two of these areas for an *acceptable* rating in this category. Applications that provide quality responses and that are granted anywhere from 3 to 5 of these autonomies will receive a rating of *exemplary* for this category. The LEA must respond to each of the following:

- i. Describe the operational autonomies the LEA has created for the Priority School in this application. Articulate how these autonomies are different and unique from those of the other schools within the district and what accountability measures the district has put in place in exchange for these autonomies.
- ii. Provide as evidence formally adopted Board of Education policies and/or procedures for providing the school the appropriate autonomy, operating flexibility, resources, and support to reduce barriers and overly burdensome compliance requirements.
- iii. Submit as additional evidence, supporting labor-management documentation such as formally executed thin-contracts or election-to-work agreements, or school-based options, that state the conditions for work that match the design needs of Priority School.

As a Renewal School, the school is provided increased supports for increased accountability for performance results. Key elements of the School Renewal Program are:

- Transforming Renewal Schools into Community Schools
- Creating expanded learning time
- Supplying resources and supports to ensure effective school leadership and rigorous instruction with collaborative teachers
- Underperforming schools will undergo needs assessments in six elements of the Framework for Great Schools to identify key areas for additional resources
- Bringing increased oversight and accountability including strict goals and clear consequences for schools that do not meet them

Budgeting: A budget for the school is based on the Fair Student Funding (FSF) formula. Funding follows each student to the school that he or she attends based on student grade level, with additional dollars based on need (academic intervention, English Language Learners, special

education, high school program). Recently the NYCDOE committed \$60 million in additional funding to ensure that struggling schools have the resources they need to succeed. Renewal Schools will be brought to 100 percent of their FSF recommendation within two years. Also as a Priority School, the school receives funding through Title I allocations to support its goals outlined in its school improvement plan as a struggling school. Priority Schools select to use this funding towards identified areas of need, for example expanding learning time. Priority Schools may also receive School Achievement Funding from the NYCDOE to improve instructional programs.

A description of Fair Student Funding, which can be used at principal discretion, is posted [here](#). A description of School Achievement Funding can be found [here](#). The Priority School receives funding in its budget to use flexibly and an additional funding allocation to support its school improvement activities, documented in a NYCDOE procedure known as a School Allocation Memorandum (SAM). The Priority and Focus Schools SAM for school year 2014-15 is posted [here](#) and is also attached.

Staffing: Renewal School principals select staff to fill vacancies. Principal staffing actions include additional pay for certified staff for expanded learning as required by NYSED as a Priority School. Schools participate in NYCDOE teacher leadership programs to support the retention and development of expert teachers at their school. The NYCDOE provides organizational assistance to Priority Schools. The Office of State/Federal Education Policy & School Improvement Programs is designated to work with Priority Schools to select and implement their whole school reform models and assist the schools with compliance requirements. School Implementation Managers (SIMs) work with SIG schools on school improvement efforts and SIG compliance requirements.

Renewal School principals and their leadership teams were targeted by NYCDOE central for ongoing consultation recruitment and retention needs as well as a series of trainings, workshops, and activities that are customized to fit the specific needs of the school. Focus areas include recruitment and marketing to candidates, determining “right-fit” teachers, teacher selection, and supporting and retaining new and existing teachers.

Through the 2014 teachers’ contract and subsequent amendments (see the attached UFT MOA) three new teacher leader roles were created. All Renewal Schools had the opportunity to establish teacher leader roles with a designated funding allocation; below is additional information on three key new roles.

- Model Teacher: Takes on additional responsibilities such as establishing a laboratory classroom; demonstrating lessons; exploring emerging instructional practices; reflecting on and debriefing a visit from a colleague.
- Peer Collaborative Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the professional learning of their colleagues through peer coaching and intervisitation.
- Master Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the entire school or across multiple schools; responsible for school-level progress.

Teacher leaders are integral to the school improvement process as well as a way to retain high-performing teachers, recruit and attract experienced educators, create opportunities for collaboration, and further develop and refine teacher practice. As one principal explained, “Having a distributed leadership structure in this school is not only effective for building effective teaching practices, but also for running a school. It makes my day and my job infinitely easier. One example is planning [professional learning time] on Mondays... it is a big task. Knowing that we have teacher leaders working with teachers who are putting forth things they would like to work on makes that time more effective and the teachers more invested.”

Each school will receive up to \$27,500 to fund a team of teacher leaders. The allocation will be issued through a SAM following the completion of the teacher leader selection and staffing cycle. The selection process is a joint UFT-NYCDOE designed and implemented process. In addition, only teachers rated Effective and Highly Effective are eligible to apply.

Guidance provided by the NYCDOE includes that schools may use the allocation to fund one Peer Collaborative Teacher and two Model Teachers:

- Schools where teacher leadership has been the most successful in building school culture have staffed more than one teacher leader role at their school – ideally a team of at least three. Having more than one teacher leader at a school, formalizes teacher leadership to the rest of the staff and makes the work of the teacher leaders a larger part of the school culture.
- Given that the Peer Collaborative Teacher has release time, they are well positioned to organize the teacher leadership team in a way that broadens the impact of the teacher leader team and increases the potential supports for other teachers in the school. The Model Teachers act as key partners in the work to support growth through sharing their classroom with other teachers in the building.

Program selection: NYCDOE was among the first large urban school districts in the nation to recommend new high-quality Core Curriculum materials, with English Language Learner supports, for grades K-8 in ELA and math that align to the CCLS and promote the instructional shifts. The NYCDOE conducted an extensive research and review process in order to identify high-quality Core Curriculum materials that align to the CCLS and promote the Common Core Instructional Shifts for ELA and Mathematics. Additional information on NYCDOE and the Common Core may be found [here](#).

Each Renewal School participated in a needs assessment, which included the Surveys of Enacted Curriculum (SEC), a research-based, nationally validated set of online surveys that align teacher-reported data on ELA and mathematics instruction against the Common Core standards. The SEC is used as one set of data to help inform the school how what is happening in the classroom—the enacted curriculum—compares to the written curriculum and tested curriculum, including state assessments. It helps begin conversations about how to better align the three types of curricula. Reports were provided to each school to inform their SIG Cohort 6 plan.

There are differentiated professional supports provided to Renewal Schools. Teachers in K-8 schools are provided professional development through the Teacher's College Writing Project and the ReadyGen Independent Reading Initiative. Teachers in high schools are provided with professional development through the WITsi (Writing is Thinking Through Strategic Inquiry) process, included in the school-level SIG plans. Effective strategies for teaching expository writing will be taught explicitly up front and integrated into the strategic inquiry process. The rationale for their central role is that they are high-leverage strategies that target struggling students' deficiencies and that improve content knowledge, academic vocabulary, written language, oral language and reading comprehension simultaneously. They also help teachers pinpoint what struggling students need and how to provide it. The strategy is to begin (year 1) with a focus on the 9th grade and to focus on one additional grade each subsequent year (9th and 10th in year 2; 9th through 11th in year 3).

Schools are also selecting programs to improve school climate and safety with the goal of decreasing incident rates, suspension rates, and disruptive behavior, and an increase in teachers' ability to manage challenging student behaviors and an increase in student academic achievement. To help strengthen school communities and improve academic outcomes, staff members need support to understand and anticipate behavior issues before they escalate. The Positive Learning Collaborative (PLC) is a joint initiative between the NYCDOE and teachers' union, UFT, which provides intensive training and direct consultation to educators in order to develop the skills that prevent crises and help students focus on academic goals. Information about PLCs will be shared with SIG Cohort 6 schools for consideration of implementation.

Educational partner selection: As part of being a Renewal School and under the Community-Oriented School Design model, the school has selected partnerships with community-based organizations (CBOs) that offer tailored whole-student supports, including mental health services and after school programs. Principals have discretion over selecting educational partners, including those outlined in the SIG plan, that have been formally contracted by the NYCDOE after a vetting process. The NYCDOE oversees a request for proposal process from organizations experienced in working with schools in need of school improvement. Accountability plans for the partner must be included based on annual evaluations of student progress in the Priority School. If progress is not evident, then the work with the partner is discontinued.

Educational partner selection from pre-qualified organizations is accomplished through the Multiple Task Award Contract (MTAC) procedure, which provides a streamlined process for schools to follow, posted below. All RFPs are on the NYCDOE public website [here](#). Renewal Schools have selected from the following community-based organizations (CBOs) listed [here](#). CBOs selected for SIG Cohort 6 applicant schools include Zone 26, Grand Street Settlement, Center for Supportive Schools, Phipps Neighborhood, Good Shepard Services, Fordham University, the Child Care Center of New York, Westhab, and El Puente. More information about the chosen CBO is in Attachment Z.

The MOUs submitted under the SIG Innovation Framework for each school and CBO outline their partnership. The CBO selected is the lead partner in the SIG Innovation Framework

Community-Oriented School Design. The process for CBO selection involved the NYCDOE issuing a request for proposals to CBOs to partner with Renewal Schools. Once the pool of CBOs was selected, School Leadership Teams (SLTs) were able to interview CBO representatives to determine fit with the school. The SLT utilized a rubric that included questions on whether the CBO could support the vision of the school through understanding the student population and needs. The CBO works in collaboration with the school principal, SLT, and the community school director assigned to the school to coordinate resources.

Use of Time During and After School: The school has a variety of opportunities for changing the use of time during and after school. NYCDOE Priority Schools are implementing an additional 200 hours of Expanded Learning Time (ELT). NYCDOE created guidance for schools to implement ELT called Guidelines for Implementing Expanded Learning Time at Priority Schools; see [here](#). The Priority School has the option to have ELT providers support students through extended learning time.

All students in Renewal Schools will be given an opportunity for an additional hour of supplemental instruction each school day, beginning next school year; a separate budget allocation is provided for this purpose. The approach is that at least one hour of ELT is offered to every student, known as the Renewal Hour. Schools may offer both the Renewal Hour and other ELT programming. In addition, the lead CBO has funds budgeted in their Community Schools contract to hire staff for the ELT initiative. There are two basic models for the Renewal Hour: integration into the regular student school day or offering the ELT before or after the school day. The attachment “Guidance for Use of Expanded Learning Time” outlines the options for the implementation of Expanded Learning Time that Renewal Schools in more detail.

Schools can utilize a School-Based Option (SBO) to create flexible use of time. The SBO process allows individual schools to modify certain provisions in the teachers’ union (UFT)/NYCDOE Collective Bargaining Agreement. In the SBO process, the school community creates a plan for how to effectively implement extended learning time. The principal and school-based UFT chapter leader must agree to the proposed modification which is presented to school union members for vote. Fifty-five percent of the UFT voting members must affirm the proposed SBO in order for it to pass. The intent of the SBO process is to empower the school community on how to best make use of time before, during, and after school. The SBO process is described in the NYCDOE/UFT Collective Bargaining Agreement on page 46 [here](#) and is also attached.

C. District Accountability and Support

The LEA must have the organizational structures and functions in place at the district-level to provide quality oversight and support for its identified Priority Schools in the implementation of their SIG plans. The LEA plan for accountability and support must contain each of the following elements:

- i. Describe in detail the manner by which the district ensures that all federal requirements of a school’s chosen model are fulfilled and continue to be fulfilled throughout the duration of the grant.
- ii. Identify specific senior leadership that will direct and coordinate district’s turnaround efforts and submit an organizational chart (or charts) identifying the management structures at the district-level that are responsible for providing oversight and support to the LEA’s lowest achieving schools.

- iii. Describe in detail how the structures identified in “i” of this section function in a coordinated manner, to provide high quality accountability and support. Describe and discuss the specific cycle of planning, action, evaluation, feedback, and adaptation between the district and the school leadership. This response should be very specific about the type, nature, and frequency of interaction between the district personnel with school leadership and identified external partner organizations in this specific Priority School application.
- iv. For each planned interaction, provide a timeframe and identify the specific person responsible for delivery.

The central Office of State/Federal Education Policy & School Improvement Programs (organizational chart attached) works to identify and monitor Priority School whole school reform model selection and SIG progress monitoring. The School Implementation Manager (SIM) ensures SIG application development, implementation, and monitoring of the approved plan. Specific activities of the SIM include:

- Review quantitative and qualitative data to assess student strengths and weaknesses;
- Investigate root causes or contributing factors for low student achievement;
- Align resources to maximize benefits to students;
- Monitor plan implementation and make mid-course adjustments, as needed; and
- Evaluate the impact of improvement interventions and external partners.

Schools Chancellor Carmen Fariña assumed leadership of the NYCDOE in January 2014. Dr. Dorita Gibson is the Senior Deputy Chancellor and the Chancellor’s second in command overseeing all aspects of school support, Superintendents, support for struggling schools, District 75 and 79 programs, and school communications. Phil Weinberg is the Deputy Chancellor for Teaching and Learning overseeing professional development and curriculum, performance and accountability, Common Core and college-readiness initiatives, Career and Technical Education, and instructional support. Attached is a copy of the NYCDOE senior leadership organizational chart which also includes leadership in Family Engagement, Operations, Students with Disabilities, and English Language Learners, all of which play an integral role in coordinating turnaround efforts.

The NYCDOE is transitioning to a new school support structure now that will be in place and operational for the first day of school in September 2015. The new approach to school support is guided by six critical principles:

- 1) Clear lines of authority and accountability so all schools improve.
- 2) Families have one place to call if they cannot resolve problems at the school.
- 3) School leaders maintain the critical independence over budget and human resources they have had, so they can continue to drive improvement.
- 4) Provide customized support so school leaders can focus on those improvement efforts most likely to boost achievement.
- 5) Provide one-stop support to school leaders.
- 6) Create equity in the system by providing more intensive support to schools that need it most.

The new school support structure consists of four major parts:

- 1) Superintendent's Offices: each Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results
- 2) Borough Field Support Centers: each of the seven geographically located Borough Field Support Centers will utilize a BOCES model (Board of Collaborative Educational Services) in the provision of support to schools. An organizational chart is attached.
- 3) Central Teams
- 4) Affinity Groups, formerly called Partnership Support Organizations

As Renewal Schools, under the direction of the Superintendent, the Principal Leadership Facilitators and Directors for School Renewal (DSRs) are the core drivers of school improvement and implementation for Renewal Schools within their district. The DSR oversees and supervises the coordination and delivery of intensive supports to persistently low achieving schools. The DSR assists with needs-aligned instructional and operational supports to a number of underperforming schools, including professional development, intensive interventions, summer programming and extended learning opportunities, to ensure accelerated academic achievement for the schools served. Attached is a copy of the Renewal Schools Program organizational chart.

DSRs work with Renewal Schools to coordinate all school improvement efforts; SIMs work in collaboration with DSRs on SIG requirements. Community School Directors (CSDs) are assigned to each Renewal School to coordinate resources at the school-level with the CBO and school. The attached "Stages of Development in a NYC Community School" provides a rubric for schools to move from exploring to excelling in the features of a community school. Staff are held accountable through performance reviews and grant monitoring. External partner organizations working with Priority Schools are evaluated by schools and the NYCDOE based on performance targets. Regular meetings take place with partners to ensure effectiveness, and through the SIG Innovation Framework Community-Oriented School Design the NYCDOE will convene all lead partners and school leaders as done with its School Innovation Fund (SIF) lead partners last year to share expectations of SIG and as a lead partner.

Interactions with the Renewal School include weekly coaching visits to schools by DSRs and content specialist instructional coaches. There are frequent observations with timely, accurate, and actionable feedback. Superintendents provide professional development for school leaders through organizing bi-monthly, collaborative Principal meetings. Superintendents also conduct school visits and provide feedback to school leaders. Leadership coaches who are former successful principals have been assigned to Renewal School principals. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor ongoing progress; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent.

SIMs have a caseload of approximately a dozen schools implementing SIG Cohorts 2-6 and SIF. SIMs are in each of their schools at least twice per month, communicate with school teams on progress monitoring, and represent their schools to NYSED in the progress monitoring process. Benchmarks have already been set for the school through the RSCEP, which align to SIG benchmarks, and require an increased level of accountability. Using these measures, Renewal Schools will be further evaluated by their superintendent at the conclusion of each of the next two school years, in June 2016 and June 2017.

One Renewal School benchmark of note is that of student attendance which is also reviewed by NYSED in SIG progress monitoring. This measure is required for all Renewal Schools as it is a key indicator of schools' progress. NYCDOE had 81 schools implementing SIG and SIF grants in school year 2014-15 and participated in U.S. Department of Education SIG monitoring of NYSED to outline its SIG development, implementation, and monitoring process. SIG Cohort 6 school plans outline strategies that will lead to successful outcomes in the leading indicators that are measured in NYSED SIG monitoring, including improvements in the areas of student attendance, teacher attendance, discipline referrals, ELT opportunities, and academic data.

In November 2014, NYCDOE released two new school quality reports, which present information about the school's practices, learning environment, and performance results. The School Quality Snapshot is designed specifically for families, and provides a concise summary of each school's practices, environment, and performance. The School Quality Guide is a more detailed report with additional information, including multiple years of data to show the school's progress over time. The Guide also sets rigorous and realistic targets that are based on the historical performance of schools with similar populations and the city as a whole for schools in areas including student achievement, student progress, and college and career readiness.

Each Renewal School was provided a menu from which they chose leading indicators and student achievement benchmarks. Generally the targets included in the NYCDOE [High School](#) and [Elementary/Middle School](#) Quality Guides were used as the basis for setting these benchmarks. The attached shows samples from the benchmarks menus provided 1) for an elementary/middle school and 2) for a high school. The guidelines for choosing benchmarks are similar; the leading indicators and student achievement benchmarks are different based on the school grade level.

Schools began receiving new data tools this year to help them track student progress and school improvement. The Progress to Graduation Tracker provides high schools and transfer high schools with credit and Regents data to more easily track individual students' progress toward graduation. The Tracker is updated on a daily basis so that educators can use the most up-to-date information possible when identifying students who may be in need of additional supports and interventions to help them succeed. The School Performance Data Explorer allows elementary, middle and high schools to easily search, sort, and monitor metrics for current students across subgroups and overtime. The tool includes information on how former students are doing academically since they have left the school. By allowing educators to examine both whole-school and individual-student metrics and trends, the Data Explorer is meant to help schools

better identify and support struggling students earlier than ever before, identify and address performance trends at their school, and track current and former students' progress over time.

The following chart summarizes the interactions, timeframe, and persons responsible that are discussed in this section:

Planned School Improvement Interaction	Timeframe	Person Responsible
Professional development for school leaders. School visits & feedback for school leaders.	Bi-monthly collaborative Principal meetings On-site school visits	Superintendent
Professional support to implement feedback provided by the Superintendent. Monitor progress and help to make adjustments when necessary.	On-going	Principal Leadership Facilitator (PLF)
Supervises the coordination and delivery of multiple supports from NYCDOE. Provides instructional and operational support for schools. Supports professional development needs of the school. Supports interventions, summer programming and extended learning opportunities for schools. Provides content coaching and classroom observations and feedback.	Weekly visits to School	Director for School Renewal (DSR)
Coordinate resources at the school-level with the CBO and school.	On-site daily	Community School Director (CSD)
Support and monitors SIG implementation. Coordinate with Superintendent teams on school improvement initiatives for SIG	Bi-monthly on site visits	School Implementation Manager (SIM)

D. Teacher and Leader Pipeline

The LEA must have a clear understanding of the type and nature of teachers and leaders that are needed to create dramatic improvement in its lowest-achieving schools. In addition, the LEA must have a coherent set of goals and actions that lead to the successful recruitment, training, and retention of teachers and leaders who are effective in low-achieving schools. The LEA's plan must include each of the following elements:

- i. Identify and describe recruitment goals and strategies for high poverty and high minority schools to ensure that students in those schools have equal access to high-quality leaders and teachers.
- ii. Describe the district processes for altering hiring procedures and budget timelines to ensure that the appropriate number and types of teachers and principals can be recruited and hired in time to bring schools through dramatic change.
- iii. Identify and describe any district-wide training programs designed to build the capacity of *leaders* to be successful in leading dramatic change in low-achieving schools. In addition, describe how these programs are aligned to the implementation of the specific model chosen (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*). Provide a history of these or similarly purposed programs in the district, how they are or have been funded, and identify whether the school principals chosen to lead the new school designs proposed in this application have emerged as a direct result of these programs. Please identify the goals in terms of quantity and quality of effective leader development.*
- iv. Identify and describe any district-wide training programs designed to build the capacity of *teachers* to be effective specifically in low-achieving schools. Provide a history of these programs in the district, how they are or have been funded, and identify whether the instructional staff chosen for the new school designs proposed in this application have emerged as a direct result of these programs. If the programs are newly proposed, please identify the goals in terms of quantity and quality of effective teacher development.*
- v. Identify in chart form, the district-offered training events for items "iii & iv" above, scheduled during the year-one implementation period (September 1, 2015 to June 30, 2016). For each planned event, identify the specific agent/organization responsible for delivery, the desired measurable outcomes, and the method by which outcomes will be analyzed and reported. Provide a rationale for each planned event and why it will be critical to the successful implementation of the SIG plan.

*The district-wide training and professional development programs to be identified in this section are those that are offered by the district to a group or cluster of like schools (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*) and/or to cohorts of teachers and leaders who will serve in them (e.g., training for turnaround leaders; training for teachers who need to accelerate learning in Priority Schools where students are several levels below proficiency; training for school climate and culture in Priority Schools, etc.). NYSED's Strengthening Teacher and Leader Effectiveness (STLE) grant may provide suitable examples of the types of training and professional development expected in this section. See <https://www.engageny.org/resource/improving-practice>. School-specific and embedded training and professional-development should be detailed in Section II. I.

The NYCDOE believes in its talent: the teachers, school leaders, and other personnel who work with our city's 1.1 million students. The mission of the [Office of Leadership](#) is to build and sustain a leadership pipeline that yields high-quality leaders at all levels of the system, including teacher leaders, assistant principals, principals, and systems-level leaders. The pipeline structure has systemic supports and effective leadership development programs at each stage to identify and cultivate:

1. Strong teachers to meet the citywide instructional expectations and move into more formal teacher leadership development programs;
2. Effective teacher leaders and assistant principals to move into principal pipeline programs and then into principal positions;

3. Quality support for novice principals; and
4. Opportunities for experienced principals to mentor aspiring leaders.

The NYCDOE seeks to ensure that every student has the opportunity to learn from a high-quality educator in a school with a strong school leader, particularly in Priority Schools where the need is great. To accomplish this goal, we developed a pipeline of expert teachers and leaders and provide them with targeted support. To increase the number of candidates who are well-prepared to become principals, we have strengthened our principal preparation programs. Simultaneously, we have shifted our focus toward identifying talented educators and nurturing their leadership skills while they remain in teacher leadership roles. Our theory of action is that if we invest in providing job-embedded leadership development opportunities for our most promising emerging leaders and supporting our strongest current leaders to build leadership capacity in others, then we will build a leadership pipeline that is more cost-effective and sustainable, and produces more high quality next-level leaders.

The NYCDOE created the Principal Candidate Pool selection process to make clear the expectations for principals in the recruitment process. The process is used to discern all candidates' readiness for the position of principal and ability to impact student achievement. The NYCDOE has launched an enhanced version of the Principal Candidate Pool process in order to meet the following objectives:

- Align the screening process to clear, high standards that are consistent with the expectations to which principals will be held accountable under 3012-c.
- Offer participants an opportunity to receive high-quality professional development about the NYCDOE's expectations of principals.
- Provide hiring managers with multi-dimensional information to help enhance strategic placement hiring decisions related to principals.

To recruit expert teachers, NYCDOE creates a diverse candidate pool. For subject-shortage areas in which there are not enough traditionally-certified teachers to meet the needs of schools, we developed alternative-certification programs such as the New York City Teaching Fellows, which draws skilled professionals and recent college graduates to teach in high-need schools. Begun in 2000, since then the program has provided schools with more than 17,000 teachers. In addition to the NYC Teaching Fellows program, the NYCDOE has created an innovative residency program called the NYC Teaching Collaborative that recruits and trains a cohort of 50 new teachers annually through a practice-based teacher training model in hard-to-staff schools. This program is modeled after the nationally known program run by AUSL in Chicago. Additionally, the NYCDOE recruits annually a cohort of new hires that have been identified as top tier recruits to fill positions in struggling schools called the "Select Recruits" program.

The NYCDOE created teacher recruitment initiatives to build a pipeline of teachers prepared to turnaround the performance of our lowest-performing schools and teacher leadership programs for experienced educators to support professional development in their schools. In June 2014 the NYCDOE and UFT negotiated a set of teacher leadership positions and those positions have been focused in a subset of schools to serve as a vehicle to attract new talent to struggling schools and create leadership opportunities for current teachers on staff. In spring 2015 a cohort

of school participated in a foundational teacher leadership professional learning series that oriented teachers to the new positions and provided opportunities for foundational skill development in key teacher leadership skills. The NYCDOE also leverages the state-funded Teachers of Tomorrow grant to provide recruitment and retention incentives for teachers to work in our highest-need schools.

To support schools in recruiting and retaining this new talent at the school level, the DOE produces annual “Smart Retention” reports which create a picture of a school’s history in retaining talent year over year. Alongside the report, NYCDOE offers coaching in recruitment and retention strategies for a subset of identified schools. Each year the NYCDOE sets hiring policies to ensure that teachers and principals can be recruited and placed into our schools. Principals are typically in place in schools by July before the start of the next school year to begin year-long planning and school improvement efforts and teachers in place by September. Once selected, principals are empowered to make certain staffing decisions for their schools. Schools receive their budgets for the new fiscal year by June.

Annual hiring exceptions are set to ensure that hard-to-staff schools are staffed appropriately. These exceptions are made on the basis of the following factors: hard to staff subject areas, geographic districts, and grade level (elementary, middle, high). The timeline allows school leaders the ability to plan for any staffing needs or adjustments in concert with the citywide hiring process which begins in the spring and continues into the summer.

The NYCDOE creates and collaborates with partners on principal training programs to build a pipeline of principals with the ability to drive teaching quality and student achievement district-wide, particularly in schools with the greatest need. Our principal preparation programs share the following characteristics: 1) a carefully-developed recruitment process to screen for highly qualified participants, 2) required completion of a practical residency period, and 3) projects capturing evidence of impact on leadership development and student gains. The NYCDOE is now committed to hiring principals with at least seven years of education experience. LEAP, launched in 2009, is a rigorous 12-month on-the-job program. LEAP develops school leaders within their existing school environments and creates opportunities to harness existing relationships including those with current principals and school communities. The LEAP curriculum differentiates learning based on individual needs and is aligned with the NYCDOE’s instructional initiatives and the CCLS.

Leadership coaches who are former successful principals have been assigned to Renewal School Principals that are leading high schools. The DSRs collaborate closely with the ELI Principal Leadership Coaches and Leadership Academy coaches. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor the ongoing progress of the Renewal efforts; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent to stay apprised of all the initiatives.

K-8 Renewal School principals are provided professional development and support through the School Renewal Principal Learning Community, which meets five times per year around thematically organized sessions designed to engage school leaders in their own professional learning. The sessions also involve guest speakers and experts in the field. Renewal Principals Study Groups are led by a panel of advisory principals and focus on developing leadership expertise in one or more of the following areas: budgeting, data analysis, curriculum and instruction, parent engagement and rebranding which involves re-visiting the mission and vision. Please see Attachment Z: School-Level Information for District-Level Plan for information about the principal chosen to lead the school design.

The NYCDOE believes that to support teachers in their growth and development, it is important to have a common language and understanding of what quality teaching looks like. We have invested significant resources into beginning the work of developing principals' and teachers' understanding of Charlotte Danielson's Framework for Teaching, while training principals to do more frequent cycles of classroom observations and feedback. Resources to begin this work are provided to principals and educators in a number of ways: central and school-based professional development opportunities, online courses, and Teacher Evaluation and Development Coaches (TDECs) who work across multiple schools within their district. In addition, the NYCDOE has developed district-wide training programs to build the capacity of specific groups of teachers, including new teachers, teacher leaders, and teachers that work with special populations.

As of July 1, 2015, the NYCDOE Talent Coach and MOSL Specialist positions have been combined to create a new role: the Teacher Development and Evaluation Coach (TDEC). TDECs are supervised by superintendents and as such support school leaders throughout their district with *Advance*, NYCDOE's teacher development and evaluation system. Teacher Development and Evaluation Coaches (TDECs) collaborate with and support instructional leaders in using *Advance* to assess teacher practice, utilize measures of student learning to assess teacher effectiveness, and deliver high-quality developmental feedback to improve teacher effectiveness and student learning. Coaches also inform central efforts to develop and refine systems, research tools and program policies that support school leaders across New York City in providing meaningful evaluations and targeted professional development to teachers.

New teachers who work in low-achieving schools are provided differentiated levels of support, depending on their pathway to teaching. The New York City Teaching Collaborative offers a subsidized Master's degree program and focuses on supporting our highest-need schools, provides intensive training and school placement during the spring, with ongoing mentoring and training throughout the fall.

Several district-wide training programs are also available for teacher leaders who work in low-achieving schools. We are looking to improve the teacher leadership programs that we offer and are now working to create career ladders for teachers. All of the programs have developed continuous feedback loops (surveys, focus groups, school-based visits) to ensure that professional development is effectively being delivered and meeting the needs of new teachers and teacher leaders. Current programs that exist include the Teacher Incentive Fund (TIF) Program, the three new identified teacher leadership positions, and the Learning Partners Program which allow teachers to stay in the classroom while collaborating with colleagues

within and across schools. Professional development is also offered through collaboration with the UFT Teacher Center. More information about teacher career pathways is [here](#).

A chart is included as an attachment on NYCDOE trainings offered, and additional information is included as an attachment as “Programs and Partnerships 2015.”

E. External Partner Recruitment, Screening, and Matching

The LEA must have a rigorous process for identifying, screening, selecting, matching, and evaluating partner organizations that provide critical services to Priority Schools.

- i. Describe the rigorous process and formal LEA mechanisms for identifying, screening, selecting, matching, and evaluating external partner organizations that are providing support to this Priority school.
- ii. Describe the LEA processes for procurement and budget timelines (and/or any modifications to standard processes) that will ensure this Priority School will have access to effective external partner support prior to or directly at the start of the year-one pre-implementation period and subsequent implementation periods.
- iii. Describe the role of the district and the role of the school principal in terms of identifying, screening, selecting, matching, and evaluating partner organizations supporting this school. Describe the level of choice that the school principal has in terms of the educational partners available and how those options are accessible in a timeline that matches the preparation and start-up of the new school year.
- iv. If the model chosen is *Restart*, the LEA/school must describe in detail the rigorous review process that includes a determination by the LEA that the selected CMO or EMO is likely to produce strong results for the school. See federal definition of ‘strong results’ at <http://www2.ed.gov/programs/sif/index.html>. Federal Register, vol. 80, no. 26, pg. 7242.

To identify, screen, select, match, and evaluate external partner organizations, the NYCDOE uses a Pre-Qualified Solicitation (PQS) process. PQS is an ongoing open call-for-proposals process by which the NYCDOE selects potential partners. Each partner undergoes a screening process, which includes a proposal evaluation by a committee of three program experts who independently evaluate partner proposals in terms of project narrative, organizational capacity, qualifications and experience, and pricing level. The result is a pool of highly-qualified partner organizations which are approved and fully contracted. The Priority School is then able to select services from any of the pre-qualified external partner organizations by soliciting proposals and choosing the best fit according to its needs. If a principal is interested in a specific partner that has not already been approved, then she/he can recommend that the partner engage in the qualification process with the NYCDOE.

In addition, the NYCDOE uses a specific solicitation process called Whole School Reform, which seeks proposals from organizations experienced in working with schools in need of school intervention. The goal is for the partners to support the school to build capacity and enable the school to continue improvement efforts on its own. Partner proposals must offer a variety of methods and strategies grounded in best practices to achieve substantial gains. Potential partners provide accountability plans that include annual evaluations on student achievement progress and the process for enabling schools to continue the reform efforts beyond the contract period, along with at least three references from current or past client schools. Once partner proposals are reviewed by the evaluation committee and recommended for approval, further due diligence is done before formal recommendation for the Panel for Educational Policy for approval. Principals have discretion to select approved partners based on their scope of service needs.

Please see Attachment Z: School-Level Information for District-Level Plan for information about the CBO that is providing support to this Priority School. The school-level plan for this Priority School describes the particular design framework proposed and the scope of the re-design, as well as our rationale for selecting the chosen external partner as a solution to address identified gaps.

Priority Schools receive budget allocations for the new fiscal year by June, well in advance of the start of the new fiscal year in July and the start of the school year in September. The NYCDOE budget process provides principals with ample time to secure external partner support through the above-mentioned systems. Principals may secure services from a list of external partners that have already been thoroughly vetted by NYCDOE. Individual principals create a scope of service and solicit proposals from partners based on their specific needs. Once received, principals score proposals and award contracts to the most competitive and cost-effective partners. Priority Schools secure support from effective external Whole School Reform partners as early as May or June, well in advance of the year-one implementation period.

The NYCDOE manages the initial process of screening potential partner organizations so that principals can focus on selecting partner organizations based on their budget and service needs. NYCDOE manages an ongoing call-for-proposals process for select categories of services to schools. All proposals received by the NYCDOE must first be reviewed to determine if they meet all of the submission qualifications prescribed in the call for proposal. Proposals meeting these requirements are evaluated and rated by a district-based evaluation committee.

As needed, the NYCDOE may conduct site visits to verify information contained in a proposal and may require a potential partner to make a presentation on their services or submit additional written material in support of a proposal. Once the NYCDOE recommends a vendor for award, the recommendation is reviewed by the Division of Contracts and Purchasing for approval and then the Panel for Educational Policy for review and final approval.

Priority School principals are able to contract services from any of the approved pre-qualified educational partners by developing a specific scope of work, soliciting proposals using a user-friendly online tool and choosing the most competitive partner according to their specific needs. Once school principals receive school budgets for the new fiscal year in June, they are able to begin negotiating with potential partners for services in the new school year. The process allows principals sufficient time to solicit vendors and establish contracts in time for the new school year and possible preparation activities during the summer.

At the end of each school year, each school principal evaluates the services of the vendors – based on the objectives, proposed scope of services, and outcomes from the services – and determines whether to continue the partnership. Central staff assist the Priority School in evaluating the impact of chosen partners toward meeting the school’s improvement goals.

F. Enrollment and Retention Policies, Practices, and Strategies

The LEA must have clear policies, practices, and strategies for managing student enrollment and retention to ensure that Priority Schools are not receiving disproportionately high numbers of students with disabilities, English-language learners, and students performing below proficiency.

- i. Identify and describe similarities and differences in the school enrollment of SWDs, ELLs, and students performing below proficiency in this Priority School as compared with other schools within the district. Discuss the reasons why these similarities and differences exist.
- ii. Describe the district policies and practices that help to ensure SWDs, ELLs, and students performing below proficiency have increasing access to diverse and high quality school programs across the district.
- iii. Describe specific strategies employed by the district to ensure that Priority schools in the district are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency.

Please see Attachment Z: School-Level Information for District-Level Plan for information about this Priority School's enrollment as compared with other schools.

The NYCDOE operates a school choice-based system for students and families from Pre-Kindergarten to high school. In the past several years, the NYCDOE has worked to increase equitable access to high quality programs at all grade levels. All students, including students with disabilities, English Language Learners, and students performing below proficiency have access to all public schools as part of the choice-based enrollment system. Students participating in Pre-Kindergarten admissions can access NYCDOE district schools and New York City Early Education Centers (NYCEECs). The NYCDOE works to make as many pre-K programs as possible available to families. This year, families had the benefit of a new streamlined application process. This single application process allowed families to rank their options in order of preference, including both NYCDOE district schools and NYCEECs. Students participating in Kindergarten admissions can access all elementary choice and zoned schools. Zoned schools give priority to students who live in the geographic zoned area. Choice schools are schools that do not have a zone and give priority to applicants based on sibling status, district of residence, and in some cases, other criteria. The Kindergarten application process is a single application that allows parents to rank their school options in order of preference, including both zoned and choice schools.

At the middle school level, families also may submit a single application that allows them to rank their school options in order of preference. Some community school districts maintain primarily zoned middle schools, which give priority to students in the geographic zone. Most districts also have choice schools which have admissions methods based on academic or artistic ability, language proficiency, demonstrated interest, or a lottery (unscreened). At the high school level, approximately 75,000 students participate annually in a single application process that covers over 400 schools. The citywide choice process provides an opportunity for all participants to select up to 12 choices from across the five boroughs. The process consistently matches the majority of students to their top choice schools; for the previous five years, high school admissions has matched over 80% of students to one of their top five choices. Students may participate for both 9th grade and 10th grade admissions.

Since the 2012-13 school year, students with disabilities who have IEPs have benefited from improved access to zoned and choice schools. Rather than being assigned to a school based solely on availability of their recommended special education program, students with IEPs participated fully in the standard Kindergarten, middle school, and high school admissions process alongside their peers. This increased level of access will continue to scale up until the NYCDOE can ensure all students with disabilities have access to the schools they would otherwise attend if they did not have an IEP and, furthermore, that their special education programs, supports, and services be available in the schools to which they are matched.

Throughout the 2013-14 and 2014-15 school years, the Division of Specialized Instruction and Student Support (DSISS) partnered with field-based school support teams and schools to proactively support students with disabilities in the following four areas: student engagement in rigorous curriculum with full access to community schools and classrooms, development and implementation of quality IEPs, infusing school-wide and individualized positive behavioral supports, and effective transition planning. For the 2015-16 school year, DSISS will continue this work. All stakeholders will continue to be responsible for ensuring students with disabilities are educated in the most appropriate, least restrictive environment. To that end, through the NYCDOE's special education reform work, schools will engage in professional learning opportunities that focus on the continued commitment to supporting all educators in their understanding and facility with learner variability, access to content, rigorous expectations, inclusion, and the essential knowledge and skills needed for students to be college and career ready. Priorities for professional development are built on themes that reflect research- and evidence-based best practices and are fully integrated with the Common Core Learning Standards and *Advance*.

The NYCDOE has begun to put in place policies and practices designed to ensure that Students with Disabilities (SWDs), English Language Learners (ELLs), and students performing below proficiency have increasing access to diverse and high quality school options across the district. Our current SWD and ELL policies and guidance not only support schools in focusing their programming practices around student needs, but also encourage schools to develop a deep knowledge and understanding of their students' strengths, needs, and preferences in order to drive programmatic planning and/or shifts. Schools are supported in expanding their continuum of services to provide differentiated and individualized levels of support rather than stand-alone special education programs, so that students may receive recommended services based on individual needs at their schools of choice. For ELLs specifically, the NYCDOE encourages families of eligible students to request a bilingual program in their schools, knowing that if there is sufficient interest then schools will create and sustain bilingual programs that benefit not only ELLs, but also students interested in learning a second language.

In addition, for students with specific disabilities who may benefit from specialized instructional and/or social-emotional strategies, the NYCDOE continues to create and expand specialized programs in community schools and specialized schools. For SWDs, the NYCDOE has grown the number of District 75 (D75) specialized schools for students with disabilities, specialized programs in community schools for students with Autism Spectrum Disorders (ASD) known as the ASD Nest Program and the ASD Horizon Program, specialized programs in community schools for students with intellectual disability or multiple disabilities known as Academic,

Career, and Essential Skills (ACES) Programs, and also Bilingual Special Education (BSE) Programs for ELLs with IEPs who are recommended for a special education program in their home/native language. Families of students with specific disabilities may also elect to enroll in their zoned school.

District 75 provides citywide educational, vocational, and behavior support programs for students who are on the autism spectrum, have significant cognitive delays, are severely emotionally challenged, sensory impaired and/or multiply disabled at more than 310 sites. Specialized Programs in community schools (ASD Nest, ASD Horizon, ACES, and BSE Programs) are intended to increase access to community schools even further, for students with these specific disabilities for whom a District 75 school was historically more likely to be recommended. The ASD Nest Program and ASD Horizon Program are two different programs in community schools that serve admitted students with a disability classification of autism. Each program is designed to develop students' academic and social skills, but has different service delivery models and admissions criteria. The ASD Nest Program is primarily designed to support students with ASD who would benefit from intensive social skills development. As the result of significant growth in these programs, in 2014-15, a student on the autism spectrum was more than three times as likely (from 9% to 29%) to attend a community school than in 2007-8. This is especially significant given that over the same time period, the numbers of students classified as autistic has more than doubled, from 5,365 to 13,161 students.

The NYCDOE offers a range of high-quality programs for students performing below proficiency. The Office of Postsecondary Readiness works to support over-age and under-credited students, students enrolled in Career and Technical Education programs and Black and Latino students. The NYCDOE has Transfer Schools, which are small, academically rigorous, full-time high schools designated to re-engage students who have dropped out or who have fallen behind in credits. CTE is delivered in two ways across the NYCDOE: at designated CTE high schools and CTE programs in other high schools. CTE programs offered in high schools are developed in response to future employment opportunities and the potential for career growth in New York City. Currently, CTE programs are offered in fields ranging from aviation technology and culinary arts to emergency management and multimedia production.

In addition to expanding access to high-quality school and program options for SWDs, ELLs, and students performing below proficiency, the NYCDOE is committed to supporting schools in meeting students' unique learning needs. The NYCDOE previously made modifications to the Fair Student Funding formula to provide weights, which provide additional funding, for students who require additional support in order to succeed, including weights for Academic Intervention Services (AIS), ELLs, and Special Education Services. In 2011-12, the NYCDOE revised the funding methodology to provide additional weights to traditional high schools serving overage under-credited (OAUC) students. Providing schools with additional funding for AIS and OAUC further supports students that are performing below proficiency.

Meeting the needs of ELLs and SWDs is an area of special need in our schools. The UFT Teacher Center will support educators in SIG Cohort 6 schools through customized professional learning opportunities targeted to meet the unique needs of each school. Three Teacher Center Field Liaisons will collaborate with administrators and the school-based staff development committee to design learning opportunities to meet the needs of all learners, including ELLs and

SWDs.

The UFT Teacher Center Field Liaison will work in participating schools with Master/Peer Collaborative and Model Teachers and school-based site staff to:

- Design customized professional development
- Provide intensive, ongoing, job-embedded professional development, including one-on-one coaching, in-classroom support and coaching, demonstration lessons, co-teaching, classroom learning labs, study groups and work sessions, to impact student achievement
- Collect, analyze and interpret data for making instructional decisions
- Use data and facilitate the creation of action plans for data-driven professional development, learning laboratories and study groups, etc.
- Integrate instructional technology into teaching and learning

The NYCDOE employs specific strategies to ensure that Priority Schools are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency. One important strategy is the reform of the over-the-counter (OTC) process, which has been critical to managing disproportionately high enrollment of SWDs, ELLs, and students performing below proficiency in Priority Schools. Each summer, the NYCDOE opens temporary registration centers across the city to assist families seeking placement or hardship transfers (primarily in high school grades) during the period before the start of school. Approximately 15,000 new or returning students are placed during this peak OTC period and many are higher-needs students. For the past several years, the NYCDOE has added seats to every high school's OTC count. As a result, the impact of OTC placements at low-performing schools, including Priority Schools, was minimized, and there was an increase in student access to more programs.

For fall 2015, the NYCDOE Chancellor has publicly committed to reducing OTC in Renewal Schools, including all the schools applying for SIG Cohort 6. Additionally, in 2014-15, NYCDOE implemented a one-year elimination of OTC enrollment for the two State-identified Out of Time schools.

Another important strategy is the NYCDOE enrollment "targets" for Students with Disabilities, in which elementary, middle, and high schools allot a percentage of their seats to SWDs, equivalent to the district or borough rate of SWDs. In 2014, students with recommendations of services for 20% or more of their day were included in these targets. This strategy has contributed to an impressive decline in the number of schools serve few SWDs. Between 2007-08 and 2014-15, the percentage of schools that enroll SWDs at a rate of 10% or less has been cut in half, from 19% of schools in 2007-08 to just 9% of schools in 2014-15.

Furthermore, to increase access to some of NYCDOE's highest performing schools, NYCDOE has reduced the screening requirements for seats in selective programs that maintain unfilled seats. Typically, schools that have screened programs are allowed to rank students who meet that program's admissions criteria, and only those students who are ranked may be matched to that school. Since 2012, the NYCDOE has worked with screened schools to increase the number of SWDs ranked and matched to their programs. In situations where schools do not rank a sufficient number of SWDs, additional SWDs are matched to the unfilled seats in order to provide greater

access for these students to high-quality schools. In its first year, this work resulted in 20 programs placing approximately 900 additional students into academically screened seats that would have otherwise gone unfilled. For students entering high school in 2013, the NYCDOE placed almost 1,300 students were placed into these programs. The NYCDOE will continue this work in the upcoming school year.

The Public School Choice transfer process is another strategy that NYCDOE uses to help reduce the number of higher-needs, lower-performing students in Priority schools. Through Public School Choice, all students attending Priority schools are given the opportunity to transfer out of their current school and into a school that is “In Good Standing.” Students submit an application in the spring listing their choices, and they receive an offer over the summer for the upcoming fall. Lower-performing students and lower-income students are prioritized to receive an offer of their choosing. Furthermore, the NYCDOE has slightly revised the process in recent years to make the following two changes: the lowest-performing students within Priority Schools are more accurately identified through the use of indicators beyond merely test scores (including a promotion-in-doubt indicator based on grades and an indicator for students in temporary housing); students attending Priority Schools are prioritized to receive an offer above students attending Focus Schools. In 2014, over 6,500 families applied for transfers through Public School Choice and over 4,500 students received an offer.

G. District-level Labor and Management Consultation and Collaboration

The LEA/school must fully and transparently consult and collaborate with recognized district leaders of the principals’ and teachers’ labor unions about district Priority Schools and the development and implementation of the plan proposed for this specific Priority School proposed in this application. The evidence of consultation and collaboration provided by the LEA must contain each of the following elements:

- i. Describe in detail the steps that have occurred to consult and collaborate in the development of the district and school-level implementation plans.
- ii. Complete the Consultation and Collaboration Form and submit with this application (Attachment A).

The NYCDOE has consulted and collaborated with key stakeholders on the development of SIG Cohort 6 plans. Application and NYCDOE-developed guidance materials were shared directly by staff with the parent leadership group, CPAC; the principals’ union, CSA; and the teachers’ union, UFT. The engagement process with each group took place via meetings, phone calls, and emails about the applications. School Leadership Team (SLT) meetings took place to discuss school plans, which includes the principal, parent representatives, and UFT school leadership.

NYCDOE staff met with the Chancellor’s Parent Advisory Council (CPAC) in a full meeting on June 11 to discuss SIG Cohort 6. CPAC is the group of parent leaders in the NYCDOE; it is comprised of presidents of the district presidents’ councils. The role of CPAC is to consult with the district presidents’ councils to identify concerns, trends, and policy issues, and it advises the Chancellor on NYCDOE policies. NYCDOE staff met with UFT leadership on June 29 and engaged in multiple phone calls and emails with UFT regarding plan and overall school feedback subsequent to this meeting. CSA was also consulted with via phone calls and emails. All groups received district and school drafts for review and feedback.

The NYCDOE is committed to collaboration in its efforts to improve Renewal Schools. Teacher leaders in particular are integral to the successful implementation of all other school improvement measures. They serve as indispensable colleagues for school leaders, ensuring that the school community retains its most effective teachers, is supportive of all teachers' growth, and increases student achievement. School-level plans include information about faculty senates or other structures to promote shared school-based governance, responsibility, and collaboration in the interests of furthering the educational mission of each school. Moreover, the success of these schools depends largely on developing in parents an ownership and leadership in schools. This means shifting the paradigm from parents as participants to parents as leaders and decision-makers who work hand-in-hand with school staff and CBOs. Stakeholder collaboration will continue to be a focus for each SIG Cohort 6 school.

In addition to the district-level Attachment A, NYCDOE asked that schools submit a school-level Attachment A, the Consultation & Collaboration Documentation Form, in order to ensure consultation and collaboration took place on the school-level plans with staff and parent stakeholder groups. Signatures include the school's principal, parent group president, and UFT representative. These school-level forms are also attached in addition to the required district-level Attachment A. The district-level form is signed by the president/leaders of the teachers' union, principals' union, and district parent body as of July 17 and July 20. The individuals who signed are Michael Mulgrew, UFT President; Ernest Logan, CSA President; and Nancy Northrup, CPAC Co-Chair.

Section D: District trainings offered for Year One

Planned Event	Office Responsible	Rationale	Outcomes
New Teacher Mentoring	Office of Leadership	The mentor's role is to promote growth and development of new teachers to improve student learning by providing instructional coaching and non-evaluative feedback. The NYCDOE believes that one of the first leadership opportunities for teachers is to become a new teacher mentor; there are new teacher mentor certification courses held.	In 2014-15 there were approximately 6,000 new teacher mentors
Teacher Leadership Program (TLP)	Office of Leadership	Strengthening content knowledge, coaching, and facilitative skills are the key elements of this program for teachers already serving in school-based leadership roles; TLP is an opportunity for teacher leaders to develop their facilitative and instructional leadership skills. It is designed to challenge and support teacher leaders across the city in developing the content knowledge and facilitative leadership skills needed to guide instructional improvements in schools. Upon completion of the program, teachers may choose to remain in teacher leadership roles within their schools or consider applying to a principal preparation program to further strengthen their leadership skills and prepare for roles as school leaders.	Approximately 350 schools selected with 50 principals and 700 teachers actively involved for 2015-16

New Leaders Emerging Leaders Program	External Partnership with New Leaders and the Office of Leadership	Provides teachers, instructional coaches and other school leaders with hands-on, on-the-job training that deepens their adult leadership skills.	Approximately 25-30 teachers and/or assistant principals provided with high-impact professional development Potential invitation to New Leaders Aspiring Principal Program
Leaders in Education Apprenticeship Program (LEAP)	Office of Leadership	Develops individuals who demonstrate leadership capacity and readiness to take on school leadership positions in their existing school environments.	Approximately 100 apprentices per year Number of certificates obtained for: School Building Leader (SBL) certification Program certificate of completion
NYC Leadership Academy Aspiring Principal Program	External Partnership with NYCLA and Office of Leadership	Focuses on leaders interested in ensuring high academic achievement for all children, particularly students in poverty and students of color.	15 aspiring principals for 2015-16: Program certificate of completion
NYC Leadership Academy Leadership Advancement Program	External Partnership with NYCLA and Office of Leadership	Prepares teachers and guidance counselors who currently serve in school-based leadership roles to become school administrators in NYCDOE schools.	After two years: School Building Leader (SBL) certificate obtained Assume the role of Assistant Principal Potential partnership with an APP graduate
Assistant Principal Institute (API)	Office of Leadership	A year-long program designed to prepare strong assistant principals for principal positions in one to three years.	Approximately 60-75 assistant principals for 2015-16
Wallace Fellowship	Office of Leadership and External Partnerships with	Partnership with Bank Street, Relay Graduate School, Fordham, Queens College, Hunter College,	Approximately 100-150 candidates enrolled in these programs apply and

	Universities in NYC	Brooklyn College, and Lehman College to prepare teachers with the credentials necessary to obtain NYS SBLs.	are selected for a fellowship where they receive additional opportunities to engage in NYCDOE professional learning and preparation to become an assistant principal or principal in NYC
Principal Candidate Pool	Office of Leadership	To positively impact student achievement by ensuring that strong leaders are considered for principal roles. This is one of the first steps before a candidate is eligible to apply for a principal position. In 2013, the process was aligned explicitly to the Quality Review Rubric.	High-quality reports about potential principal candidates
Advanced Leadership Institute (ALI)	Office of Leadership	The New York City Department of Education's (DOE) Advanced Leadership Institute (ALI), in partnership with Baruch College, is a one-year leadership development program for high-performing principals, network, cluster, or central leaders. Taught by current DOE leaders, ALI combines theory with clinically-rich learning experiences to develop the knowledge, skills, and aptitudes necessary to effectively lead at the systems-level. Participants accepted into ALI will be eligible for a 60% reduction of SDL tuition fees through Baruch College. Those who meet and demonstrate success will receive a certificate of completion from the DOE and be considered for New York State (NYS) School District Leader (SDL) certification. Candidates who already hold School District Leader (SDL) certification are also eligible to apply.	Approximately 30 candidates for the 2015-16 school year

Chancellors Fellowship	Office of Leadership	<p>The Chancellor's Fellowship is a leadership development opportunity for top talent at the New York City Department of Education (NYCDOE). The program is designed for exemplary principals and central leaders who are committed to public education and have a proven record of success. The Fellowship provides tangible tools and non-monetary rewards to our 'best and brightest' including professional development; executive coaching, career guidance and a network of peers and alumni. The Chancellor's Fellowship is a highly selective program for up to twelve participants. Chancellor's Fellows will be trained and provided opportunities in six competency categories that collectively define what it takes to be an effective system-level leader. Each Chancellor's Fellow will also receive a 360-degree review and five hours of executive coaching.</p>	20 participants per calendar year
Teacher Career Pathways Program	Office of Teacher Recruitment and Quality	<p>In the classroom for half of the day, Peer Collaborative Teachers (PCTs), formerly known as Lead Teachers, create model classrooms to demonstrate best practices and try out new curriculum and pedagogical strategies. PCTs spend the remainder of their time coaching peers, co-teaching, and facilitating teacher teams. Model Teachers create laboratory classrooms and share best practices with colleagues. Master Teachers play a school-wide role in driving instructional initiatives. They may also work as a leader coaching other teachers across schools.</p>	SY14-15: 225 PCTs (140 schools); SY15-16 numbers not finalized yet

A. District Overview

The LEA must demonstrate a commitment to success in the turnaround of its lowest achieving schools and the capacity to implement the model proposed. The district overview must contain the following elements:

- i. Describe the district motivation/intention as well as the theories of action guiding key district strategies to support its lowest achieving schools and ensuring that all students graduate high school ready for college and careers.
- ii. Provide a clear and cogent district approach and set of actions in supporting the turnaround of its lowest achieving schools and its desired impact on Priority Schools.
- iii. Describe the evidence of district readiness to build upon its current strengths and identify opportunities for system-wide improvement in its Priority Schools.

Under the leadership of Schools Chancellor Carmen Fariña, the New York City Department of Education (NYCDOE) is fundamentally changing the way in which it partners with and provides support to schools, and holds everyone in the system accountable for results. The NYCDOE created *Strong Schools, Strong Communities* (see plan [here](#)), which outlines the motivation/intention and theories of action guiding NYCDOE strategies to support the lowest achieving schools and ensure that all students graduate high school ready for college and careers. The plan describes a new approach to supporting New York City's public schools and all of our students, which consists of three key components:

1. The Framework for Great Schools – a roadmap to school improvement for school leaders
2. School Quality Reports that give schools and families well-rounded and actionable information about school performance
3. A streamlined system to deliver customized support to schools

The Framework for Great Schools provides the NYCDOE approach in supporting the turnaround of our lowest achieving schools and ensuring that all students graduate high school ready for college and careers. There are six essential interconnected elements of the framework which are the foundation for our approach:

1. **Rigorous instruction:** Classes are driven by high educational standards and engage students by emphasizing the application of knowledge.
2. **Collaborative Teachers:** The staff is committed to the school, receives strong professional development, and works together to improve the school.
3. **Supportive Environment:** The school is safe and orderly. Teachers have high expectations for students. Students are socially and emotionally supported by their teachers and peers.
4. **Strong Family-Community Ties:** The entire school staff builds strong relationships with families and communities to support learning.
5. **Effective Leaders:** The principal and other school leaders work with fellow teachers and school staff, families, and students to implement a clear and strategic vision for school success.
6. **Trust:** The entire school community works to establish and maintain trusting relationships that will enable students, families, teachers, and principals to take the risks necessary to mount ambitious improvement efforts.

The NYCDOE School Renewal Program was recently created for the most struggling schools, including Priority Schools. All of the schools for which the NYCDOE is applying for the School Improvement Grant (SIG) Cohort 6 opportunity are Renewal Schools. The School Renewal Program provides a more targeted approach for school improvement, and demonstrates the readiness of the NYCDOE to build upon current strengths and identify further opportunities for improvement. The NYCDOE is working intensively with each Renewal School community over three years, setting clear goals and holding each school community accountable for rapid improvement. More information about the School Renewal Program is [here](#).

Renewal Schools are transforming into Community Schools as the New York City Community Schools Initiative is a central element of Mayor Bill de Blasio's vision to re-imagine the City's school system; this direction is aligned with the New York State Education Department (NYSED) state-determined SIG model: the Innovation Framework Community-Oriented School Design, the model selected for NYCDOE SIG Cohort 6 applications. Community Schools are neighborhood hubs where students receive high-quality academic instruction, families can access social services, and communities congregate to share resources and address common challenges. The Mayor has pledged to create more than 100 Community Schools over the next several years, including this school. More information on the Community Schools Initiative is [here](#).

This SIG plan is based on the school's unique Renewal Schools Comprehensive Education Plan (RSCEP), which was crafted this past spring based on needs assessments for each school and includes a Community School description along with SCEP required information. NYCDOE Renewal Schools will be transformed into Community Schools, have an additional hour of instruction each day, increase professional development in key areas like student writing, and launch a summer learning program – with concrete targets in student achievement. This SIG plan will support key improvement strategies in the Renewal School.

Another strength of the NYCDOE includes control of the schools under the Chancellor and Mayor, which ultimately has given more independence to principals. One of the most important reforms has been giving principals control over hiring and budget decisions. An opportunity for improvement, however, is that while some principals were able to use this autonomy to drive achievement in their schools, others struggled without direction on how to improve, particularly in struggling schools. Moving forward, each NYCDOE Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results. Superintendents will utilize a school's performance data, the Framework for Great Schools, and the professional judgment they have gained through experience to raise student achievement in struggling schools.

The Mayor, Chancellor, and NYCDOE leadership will closely monitor Renewal School progress via regular data reports and frequent visits to the school. Renewal Schools have at most three years to show significant improvement before the NYCDOE considers restructuring the school. If the school fails to meet benchmarks each year, or the Superintendent loses confidence in the school leadership, the Superintendent will make the changes necessary to ensure that each child in the school has a high-quality education. Such changes may include school consolidation/merger or closure.

The NYCDOE is monitoring schools with low student enrollment for possible consolidations/mergers. By the end of the 2014-15 school year, proposals to consolidate four low enrollment schools were announced for proposal to the Panel on Educational Policy (PEP) in fall 2015. In addition, there are other schools that could benefit from consolidation, and school leaders are working closely with their communities and Superintendents with the intention of aligning resources and building consensus for consolidation. We anticipate making further announcements this fall if there are viable school redesigns, which may include SIG Cohort 6 schools. Our budget requests for schools with currently less than a 200 student enrollment reflect a reduced amount for school year 2015-16 as we took into consideration the relatively low student enrollment. We believe that our school redesign efforts will ultimately provide a much richer educational experience for our students.

B. Operational Autonomies

The LEA must provide operational autonomies for Priority Schools in exchange for greater accountability for performance results in the following areas: 1) staffing; 2) school-based budgeting; 3) use of time during and after school; 4) program selection; and 5) educational partner selection. In addition to providing quality responses to each element requested in this section of the Project Narrative, the Priority School must have school-level autonomy in at least two of these areas for an *acceptable* rating in this category. Applications that provide quality responses and that are granted anywhere from 3 to 5 of these autonomies will receive a rating of *exemplary* for this category. The LEA must respond to each of the following:

- i. Describe the operational autonomies the LEA has created for the Priority School in this application. Articulate how these autonomies are different and unique from those of the other schools within the district and what accountability measures the district has put in place in exchange for these autonomies.
- ii. Provide as evidence formally adopted Board of Education policies and/or procedures for providing the school the appropriate autonomy, operating flexibility, resources, and support to reduce barriers and overly burdensome compliance requirements.
- iii. Submit as additional evidence, supporting labor-management documentation such as formally executed thin-contracts or election-to-work agreements, or school-based options, that state the conditions for work that match the design needs of Priority School.

As a Renewal School, the school is provided increased supports for increased accountability for performance results. Key elements of the School Renewal Program are:

- Transforming Renewal Schools into Community Schools
- Creating expanded learning time
- Supplying resources and supports to ensure effective school leadership and rigorous instruction with collaborative teachers
- Underperforming schools will undergo needs assessments in six elements of the Framework for Great Schools to identify key areas for additional resources
- Bringing increased oversight and accountability including strict goals and clear consequences for schools that do not meet them

Budgeting: A budget for the school is based on the Fair Student Funding (FSF) formula. Funding follows each student to the school that he or she attends based on student grade level, with additional dollars based on need (academic intervention, English Language Learners, special

education, high school program). Recently the NYCDOE committed \$60 million in additional funding to ensure that struggling schools have the resources they need to succeed. Renewal Schools will be brought to 100 percent of their FSF recommendation within two years. Also as a Priority School, the school receives funding through Title I allocations to support its goals outlined in its school improvement plan as a struggling school. Priority Schools select to use this funding towards identified areas of need, for example expanding learning time. Priority Schools may also receive School Achievement Funding from the NYCDOE to improve instructional programs.

A description of Fair Student Funding, which can be used at principal discretion, is posted [here](#). A description of School Achievement Funding can be found [here](#). The Priority School receives funding in its budget to use flexibly and an additional funding allocation to support its school improvement activities, documented in a NYCDOE procedure known as a School Allocation Memorandum (SAM). The Priority and Focus Schools SAM for school year 2014-15 is posted [here](#) and is also attached.

Staffing: Renewal School principals select staff to fill vacancies. Principal staffing actions include additional pay for certified staff for expanded learning as required by NYSED as a Priority School. Schools participate in NYCDOE teacher leadership programs to support the retention and development of expert teachers at their school. The NYCDOE provides organizational assistance to Priority Schools. The Office of State/Federal Education Policy & School Improvement Programs is designated to work with Priority Schools to select and implement their whole school reform models and assist the schools with compliance requirements. School Implementation Managers (SIMs) work with SIG schools on school improvement efforts and SIG compliance requirements.

Renewal School principals and their leadership teams were targeted by NYCDOE central for ongoing consultation recruitment and retention needs as well as a series of trainings, workshops, and activities that are customized to fit the specific needs of the school. Focus areas include recruitment and marketing to candidates, determining “right-fit” teachers, teacher selection, and supporting and retaining new and existing teachers.

Through the 2014 teachers’ contract and subsequent amendments (see the attached UFT MOA) three new teacher leader roles were created. All Renewal Schools had the opportunity to establish teacher leader roles with a designated funding allocation; below is additional information on three key new roles.

- Model Teacher: Takes on additional responsibilities such as establishing a laboratory classroom; demonstrating lessons; exploring emerging instructional practices; reflecting on and debriefing a visit from a colleague.
- Peer Collaborative Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the professional learning of their colleagues through peer coaching and intervisitation.
- Master Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the entire school or across multiple schools; responsible for school-level progress.

Teacher leaders are integral to the school improvement process as well as a way to retain high-performing teachers, recruit and attract experienced educators, create opportunities for collaboration, and further develop and refine teacher practice. As one principal explained, “Having a distributed leadership structure in this school is not only effective for building effective teaching practices, but also for running a school. It makes my day and my job infinitely easier. One example is planning [professional learning time] on Mondays... it is a big task. Knowing that we have teacher leaders working with teachers who are putting forth things they would like to work on makes that time more effective and the teachers more invested.”

Each school will receive up to \$27,500 to fund a team of teacher leaders. The allocation will be issued through a SAM following the completion of the teacher leader selection and staffing cycle. The selection process is a joint UFT-NYCDOE designed and implemented process. In addition, only teachers rated Effective and Highly Effective are eligible to apply.

Guidance provided by the NYCDOE includes that schools may use the allocation to fund one Peer Collaborative Teacher and two Model Teachers:

- Schools where teacher leadership has been the most successful in building school culture have staffed more than one teacher leader role at their school – ideally a team of at least three. Having more than one teacher leader at a school, formalizes teacher leadership to the rest of the staff and makes the work of the teacher leaders a larger part of the school culture.
- Given that the Peer Collaborative Teacher has release time, they are well positioned to organize the teacher leadership team in a way that broadens the impact of the teacher leader team and increases the potential supports for other teachers in the school. The Model Teachers act as key partners in the work to support growth through sharing their classroom with other teachers in the building.

Program selection: NYCDOE was among the first large urban school districts in the nation to recommend new high-quality Core Curriculum materials, with English Language Learner supports, for grades K-8 in ELA and math that align to the CCLS and promote the instructional shifts. The NYCDOE conducted an extensive research and review process in order to identify high-quality Core Curriculum materials that align to the CCLS and promote the Common Core Instructional Shifts for ELA and Mathematics. Additional information on NYCDOE and the Common Core may be found [here](#).

Each Renewal School participated in a needs assessment, which included the Surveys of Enacted Curriculum (SEC), a research-based, nationally validated set of online surveys that align teacher-reported data on ELA and mathematics instruction against the Common Core standards. The SEC is used as one set of data to help inform the school how what is happening in the classroom—the enacted curriculum—compares to the written curriculum and tested curriculum, including state assessments. It helps begin conversations about how to better align the three types of curricula. Reports were provided to each school to inform their SIG Cohort 6 plan.

There are differentiated professional supports provided to Renewal Schools. Teachers in K-8 schools are provided professional development through the Teacher's College Writing Project and the ReadyGen Independent Reading Initiative. Teachers in high schools are provided with professional development through the WITsi (Writing is Thinking Through Strategic Inquiry) process, included in the school-level SIG plans. Effective strategies for teaching expository writing will be taught explicitly up front and integrated into the strategic inquiry process. The rationale for their central role is that they are high-leverage strategies that target struggling students' deficiencies and that improve content knowledge, academic vocabulary, written language, oral language and reading comprehension simultaneously. They also help teachers pinpoint what struggling students need and how to provide it. The strategy is to begin (year 1) with a focus on the 9th grade and to focus on one additional grade each subsequent year (9th and 10th in year 2; 9th through 11th in year 3).

Schools are also selecting programs to improve school climate and safety with the goal of decreasing incident rates, suspension rates, and disruptive behavior, and an increase in teachers' ability to manage challenging student behaviors and an increase in student academic achievement. To help strengthen school communities and improve academic outcomes, staff members need support to understand and anticipate behavior issues before they escalate. The Positive Learning Collaborative (PLC) is a joint initiative between the NYCDOE and teachers' union, UFT, which provides intensive training and direct consultation to educators in order to develop the skills that prevent crises and help students focus on academic goals. Information about PLCs will be shared with SIG Cohort 6 schools for consideration of implementation.

Educational partner selection: As part of being a Renewal School and under the Community-Oriented School Design model, the school has selected partnerships with community-based organizations (CBOs) that offer tailored whole-student supports, including mental health services and after school programs. Principals have discretion over selecting educational partners, including those outlined in the SIG plan, that have been formally contracted by the NYCDOE after a vetting process. The NYCDOE oversees a request for proposal process from organizations experienced in working with schools in need of school improvement. Accountability plans for the partner must be included based on annual evaluations of student progress in the Priority School. If progress is not evident, then the work with the partner is discontinued.

Educational partner selection from pre-qualified organizations is accomplished through the Multiple Task Award Contract (MTAC) procedure, which provides a streamlined process for schools to follow, posted below. All RFPs are on the NYCDOE public website [here](#). Renewal Schools have selected from the following community-based organizations (CBOs) listed [here](#). CBOs selected for SIG Cohort 6 applicant schools include Zone 26, Grand Street Settlement, Center for Supportive Schools, Phipps Neighborhood, Good Shepard Services, Fordham University, the Child Care Center of New York, Westhab, and El Puente. More information about the chosen CBO is in Attachment Z.

The MOUs submitted under the SIG Innovation Framework for each school and CBO outline their partnership. The CBO selected is the lead partner in the SIG Innovation Framework

Community-Oriented School Design. The process for CBO selection involved the NYCDOE issuing a request for proposals to CBOs to partner with Renewal Schools. Once the pool of CBOs was selected, School Leadership Teams (SLTs) were able to interview CBO representatives to determine fit with the school. The SLT utilized a rubric that included questions on whether the CBO could support the vision of the school through understanding the student population and needs. The CBO works in collaboration with the school principal, SLT, and the community school director assigned to the school to coordinate resources.

Use of Time During and After School: The school has a variety of opportunities for changing the use of time during and after school. NYCDOE Priority Schools are implementing an additional 200 hours of Expanded Learning Time (ELT). NYCDOE created guidance for schools to implement ELT called Guidelines for Implementing Expanded Learning Time at Priority Schools; see [here](#). The Priority School has the option to have ELT providers support students through extended learning time.

All students in Renewal Schools will be given an opportunity for an additional hour of supplemental instruction each school day, beginning next school year; a separate budget allocation is provided for this purpose. The approach is that at least one hour of ELT is offered to every student, known as the Renewal Hour. Schools may offer both the Renewal Hour and other ELT programming. In addition, the lead CBO has funds budgeted in their Community Schools contract to hire staff for the ELT initiative. There are two basic models for the Renewal Hour: integration into the regular student school day or offering the ELT before or after the school day. The attachment “Guidance for Use of Expanded Learning Time” outlines the options for the implementation of Expanded Learning Time that Renewal Schools in more detail.

Schools can utilize a School-Based Option (SBO) to create flexible use of time. The SBO process allows individual schools to modify certain provisions in the teachers’ union (UFT)/NYCDOE Collective Bargaining Agreement. In the SBO process, the school community creates a plan for how to effectively implement extended learning time. The principal and school-based UFT chapter leader must agree to the proposed modification which is presented to school union members for vote. Fifty-five percent of the UFT voting members must affirm the proposed SBO in order for it to pass. The intent of the SBO process is to empower the school community on how to best make use of time before, during, and after school. The SBO process is described in the NYCDOE/UFT Collective Bargaining Agreement on page 46 [here](#) and is also attached.

C. District Accountability and Support

The LEA must have the organizational structures and functions in place at the district-level to provide quality oversight and support for its identified Priority Schools in the implementation of their SIG plans. The LEA plan for accountability and support must contain each of the following elements:

- i. Describe in detail the manner by which the district ensures that all federal requirements of a school’s chosen model are fulfilled and continue to be fulfilled throughout the duration of the grant.
- ii. Identify specific senior leadership that will direct and coordinate district’s turnaround efforts and submit an organizational chart (or charts) identifying the management structures at the district-level that are responsible for providing oversight and support to the LEA’s lowest achieving schools.

- iii. Describe in detail how the structures identified in “i” of this section function in a coordinated manner, to provide high quality accountability and support. Describe and discuss the specific cycle of planning, action, evaluation, feedback, and adaptation between the district and the school leadership. This response should be very specific about the type, nature, and frequency of interaction between the district personnel with school leadership and identified external partner organizations in this specific Priority School application.
- iv. For each planned interaction, provide a timeframe and identify the specific person responsible for delivery.

The central Office of State/Federal Education Policy & School Improvement Programs (organizational chart attached) works to identify and monitor Priority School whole school reform model selection and SIG progress monitoring. The School Implementation Manager (SIM) ensures SIG application development, implementation, and monitoring of the approved plan. Specific activities of the SIM include:

- Review quantitative and qualitative data to assess student strengths and weaknesses;
- Investigate root causes or contributing factors for low student achievement;
- Align resources to maximize benefits to students;
- Monitor plan implementation and make mid-course adjustments, as needed; and
- Evaluate the impact of improvement interventions and external partners.

Schools Chancellor Carmen Fariña assumed leadership of the NYCDOE in January 2014. Dr. Dorita Gibson is the Senior Deputy Chancellor and the Chancellor’s second in command overseeing all aspects of school support, Superintendents, support for struggling schools, District 75 and 79 programs, and school communications. Phil Weinberg is the Deputy Chancellor for Teaching and Learning overseeing professional development and curriculum, performance and accountability, Common Core and college-readiness initiatives, Career and Technical Education, and instructional support. Attached is a copy of the NYCDOE senior leadership organizational chart which also includes leadership in Family Engagement, Operations, Students with Disabilities, and English Language Learners, all of which play an integral role in coordinating turnaround efforts.

The NYCDOE is transitioning to a new school support structure now that will be in place and operational for the first day of school in September 2015. The new approach to school support is guided by six critical principles:

- 1) Clear lines of authority and accountability so all schools improve.
- 2) Families have one place to call if they cannot resolve problems at the school.
- 3) School leaders maintain the critical independence over budget and human resources they have had, so they can continue to drive improvement.
- 4) Provide customized support so school leaders can focus on those improvement efforts most likely to boost achievement.
- 5) Provide one-stop support to school leaders.
- 6) Create equity in the system by providing more intensive support to schools that need it most.

The new school support structure consists of four major parts:

- 1) Superintendent's Offices: each Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results
- 2) Borough Field Support Centers: each of the seven geographically located Borough Field Support Centers will utilize a BOCES model (Board of Collaborative Educational Services) in the provision of support to schools. An organizational chart is attached.
- 3) Central Teams
- 4) Affinity Groups, formerly called Partnership Support Organizations

As Renewal Schools, under the direction of the Superintendent, the Principal Leadership Facilitators and Directors for School Renewal (DSRs) are the core drivers of school improvement and implementation for Renewal Schools within their district. The DSR oversees and supervises the coordination and delivery of intensive supports to persistently low achieving schools. The DSR assists with needs-aligned instructional and operational supports to a number of underperforming schools, including professional development, intensive interventions, summer programming and extended learning opportunities, to ensure accelerated academic achievement for the schools served. Attached is a copy of the Renewal Schools Program organizational chart.

DSRs work with Renewal Schools to coordinate all school improvement efforts; SIMs work in collaboration with DSRs on SIG requirements. Community School Directors (CSDs) are assigned to each Renewal School to coordinate resources at the school-level with the CBO and school. The attached "Stages of Development in a NYC Community School" provides a rubric for schools to move from exploring to excelling in the features of a community school. Staff are held accountable through performance reviews and grant monitoring. External partner organizations working with Priority Schools are evaluated by schools and the NYCDOE based on performance targets. Regular meetings take place with partners to ensure effectiveness, and through the SIG Innovation Framework Community-Oriented School Design the NYCDOE will convene all lead partners and school leaders as done with its School Innovation Fund (SIF) lead partners last year to share expectations of SIG and as a lead partner.

Interactions with the Renewal School include weekly coaching visits to schools by DSRs and content specialist instructional coaches. There are frequent observations with timely, accurate, and actionable feedback. Superintendents provide professional development for school leaders through organizing bi-monthly, collaborative Principal meetings. Superintendents also conduct school visits and provide feedback to school leaders. Leadership coaches who are former successful principals have been assigned to Renewal School principals. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor ongoing progress; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent.

SIMs have a caseload of approximately a dozen schools implementing SIG Cohorts 2-6 and SIF. SIMs are in each of their schools at least twice per month, communicate with school teams on progress monitoring, and represent their schools to NYSED in the progress monitoring process. Benchmarks have already been set for the school through the RSCEP, which align to SIG benchmarks, and require an increased level of accountability. Using these measures, Renewal Schools will be further evaluated by their superintendent at the conclusion of each of the next two school years, in June 2016 and June 2017.

One Renewal School benchmark of note is that of student attendance which is also reviewed by NYSED in SIG progress monitoring. This measure is required for all Renewal Schools as it is a key indicator of schools' progress. NYCDOE had 81 schools implementing SIG and SIF grants in school year 2014-15 and participated in U.S. Department of Education SIG monitoring of NYSED to outline its SIG development, implementation, and monitoring process. SIG Cohort 6 school plans outline strategies that will lead to successful outcomes in the leading indicators that are measured in NYSED SIG monitoring, including improvements in the areas of student attendance, teacher attendance, discipline referrals, ELT opportunities, and academic data.

In November 2014, NYCDOE released two new school quality reports, which present information about the school's practices, learning environment, and performance results. The School Quality Snapshot is designed specifically for families, and provides a concise summary of each school's practices, environment, and performance. The School Quality Guide is a more detailed report with additional information, including multiple years of data to show the school's progress over time. The Guide also sets rigorous and realistic targets that are based on the historical performance of schools with similar populations and the city as a whole for schools in areas including student achievement, student progress, and college and career readiness.

Each Renewal School was provided a menu from which they chose leading indicators and student achievement benchmarks. Generally the targets included in the NYCDOE [High School](#) and [Elementary/Middle School](#) Quality Guides were used as the basis for setting these benchmarks. The attached shows samples from the benchmarks menus provided 1) for an elementary/middle school and 2) for a high school. The guidelines for choosing benchmarks are similar; the leading indicators and student achievement benchmarks are different based on the school grade level.

Schools began receiving new data tools this year to help them track student progress and school improvement. The Progress to Graduation Tracker provides high schools and transfer high schools with credit and Regents data to more easily track individual students' progress toward graduation. The Tracker is updated on a daily basis so that educators can use the most up-to-date information possible when identifying students who may be in need of additional supports and interventions to help them succeed. The School Performance Data Explorer allows elementary, middle and high schools to easily search, sort, and monitor metrics for current students across subgroups and overtime. The tool includes information on how former students are doing academically since they have left the school. By allowing educators to examine both whole-school and individual-student metrics and trends, the Data Explorer is meant to help schools

better identify and support struggling students earlier than ever before, identify and address performance trends at their school, and track current and former students' progress over time.

The following chart summarizes the interactions, timeframe, and persons responsible that are discussed in this section:

Planned School Improvement Interaction	Timeframe	Person Responsible
Professional development for school leaders. School visits & feedback for school leaders.	Bi-monthly collaborative Principal meetings On-site school visits	Superintendent
Professional support to implement feedback provided by the Superintendent. Monitor progress and help to make adjustments when necessary.	On-going	Principal Leadership Facilitator (PLF)
Supervises the coordination and delivery of multiple supports from NYCDOE. Provides instructional and operational support for schools. Supports professional development needs of the school. Supports interventions, summer programming and extended learning opportunities for schools. Provides content coaching and classroom observations and feedback.	Weekly visits to School	Director for School Renewal (DSR)
Coordinate resources at the school-level with the CBO and school.	On-site daily	Community School Director (CSD)
Support and monitors SIG implementation. Coordinate with Superintendent teams on school improvement initiatives for SIG	Bi-monthly on site visits	School Implementation Manager (SIM)

D. Teacher and Leader Pipeline

The LEA must have a clear understanding of the type and nature of teachers and leaders that are needed to create dramatic improvement in its lowest-achieving schools. In addition, the LEA must have a coherent set of goals and actions that lead to the successful recruitment, training, and retention of teachers and leaders who are effective in low-achieving schools. The LEA's plan must include each of the following elements:

- i. Identify and describe recruitment goals and strategies for high poverty and high minority schools to ensure that students in those schools have equal access to high-quality leaders and teachers.
- ii. Describe the district processes for altering hiring procedures and budget timelines to ensure that the appropriate number and types of teachers and principals can be recruited and hired in time to bring schools through dramatic change.
- iii. Identify and describe any district-wide training programs designed to build the capacity of *leaders* to be successful in leading dramatic change in low-achieving schools. In addition, describe how these programs are aligned to the implementation of the specific model chosen (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*). Provide a history of these or similarly purposed programs in the district, how they are or have been funded, and identify whether the school principals chosen to lead the new school designs proposed in this application have emerged as a direct result of these programs. Please identify the goals in terms of quantity and quality of effective leader development.*
- iv. Identify and describe any district-wide training programs designed to build the capacity of *teachers* to be effective specifically in low-achieving schools. Provide a history of these programs in the district, how they are or have been funded, and identify whether the instructional staff chosen for the new school designs proposed in this application have emerged as a direct result of these programs. If the programs are newly proposed, please identify the goals in terms of quantity and quality of effective teacher development.*
- v. Identify in chart form, the district-offered training events for items "iii & iv" above, scheduled during the year-one implementation period (September 1, 2015 to June 30, 2016). For each planned event, identify the specific agent/organization responsible for delivery, the desired measurable outcomes, and the method by which outcomes will be analyzed and reported. Provide a rationale for each planned event and why it will be critical to the successful implementation of the SIG plan.

*The district-wide training and professional development programs to be identified in this section are those that are offered by the district to a group or cluster of like schools (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*) and/or to cohorts of teachers and leaders who will serve in them (e.g., training for turnaround leaders; training for teachers who need to accelerate learning in Priority Schools where students are several levels below proficiency; training for school climate and culture in Priority Schools, etc.). NYSED's Strengthening Teacher and Leader Effectiveness (STLE) grant may provide suitable examples of the types of training and professional development expected in this section. See <https://www.engageny.org/resource/improving-practice>. School-specific and embedded training and professional-development should be detailed in Section II. I.

The NYCDOE believes in its talent: the teachers, school leaders, and other personnel who work with our city's 1.1 million students. The mission of the [Office of Leadership](#) is to build and sustain a leadership pipeline that yields high-quality leaders at all levels of the system, including teacher leaders, assistant principals, principals, and systems-level leaders. The pipeline structure has systemic supports and effective leadership development programs at each stage to identify and cultivate:

1. Strong teachers to meet the citywide instructional expectations and move into more formal teacher leadership development programs;
2. Effective teacher leaders and assistant principals to move into principal pipeline programs and then into principal positions;

3. Quality support for novice principals; and
4. Opportunities for experienced principals to mentor aspiring leaders.

The NYCDOE seeks to ensure that every student has the opportunity to learn from a high-quality educator in a school with a strong school leader, particularly in Priority Schools where the need is great. To accomplish this goal, we developed a pipeline of expert teachers and leaders and provide them with targeted support. To increase the number of candidates who are well-prepared to become principals, we have strengthened our principal preparation programs. Simultaneously, we have shifted our focus toward identifying talented educators and nurturing their leadership skills while they remain in teacher leadership roles. Our theory of action is that if we invest in providing job-embedded leadership development opportunities for our most promising emerging leaders and supporting our strongest current leaders to build leadership capacity in others, then we will build a leadership pipeline that is more cost-effective and sustainable, and produces more high quality next-level leaders.

The NYCDOE created the Principal Candidate Pool selection process to make clear the expectations for principals in the recruitment process. The process is used to discern all candidates' readiness for the position of principal and ability to impact student achievement. The NYCDOE has launched an enhanced version of the Principal Candidate Pool process in order to meet the following objectives:

- Align the screening process to clear, high standards that are consistent with the expectations to which principals will be held accountable under 3012-c.
- Offer participants an opportunity to receive high-quality professional development about the NYCDOE's expectations of principals.
- Provide hiring managers with multi-dimensional information to help enhance strategic placement hiring decisions related to principals.

To recruit expert teachers, NYCDOE creates a diverse candidate pool. For subject-shortage areas in which there are not enough traditionally-certified teachers to meet the needs of schools, we developed alternative-certification programs such as the New York City Teaching Fellows, which draws skilled professionals and recent college graduates to teach in high-need schools. Begun in 2000, since then the program has provided schools with more than 17,000 teachers. In addition to the NYC Teaching Fellows program, the NYCDOE has created an innovative residency program called the NYC Teaching Collaborative that recruits and trains a cohort of 50 new teachers annually through a practice-based teacher training model in hard-to-staff schools. This program is modeled after the nationally known program run by AUSL in Chicago. Additionally, the NYCDOE recruits annually a cohort of new hires that have been identified as top tier recruits to fill positions in struggling schools called the "Select Recruits" program.

The NYCDOE created teacher recruitment initiatives to build a pipeline of teachers prepared to turnaround the performance of our lowest-performing schools and teacher leadership programs for experienced educators to support professional development in their schools. In June 2014 the NYCDOE and UFT negotiated a set of teacher leadership positions and those positions have been focused in a subset of schools to serve as a vehicle to attract new talent to struggling schools and create leadership opportunities for current teachers on staff. In spring 2015 a cohort

of school participated in a foundational teacher leadership professional learning series that oriented teachers to the new positions and provided opportunities for foundational skill development in key teacher leadership skills. The NYCDOE also leverages the state-funded Teachers of Tomorrow grant to provide recruitment and retention incentives for teachers to work in our highest-need schools.

To support schools in recruiting and retaining this new talent at the school level, the DOE produces annual “Smart Retention” reports which create a picture of a school’s history in retaining talent year over year. Alongside the report, NYCDOE offers coaching in recruitment and retention strategies for a subset of identified schools. Each year the NYCDOE sets hiring policies to ensure that teachers and principals can be recruited and placed into our schools. Principals are typically in place in schools by July before the start of the next school year to begin year-long planning and school improvement efforts and teachers in place by September. Once selected, principals are empowered to make certain staffing decisions for their schools. Schools receive their budgets for the new fiscal year by June.

Annual hiring exceptions are set to ensure that hard-to-staff schools are staffed appropriately. These exceptions are made on the basis of the following factors: hard to staff subject areas, geographic districts, and grade level (elementary, middle, high). The timeline allows school leaders the ability to plan for any staffing needs or adjustments in concert with the citywide hiring process which begins in the spring and continues into the summer.

The NYCDOE creates and collaborates with partners on principal training programs to build a pipeline of principals with the ability to drive teaching quality and student achievement district-wide, particularly in schools with the greatest need. Our principal preparation programs share the following characteristics: 1) a carefully-developed recruitment process to screen for highly qualified participants, 2) required completion of a practical residency period, and 3) projects capturing evidence of impact on leadership development and student gains. The NYCDOE is now committed to hiring principals with at least seven years of education experience. LEAP, launched in 2009, is a rigorous 12-month on-the-job program. LEAP develops school leaders within their existing school environments and creates opportunities to harness existing relationships including those with current principals and school communities. The LEAP curriculum differentiates learning based on individual needs and is aligned with the NYCDOE’s instructional initiatives and the CCLS.

Leadership coaches who are former successful principals have been assigned to Renewal School Principals that are leading high schools. The DSRs collaborate closely with the ELI Principal Leadership Coaches and Leadership Academy coaches. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor the ongoing progress of the Renewal efforts; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent to stay apprised of all the initiatives.

K-8 Renewal School principals are provided professional development and support through the School Renewal Principal Learning Community, which meets five times per year around thematically organized sessions designed to engage school leaders in their own professional learning. The sessions also involve guest speakers and experts in the field. Renewal Principals Study Groups are led by a panel of advisory principals and focus on developing leadership expertise in one or more of the following areas: budgeting, data analysis, curriculum and instruction, parent engagement and rebranding which involves re-visiting the mission and vision. Please see Attachment Z: School-Level Information for District-Level Plan for information about the principal chosen to lead the school design.

The NYCDOE believes that to support teachers in their growth and development, it is important to have a common language and understanding of what quality teaching looks like. We have invested significant resources into beginning the work of developing principals' and teachers' understanding of Charlotte Danielson's Framework for Teaching, while training principals to do more frequent cycles of classroom observations and feedback. Resources to begin this work are provided to principals and educators in a number of ways: central and school-based professional development opportunities, online courses, and Teacher Evaluation and Development Coaches (TDECs) who work across multiple schools within their district. In addition, the NYCDOE has developed district-wide training programs to build the capacity of specific groups of teachers, including new teachers, teacher leaders, and teachers that work with special populations.

As of July 1, 2015, the NYCDOE Talent Coach and MOSL Specialist positions have been combined to create a new role: the Teacher Development and Evaluation Coach (TDEC). TDECs are supervised by superintendents and as such support school leaders throughout their district with *Advance*, NYCDOE's teacher development and evaluation system. Teacher Development and Evaluation Coaches (TDECs) collaborate with and support instructional leaders in using *Advance* to assess teacher practice, utilize measures of student learning to assess teacher effectiveness, and deliver high-quality developmental feedback to improve teacher effectiveness and student learning. Coaches also inform central efforts to develop and refine systems, research tools and program policies that support school leaders across New York City in providing meaningful evaluations and targeted professional development to teachers.

New teachers who work in low-achieving schools are provided differentiated levels of support, depending on their pathway to teaching. The New York City Teaching Collaborative offers a subsidized Master's degree program and focuses on supporting our highest-need schools, provides intensive training and school placement during the spring, with ongoing mentoring and training throughout the fall.

Several district-wide training programs are also available for teacher leaders who work in low-achieving schools. We are looking to improve the teacher leadership programs that we offer and are now working to create career ladders for teachers. All of the programs have developed continuous feedback loops (surveys, focus groups, school-based visits) to ensure that professional development is effectively being delivered and meeting the needs of new teachers and teacher leaders. Current programs that exist include the Teacher Incentive Fund (TIF) Program, the three new identified teacher leadership positions, and the Learning Partners Program which allow teachers to stay in the classroom while collaborating with colleagues

within and across schools. Professional development is also offered through collaboration with the UFT Teacher Center. More information about teacher career pathways is [here](#).

A chart is included as an attachment on NYCDOE trainings offered, and additional information is included as an attachment as “Programs and Partnerships 2015.”

E. External Partner Recruitment, Screening, and Matching

The LEA must have a rigorous process for identifying, screening, selecting, matching, and evaluating partner organizations that provide critical services to Priority Schools.

- i. Describe the rigorous process and formal LEA mechanisms for identifying, screening, selecting, matching, and evaluating external partner organizations that are providing support to this Priority school.
- ii. Describe the LEA processes for procurement and budget timelines (and/or any modifications to standard processes) that will ensure this Priority School will have access to effective external partner support prior to or directly at the start of the year-one pre-implementation period and subsequent implementation periods.
- iii. Describe the role of the district and the role of the school principal in terms of identifying, screening, selecting, matching, and evaluating partner organizations supporting this school. Describe the level of choice that the school principal has in terms of the educational partners available and how those options are accessible in a timeline that matches the preparation and start-up of the new school year.
- iv. If the model chosen is *Restart*, the LEA/school must describe in detail the rigorous review process that includes a determination by the LEA that the selected CMO or EMO is likely to produce strong results for the school. See federal definition of ‘strong results’ at <http://www2.ed.gov/programs/sif/index.html>. Federal Register, vol. 80, no. 26, pg. 7242.

To identify, screen, select, match, and evaluate external partner organizations, the NYCDOE uses a Pre-Qualified Solicitation (PQS) process. PQS is an ongoing open call-for-proposals process by which the NYCDOE selects potential partners. Each partner undergoes a screening process, which includes a proposal evaluation by a committee of three program experts who independently evaluate partner proposals in terms of project narrative, organizational capacity, qualifications and experience, and pricing level. The result is a pool of highly-qualified partner organizations which are approved and fully contracted. The Priority School is then able to select services from any of the pre-qualified external partner organizations by soliciting proposals and choosing the best fit according to its needs. If a principal is interested in a specific partner that has not already been approved, then she/he can recommend that the partner engage in the qualification process with the NYCDOE.

In addition, the NYCDOE uses a specific solicitation process called Whole School Reform, which seeks proposals from organizations experienced in working with schools in need of school intervention. The goal is for the partners to support the school to build capacity and enable the school to continue improvement efforts on its own. Partner proposals must offer a variety of methods and strategies grounded in best practices to achieve substantial gains. Potential partners provide accountability plans that include annual evaluations on student achievement progress and the process for enabling schools to continue the reform efforts beyond the contract period, along with at least three references from current or past client schools. Once partner proposals are reviewed by the evaluation committee and recommended for approval, further due diligence is done before formal recommendation for the Panel for Educational Policy for approval. Principals have discretion to select approved partners based on their scope of service needs.

Please see Attachment Z: School-Level Information for District-Level Plan for information about the CBO that is providing support to this Priority School. The school-level plan for this Priority School describes the particular design framework proposed and the scope of the re-design, as well as our rationale for selecting the chosen external partner as a solution to address identified gaps.

Priority Schools receive budget allocations for the new fiscal year by June, well in advance of the start of the new fiscal year in July and the start of the school year in September. The NYCDOE budget process provides principals with ample time to secure external partner support through the above-mentioned systems. Principals may secure services from a list of external partners that have already been thoroughly vetted by NYCDOE. Individual principals create a scope of service and solicit proposals from partners based on their specific needs. Once received, principals score proposals and award contracts to the most competitive and cost-effective partners. Priority Schools secure support from effective external Whole School Reform partners as early as May or June, well in advance of the year-one implementation period.

The NYCDOE manages the initial process of screening potential partner organizations so that principals can focus on selecting partner organizations based on their budget and service needs. NYCDOE manages an ongoing call-for-proposals process for select categories of services to schools. All proposals received by the NYCDOE must first be reviewed to determine if they meet all of the submission qualifications prescribed in the call for proposal. Proposals meeting these requirements are evaluated and rated by a district-based evaluation committee.

As needed, the NYCDOE may conduct site visits to verify information contained in a proposal and may require a potential partner to make a presentation on their services or submit additional written material in support of a proposal. Once the NYCDOE recommends a vendor for award, the recommendation is reviewed by the Division of Contracts and Purchasing for approval and then the Panel for Educational Policy for review and final approval.

Priority School principals are able to contract services from any of the approved pre-qualified educational partners by developing a specific scope of work, soliciting proposals using a user-friendly online tool and choosing the most competitive partner according to their specific needs. Once school principals receive school budgets for the new fiscal year in June, they are able to begin negotiating with potential partners for services in the new school year. The process allows principals sufficient time to solicit vendors and establish contracts in time for the new school year and possible preparation activities during the summer.

At the end of each school year, each school principal evaluates the services of the vendors – based on the objectives, proposed scope of services, and outcomes from the services – and determines whether to continue the partnership. Central staff assist the Priority School in evaluating the impact of chosen partners toward meeting the school’s improvement goals.

F. Enrollment and Retention Policies, Practices, and Strategies

The LEA must have clear policies, practices, and strategies for managing student enrollment and retention to ensure that Priority Schools are not receiving disproportionately high numbers of students with disabilities, English-language learners, and students performing below proficiency.

- i. Identify and describe similarities and differences in the school enrollment of SWDs, ELLs, and students performing below proficiency in this Priority School as compared with other schools within the district. Discuss the reasons why these similarities and differences exist.
- ii. Describe the district policies and practices that help to ensure SWDs, ELLs, and students performing below proficiency have increasing access to diverse and high quality school programs across the district.
- iii. Describe specific strategies employed by the district to ensure that Priority schools in the district are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency.

Please see Attachment Z: School-Level Information for District-Level Plan for information about this Priority School's enrollment as compared with other schools.

The NYCDOE operates a school choice-based system for students and families from Pre-Kindergarten to high school. In the past several years, the NYCDOE has worked to increase equitable access to high quality programs at all grade levels. All students, including students with disabilities, English Language Learners, and students performing below proficiency have access to all public schools as part of the choice-based enrollment system. Students participating in Pre-Kindergarten admissions can access NYCDOE district schools and New York City Early Education Centers (NYCEECs). The NYCDOE works to make as many pre-K programs as possible available to families. This year, families had the benefit of a new streamlined application process. This single application process allowed families to rank their options in order of preference, including both NYCDOE district schools and NYCEECs. Students participating in Kindergarten admissions can access all elementary choice and zoned schools. Zoned schools give priority to students who live in the geographic zoned area. Choice schools are schools that do not have a zone and give priority to applicants based on sibling status, district of residence, and in some cases, other criteria. The Kindergarten application process is a single application that allows parents to rank their school options in order of preference, including both zoned and choice schools.

At the middle school level, families also may submit a single application that allows them to rank their school options in order of preference. Some community school districts maintain primarily zoned middle schools, which give priority to students in the geographic zone. Most districts also have choice schools which have admissions methods based on academic or artistic ability, language proficiency, demonstrated interest, or a lottery (unscreened). At the high school level, approximately 75,000 students participate annually in a single application process that covers over 400 schools. The citywide choice process provides an opportunity for all participants to select up to 12 choices from across the five boroughs. The process consistently matches the majority of students to their top choice schools; for the previous five years, high school admissions has matched over 80% of students to one of their top five choices. Students may participate for both 9th grade and 10th grade admissions.

Since the 2012-13 school year, students with disabilities who have IEPs have benefited from improved access to zoned and choice schools. Rather than being assigned to a school based solely on availability of their recommended special education program, students with IEPs participated fully in the standard Kindergarten, middle school, and high school admissions process alongside their peers. This increased level of access will continue to scale up until the NYCDOE can ensure all students with disabilities have access to the schools they would otherwise attend if they did not have an IEP and, furthermore, that their special education programs, supports, and services be available in the schools to which they are matched.

Throughout the 2013-14 and 2014-15 school years, the Division of Specialized Instruction and Student Support (DSISS) partnered with field-based school support teams and schools to proactively support students with disabilities in the following four areas: student engagement in rigorous curriculum with full access to community schools and classrooms, development and implementation of quality IEPs, infusing school-wide and individualized positive behavioral supports, and effective transition planning. For the 2015-16 school year, DSISS will continue this work. All stakeholders will continue to be responsible for ensuring students with disabilities are educated in the most appropriate, least restrictive environment. To that end, through the NYCDOE's special education reform work, schools will engage in professional learning opportunities that focus on the continued commitment to supporting all educators in their understanding and facility with learner variability, access to content, rigorous expectations, inclusion, and the essential knowledge and skills needed for students to be college and career ready. Priorities for professional development are built on themes that reflect research- and evidence-based best practices and are fully integrated with the Common Core Learning Standards and *Advance*.

The NYCDOE has begun to put in place policies and practices designed to ensure that Students with Disabilities (SWDs), English Language Learners (ELLs), and students performing below proficiency have increasing access to diverse and high quality school options across the district. Our current SWD and ELL policies and guidance not only support schools in focusing their programming practices around student needs, but also encourage schools to develop a deep knowledge and understanding of their students' strengths, needs, and preferences in order to drive programmatic planning and/or shifts. Schools are supported in expanding their continuum of services to provide differentiated and individualized levels of support rather than stand-alone special education programs, so that students may receive recommended services based on individual needs at their schools of choice. For ELLs specifically, the NYCDOE encourages families of eligible students to request a bilingual program in their schools, knowing that if there is sufficient interest then schools will create and sustain bilingual programs that benefit not only ELLs, but also students interested in learning a second language.

In addition, for students with specific disabilities who may benefit from specialized instructional and/or social-emotional strategies, the NYCDOE continues to create and expand specialized programs in community schools and specialized schools. For SWDs, the NYCDOE has grown the number of District 75 (D75) specialized schools for students with disabilities, specialized programs in community schools for students with Autism Spectrum Disorders (ASD) known as the ASD Nest Program and the ASD Horizon Program, specialized programs in community schools for students with intellectual disability or multiple disabilities known as Academic,

Career, and Essential Skills (ACES) Programs, and also Bilingual Special Education (BSE) Programs for ELLs with IEPs who are recommended for a special education program in their home/native language. Families of students with specific disabilities may also elect to enroll in their zoned school.

District 75 provides citywide educational, vocational, and behavior support programs for students who are on the autism spectrum, have significant cognitive delays, are severely emotionally challenged, sensory impaired and/or multiply disabled at more than 310 sites. Specialized Programs in community schools (ASD Nest, ASD Horizon, ACES, and BSE Programs) are intended to increase access to community schools even further, for students with these specific disabilities for whom a District 75 school was historically more likely to be recommended. The ASD Nest Program and ASD Horizon Program are two different programs in community schools that serve admitted students with a disability classification of autism. Each program is designed to develop students' academic and social skills, but has different service delivery models and admissions criteria. The ASD Nest Program is primarily designed to support students with ASD who would benefit from intensive social skills development. As the result of significant growth in these programs, in 2014-15, a student on the autism spectrum was more than three times as likely (from 9% to 29%) to attend a community school than in 2007-8. This is especially significant given that over the same time period, the numbers of students classified as autistic has more than doubled, from 5,365 to 13,161 students.

The NYCDOE offers a range of high-quality programs for students performing below proficiency. The Office of Postsecondary Readiness works to support over-age and under-credited students, students enrolled in Career and Technical Education programs and Black and Latino students. The NYCDOE has Transfer Schools, which are small, academically rigorous, full-time high schools designated to re-engage students who have dropped out or who have fallen behind in credits. CTE is delivered in two ways across the NYCDOE: at designated CTE high schools and CTE programs in other high schools. CTE programs offered in high schools are developed in response to future employment opportunities and the potential for career growth in New York City. Currently, CTE programs are offered in fields ranging from aviation technology and culinary arts to emergency management and multimedia production.

In addition to expanding access to high-quality school and program options for SWDs, ELLs, and students performing below proficiency, the NYCDOE is committed to supporting schools in meeting students' unique learning needs. The NYCDOE previously made modifications to the Fair Student Funding formula to provide weights, which provide additional funding, for students who require additional support in order to succeed, including weights for Academic Intervention Services (AIS), ELLs, and Special Education Services. In 2011-12, the NYCDOE revised the funding methodology to provide additional weights to traditional high schools serving overage under-credited (OAUC) students. Providing schools with additional funding for AIS and OAUC further supports students that are performing below proficiency.

Meeting the needs of ELLs and SWDs is an area of special need in our schools. The UFT Teacher Center will support educators in SIG Cohort 6 schools through customized professional learning opportunities targeted to meet the unique needs of each school. Three Teacher Center Field Liaisons will collaborate with administrators and the school-based staff development committee to design learning opportunities to meet the needs of all learners, including ELLs and

SWDs.

The UFT Teacher Center Field Liaison will work in participating schools with Master/Peer Collaborative and Model Teachers and school-based site staff to:

- Design customized professional development
- Provide intensive, ongoing, job-embedded professional development, including one-on-one coaching, in-classroom support and coaching, demonstration lessons, co-teaching, classroom learning labs, study groups and work sessions, to impact student achievement
- Collect, analyze and interpret data for making instructional decisions
- Use data and facilitate the creation of action plans for data-driven professional development, learning laboratories and study groups, etc.
- Integrate instructional technology into teaching and learning

The NYCDOE employs specific strategies to ensure that Priority Schools are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency. One important strategy is the reform of the over-the-counter (OTC) process, which has been critical to managing disproportionately high enrollment of SWDs, ELLs, and students performing below proficiency in Priority Schools. Each summer, the NYCDOE opens temporary registration centers across the city to assist families seeking placement or hardship transfers (primarily in high school grades) during the period before the start of school. Approximately 15,000 new or returning students are placed during this peak OTC period and many are higher-needs students. For the past several years, the NYCDOE has added seats to every high school's OTC count. As a result, the impact of OTC placements at low-performing schools, including Priority Schools, was minimized, and there was an increase in student access to more programs.

For fall 2015, the NYCDOE Chancellor has publicly committed to reducing OTC in Renewal Schools, including all the schools applying for SIG Cohort 6. Additionally, in 2014-15, NYCDOE implemented a one-year elimination of OTC enrollment for the two State-identified Out of Time schools.

Another important strategy is the NYCDOE enrollment "targets" for Students with Disabilities, in which elementary, middle, and high schools allot a percentage of their seats to SWDs, equivalent to the district or borough rate of SWDs. In 2014, students with recommendations of services for 20% or more of their day were included in these targets. This strategy has contributed to an impressive decline in the number of schools serve few SWDs. Between 2007-08 and 2014-15, the percentage of schools that enroll SWDs at a rate of 10% or less has been cut in half, from 19% of schools in 2007-08 to just 9% of schools in 2014-15.

Furthermore, to increase access to some of NYCDOE's highest performing schools, NYCDOE has reduced the screening requirements for seats in selective programs that maintain unfilled seats. Typically, schools that have screened programs are allowed to rank students who meet that program's admissions criteria, and only those students who are ranked may be matched to that school. Since 2012, the NYCDOE has worked with screened schools to increase the number of SWDs ranked and matched to their programs. In situations where schools do not rank a sufficient number of SWDs, additional SWDs are matched to the unfilled seats in order to provide greater

access for these students to high-quality schools. In its first year, this work resulted in 20 programs placing approximately 900 additional students into academically screened seats that would have otherwise gone unfilled. For students entering high school in 2013, the NYCDOE placed almost 1,300 students were placed into these programs. The NYCDOE will continue this work in the upcoming school year.

The Public School Choice transfer process is another strategy that NYCDOE uses to help reduce the number of higher-needs, lower-performing students in Priority schools. Through Public School Choice, all students attending Priority schools are given the opportunity to transfer out of their current school and into a school that is “In Good Standing.” Students submit an application in the spring listing their choices, and they receive an offer over the summer for the upcoming fall. Lower-performing students and lower-income students are prioritized to receive an offer of their choosing. Furthermore, the NYCDOE has slightly revised the process in recent years to make the following two changes: the lowest-performing students within Priority Schools are more accurately identified through the use of indicators beyond merely test scores (including a promotion-in-doubt indicator based on grades and an indicator for students in temporary housing); students attending Priority Schools are prioritized to receive an offer above students attending Focus Schools. In 2014, over 6,500 families applied for transfers through Public School Choice and over 4,500 students received an offer.

G. District-level Labor and Management Consultation and Collaboration

The LEA/school must fully and transparently consult and collaborate with recognized district leaders of the principals’ and teachers’ labor unions about district Priority Schools and the development and implementation of the plan proposed for this specific Priority School proposed in this application. The evidence of consultation and collaboration provided by the LEA must contain each of the following elements:

- i. Describe in detail the steps that have occurred to consult and collaborate in the development of the district and school-level implementation plans.
- ii. Complete the Consultation and Collaboration Form and submit with this application (Attachment A).

The NYCDOE has consulted and collaborated with key stakeholders on the development of SIG Cohort 6 plans. Application and NYCDOE-developed guidance materials were shared directly by staff with the parent leadership group, CPAC; the principals’ union, CSA; and the teachers’ union, UFT. The engagement process with each group took place via meetings, phone calls, and emails about the applications. School Leadership Team (SLT) meetings took place to discuss school plans, which includes the principal, parent representatives, and UFT school leadership.

NYCDOE staff met with the Chancellor’s Parent Advisory Council (CPAC) in a full meeting on June 11 to discuss SIG Cohort 6. CPAC is the group of parent leaders in the NYCDOE; it is comprised of presidents of the district presidents’ councils. The role of CPAC is to consult with the district presidents’ councils to identify concerns, trends, and policy issues, and it advises the Chancellor on NYCDOE policies. NYCDOE staff met with UFT leadership on June 29 and engaged in multiple phone calls and emails with UFT regarding plan and overall school feedback subsequent to this meeting. CSA was also consulted with via phone calls and emails. All groups received district and school drafts for review and feedback.

The NYCDOE is committed to collaboration in its efforts to improve Renewal Schools. Teacher leaders in particular are integral to the successful implementation of all other school improvement measures. They serve as indispensable colleagues for school leaders, ensuring that the school community retains its most effective teachers, is supportive of all teachers' growth, and increases student achievement. School-level plans include information about faculty senates or other structures to promote shared school-based governance, responsibility, and collaboration in the interests of furthering the educational mission of each school. Moreover, the success of these schools depends largely on developing in parents an ownership and leadership in schools. This means shifting the paradigm from parents as participants to parents as leaders and decision-makers who work hand-in-hand with school staff and CBOs. Stakeholder collaboration will continue to be a focus for each SIG Cohort 6 school.

In addition to the district-level Attachment A, NYCDOE asked that schools submit a school-level Attachment A, the Consultation & Collaboration Documentation Form, in order to ensure consultation and collaboration took place on the school-level plans with staff and parent stakeholder groups. Signatures include the school's principal, parent group president, and UFT representative. These school-level forms are also attached in addition to the required district-level Attachment A. The district-level form is signed by the president/leaders of the teachers' union, principals' union, and district parent body as of July 17 and July 20. The individuals who signed are Michael Mulgrew, UFT President; Ernest Logan, CSA President; and Nancy Northrup, CPAC Co-Chair.

A. District Overview

The LEA must demonstrate a commitment to success in the turnaround of its lowest achieving schools and the capacity to implement the model proposed. The district overview must contain the following elements:

- i. Describe the district motivation/intention as well as the theories of action guiding key district strategies to support its lowest achieving schools and ensuring that all students graduate high school ready for college and careers.
- ii. Provide a clear and cogent district approach and set of actions in supporting the turnaround of its lowest achieving schools and its desired impact on Priority Schools.
- iii. Describe the evidence of district readiness to build upon its current strengths and identify opportunities for system-wide improvement in its Priority Schools.

Under the leadership of Schools Chancellor Carmen Fariña, the New York City Department of Education (NYCDOE) is fundamentally changing the way in which it partners with and provides support to schools, and holds everyone in the system accountable for results. The NYCDOE created *Strong Schools, Strong Communities* (see plan [here](#)), which outlines the motivation/intention and theories of action guiding NYCDOE strategies to support the lowest achieving schools and ensure that all students graduate high school ready for college and careers. The plan describes a new approach to supporting New York City's public schools and all of our students, which consists of three key components:

1. The Framework for Great Schools – a roadmap to school improvement for school leaders
2. School Quality Reports that give schools and families well-rounded and actionable information about school performance
3. A streamlined system to deliver customized support to schools

The Framework for Great Schools provides the NYCDOE approach in supporting the turnaround of our lowest achieving schools and ensuring that all students graduate high school ready for college and careers. There are six essential interconnected elements of the framework which are the foundation for our approach:

1. **Rigorous instruction:** Classes are driven by high educational standards and engage students by emphasizing the application of knowledge.
2. **Collaborative Teachers:** The staff is committed to the school, receives strong professional development, and works together to improve the school.
3. **Supportive Environment:** The school is safe and orderly. Teachers have high expectations for students. Students are socially and emotionally supported by their teachers and peers.
4. **Strong Family-Community Ties:** The entire school staff builds strong relationships with families and communities to support learning.
5. **Effective Leaders:** The principal and other school leaders work with fellow teachers and school staff, families, and students to implement a clear and strategic vision for school success.
6. **Trust:** The entire school community works to establish and maintain trusting relationships that will enable students, families, teachers, and principals to take the risks necessary to mount ambitious improvement efforts.

The NYCDOE School Renewal Program was recently created for the most struggling schools, including Priority Schools. All of the schools for which the NYCDOE is applying for the School Improvement Grant (SIG) Cohort 6 opportunity are Renewal Schools. The School Renewal Program provides a more targeted approach for school improvement, and demonstrates the readiness of the NYCDOE to build upon current strengths and identify further opportunities for improvement. The NYCDOE is working intensively with each Renewal School community over three years, setting clear goals and holding each school community accountable for rapid improvement. More information about the School Renewal Program is [here](#).

Renewal Schools are transforming into Community Schools as the New York City Community Schools Initiative is a central element of Mayor Bill de Blasio's vision to re-imagine the City's school system; this direction is aligned with the New York State Education Department (NYSED) state-determined SIG model: the Innovation Framework Community-Oriented School Design, the model selected for NYCDOE SIG Cohort 6 applications. Community Schools are neighborhood hubs where students receive high-quality academic instruction, families can access social services, and communities congregate to share resources and address common challenges. The Mayor has pledged to create more than 100 Community Schools over the next several years, including this school. More information on the Community Schools Initiative is [here](#).

This SIG plan is based on the school's unique Renewal Schools Comprehensive Education Plan (RSCEP), which was crafted this past spring based on needs assessments for each school and includes a Community School description along with SCEP required information. NYCDOE Renewal Schools will be transformed into Community Schools, have an additional hour of instruction each day, increase professional development in key areas like student writing, and launch a summer learning program – with concrete targets in student achievement. This SIG plan will support key improvement strategies in the Renewal School.

Another strength of the NYCDOE includes control of the schools under the Chancellor and Mayor, which ultimately has given more independence to principals. One of the most important reforms has been giving principals control over hiring and budget decisions. An opportunity for improvement, however, is that while some principals were able to use this autonomy to drive achievement in their schools, others struggled without direction on how to improve, particularly in struggling schools. Moving forward, each NYCDOE Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results. Superintendents will utilize a school's performance data, the Framework for Great Schools, and the professional judgment they have gained through experience to raise student achievement in struggling schools.

The Mayor, Chancellor, and NYCDOE leadership will closely monitor Renewal School progress via regular data reports and frequent visits to the school. Renewal Schools have at most three years to show significant improvement before the NYCDOE considers restructuring the school. If the school fails to meet benchmarks each year, or the Superintendent loses confidence in the school leadership, the Superintendent will make the changes necessary to ensure that each child in the school has a high-quality education. Such changes may include school consolidation/merger or closure.

The NYCDOE is monitoring schools with low student enrollment for possible consolidations/mergers. By the end of the 2014-15 school year, proposals to consolidate four low enrollment schools were announced for proposal to the Panel on Educational Policy (PEP) in fall 2015. In addition, there are other schools that could benefit from consolidation, and school leaders are working closely with their communities and Superintendents with the intention of aligning resources and building consensus for consolidation. We anticipate making further announcements this fall if there are viable school redesigns, which may include SIG Cohort 6 schools. Our budget requests for schools with currently less than a 200 student enrollment reflect a reduced amount for school year 2015-16 as we took into consideration the relatively low student enrollment. We believe that our school redesign efforts will ultimately provide a much richer educational experience for our students.

B. Operational Autonomies

The LEA must provide operational autonomies for Priority Schools in exchange for greater accountability for performance results in the following areas: 1) staffing; 2) school-based budgeting; 3) use of time during and after school; 4) program selection; and 5) educational partner selection. In addition to providing quality responses to each element requested in this section of the Project Narrative, the Priority School must have school-level autonomy in at least two of these areas for an *acceptable* rating in this category. Applications that provide quality responses and that are granted anywhere from 3 to 5 of these autonomies will receive a rating of *exemplary* for this category. The LEA must respond to each of the following:

- i. Describe the operational autonomies the LEA has created for the Priority School in this application. Articulate how these autonomies are different and unique from those of the other schools within the district and what accountability measures the district has put in place in exchange for these autonomies.
- ii. Provide as evidence formally adopted Board of Education policies and/or procedures for providing the school the appropriate autonomy, operating flexibility, resources, and support to reduce barriers and overly burdensome compliance requirements.
- iii. Submit as additional evidence, supporting labor-management documentation such as formally executed thin-contracts or election-to-work agreements, or school-based options, that state the conditions for work that match the design needs of Priority School.

As a Renewal School, the school is provided increased supports for increased accountability for performance results. Key elements of the School Renewal Program are:

- Transforming Renewal Schools into Community Schools
- Creating expanded learning time
- Supplying resources and supports to ensure effective school leadership and rigorous instruction with collaborative teachers
- Underperforming schools will undergo needs assessments in six elements of the Framework for Great Schools to identify key areas for additional resources
- Bringing increased oversight and accountability including strict goals and clear consequences for schools that do not meet them

Budgeting: A budget for the school is based on the Fair Student Funding (FSF) formula. Funding follows each student to the school that he or she attends based on student grade level, with additional dollars based on need (academic intervention, English Language Learners, special

education, high school program). Recently the NYCDOE committed \$60 million in additional funding to ensure that struggling schools have the resources they need to succeed. Renewal Schools will be brought to 100 percent of their FSF recommendation within two years. Also as a Priority School, the school receives funding through Title I allocations to support its goals outlined in its school improvement plan as a struggling school. Priority Schools select to use this funding towards identified areas of need, for example expanding learning time. Priority Schools may also receive School Achievement Funding from the NYCDOE to improve instructional programs.

A description of Fair Student Funding, which can be used at principal discretion, is posted [here](#). A description of School Achievement Funding can be found [here](#). The Priority School receives funding in its budget to use flexibly and an additional funding allocation to support its school improvement activities, documented in a NYCDOE procedure known as a School Allocation Memorandum (SAM). The Priority and Focus Schools SAM for school year 2014-15 is posted [here](#) and is also attached.

Staffing: Renewal School principals select staff to fill vacancies. Principal staffing actions include additional pay for certified staff for expanded learning as required by NYSED as a Priority School. Schools participate in NYCDOE teacher leadership programs to support the retention and development of expert teachers at their school. The NYCDOE provides organizational assistance to Priority Schools. The Office of State/Federal Education Policy & School Improvement Programs is designated to work with Priority Schools to select and implement their whole school reform models and assist the schools with compliance requirements. School Implementation Managers (SIMs) work with SIG schools on school improvement efforts and SIG compliance requirements.

Renewal School principals and their leadership teams were targeted by NYCDOE central for ongoing consultation recruitment and retention needs as well as a series of trainings, workshops, and activities that are customized to fit the specific needs of the school. Focus areas include recruitment and marketing to candidates, determining “right-fit” teachers, teacher selection, and supporting and retaining new and existing teachers.

Through the 2014 teachers’ contract and subsequent amendments (see the attached UFT MOA) three new teacher leader roles were created. All Renewal Schools had the opportunity to establish teacher leader roles with a designated funding allocation; below is additional information on three key new roles.

- Model Teacher: Takes on additional responsibilities such as establishing a laboratory classroom; demonstrating lessons; exploring emerging instructional practices; reflecting on and debriefing a visit from a colleague.
- Peer Collaborative Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the professional learning of their colleagues through peer coaching and intervisitation.
- Master Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the entire school or across multiple schools; responsible for school-level progress.

Teacher leaders are integral to the school improvement process as well as a way to retain high-performing teachers, recruit and attract experienced educators, create opportunities for collaboration, and further develop and refine teacher practice. As one principal explained, “Having a distributed leadership structure in this school is not only effective for building effective teaching practices, but also for running a school. It makes my day and my job infinitely easier. One example is planning [professional learning time] on Mondays... it is a big task. Knowing that we have teacher leaders working with teachers who are putting forth things they would like to work on makes that time more effective and the teachers more invested.”

Each school will receive up to \$27,500 to fund a team of teacher leaders. The allocation will be issued through a SAM following the completion of the teacher leader selection and staffing cycle. The selection process is a joint UFT-NYCDOE designed and implemented process. In addition, only teachers rated Effective and Highly Effective are eligible to apply.

Guidance provided by the NYCDOE includes that schools may use the allocation to fund one Peer Collaborative Teacher and two Model Teachers:

- Schools where teacher leadership has been the most successful in building school culture have staffed more than one teacher leader role at their school – ideally a team of at least three. Having more than one teacher leader at a school, formalizes teacher leadership to the rest of the staff and makes the work of the teacher leaders a larger part of the school culture.
- Given that the Peer Collaborative Teacher has release time, they are well positioned to organize the teacher leadership team in a way that broadens the impact of the teacher leader team and increases the potential supports for other teachers in the school. The Model Teachers act as key partners in the work to support growth through sharing their classroom with other teachers in the building.

Program selection: NYCDOE was among the first large urban school districts in the nation to recommend new high-quality Core Curriculum materials, with English Language Learner supports, for grades K-8 in ELA and math that align to the CCLS and promote the instructional shifts. The NYCDOE conducted an extensive research and review process in order to identify high-quality Core Curriculum materials that align to the CCLS and promote the Common Core Instructional Shifts for ELA and Mathematics. Additional information on NYCDOE and the Common Core may be found [here](#).

Each Renewal School participated in a needs assessment, which included the Surveys of Enacted Curriculum (SEC), a research-based, nationally validated set of online surveys that align teacher-reported data on ELA and mathematics instruction against the Common Core standards. The SEC is used as one set of data to help inform the school how what is happening in the classroom—the enacted curriculum—compares to the written curriculum and tested curriculum, including state assessments. It helps begin conversations about how to better align the three types of curricula. Reports were provided to each school to inform their SIG Cohort 6 plan.

There are differentiated professional supports provided to Renewal Schools. Teachers in K-8 schools are provided professional development through the Teacher's College Writing Project and the ReadyGen Independent Reading Initiative. Teachers in high schools are provided with professional development through the WITsi (Writing is Thinking Through Strategic Inquiry) process, included in the school-level SIG plans. Effective strategies for teaching expository writing will be taught explicitly up front and integrated into the strategic inquiry process. The rationale for their central role is that they are high-leverage strategies that target struggling students' deficiencies and that improve content knowledge, academic vocabulary, written language, oral language and reading comprehension simultaneously. They also help teachers pinpoint what struggling students need and how to provide it. The strategy is to begin (year 1) with a focus on the 9th grade and to focus on one additional grade each subsequent year (9th and 10th in year 2; 9th through 11th in year 3).

Schools are also selecting programs to improve school climate and safety with the goal of decreasing incident rates, suspension rates, and disruptive behavior, and an increase in teachers' ability to manage challenging student behaviors and an increase in student academic achievement. To help strengthen school communities and improve academic outcomes, staff members need support to understand and anticipate behavior issues before they escalate. The Positive Learning Collaborative (PLC) is a joint initiative between the NYCDOE and teachers' union, UFT, which provides intensive training and direct consultation to educators in order to develop the skills that prevent crises and help students focus on academic goals. Information about PLCs will be shared with SIG Cohort 6 schools for consideration of implementation.

Educational partner selection: As part of being a Renewal School and under the Community-Oriented School Design model, the school has selected partnerships with community-based organizations (CBOs) that offer tailored whole-student supports, including mental health services and after school programs. Principals have discretion over selecting educational partners, including those outlined in the SIG plan, that have been formally contracted by the NYCDOE after a vetting process. The NYCDOE oversees a request for proposal process from organizations experienced in working with schools in need of school improvement. Accountability plans for the partner must be included based on annual evaluations of student progress in the Priority School. If progress is not evident, then the work with the partner is discontinued.

Educational partner selection from pre-qualified organizations is accomplished through the Multiple Task Award Contract (MTAC) procedure, which provides a streamlined process for schools to follow, posted below. All RFPs are on the NYCDOE public website [here](#). Renewal Schools have selected from the following community-based organizations (CBOs) listed [here](#). CBOs selected for SIG Cohort 6 applicant schools include Zone 26, Grand Street Settlement, Center for Supportive Schools, Phipps Neighborhood, Good Shepard Services, Fordham University, the Child Care Center of New York, Westhab, and El Puente. More information about the chosen CBO is in Attachment Z.

The MOUs submitted under the SIG Innovation Framework for each school and CBO outline their partnership. The CBO selected is the lead partner in the SIG Innovation Framework

Community-Oriented School Design. The process for CBO selection involved the NYCDOE issuing a request for proposals to CBOs to partner with Renewal Schools. Once the pool of CBOs was selected, School Leadership Teams (SLTs) were able to interview CBO representatives to determine fit with the school. The SLT utilized a rubric that included questions on whether the CBO could support the vision of the school through understanding the student population and needs. The CBO works in collaboration with the school principal, SLT, and the community school director assigned to the school to coordinate resources.

Use of Time During and After School: The school has a variety of opportunities for changing the use of time during and after school. NYCDOE Priority Schools are implementing an additional 200 hours of Expanded Learning Time (ELT). NYCDOE created guidance for schools to implement ELT called Guidelines for Implementing Expanded Learning Time at Priority Schools; see [here](#). The Priority School has the option to have ELT providers support students through extended learning time.

All students in Renewal Schools will be given an opportunity for an additional hour of supplemental instruction each school day, beginning next school year; a separate budget allocation is provided for this purpose. The approach is that at least one hour of ELT is offered to every student, known as the Renewal Hour. Schools may offer both the Renewal Hour and other ELT programming. In addition, the lead CBO has funds budgeted in their Community Schools contract to hire staff for the ELT initiative. There are two basic models for the Renewal Hour: integration into the regular student school day or offering the ELT before or after the school day. The attachment “Guidance for Use of Expanded Learning Time” outlines the options for the implementation of Expanded Learning Time that Renewal Schools in more detail.

Schools can utilize a School-Based Option (SBO) to create flexible use of time. The SBO process allows individual schools to modify certain provisions in the teachers’ union (UFT)/NYCDOE Collective Bargaining Agreement. In the SBO process, the school community creates a plan for how to effectively implement extended learning time. The principal and school-based UFT chapter leader must agree to the proposed modification which is presented to school union members for vote. Fifty-five percent of the UFT voting members must affirm the proposed SBO in order for it to pass. The intent of the SBO process is to empower the school community on how to best make use of time before, during, and after school. The SBO process is described in the NYCDOE/UFT Collective Bargaining Agreement on page 46 [here](#) and is also attached.

C. District Accountability and Support

The LEA must have the organizational structures and functions in place at the district-level to provide quality oversight and support for its identified Priority Schools in the implementation of their SIG plans. The LEA plan for accountability and support must contain each of the following elements:

- i. Describe in detail the manner by which the district ensures that all federal requirements of a school’s chosen model are fulfilled and continue to be fulfilled throughout the duration of the grant.
- ii. Identify specific senior leadership that will direct and coordinate district’s turnaround efforts and submit an organizational chart (or charts) identifying the management structures at the district-level that are responsible for providing oversight and support to the LEA’s lowest achieving schools.

- iii. Describe in detail how the structures identified in “i” of this section function in a coordinated manner, to provide high quality accountability and support. Describe and discuss the specific cycle of planning, action, evaluation, feedback, and adaptation between the district and the school leadership. This response should be very specific about the type, nature, and frequency of interaction between the district personnel with school leadership and identified external partner organizations in this specific Priority School application.
- iv. For each planned interaction, provide a timeframe and identify the specific person responsible for delivery.

The central Office of State/Federal Education Policy & School Improvement Programs (organizational chart attached) works to identify and monitor Priority School whole school reform model selection and SIG progress monitoring. The School Implementation Manager (SIM) ensures SIG application development, implementation, and monitoring of the approved plan. Specific activities of the SIM include:

- Review quantitative and qualitative data to assess student strengths and weaknesses;
- Investigate root causes or contributing factors for low student achievement;
- Align resources to maximize benefits to students;
- Monitor plan implementation and make mid-course adjustments, as needed; and
- Evaluate the impact of improvement interventions and external partners.

Schools Chancellor Carmen Fariña assumed leadership of the NYCDOE in January 2014. Dr. Dorita Gibson is the Senior Deputy Chancellor and the Chancellor’s second in command overseeing all aspects of school support, Superintendents, support for struggling schools, District 75 and 79 programs, and school communications. Phil Weinberg is the Deputy Chancellor for Teaching and Learning overseeing professional development and curriculum, performance and accountability, Common Core and college-readiness initiatives, Career and Technical Education, and instructional support. Attached is a copy of the NYCDOE senior leadership organizational chart which also includes leadership in Family Engagement, Operations, Students with Disabilities, and English Language Learners, all of which play an integral role in coordinating turnaround efforts.

The NYCDOE is transitioning to a new school support structure now that will be in place and operational for the first day of school in September 2015. The new approach to school support is guided by six critical principles:

- 1) Clear lines of authority and accountability so all schools improve.
- 2) Families have one place to call if they cannot resolve problems at the school.
- 3) School leaders maintain the critical independence over budget and human resources they have had, so they can continue to drive improvement.
- 4) Provide customized support so school leaders can focus on those improvement efforts most likely to boost achievement.
- 5) Provide one-stop support to school leaders.
- 6) Create equity in the system by providing more intensive support to schools that need it most.

The new school support structure consists of four major parts:

- 1) Superintendent's Offices: each Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results
- 2) Borough Field Support Centers: each of the seven geographically located Borough Field Support Centers will utilize a BOCES model (Board of Collaborative Educational Services) in the provision of support to schools. An organizational chart is attached.
- 3) Central Teams
- 4) Affinity Groups, formerly called Partnership Support Organizations

As Renewal Schools, under the direction of the Superintendent, the Principal Leadership Facilitators and Directors for School Renewal (DSRs) are the core drivers of school improvement and implementation for Renewal Schools within their district. The DSR oversees and supervises the coordination and delivery of intensive supports to persistently low achieving schools. The DSR assists with needs-aligned instructional and operational supports to a number of underperforming schools, including professional development, intensive interventions, summer programming and extended learning opportunities, to ensure accelerated academic achievement for the schools served. Attached is a copy of the Renewal Schools Program organizational chart.

DSRs work with Renewal Schools to coordinate all school improvement efforts; SIMs work in collaboration with DSRs on SIG requirements. Community School Directors (CSDs) are assigned to each Renewal School to coordinate resources at the school-level with the CBO and school. The attached "Stages of Development in a NYC Community School" provides a rubric for schools to move from exploring to excelling in the features of a community school. Staff are held accountable through performance reviews and grant monitoring. External partner organizations working with Priority Schools are evaluated by schools and the NYCDOE based on performance targets. Regular meetings take place with partners to ensure effectiveness, and through the SIG Innovation Framework Community-Oriented School Design the NYCDOE will convene all lead partners and school leaders as done with its School Innovation Fund (SIF) lead partners last year to share expectations of SIG and as a lead partner.

Interactions with the Renewal School include weekly coaching visits to schools by DSRs and content specialist instructional coaches. There are frequent observations with timely, accurate, and actionable feedback. Superintendents provide professional development for school leaders through organizing bi-monthly, collaborative Principal meetings. Superintendents also conduct school visits and provide feedback to school leaders. Leadership coaches who are former successful principals have been assigned to Renewal School principals. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor ongoing progress; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent.

SIMs have a caseload of approximately a dozen schools implementing SIG Cohorts 2-6 and SIF. SIMs are in each of their schools at least twice per month, communicate with school teams on progress monitoring, and represent their schools to NYSED in the progress monitoring process. Benchmarks have already been set for the school through the RSCEP, which align to SIG benchmarks, and require an increased level of accountability. Using these measures, Renewal Schools will be further evaluated by their superintendent at the conclusion of each of the next two school years, in June 2016 and June 2017.

One Renewal School benchmark of note is that of student attendance which is also reviewed by NYSED in SIG progress monitoring. This measure is required for all Renewal Schools as it is a key indicator of schools' progress. NYCDOE had 81 schools implementing SIG and SIF grants in school year 2014-15 and participated in U.S. Department of Education SIG monitoring of NYSED to outline its SIG development, implementation, and monitoring process. SIG Cohort 6 school plans outline strategies that will lead to successful outcomes in the leading indicators that are measured in NYSED SIG monitoring, including improvements in the areas of student attendance, teacher attendance, discipline referrals, ELT opportunities, and academic data.

In November 2014, NYCDOE released two new school quality reports, which present information about the school's practices, learning environment, and performance results. The School Quality Snapshot is designed specifically for families, and provides a concise summary of each school's practices, environment, and performance. The School Quality Guide is a more detailed report with additional information, including multiple years of data to show the school's progress over time. The Guide also sets rigorous and realistic targets that are based on the historical performance of schools with similar populations and the city as a whole for schools in areas including student achievement, student progress, and college and career readiness.

Each Renewal School was provided a menu from which they chose leading indicators and student achievement benchmarks. Generally the targets included in the NYCDOE [High School](#) and [Elementary/Middle School](#) Quality Guides were used as the basis for setting these benchmarks. The attached shows samples from the benchmarks menus provided 1) for an elementary/middle school and 2) for a high school. The guidelines for choosing benchmarks are similar; the leading indicators and student achievement benchmarks are different based on the school grade level.

Schools began receiving new data tools this year to help them track student progress and school improvement. The Progress to Graduation Tracker provides high schools and transfer high schools with credit and Regents data to more easily track individual students' progress toward graduation. The Tracker is updated on a daily basis so that educators can use the most up-to-date information possible when identifying students who may be in need of additional supports and interventions to help them succeed. The School Performance Data Explorer allows elementary, middle and high schools to easily search, sort, and monitor metrics for current students across subgroups and overtime. The tool includes information on how former students are doing academically since they have left the school. By allowing educators to examine both whole-school and individual-student metrics and trends, the Data Explorer is meant to help schools

better identify and support struggling students earlier than ever before, identify and address performance trends at their school, and track current and former students' progress over time.

The following chart summarizes the interactions, timeframe, and persons responsible that are discussed in this section:

Planned School Improvement Interaction	Timeframe	Person Responsible
Professional development for school leaders. School visits & feedback for school leaders.	Bi-monthly collaborative Principal meetings On-site school visits	Superintendent
Professional support to implement feedback provided by the Superintendent. Monitor progress and help to make adjustments when necessary.	On-going	Principal Leadership Facilitator (PLF)
Supervises the coordination and delivery of multiple supports from NYCDOE. Provides instructional and operational support for schools. Supports professional development needs of the school. Supports interventions, summer programming and extended learning opportunities for schools. Provides content coaching and classroom observations and feedback.	Weekly visits to School	Director for School Renewal (DSR)
Coordinate resources at the school-level with the CBO and school.	On-site daily	Community School Director (CSD)
Support and monitors SIG implementation. Coordinate with Superintendent teams on school improvement initiatives for SIG	Bi-monthly on site visits	School Implementation Manager (SIM)

D. Teacher and Leader Pipeline

The LEA must have a clear understanding of the type and nature of teachers and leaders that are needed to create dramatic improvement in its lowest-achieving schools. In addition, the LEA must have a coherent set of goals and actions that lead to the successful recruitment, training, and retention of teachers and leaders who are effective in low-achieving schools. The LEA's plan must include each of the following elements:

- i. Identify and describe recruitment goals and strategies for high poverty and high minority schools to ensure that students in those schools have equal access to high-quality leaders and teachers.
- ii. Describe the district processes for altering hiring procedures and budget timelines to ensure that the appropriate number and types of teachers and principals can be recruited and hired in time to bring schools through dramatic change.
- iii. Identify and describe any district-wide training programs designed to build the capacity of *leaders* to be successful in leading dramatic change in low-achieving schools. In addition, describe how these programs are aligned to the implementation of the specific model chosen (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*). Provide a history of these or similarly purposed programs in the district, how they are or have been funded, and identify whether the school principals chosen to lead the new school designs proposed in this application have emerged as a direct result of these programs. Please identify the goals in terms of quantity and quality of effective leader development.*
- iv. Identify and describe any district-wide training programs designed to build the capacity of *teachers* to be effective specifically in low-achieving schools. Provide a history of these programs in the district, how they are or have been funded, and identify whether the instructional staff chosen for the new school designs proposed in this application have emerged as a direct result of these programs. If the programs are newly proposed, please identify the goals in terms of quantity and quality of effective teacher development.*
- v. Identify in chart form, the district-offered training events for items "iii & iv" above, scheduled during the year-one implementation period (September 1, 2015 to June 30, 2016). For each planned event, identify the specific agent/organization responsible for delivery, the desired measurable outcomes, and the method by which outcomes will be analyzed and reported. Provide a rationale for each planned event and why it will be critical to the successful implementation of the SIG plan.

*The district-wide training and professional development programs to be identified in this section are those that are offered by the district to a group or cluster of like schools (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*) and/or to cohorts of teachers and leaders who will serve in them (e.g., training for turnaround leaders; training for teachers who need to accelerate learning in Priority Schools where students are several levels below proficiency; training for school climate and culture in Priority Schools, etc.). NYSED's Strengthening Teacher and Leader Effectiveness (STLE) grant may provide suitable examples of the types of training and professional development expected in this section. See <https://www.engageny.org/resource/improving-practice>. School-specific and embedded training and professional-development should be detailed in Section II. I.

The NYCDOE believes in its talent: the teachers, school leaders, and other personnel who work with our city's 1.1 million students. The mission of the [Office of Leadership](#) is to build and sustain a leadership pipeline that yields high-quality leaders at all levels of the system, including teacher leaders, assistant principals, principals, and systems-level leaders. The pipeline structure has systemic supports and effective leadership development programs at each stage to identify and cultivate:

1. Strong teachers to meet the citywide instructional expectations and move into more formal teacher leadership development programs;
2. Effective teacher leaders and assistant principals to move into principal pipeline programs and then into principal positions;

3. Quality support for novice principals; and
4. Opportunities for experienced principals to mentor aspiring leaders.

The NYCDOE seeks to ensure that every student has the opportunity to learn from a high-quality educator in a school with a strong school leader, particularly in Priority Schools where the need is great. To accomplish this goal, we developed a pipeline of expert teachers and leaders and provide them with targeted support. To increase the number of candidates who are well-prepared to become principals, we have strengthened our principal preparation programs. Simultaneously, we have shifted our focus toward identifying talented educators and nurturing their leadership skills while they remain in teacher leadership roles. Our theory of action is that if we invest in providing job-embedded leadership development opportunities for our most promising emerging leaders and supporting our strongest current leaders to build leadership capacity in others, then we will build a leadership pipeline that is more cost-effective and sustainable, and produces more high quality next-level leaders.

The NYCDOE created the Principal Candidate Pool selection process to make clear the expectations for principals in the recruitment process. The process is used to discern all candidates' readiness for the position of principal and ability to impact student achievement. The NYCDOE has launched an enhanced version of the Principal Candidate Pool process in order to meet the following objectives:

- Align the screening process to clear, high standards that are consistent with the expectations to which principals will be held accountable under 3012-c.
- Offer participants an opportunity to receive high-quality professional development about the NYCDOE's expectations of principals.
- Provide hiring managers with multi-dimensional information to help enhance strategic placement hiring decisions related to principals.

To recruit expert teachers, NYCDOE creates a diverse candidate pool. For subject-shortage areas in which there are not enough traditionally-certified teachers to meet the needs of schools, we developed alternative-certification programs such as the New York City Teaching Fellows, which draws skilled professionals and recent college graduates to teach in high-need schools. Begun in 2000, since then the program has provided schools with more than 17,000 teachers. In addition to the NYC Teaching Fellows program, the NYCDOE has created an innovative residency program called the NYC Teaching Collaborative that recruits and trains a cohort of 50 new teachers annually through a practice-based teacher training model in hard-to-staff schools. This program is modeled after the nationally known program run by AUSL in Chicago. Additionally, the NYCDOE recruits annually a cohort of new hires that have been identified as top tier recruits to fill positions in struggling schools called the "Select Recruits" program.

The NYCDOE created teacher recruitment initiatives to build a pipeline of teachers prepared to turnaround the performance of our lowest-performing schools and teacher leadership programs for experienced educators to support professional development in their schools. In June 2014 the NYCDOE and UFT negotiated a set of teacher leadership positions and those positions have been focused in a subset of schools to serve as a vehicle to attract new talent to struggling schools and create leadership opportunities for current teachers on staff. In spring 2015 a cohort

of school participated in a foundational teacher leadership professional learning series that oriented teachers to the new positions and provided opportunities for foundational skill development in key teacher leadership skills. The NYCDOE also leverages the state-funded Teachers of Tomorrow grant to provide recruitment and retention incentives for teachers to work in our highest-need schools.

To support schools in recruiting and retaining this new talent at the school level, the DOE produces annual “Smart Retention” reports which create a picture of a school’s history in retaining talent year over year. Alongside the report, NYCDOE offers coaching in recruitment and retention strategies for a subset of identified schools. Each year the NYCDOE sets hiring policies to ensure that teachers and principals can be recruited and placed into our schools. Principals are typically in place in schools by July before the start of the next school year to begin year-long planning and school improvement efforts and teachers in place by September. Once selected, principals are empowered to make certain staffing decisions for their schools. Schools receive their budgets for the new fiscal year by June.

Annual hiring exceptions are set to ensure that hard-to-staff schools are staffed appropriately. These exceptions are made on the basis of the following factors: hard to staff subject areas, geographic districts, and grade level (elementary, middle, high). The timeline allows school leaders the ability to plan for any staffing needs or adjustments in concert with the citywide hiring process which begins in the spring and continues into the summer.

The NYCDOE creates and collaborates with partners on principal training programs to build a pipeline of principals with the ability to drive teaching quality and student achievement district-wide, particularly in schools with the greatest need. Our principal preparation programs share the following characteristics: 1) a carefully-developed recruitment process to screen for highly qualified participants, 2) required completion of a practical residency period, and 3) projects capturing evidence of impact on leadership development and student gains. The NYCDOE is now committed to hiring principals with at least seven years of education experience. LEAP, launched in 2009, is a rigorous 12-month on-the-job program. LEAP develops school leaders within their existing school environments and creates opportunities to harness existing relationships including those with current principals and school communities. The LEAP curriculum differentiates learning based on individual needs and is aligned with the NYCDOE’s instructional initiatives and the CCLS.

Leadership coaches who are former successful principals have been assigned to Renewal School Principals that are leading high schools. The DSRs collaborate closely with the ELI Principal Leadership Coaches and Leadership Academy coaches. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor the ongoing progress of the Renewal efforts; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent to stay apprised of all the initiatives.

K-8 Renewal School principals are provided professional development and support through the School Renewal Principal Learning Community, which meets five times per year around thematically organized sessions designed to engage school leaders in their own professional learning. The sessions also involve guest speakers and experts in the field. Renewal Principals Study Groups are led by a panel of advisory principals and focus on developing leadership expertise in one or more of the following areas: budgeting, data analysis, curriculum and instruction, parent engagement and rebranding which involves re-visiting the mission and vision. Please see Attachment Z: School-Level Information for District-Level Plan for information about the principal chosen to lead the school design.

The NYCDOE believes that to support teachers in their growth and development, it is important to have a common language and understanding of what quality teaching looks like. We have invested significant resources into beginning the work of developing principals' and teachers' understanding of Charlotte Danielson's Framework for Teaching, while training principals to do more frequent cycles of classroom observations and feedback. Resources to begin this work are provided to principals and educators in a number of ways: central and school-based professional development opportunities, online courses, and Teacher Evaluation and Development Coaches (TDECs) who work across multiple schools within their district. In addition, the NYCDOE has developed district-wide training programs to build the capacity of specific groups of teachers, including new teachers, teacher leaders, and teachers that work with special populations.

As of July 1, 2015, the NYCDOE Talent Coach and MOSL Specialist positions have been combined to create a new role: the Teacher Development and Evaluation Coach (TDEC). TDECs are supervised by superintendents and as such support school leaders throughout their district with *Advance*, NYCDOE's teacher development and evaluation system. Teacher Development and Evaluation Coaches (TDECs) collaborate with and support instructional leaders in using *Advance* to assess teacher practice, utilize measures of student learning to assess teacher effectiveness, and deliver high-quality developmental feedback to improve teacher effectiveness and student learning. Coaches also inform central efforts to develop and refine systems, research tools and program policies that support school leaders across New York City in providing meaningful evaluations and targeted professional development to teachers.

New teachers who work in low-achieving schools are provided differentiated levels of support, depending on their pathway to teaching. The New York City Teaching Collaborative offers a subsidized Master's degree program and focuses on supporting our highest-need schools, provides intensive training and school placement during the spring, with ongoing mentoring and training throughout the fall.

Several district-wide training programs are also available for teacher leaders who work in low-achieving schools. We are looking to improve the teacher leadership programs that we offer and are now working to create career ladders for teachers. All of the programs have developed continuous feedback loops (surveys, focus groups, school-based visits) to ensure that professional development is effectively being delivered and meeting the needs of new teachers and teacher leaders. Current programs that exist include the Teacher Incentive Fund (TIF) Program, the three new identified teacher leadership positions, and the Learning Partners Program which allow teachers to stay in the classroom while collaborating with colleagues

within and across schools. Professional development is also offered through collaboration with the UFT Teacher Center. More information about teacher career pathways is [here](#).

A chart is included as an attachment on NYCDOE trainings offered, and additional information is included as an attachment as “Programs and Partnerships 2015.”

E. External Partner Recruitment, Screening, and Matching

The LEA must have a rigorous process for identifying, screening, selecting, matching, and evaluating partner organizations that provide critical services to Priority Schools.

- i. Describe the rigorous process and formal LEA mechanisms for identifying, screening, selecting, matching, and evaluating external partner organizations that are providing support to this Priority school.
- ii. Describe the LEA processes for procurement and budget timelines (and/or any modifications to standard processes) that will ensure this Priority School will have access to effective external partner support prior to or directly at the start of the year-one pre-implementation period and subsequent implementation periods.
- iii. Describe the role of the district and the role of the school principal in terms of identifying, screening, selecting, matching, and evaluating partner organizations supporting this school. Describe the level of choice that the school principal has in terms of the educational partners available and how those options are accessible in a timeline that matches the preparation and start-up of the new school year.
- iv. If the model chosen is *Restart*, the LEA/school must describe in detail the rigorous review process that includes a determination by the LEA that the selected CMO or EMO is likely to produce strong results for the school. See federal definition of ‘strong results’ at <http://www2.ed.gov/programs/sif/index.html>. Federal Register, vol. 80, no. 26, pg. 7242.

To identify, screen, select, match, and evaluate external partner organizations, the NYCDOE uses a Pre-Qualified Solicitation (PQS) process. PQS is an ongoing open call-for-proposals process by which the NYCDOE selects potential partners. Each partner undergoes a screening process, which includes a proposal evaluation by a committee of three program experts who independently evaluate partner proposals in terms of project narrative, organizational capacity, qualifications and experience, and pricing level. The result is a pool of highly-qualified partner organizations which are approved and fully contracted. The Priority School is then able to select services from any of the pre-qualified external partner organizations by soliciting proposals and choosing the best fit according to its needs. If a principal is interested in a specific partner that has not already been approved, then she/he can recommend that the partner engage in the qualification process with the NYCDOE.

In addition, the NYCDOE uses a specific solicitation process called Whole School Reform, which seeks proposals from organizations experienced in working with schools in need of school intervention. The goal is for the partners to support the school to build capacity and enable the school to continue improvement efforts on its own. Partner proposals must offer a variety of methods and strategies grounded in best practices to achieve substantial gains. Potential partners provide accountability plans that include annual evaluations on student achievement progress and the process for enabling schools to continue the reform efforts beyond the contract period, along with at least three references from current or past client schools. Once partner proposals are reviewed by the evaluation committee and recommended for approval, further due diligence is done before formal recommendation for the Panel for Educational Policy for approval. Principals have discretion to select approved partners based on their scope of service needs.

Please see Attachment Z: School-Level Information for District-Level Plan for information about the CBO that is providing support to this Priority School. The school-level plan for this Priority School describes the particular design framework proposed and the scope of the re-design, as well as our rationale for selecting the chosen external partner as a solution to address identified gaps.

Priority Schools receive budget allocations for the new fiscal year by June, well in advance of the start of the new fiscal year in July and the start of the school year in September. The NYCDOE budget process provides principals with ample time to secure external partner support through the above-mentioned systems. Principals may secure services from a list of external partners that have already been thoroughly vetted by NYCDOE. Individual principals create a scope of service and solicit proposals from partners based on their specific needs. Once received, principals score proposals and award contracts to the most competitive and cost-effective partners. Priority Schools secure support from effective external Whole School Reform partners as early as May or June, well in advance of the year-one implementation period.

The NYCDOE manages the initial process of screening potential partner organizations so that principals can focus on selecting partner organizations based on their budget and service needs. NYCDOE manages an ongoing call-for-proposals process for select categories of services to schools. All proposals received by the NYCDOE must first be reviewed to determine if they meet all of the submission qualifications prescribed in the call for proposal. Proposals meeting these requirements are evaluated and rated by a district-based evaluation committee.

As needed, the NYCDOE may conduct site visits to verify information contained in a proposal and may require a potential partner to make a presentation on their services or submit additional written material in support of a proposal. Once the NYCDOE recommends a vendor for award, the recommendation is reviewed by the Division of Contracts and Purchasing for approval and then the Panel for Educational Policy for review and final approval.

Priority School principals are able to contract services from any of the approved pre-qualified educational partners by developing a specific scope of work, soliciting proposals using a user-friendly online tool and choosing the most competitive partner according to their specific needs. Once school principals receive school budgets for the new fiscal year in June, they are able to begin negotiating with potential partners for services in the new school year. The process allows principals sufficient time to solicit vendors and establish contracts in time for the new school year and possible preparation activities during the summer.

At the end of each school year, each school principal evaluates the services of the vendors – based on the objectives, proposed scope of services, and outcomes from the services – and determines whether to continue the partnership. Central staff assist the Priority School in evaluating the impact of chosen partners toward meeting the school’s improvement goals.

F. Enrollment and Retention Policies, Practices, and Strategies

The LEA must have clear policies, practices, and strategies for managing student enrollment and retention to ensure that Priority Schools are not receiving disproportionately high numbers of students with disabilities, English-language learners, and students performing below proficiency.

- i. Identify and describe similarities and differences in the school enrollment of SWDs, ELLs, and students performing below proficiency in this Priority School as compared with other schools within the district. Discuss the reasons why these similarities and differences exist.
- ii. Describe the district policies and practices that help to ensure SWDs, ELLs, and students performing below proficiency have increasing access to diverse and high quality school programs across the district.
- iii. Describe specific strategies employed by the district to ensure that Priority schools in the district are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency.

Please see Attachment Z: School-Level Information for District-Level Plan for information about this Priority School's enrollment as compared with other schools.

The NYCDOE operates a school choice-based system for students and families from Pre-Kindergarten to high school. In the past several years, the NYCDOE has worked to increase equitable access to high quality programs at all grade levels. All students, including students with disabilities, English Language Learners, and students performing below proficiency have access to all public schools as part of the choice-based enrollment system. Students participating in Pre-Kindergarten admissions can access NYCDOE district schools and New York City Early Education Centers (NYCEECs). The NYCDOE works to make as many pre-K programs as possible available to families. This year, families had the benefit of a new streamlined application process. This single application process allowed families to rank their options in order of preference, including both NYCDOE district schools and NYCEECs. Students participating in Kindergarten admissions can access all elementary choice and zoned schools. Zoned schools give priority to students who live in the geographic zoned area. Choice schools are schools that do not have a zone and give priority to applicants based on sibling status, district of residence, and in some cases, other criteria. The Kindergarten application process is a single application that allows parents to rank their school options in order of preference, including both zoned and choice schools.

At the middle school level, families also may submit a single application that allows them to rank their school options in order of preference. Some community school districts maintain primarily zoned middle schools, which give priority to students in the geographic zone. Most districts also have choice schools which have admissions methods based on academic or artistic ability, language proficiency, demonstrated interest, or a lottery (unscreened). At the high school level, approximately 75,000 students participate annually in a single application process that covers over 400 schools. The citywide choice process provides an opportunity for all participants to select up to 12 choices from across the five boroughs. The process consistently matches the majority of students to their top choice schools; for the previous five years, high school admissions has matched over 80% of students to one of their top five choices. Students may participate for both 9th grade and 10th grade admissions.

Since the 2012-13 school year, students with disabilities who have IEPs have benefited from improved access to zoned and choice schools. Rather than being assigned to a school based solely on availability of their recommended special education program, students with IEPs participated fully in the standard Kindergarten, middle school, and high school admissions process alongside their peers. This increased level of access will continue to scale up until the NYCDOE can ensure all students with disabilities have access to the schools they would otherwise attend if they did not have an IEP and, furthermore, that their special education programs, supports, and services be available in the schools to which they are matched.

Throughout the 2013-14 and 2014-15 school years, the Division of Specialized Instruction and Student Support (DSISS) partnered with field-based school support teams and schools to proactively support students with disabilities in the following four areas: student engagement in rigorous curriculum with full access to community schools and classrooms, development and implementation of quality IEPs, infusing school-wide and individualized positive behavioral supports, and effective transition planning. For the 2015-16 school year, DSISS will continue this work. All stakeholders will continue to be responsible for ensuring students with disabilities are educated in the most appropriate, least restrictive environment. To that end, through the NYCDOE's special education reform work, schools will engage in professional learning opportunities that focus on the continued commitment to supporting all educators in their understanding and facility with learner variability, access to content, rigorous expectations, inclusion, and the essential knowledge and skills needed for students to be college and career ready. Priorities for professional development are built on themes that reflect research- and evidence-based best practices and are fully integrated with the Common Core Learning Standards and *Advance*.

The NYCDOE has begun to put in place policies and practices designed to ensure that Students with Disabilities (SWDs), English Language Learners (ELLs), and students performing below proficiency have increasing access to diverse and high quality school options across the district. Our current SWD and ELL policies and guidance not only support schools in focusing their programming practices around student needs, but also encourage schools to develop a deep knowledge and understanding of their students' strengths, needs, and preferences in order to drive programmatic planning and/or shifts. Schools are supported in expanding their continuum of services to provide differentiated and individualized levels of support rather than stand-alone special education programs, so that students may receive recommended services based on individual needs at their schools of choice. For ELLs specifically, the NYCDOE encourages families of eligible students to request a bilingual program in their schools, knowing that if there is sufficient interest then schools will create and sustain bilingual programs that benefit not only ELLs, but also students interested in learning a second language.

In addition, for students with specific disabilities who may benefit from specialized instructional and/or social-emotional strategies, the NYCDOE continues to create and expand specialized programs in community schools and specialized schools. For SWDs, the NYCDOE has grown the number of District 75 (D75) specialized schools for students with disabilities, specialized programs in community schools for students with Autism Spectrum Disorders (ASD) known as the ASD Nest Program and the ASD Horizon Program, specialized programs in community schools for students with intellectual disability or multiple disabilities known as Academic,

Career, and Essential Skills (ACES) Programs, and also Bilingual Special Education (BSE) Programs for ELLs with IEPs who are recommended for a special education program in their home/native language. Families of students with specific disabilities may also elect to enroll in their zoned school.

District 75 provides citywide educational, vocational, and behavior support programs for students who are on the autism spectrum, have significant cognitive delays, are severely emotionally challenged, sensory impaired and/or multiply disabled at more than 310 sites. Specialized Programs in community schools (ASD Nest, ASD Horizon, ACES, and BSE Programs) are intended to increase access to community schools even further, for students with these specific disabilities for whom a District 75 school was historically more likely to be recommended. The ASD Nest Program and ASD Horizon Program are two different programs in community schools that serve admitted students with a disability classification of autism. Each program is designed to develop students' academic and social skills, but has different service delivery models and admissions criteria. The ASD Nest Program is primarily designed to support students with ASD who would benefit from intensive social skills development. As the result of significant growth in these programs, in 2014-15, a student on the autism spectrum was more than three times as likely (from 9% to 29%) to attend a community school than in 2007-8. This is especially significant given that over the same time period, the numbers of students classified as autistic has more than doubled, from 5,365 to 13,161 students.

The NYCDOE offers a range of high-quality programs for students performing below proficiency. The Office of Postsecondary Readiness works to support over-age and under-credited students, students enrolled in Career and Technical Education programs and Black and Latino students. The NYCDOE has Transfer Schools, which are small, academically rigorous, full-time high schools designated to re-engage students who have dropped out or who have fallen behind in credits. CTE is delivered in two ways across the NYCDOE: at designated CTE high schools and CTE programs in other high schools. CTE programs offered in high schools are developed in response to future employment opportunities and the potential for career growth in New York City. Currently, CTE programs are offered in fields ranging from aviation technology and culinary arts to emergency management and multimedia production.

In addition to expanding access to high-quality school and program options for SWDs, ELLs, and students performing below proficiency, the NYCDOE is committed to supporting schools in meeting students' unique learning needs. The NYCDOE previously made modifications to the Fair Student Funding formula to provide weights, which provide additional funding, for students who require additional support in order to succeed, including weights for Academic Intervention Services (AIS), ELLs, and Special Education Services. In 2011-12, the NYCDOE revised the funding methodology to provide additional weights to traditional high schools serving overage under-credited (OAUC) students. Providing schools with additional funding for AIS and OAUC further supports students that are performing below proficiency.

Meeting the needs of ELLs and SWDs is an area of special need in our schools. The UFT Teacher Center will support educators in SIG Cohort 6 schools through customized professional learning opportunities targeted to meet the unique needs of each school. Three Teacher Center Field Liaisons will collaborate with administrators and the school-based staff development committee to design learning opportunities to meet the needs of all learners, including ELLs and

SWDs.

The UFT Teacher Center Field Liaison will work in participating schools with Master/Peer Collaborative and Model Teachers and school-based site staff to:

- Design customized professional development
- Provide intensive, ongoing, job-embedded professional development, including one-on-one coaching, in-classroom support and coaching, demonstration lessons, co-teaching, classroom learning labs, study groups and work sessions, to impact student achievement
- Collect, analyze and interpret data for making instructional decisions
- Use data and facilitate the creation of action plans for data-driven professional development, learning laboratories and study groups, etc.
- Integrate instructional technology into teaching and learning

The NYCDOE employs specific strategies to ensure that Priority Schools are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency. One important strategy is the reform of the over-the-counter (OTC) process, which has been critical to managing disproportionately high enrollment of SWDs, ELLs, and students performing below proficiency in Priority Schools. Each summer, the NYCDOE opens temporary registration centers across the city to assist families seeking placement or hardship transfers (primarily in high school grades) during the period before the start of school. Approximately 15,000 new or returning students are placed during this peak OTC period and many are higher-needs students. For the past several years, the NYCDOE has added seats to every high school's OTC count. As a result, the impact of OTC placements at low-performing schools, including Priority Schools, was minimized, and there was an increase in student access to more programs.

For fall 2015, the NYCDOE Chancellor has publicly committed to reducing OTC in Renewal Schools, including all the schools applying for SIG Cohort 6. Additionally, in 2014-15, NYCDOE implemented a one-year elimination of OTC enrollment for the two State-identified Out of Time schools.

Another important strategy is the NYCDOE enrollment "targets" for Students with Disabilities, in which elementary, middle, and high schools allot a percentage of their seats to SWDs, equivalent to the district or borough rate of SWDs. In 2014, students with recommendations of services for 20% or more of their day were included in these targets. This strategy has contributed to an impressive decline in the number of schools serve few SWDs. Between 2007-08 and 2014-15, the percentage of schools that enroll SWDs at a rate of 10% or less has been cut in half, from 19% of schools in 2007-08 to just 9% of schools in 2014-15.

Furthermore, to increase access to some of NYCDOE's highest performing schools, NYCDOE has reduced the screening requirements for seats in selective programs that maintain unfilled seats. Typically, schools that have screened programs are allowed to rank students who meet that program's admissions criteria, and only those students who are ranked may be matched to that school. Since 2012, the NYCDOE has worked with screened schools to increase the number of SWDs ranked and matched to their programs. In situations where schools do not rank a sufficient number of SWDs, additional SWDs are matched to the unfilled seats in order to provide greater

access for these students to high-quality schools. In its first year, this work resulted in 20 programs placing approximately 900 additional students into academically screened seats that would have otherwise gone unfilled. For students entering high school in 2013, the NYCDOE placed almost 1,300 students were placed into these programs. The NYCDOE will continue this work in the upcoming school year.

The Public School Choice transfer process is another strategy that NYCDOE uses to help reduce the number of higher-needs, lower-performing students in Priority schools. Through Public School Choice, all students attending Priority schools are given the opportunity to transfer out of their current school and into a school that is “In Good Standing.” Students submit an application in the spring listing their choices, and they receive an offer over the summer for the upcoming fall. Lower-performing students and lower-income students are prioritized to receive an offer of their choosing. Furthermore, the NYCDOE has slightly revised the process in recent years to make the following two changes: the lowest-performing students within Priority Schools are more accurately identified through the use of indicators beyond merely test scores (including a promotion-in-doubt indicator based on grades and an indicator for students in temporary housing); students attending Priority Schools are prioritized to receive an offer above students attending Focus Schools. In 2014, over 6,500 families applied for transfers through Public School Choice and over 4,500 students received an offer.

G. District-level Labor and Management Consultation and Collaboration

The LEA/school must fully and transparently consult and collaborate with recognized district leaders of the principals’ and teachers’ labor unions about district Priority Schools and the development and implementation of the plan proposed for this specific Priority School proposed in this application. The evidence of consultation and collaboration provided by the LEA must contain each of the following elements:

- i. Describe in detail the steps that have occurred to consult and collaborate in the development of the district and school-level implementation plans.
- ii. Complete the Consultation and Collaboration Form and submit with this application (Attachment A).

The NYCDOE has consulted and collaborated with key stakeholders on the development of SIG Cohort 6 plans. Application and NYCDOE-developed guidance materials were shared directly by staff with the parent leadership group, CPAC; the principals’ union, CSA; and the teachers’ union, UFT. The engagement process with each group took place via meetings, phone calls, and emails about the applications. School Leadership Team (SLT) meetings took place to discuss school plans, which includes the principal, parent representatives, and UFT school leadership.

NYCDOE staff met with the Chancellor’s Parent Advisory Council (CPAC) in a full meeting on June 11 to discuss SIG Cohort 6. CPAC is the group of parent leaders in the NYCDOE; it is comprised of presidents of the district presidents’ councils. The role of CPAC is to consult with the district presidents’ councils to identify concerns, trends, and policy issues, and it advises the Chancellor on NYCDOE policies. NYCDOE staff met with UFT leadership on June 29 and engaged in multiple phone calls and emails with UFT regarding plan and overall school feedback subsequent to this meeting. CSA was also consulted with via phone calls and emails. All groups received district and school drafts for review and feedback.

The NYCDOE is committed to collaboration in its efforts to improve Renewal Schools. Teacher leaders in particular are integral to the successful implementation of all other school improvement measures. They serve as indispensable colleagues for school leaders, ensuring that the school community retains its most effective teachers, is supportive of all teachers' growth, and increases student achievement. School-level plans include information about faculty senates or other structures to promote shared school-based governance, responsibility, and collaboration in the interests of furthering the educational mission of each school. Moreover, the success of these schools depends largely on developing in parents an ownership and leadership in schools. This means shifting the paradigm from parents as participants to parents as leaders and decision-makers who work hand-in-hand with school staff and CBOs. Stakeholder collaboration will continue to be a focus for each SIG Cohort 6 school.

In addition to the district-level Attachment A, NYCDOE asked that schools submit a school-level Attachment A, the Consultation & Collaboration Documentation Form, in order to ensure consultation and collaboration took place on the school-level plans with staff and parent stakeholder groups. Signatures include the school's principal, parent group president, and UFT representative. These school-level forms are also attached in addition to the required district-level Attachment A. The district-level form is signed by the president/leaders of the teachers' union, principals' union, and district parent body as of July 17 and July 20. The individuals who signed are Michael Mulgrew, UFT President; Ernest Logan, CSA President; and Nancy Northrup, CPAC Co-Chair.

A. District Overview

The LEA must demonstrate a commitment to success in the turnaround of its lowest achieving schools and the capacity to implement the model proposed. The district overview must contain the following elements:

- i. Describe the district motivation/intention as well as the theories of action guiding key district strategies to support its lowest achieving schools and ensuring that all students graduate high school ready for college and careers.
- ii. Provide a clear and cogent district approach and set of actions in supporting the turnaround of its lowest achieving schools and its desired impact on Priority Schools.
- iii. Describe the evidence of district readiness to build upon its current strengths and identify opportunities for system-wide improvement in its Priority Schools.

Under the leadership of Schools Chancellor Carmen Fariña, the New York City Department of Education (NYCDOE) is fundamentally changing the way in which it partners with and provides support to schools, and holds everyone in the system accountable for results. The NYCDOE created *Strong Schools, Strong Communities* (see plan [here](#)), which outlines the motivation/intention and theories of action guiding NYCDOE strategies to support the lowest achieving schools and ensure that all students graduate high school ready for college and careers. The plan describes a new approach to supporting New York City's public schools and all of our students, which consists of three key components:

1. The Framework for Great Schools – a roadmap to school improvement for school leaders
2. School Quality Reports that give schools and families well-rounded and actionable information about school performance
3. A streamlined system to deliver customized support to schools

The Framework for Great Schools provides the NYCDOE approach in supporting the turnaround of our lowest achieving schools and ensuring that all students graduate high school ready for college and careers. There are six essential interconnected elements of the framework which are the foundation for our approach:

1. **Rigorous instruction:** Classes are driven by high educational standards and engage students by emphasizing the application of knowledge.
2. **Collaborative Teachers:** The staff is committed to the school, receives strong professional development, and works together to improve the school.
3. **Supportive Environment:** The school is safe and orderly. Teachers have high expectations for students. Students are socially and emotionally supported by their teachers and peers.
4. **Strong Family-Community Ties:** The entire school staff builds strong relationships with families and communities to support learning.
5. **Effective Leaders:** The principal and other school leaders work with fellow teachers and school staff, families, and students to implement a clear and strategic vision for school success.
6. **Trust:** The entire school community works to establish and maintain trusting relationships that will enable students, families, teachers, and principals to take the risks necessary to mount ambitious improvement efforts.

The NYCDOE School Renewal Program was recently created for the most struggling schools, including Priority Schools. All of the schools for which the NYCDOE is applying for the School Improvement Grant (SIG) Cohort 6 opportunity are Renewal Schools. The School Renewal Program provides a more targeted approach for school improvement, and demonstrates the readiness of the NYCDOE to build upon current strengths and identify further opportunities for improvement. The NYCDOE is working intensively with each Renewal School community over three years, setting clear goals and holding each school community accountable for rapid improvement. More information about the School Renewal Program is [here](#).

Renewal Schools are transforming into Community Schools as the New York City Community Schools Initiative is a central element of Mayor Bill de Blasio's vision to re-imagine the City's school system; this direction is aligned with the New York State Education Department (NYSED) state-determined SIG model: the Innovation Framework Community-Oriented School Design, the model selected for NYCDOE SIG Cohort 6 applications. Community Schools are neighborhood hubs where students receive high-quality academic instruction, families can access social services, and communities congregate to share resources and address common challenges. The Mayor has pledged to create more than 100 Community Schools over the next several years, including this school. More information on the Community Schools Initiative is [here](#).

This SIG plan is based on the school's unique Renewal Schools Comprehensive Education Plan (RSCEP), which was crafted this past spring based on needs assessments for each school and includes a Community School description along with SCEP required information. NYCDOE Renewal Schools will be transformed into Community Schools, have an additional hour of instruction each day, increase professional development in key areas like student writing, and launch a summer learning program – with concrete targets in student achievement. This SIG plan will support key improvement strategies in the Renewal School.

Another strength of the NYCDOE includes control of the schools under the Chancellor and Mayor, which ultimately has given more independence to principals. One of the most important reforms has been giving principals control over hiring and budget decisions. An opportunity for improvement, however, is that while some principals were able to use this autonomy to drive achievement in their schools, others struggled without direction on how to improve, particularly in struggling schools. Moving forward, each NYCDOE Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results. Superintendents will utilize a school's performance data, the Framework for Great Schools, and the professional judgment they have gained through experience to raise student achievement in struggling schools.

The Mayor, Chancellor, and NYCDOE leadership will closely monitor Renewal School progress via regular data reports and frequent visits to the school. Renewal Schools have at most three years to show significant improvement before the NYCDOE considers restructuring the school. If the school fails to meet benchmarks each year, or the Superintendent loses confidence in the school leadership, the Superintendent will make the changes necessary to ensure that each child in the school has a high-quality education. Such changes may include school consolidation/merger or closure.

The NYCDOE is monitoring schools with low student enrollment for possible consolidations/mergers. By the end of the 2014-15 school year, proposals to consolidate four low enrollment schools were announced for proposal to the Panel on Educational Policy (PEP) in fall 2015. In addition, there are other schools that could benefit from consolidation, and school leaders are working closely with their communities and Superintendents with the intention of aligning resources and building consensus for consolidation. We anticipate making further announcements this fall if there are viable school redesigns, which may include SIG Cohort 6 schools. Our budget requests for schools with currently less than a 200 student enrollment reflect a reduced amount for school year 2015-16 as we took into consideration the relatively low student enrollment. We believe that our school redesign efforts will ultimately provide a much richer educational experience for our students.

B. Operational Autonomies

The LEA must provide operational autonomies for Priority Schools in exchange for greater accountability for performance results in the following areas: 1) staffing; 2) school-based budgeting; 3) use of time during and after school; 4) program selection; and 5) educational partner selection. In addition to providing quality responses to each element requested in this section of the Project Narrative, the Priority School must have school-level autonomy in at least two of these areas for an *acceptable* rating in this category. Applications that provide quality responses and that are granted anywhere from 3 to 5 of these autonomies will receive a rating of *exemplary* for this category. The LEA must respond to each of the following:

- i. Describe the operational autonomies the LEA has created for the Priority School in this application. Articulate how these autonomies are different and unique from those of the other schools within the district and what accountability measures the district has put in place in exchange for these autonomies.
- ii. Provide as evidence formally adopted Board of Education policies and/or procedures for providing the school the appropriate autonomy, operating flexibility, resources, and support to reduce barriers and overly burdensome compliance requirements.
- iii. Submit as additional evidence, supporting labor-management documentation such as formally executed thin-contracts or election-to-work agreements, or school-based options, that state the conditions for work that match the design needs of Priority School.

As a Renewal School, the school is provided increased supports for increased accountability for performance results. Key elements of the School Renewal Program are:

- Transforming Renewal Schools into Community Schools
- Creating expanded learning time
- Supplying resources and supports to ensure effective school leadership and rigorous instruction with collaborative teachers
- Underperforming schools will undergo needs assessments in six elements of the Framework for Great Schools to identify key areas for additional resources
- Bringing increased oversight and accountability including strict goals and clear consequences for schools that do not meet them

Budgeting: A budget for the school is based on the Fair Student Funding (FSF) formula. Funding follows each student to the school that he or she attends based on student grade level, with additional dollars based on need (academic intervention, English Language Learners, special

education, high school program). Recently the NYCDOE committed \$60 million in additional funding to ensure that struggling schools have the resources they need to succeed. Renewal Schools will be brought to 100 percent of their FSF recommendation within two years. Also as a Priority School, the school receives funding through Title I allocations to support its goals outlined in its school improvement plan as a struggling school. Priority Schools select to use this funding towards identified areas of need, for example expanding learning time. Priority Schools may also receive School Achievement Funding from the NYCDOE to improve instructional programs.

A description of Fair Student Funding, which can be used at principal discretion, is posted [here](#). A description of School Achievement Funding can be found [here](#). The Priority School receives funding in its budget to use flexibly and an additional funding allocation to support its school improvement activities, documented in a NYCDOE procedure known as a School Allocation Memorandum (SAM). The Priority and Focus Schools SAM for school year 2014-15 is posted [here](#) and is also attached.

Staffing: Renewal School principals select staff to fill vacancies. Principal staffing actions include additional pay for certified staff for expanded learning as required by NYSED as a Priority School. Schools participate in NYCDOE teacher leadership programs to support the retention and development of expert teachers at their school. The NYCDOE provides organizational assistance to Priority Schools. The Office of State/Federal Education Policy & School Improvement Programs is designated to work with Priority Schools to select and implement their whole school reform models and assist the schools with compliance requirements. School Implementation Managers (SIMs) work with SIG schools on school improvement efforts and SIG compliance requirements.

Renewal School principals and their leadership teams were targeted by NYCDOE central for ongoing consultation recruitment and retention needs as well as a series of trainings, workshops, and activities that are customized to fit the specific needs of the school. Focus areas include recruitment and marketing to candidates, determining “right-fit” teachers, teacher selection, and supporting and retaining new and existing teachers.

Through the 2014 teachers’ contract and subsequent amendments (see the attached UFT MOA) three new teacher leader roles were created. All Renewal Schools had the opportunity to establish teacher leader roles with a designated funding allocation; below is additional information on three key new roles.

- Model Teacher: Takes on additional responsibilities such as establishing a laboratory classroom; demonstrating lessons; exploring emerging instructional practices; reflecting on and debriefing a visit from a colleague.
- Peer Collaborative Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the professional learning of their colleagues through peer coaching and intervisitation.
- Master Teacher: Released from the classroom for a minimum of 20% of the time to take on additional responsibilities to support the entire school or across multiple schools; responsible for school-level progress.

Teacher leaders are integral to the school improvement process as well as a way to retain high-performing teachers, recruit and attract experienced educators, create opportunities for collaboration, and further develop and refine teacher practice. As one principal explained, “Having a distributed leadership structure in this school is not only effective for building effective teaching practices, but also for running a school. It makes my day and my job infinitely easier. One example is planning [professional learning time] on Mondays... it is a big task. Knowing that we have teacher leaders working with teachers who are putting forth things they would like to work on makes that time more effective and the teachers more invested.”

Each school will receive up to \$27,500 to fund a team of teacher leaders. The allocation will be issued through a SAM following the completion of the teacher leader selection and staffing cycle. The selection process is a joint UFT-NYCDOE designed and implemented process. In addition, only teachers rated Effective and Highly Effective are eligible to apply.

Guidance provided by the NYCDOE includes that schools may use the allocation to fund one Peer Collaborative Teacher and two Model Teachers:

- Schools where teacher leadership has been the most successful in building school culture have staffed more than one teacher leader role at their school – ideally a team of at least three. Having more than one teacher leader at a school, formalizes teacher leadership to the rest of the staff and makes the work of the teacher leaders a larger part of the school culture.
- Given that the Peer Collaborative Teacher has release time, they are well positioned to organize the teacher leadership team in a way that broadens the impact of the teacher leader team and increases the potential supports for other teachers in the school. The Model Teachers act as key partners in the work to support growth through sharing their classroom with other teachers in the building.

Program selection: NYCDOE was among the first large urban school districts in the nation to recommend new high-quality Core Curriculum materials, with English Language Learner supports, for grades K-8 in ELA and math that align to the CCLS and promote the instructional shifts. The NYCDOE conducted an extensive research and review process in order to identify high-quality Core Curriculum materials that align to the CCLS and promote the Common Core Instructional Shifts for ELA and Mathematics. Additional information on NYCDOE and the Common Core may be found [here](#).

Each Renewal School participated in a needs assessment, which included the Surveys of Enacted Curriculum (SEC), a research-based, nationally validated set of online surveys that align teacher-reported data on ELA and mathematics instruction against the Common Core standards. The SEC is used as one set of data to help inform the school how what is happening in the classroom—the enacted curriculum—compares to the written curriculum and tested curriculum, including state assessments. It helps begin conversations about how to better align the three types of curricula. Reports were provided to each school to inform their SIG Cohort 6 plan.

There are differentiated professional supports provided to Renewal Schools. Teachers in K-8 schools are provided professional development through the Teacher's College Writing Project and the ReadyGen Independent Reading Initiative. Teachers in high schools are provided with professional development through the WITsi (Writing is Thinking Through Strategic Inquiry) process, included in the school-level SIG plans. Effective strategies for teaching expository writing will be taught explicitly up front and integrated into the strategic inquiry process. The rationale for their central role is that they are high-leverage strategies that target struggling students' deficiencies and that improve content knowledge, academic vocabulary, written language, oral language and reading comprehension simultaneously. They also help teachers pinpoint what struggling students need and how to provide it. The strategy is to begin (year 1) with a focus on the 9th grade and to focus on one additional grade each subsequent year (9th and 10th in year 2; 9th through 11th in year 3).

Schools are also selecting programs to improve school climate and safety with the goal of decreasing incident rates, suspension rates, and disruptive behavior, and an increase in teachers' ability to manage challenging student behaviors and an increase in student academic achievement. To help strengthen school communities and improve academic outcomes, staff members need support to understand and anticipate behavior issues before they escalate. The Positive Learning Collaborative (PLC) is a joint initiative between the NYCDOE and teachers' union, UFT, which provides intensive training and direct consultation to educators in order to develop the skills that prevent crises and help students focus on academic goals. Information about PLCs will be shared with SIG Cohort 6 schools for consideration of implementation.

Educational partner selection: As part of being a Renewal School and under the Community-Oriented School Design model, the school has selected partnerships with community-based organizations (CBOs) that offer tailored whole-student supports, including mental health services and after school programs. Principals have discretion over selecting educational partners, including those outlined in the SIG plan, that have been formally contracted by the NYCDOE after a vetting process. The NYCDOE oversees a request for proposal process from organizations experienced in working with schools in need of school improvement. Accountability plans for the partner must be included based on annual evaluations of student progress in the Priority School. If progress is not evident, then the work with the partner is discontinued.

Educational partner selection from pre-qualified organizations is accomplished through the Multiple Task Award Contract (MTAC) procedure, which provides a streamlined process for schools to follow, posted below. All RFPs are on the NYCDOE public website [here](#). Renewal Schools have selected from the following community-based organizations (CBOs) listed [here](#). CBOs selected for SIG Cohort 6 applicant schools include Zone 26, Grand Street Settlement, Center for Supportive Schools, Phipps Neighborhood, Good Shepard Services, Fordham University, the Child Care Center of New York, Westhab, and El Puente. More information about the chosen CBO is in Attachment Z.

The MOUs submitted under the SIG Innovation Framework for each school and CBO outline their partnership. The CBO selected is the lead partner in the SIG Innovation Framework

Community-Oriented School Design. The process for CBO selection involved the NYCDOE issuing a request for proposals to CBOs to partner with Renewal Schools. Once the pool of CBOs was selected, School Leadership Teams (SLTs) were able to interview CBO representatives to determine fit with the school. The SLT utilized a rubric that included questions on whether the CBO could support the vision of the school through understanding the student population and needs. The CBO works in collaboration with the school principal, SLT, and the community school director assigned to the school to coordinate resources.

Use of Time During and After School: The school has a variety of opportunities for changing the use of time during and after school. NYCDOE Priority Schools are implementing an additional 200 hours of Expanded Learning Time (ELT). NYCDOE created guidance for schools to implement ELT called Guidelines for Implementing Expanded Learning Time at Priority Schools; see [here](#). The Priority School has the option to have ELT providers support students through extended learning time.

All students in Renewal Schools will be given an opportunity for an additional hour of supplemental instruction each school day, beginning next school year; a separate budget allocation is provided for this purpose. The approach is that at least one hour of ELT is offered to every student, known as the Renewal Hour. Schools may offer both the Renewal Hour and other ELT programming. In addition, the lead CBO has funds budgeted in their Community Schools contract to hire staff for the ELT initiative. There are two basic models for the Renewal Hour: integration into the regular student school day or offering the ELT before or after the school day. The attachment “Guidance for Use of Expanded Learning Time” outlines the options for the implementation of Expanded Learning Time that Renewal Schools in more detail.

Schools can utilize a School-Based Option (SBO) to create flexible use of time. The SBO process allows individual schools to modify certain provisions in the teachers’ union (UFT)/NYCDOE Collective Bargaining Agreement. In the SBO process, the school community creates a plan for how to effectively implement extended learning time. The principal and school-based UFT chapter leader must agree to the proposed modification which is presented to school union members for vote. Fifty-five percent of the UFT voting members must affirm the proposed SBO in order for it to pass. The intent of the SBO process is to empower the school community on how to best make use of time before, during, and after school. The SBO process is described in the NYCDOE/UFT Collective Bargaining Agreement on page 46 [here](#) and is also attached.

C. District Accountability and Support

The LEA must have the organizational structures and functions in place at the district-level to provide quality oversight and support for its identified Priority Schools in the implementation of their SIG plans. The LEA plan for accountability and support must contain each of the following elements:

- i. Describe in detail the manner by which the district ensures that all federal requirements of a school’s chosen model are fulfilled and continue to be fulfilled throughout the duration of the grant.
- ii. Identify specific senior leadership that will direct and coordinate district’s turnaround efforts and submit an organizational chart (or charts) identifying the management structures at the district-level that are responsible for providing oversight and support to the LEA’s lowest achieving schools.

- iii. Describe in detail how the structures identified in “i” of this section function in a coordinated manner, to provide high quality accountability and support. Describe and discuss the specific cycle of planning, action, evaluation, feedback, and adaptation between the district and the school leadership. This response should be very specific about the type, nature, and frequency of interaction between the district personnel with school leadership and identified external partner organizations in this specific Priority School application.
- iv. For each planned interaction, provide a timeframe and identify the specific person responsible for delivery.

The central Office of State/Federal Education Policy & School Improvement Programs (organizational chart attached) works to identify and monitor Priority School whole school reform model selection and SIG progress monitoring. The School Implementation Manager (SIM) ensures SIG application development, implementation, and monitoring of the approved plan. Specific activities of the SIM include:

- Review quantitative and qualitative data to assess student strengths and weaknesses;
- Investigate root causes or contributing factors for low student achievement;
- Align resources to maximize benefits to students;
- Monitor plan implementation and make mid-course adjustments, as needed; and
- Evaluate the impact of improvement interventions and external partners.

Schools Chancellor Carmen Fariña assumed leadership of the NYCDOE in January 2014. Dr. Dorita Gibson is the Senior Deputy Chancellor and the Chancellor’s second in command overseeing all aspects of school support, Superintendents, support for struggling schools, District 75 and 79 programs, and school communications. Phil Weinberg is the Deputy Chancellor for Teaching and Learning overseeing professional development and curriculum, performance and accountability, Common Core and college-readiness initiatives, Career and Technical Education, and instructional support. Attached is a copy of the NYCDOE senior leadership organizational chart which also includes leadership in Family Engagement, Operations, Students with Disabilities, and English Language Learners, all of which play an integral role in coordinating turnaround efforts.

The NYCDOE is transitioning to a new school support structure now that will be in place and operational for the first day of school in September 2015. The new approach to school support is guided by six critical principles:

- 1) Clear lines of authority and accountability so all schools improve.
- 2) Families have one place to call if they cannot resolve problems at the school.
- 3) School leaders maintain the critical independence over budget and human resources they have had, so they can continue to drive improvement.
- 4) Provide customized support so school leaders can focus on those improvement efforts most likely to boost achievement.
- 5) Provide one-stop support to school leaders.
- 6) Create equity in the system by providing more intensive support to schools that need it most.

The new school support structure consists of four major parts:

- 1) Superintendent's Offices: each Community and High School Superintendent will be responsible for providing schools with the resources they need to succeed and hold school leaders accountable for results
- 2) Borough Field Support Centers: each of the seven geographically located Borough Field Support Centers will utilize a BOCES model (Board of Collaborative Educational Services) in the provision of support to schools. An organizational chart is attached.
- 3) Central Teams
- 4) Affinity Groups, formerly called Partnership Support Organizations

As Renewal Schools, under the direction of the Superintendent, the Principal Leadership Facilitators and Directors for School Renewal (DSRs) are the core drivers of school improvement and implementation for Renewal Schools within their district. The DSR oversees and supervises the coordination and delivery of intensive supports to persistently low achieving schools. The DSR assists with needs-aligned instructional and operational supports to a number of underperforming schools, including professional development, intensive interventions, summer programming and extended learning opportunities, to ensure accelerated academic achievement for the schools served. Attached is a copy of the Renewal Schools Program organizational chart.

DSRs work with Renewal Schools to coordinate all school improvement efforts; SIMs work in collaboration with DSRs on SIG requirements. Community School Directors (CSDs) are assigned to each Renewal School to coordinate resources at the school-level with the CBO and school. The attached "Stages of Development in a NYC Community School" provides a rubric for schools to move from exploring to excelling in the features of a community school. Staff are held accountable through performance reviews and grant monitoring. External partner organizations working with Priority Schools are evaluated by schools and the NYCDOE based on performance targets. Regular meetings take place with partners to ensure effectiveness, and through the SIG Innovation Framework Community-Oriented School Design the NYCDOE will convene all lead partners and school leaders as done with its School Innovation Fund (SIF) lead partners last year to share expectations of SIG and as a lead partner.

Interactions with the Renewal School include weekly coaching visits to schools by DSRs and content specialist instructional coaches. There are frequent observations with timely, accurate, and actionable feedback. Superintendents provide professional development for school leaders through organizing bi-monthly, collaborative Principal meetings. Superintendents also conduct school visits and provide feedback to school leaders. Leadership coaches who are former successful principals have been assigned to Renewal School principals. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor ongoing progress; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent.

SIMs have a caseload of approximately a dozen schools implementing SIG Cohorts 2-6 and SIF. SIMs are in each of their schools at least twice per month, communicate with school teams on progress monitoring, and represent their schools to NYSED in the progress monitoring process. Benchmarks have already been set for the school through the RSCEP, which align to SIG benchmarks, and require an increased level of accountability. Using these measures, Renewal Schools will be further evaluated by their superintendent at the conclusion of each of the next two school years, in June 2016 and June 2017.

One Renewal School benchmark of note is that of student attendance which is also reviewed by NYSED in SIG progress monitoring. This measure is required for all Renewal Schools as it is a key indicator of schools' progress. NYCDOE had 81 schools implementing SIG and SIF grants in school year 2014-15 and participated in U.S. Department of Education SIG monitoring of NYSED to outline its SIG development, implementation, and monitoring process. SIG Cohort 6 school plans outline strategies that will lead to successful outcomes in the leading indicators that are measured in NYSED SIG monitoring, including improvements in the areas of student attendance, teacher attendance, discipline referrals, ELT opportunities, and academic data.

In November 2014, NYCDOE released two new school quality reports, which present information about the school's practices, learning environment, and performance results. The School Quality Snapshot is designed specifically for families, and provides a concise summary of each school's practices, environment, and performance. The School Quality Guide is a more detailed report with additional information, including multiple years of data to show the school's progress over time. The Guide also sets rigorous and realistic targets that are based on the historical performance of schools with similar populations and the city as a whole for schools in areas including student achievement, student progress, and college and career readiness.

Each Renewal School was provided a menu from which they chose leading indicators and student achievement benchmarks. Generally the targets included in the NYCDOE [High School](#) and [Elementary/Middle School](#) Quality Guides were used as the basis for setting these benchmarks. The attached shows samples from the benchmarks menus provided 1) for an elementary/middle school and 2) for a high school. The guidelines for choosing benchmarks are similar; the leading indicators and student achievement benchmarks are different based on the school grade level.

Schools began receiving new data tools this year to help them track student progress and school improvement. The Progress to Graduation Tracker provides high schools and transfer high schools with credit and Regents data to more easily track individual students' progress toward graduation. The Tracker is updated on a daily basis so that educators can use the most up-to-date information possible when identifying students who may be in need of additional supports and interventions to help them succeed. The School Performance Data Explorer allows elementary, middle and high schools to easily search, sort, and monitor metrics for current students across subgroups and overtime. The tool includes information on how former students are doing academically since they have left the school. By allowing educators to examine both whole-school and individual-student metrics and trends, the Data Explorer is meant to help schools

better identify and support struggling students earlier than ever before, identify and address performance trends at their school, and track current and former students' progress over time.

The following chart summarizes the interactions, timeframe, and persons responsible that are discussed in this section:

Planned School Improvement Interaction	Timeframe	Person Responsible
Professional development for school leaders. School visits & feedback for school leaders.	Bi-monthly collaborative Principal meetings On-site school visits	Superintendent
Professional support to implement feedback provided by the Superintendent. Monitor progress and help to make adjustments when necessary.	On-going	Principal Leadership Facilitator (PLF)
Supervises the coordination and delivery of multiple supports from NYCDOE. Provides instructional and operational support for schools. Supports professional development needs of the school. Supports interventions, summer programming and extended learning opportunities for schools. Provides content coaching and classroom observations and feedback.	Weekly visits to School	Director for School Renewal (DSR)
Coordinate resources at the school-level with the CBO and school.	On-site daily	Community School Director (CSD)
Support and monitors SIG implementation. Coordinate with Superintendent teams on school improvement initiatives for SIG	Bi-monthly on site visits	School Implementation Manager (SIM)

D. Teacher and Leader Pipeline

The LEA must have a clear understanding of the type and nature of teachers and leaders that are needed to create dramatic improvement in its lowest-achieving schools. In addition, the LEA must have a coherent set of goals and actions that lead to the successful recruitment, training, and retention of teachers and leaders who are effective in low-achieving schools. The LEA's plan must include each of the following elements:

- i. Identify and describe recruitment goals and strategies for high poverty and high minority schools to ensure that students in those schools have equal access to high-quality leaders and teachers.
- ii. Describe the district processes for altering hiring procedures and budget timelines to ensure that the appropriate number and types of teachers and principals can be recruited and hired in time to bring schools through dramatic change.
- iii. Identify and describe any district-wide training programs designed to build the capacity of *leaders* to be successful in leading dramatic change in low-achieving schools. In addition, describe how these programs are aligned to the implementation of the specific model chosen (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*). Provide a history of these or similarly purposed programs in the district, how they are or have been funded, and identify whether the school principals chosen to lead the new school designs proposed in this application have emerged as a direct result of these programs. Please identify the goals in terms of quantity and quality of effective leader development.*
- iv. Identify and describe any district-wide training programs designed to build the capacity of *teachers* to be effective specifically in low-achieving schools. Provide a history of these programs in the district, how they are or have been funded, and identify whether the instructional staff chosen for the new school designs proposed in this application have emerged as a direct result of these programs. If the programs are newly proposed, please identify the goals in terms of quantity and quality of effective teacher development.*
- v. Identify in chart form, the district-offered training events for items "iii & iv" above, scheduled during the year-one implementation period (September 1, 2015 to June 30, 2016). For each planned event, identify the specific agent/organization responsible for delivery, the desired measurable outcomes, and the method by which outcomes will be analyzed and reported. Provide a rationale for each planned event and why it will be critical to the successful implementation of the SIG plan.

*The district-wide training and professional development programs to be identified in this section are those that are offered by the district to a group or cluster of like schools (*Turnaround, Restart, Transformation, Innovation Framework, Evidence-based, or Early Learning Intervention*) and/or to cohorts of teachers and leaders who will serve in them (e.g., training for turnaround leaders; training for teachers who need to accelerate learning in Priority Schools where students are several levels below proficiency; training for school climate and culture in Priority Schools, etc.). NYSED's Strengthening Teacher and Leader Effectiveness (STLE) grant may provide suitable examples of the types of training and professional development expected in this section. See <https://www.engageny.org/resource/improving-practice>. School-specific and embedded training and professional-development should be detailed in Section II. I.

The NYCDOE believes in its talent: the teachers, school leaders, and other personnel who work with our city's 1.1 million students. The mission of the [Office of Leadership](#) is to build and sustain a leadership pipeline that yields high-quality leaders at all levels of the system, including teacher leaders, assistant principals, principals, and systems-level leaders. The pipeline structure has systemic supports and effective leadership development programs at each stage to identify and cultivate:

1. Strong teachers to meet the citywide instructional expectations and move into more formal teacher leadership development programs;
2. Effective teacher leaders and assistant principals to move into principal pipeline programs and then into principal positions;

3. Quality support for novice principals; and
4. Opportunities for experienced principals to mentor aspiring leaders.

The NYCDOE seeks to ensure that every student has the opportunity to learn from a high-quality educator in a school with a strong school leader, particularly in Priority Schools where the need is great. To accomplish this goal, we developed a pipeline of expert teachers and leaders and provide them with targeted support. To increase the number of candidates who are well-prepared to become principals, we have strengthened our principal preparation programs. Simultaneously, we have shifted our focus toward identifying talented educators and nurturing their leadership skills while they remain in teacher leadership roles. Our theory of action is that if we invest in providing job-embedded leadership development opportunities for our most promising emerging leaders and supporting our strongest current leaders to build leadership capacity in others, then we will build a leadership pipeline that is more cost-effective and sustainable, and produces more high quality next-level leaders.

The NYCDOE created the Principal Candidate Pool selection process to make clear the expectations for principals in the recruitment process. The process is used to discern all candidates' readiness for the position of principal and ability to impact student achievement. The NYCDOE has launched an enhanced version of the Principal Candidate Pool process in order to meet the following objectives:

- Align the screening process to clear, high standards that are consistent with the expectations to which principals will be held accountable under 3012-c.
- Offer participants an opportunity to receive high-quality professional development about the NYCDOE's expectations of principals.
- Provide hiring managers with multi-dimensional information to help enhance strategic placement hiring decisions related to principals.

To recruit expert teachers, NYCDOE creates a diverse candidate pool. For subject-shortage areas in which there are not enough traditionally-certified teachers to meet the needs of schools, we developed alternative-certification programs such as the New York City Teaching Fellows, which draws skilled professionals and recent college graduates to teach in high-need schools. Begun in 2000, since then the program has provided schools with more than 17,000 teachers. In addition to the NYC Teaching Fellows program, the NYCDOE has created an innovative residency program called the NYC Teaching Collaborative that recruits and trains a cohort of 50 new teachers annually through a practice-based teacher training model in hard-to-staff schools. This program is modeled after the nationally known program run by AUSL in Chicago. Additionally, the NYCDOE recruits annually a cohort of new hires that have been identified as top tier recruits to fill positions in struggling schools called the "Select Recruits" program.

The NYCDOE created teacher recruitment initiatives to build a pipeline of teachers prepared to turnaround the performance of our lowest-performing schools and teacher leadership programs for experienced educators to support professional development in their schools. In June 2014 the NYCDOE and UFT negotiated a set of teacher leadership positions and those positions have been focused in a subset of schools to serve as a vehicle to attract new talent to struggling schools and create leadership opportunities for current teachers on staff. In spring 2015 a cohort

of school participated in a foundational teacher leadership professional learning series that oriented teachers to the new positions and provided opportunities for foundational skill development in key teacher leadership skills. The NYCDOE also leverages the state-funded Teachers of Tomorrow grant to provide recruitment and retention incentives for teachers to work in our highest-need schools.

To support schools in recruiting and retaining this new talent at the school level, the DOE produces annual “Smart Retention” reports which create a picture of a school’s history in retaining talent year over year. Alongside the report, NYCDOE offers coaching in recruitment and retention strategies for a subset of identified schools. Each year the NYCDOE sets hiring policies to ensure that teachers and principals can be recruited and placed into our schools. Principals are typically in place in schools by July before the start of the next school year to begin year-long planning and school improvement efforts and teachers in place by September. Once selected, principals are empowered to make certain staffing decisions for their schools. Schools receive their budgets for the new fiscal year by June.

Annual hiring exceptions are set to ensure that hard-to-staff schools are staffed appropriately. These exceptions are made on the basis of the following factors: hard to staff subject areas, geographic districts, and grade level (elementary, middle, high). The timeline allows school leaders the ability to plan for any staffing needs or adjustments in concert with the citywide hiring process which begins in the spring and continues into the summer.

The NYCDOE creates and collaborates with partners on principal training programs to build a pipeline of principals with the ability to drive teaching quality and student achievement district-wide, particularly in schools with the greatest need. Our principal preparation programs share the following characteristics: 1) a carefully-developed recruitment process to screen for highly qualified participants, 2) required completion of a practical residency period, and 3) projects capturing evidence of impact on leadership development and student gains. The NYCDOE is now committed to hiring principals with at least seven years of education experience. LEAP, launched in 2009, is a rigorous 12-month on-the-job program. LEAP develops school leaders within their existing school environments and creates opportunities to harness existing relationships including those with current principals and school communities. The LEAP curriculum differentiates learning based on individual needs and is aligned with the NYCDOE’s instructional initiatives and the CCLS.

Leadership coaches who are former successful principals have been assigned to Renewal School Principals that are leading high schools. The DSRs collaborate closely with the ELI Principal Leadership Coaches and Leadership Academy coaches. The Principal Leadership Coaches are invited to school visits and debriefs to help support implementation of the feedback and next steps given; they meet regularly with DSRs and Principals to monitor the ongoing progress of the Renewal efforts; they observe classroom instruction with the DSR and Principal to ensure a common, calibrated language around instruction and feedback; and they attend Renewal Initiative meetings facilitated by the Superintendent to stay apprised of all the initiatives.

K-8 Renewal School principals are provided professional development and support through the School Renewal Principal Learning Community, which meets five times per year around thematically organized sessions designed to engage school leaders in their own professional learning. The sessions also involve guest speakers and experts in the field. Renewal Principals Study Groups are led by a panel of advisory principals and focus on developing leadership expertise in one or more of the following areas: budgeting, data analysis, curriculum and instruction, parent engagement and rebranding which involves re-visiting the mission and vision. Please see Attachment Z: School-Level Information for District-Level Plan for information about the principal chosen to lead the school design.

The NYCDOE believes that to support teachers in their growth and development, it is important to have a common language and understanding of what quality teaching looks like. We have invested significant resources into beginning the work of developing principals' and teachers' understanding of Charlotte Danielson's Framework for Teaching, while training principals to do more frequent cycles of classroom observations and feedback. Resources to begin this work are provided to principals and educators in a number of ways: central and school-based professional development opportunities, online courses, and Teacher Evaluation and Development Coaches (TDECs) who work across multiple schools within their district. In addition, the NYCDOE has developed district-wide training programs to build the capacity of specific groups of teachers, including new teachers, teacher leaders, and teachers that work with special populations.

As of July 1, 2015, the NYCDOE Talent Coach and MOSL Specialist positions have been combined to create a new role: the Teacher Development and Evaluation Coach (TDEC). TDECs are supervised by superintendents and as such support school leaders throughout their district with *Advance*, NYCDOE's teacher development and evaluation system. Teacher Development and Evaluation Coaches (TDECs) collaborate with and support instructional leaders in using *Advance* to assess teacher practice, utilize measures of student learning to assess teacher effectiveness, and deliver high-quality developmental feedback to improve teacher effectiveness and student learning. Coaches also inform central efforts to develop and refine systems, research tools and program policies that support school leaders across New York City in providing meaningful evaluations and targeted professional development to teachers.

New teachers who work in low-achieving schools are provided differentiated levels of support, depending on their pathway to teaching. The New York City Teaching Collaborative offers a subsidized Master's degree program and focuses on supporting our highest-need schools, provides intensive training and school placement during the spring, with ongoing mentoring and training throughout the fall.

Several district-wide training programs are also available for teacher leaders who work in low-achieving schools. We are looking to improve the teacher leadership programs that we offer and are now working to create career ladders for teachers. All of the programs have developed continuous feedback loops (surveys, focus groups, school-based visits) to ensure that professional development is effectively being delivered and meeting the needs of new teachers and teacher leaders. Current programs that exist include the Teacher Incentive Fund (TIF) Program, the three new identified teacher leadership positions, and the Learning Partners Program which allow teachers to stay in the classroom while collaborating with colleagues

within and across schools. Professional development is also offered through collaboration with the UFT Teacher Center. More information about teacher career pathways is [here](#).

A chart is included as an attachment on NYCDOE trainings offered, and additional information is included as an attachment as “Programs and Partnerships 2015.”

E. External Partner Recruitment, Screening, and Matching

The LEA must have a rigorous process for identifying, screening, selecting, matching, and evaluating partner organizations that provide critical services to Priority Schools.

- i. Describe the rigorous process and formal LEA mechanisms for identifying, screening, selecting, matching, and evaluating external partner organizations that are providing support to this Priority school.
- ii. Describe the LEA processes for procurement and budget timelines (and/or any modifications to standard processes) that will ensure this Priority School will have access to effective external partner support prior to or directly at the start of the year-one pre-implementation period and subsequent implementation periods.
- iii. Describe the role of the district and the role of the school principal in terms of identifying, screening, selecting, matching, and evaluating partner organizations supporting this school. Describe the level of choice that the school principal has in terms of the educational partners available and how those options are accessible in a timeline that matches the preparation and start-up of the new school year.
- iv. If the model chosen is *Restart*, the LEA/school must describe in detail the rigorous review process that includes a determination by the LEA that the selected CMO or EMO is likely to produce strong results for the school. See federal definition of ‘strong results’ at <http://www2.ed.gov/programs/sif/index.html>. Federal Register, vol. 80, no. 26, pg. 7242.

To identify, screen, select, match, and evaluate external partner organizations, the NYCDOE uses a Pre-Qualified Solicitation (PQS) process. PQS is an ongoing open call-for-proposals process by which the NYCDOE selects potential partners. Each partner undergoes a screening process, which includes a proposal evaluation by a committee of three program experts who independently evaluate partner proposals in terms of project narrative, organizational capacity, qualifications and experience, and pricing level. The result is a pool of highly-qualified partner organizations which are approved and fully contracted. The Priority School is then able to select services from any of the pre-qualified external partner organizations by soliciting proposals and choosing the best fit according to its needs. If a principal is interested in a specific partner that has not already been approved, then she/he can recommend that the partner engage in the qualification process with the NYCDOE.

In addition, the NYCDOE uses a specific solicitation process called Whole School Reform, which seeks proposals from organizations experienced in working with schools in need of school intervention. The goal is for the partners to support the school to build capacity and enable the school to continue improvement efforts on its own. Partner proposals must offer a variety of methods and strategies grounded in best practices to achieve substantial gains. Potential partners provide accountability plans that include annual evaluations on student achievement progress and the process for enabling schools to continue the reform efforts beyond the contract period, along with at least three references from current or past client schools. Once partner proposals are reviewed by the evaluation committee and recommended for approval, further due diligence is done before formal recommendation for the Panel for Educational Policy for approval. Principals have discretion to select approved partners based on their scope of service needs.

Please see Attachment Z: School-Level Information for District-Level Plan for information about the CBO that is providing support to this Priority School. The school-level plan for this Priority School describes the particular design framework proposed and the scope of the re-design, as well as our rationale for selecting the chosen external partner as a solution to address identified gaps.

Priority Schools receive budget allocations for the new fiscal year by June, well in advance of the start of the new fiscal year in July and the start of the school year in September. The NYCDOE budget process provides principals with ample time to secure external partner support through the above-mentioned systems. Principals may secure services from a list of external partners that have already been thoroughly vetted by NYCDOE. Individual principals create a scope of service and solicit proposals from partners based on their specific needs. Once received, principals score proposals and award contracts to the most competitive and cost-effective partners. Priority Schools secure support from effective external Whole School Reform partners as early as May or June, well in advance of the year-one implementation period.

The NYCDOE manages the initial process of screening potential partner organizations so that principals can focus on selecting partner organizations based on their budget and service needs. NYCDOE manages an ongoing call-for-proposals process for select categories of services to schools. All proposals received by the NYCDOE must first be reviewed to determine if they meet all of the submission qualifications prescribed in the call for proposal. Proposals meeting these requirements are evaluated and rated by a district-based evaluation committee.

As needed, the NYCDOE may conduct site visits to verify information contained in a proposal and may require a potential partner to make a presentation on their services or submit additional written material in support of a proposal. Once the NYCDOE recommends a vendor for award, the recommendation is reviewed by the Division of Contracts and Purchasing for approval and then the Panel for Educational Policy for review and final approval.

Priority School principals are able to contract services from any of the approved pre-qualified educational partners by developing a specific scope of work, soliciting proposals using a user-friendly online tool and choosing the most competitive partner according to their specific needs. Once school principals receive school budgets for the new fiscal year in June, they are able to begin negotiating with potential partners for services in the new school year. The process allows principals sufficient time to solicit vendors and establish contracts in time for the new school year and possible preparation activities during the summer.

At the end of each school year, each school principal evaluates the services of the vendors – based on the objectives, proposed scope of services, and outcomes from the services – and determines whether to continue the partnership. Central staff assist the Priority School in evaluating the impact of chosen partners toward meeting the school’s improvement goals.

F. Enrollment and Retention Policies, Practices, and Strategies

The LEA must have clear policies, practices, and strategies for managing student enrollment and retention to ensure that Priority Schools are not receiving disproportionately high numbers of students with disabilities, English-language learners, and students performing below proficiency.

- i. Identify and describe similarities and differences in the school enrollment of SWDs, ELLs, and students performing below proficiency in this Priority School as compared with other schools within the district. Discuss the reasons why these similarities and differences exist.
- ii. Describe the district policies and practices that help to ensure SWDs, ELLs, and students performing below proficiency have increasing access to diverse and high quality school programs across the district.
- iii. Describe specific strategies employed by the district to ensure that Priority schools in the district are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency.

Please see Attachment Z: School-Level Information for District-Level Plan for information about this Priority School's enrollment as compared with other schools.

The NYCDOE operates a school choice-based system for students and families from Pre-Kindergarten to high school. In the past several years, the NYCDOE has worked to increase equitable access to high quality programs at all grade levels. All students, including students with disabilities, English Language Learners, and students performing below proficiency have access to all public schools as part of the choice-based enrollment system. Students participating in Pre-Kindergarten admissions can access NYCDOE district schools and New York City Early Education Centers (NYCEECs). The NYCDOE works to make as many pre-K programs as possible available to families. This year, families had the benefit of a new streamlined application process. This single application process allowed families to rank their options in order of preference, including both NYCDOE district schools and NYCEECs. Students participating in Kindergarten admissions can access all elementary choice and zoned schools. Zoned schools give priority to students who live in the geographic zoned area. Choice schools are schools that do not have a zone and give priority to applicants based on sibling status, district of residence, and in some cases, other criteria. The Kindergarten application process is a single application that allows parents to rank their school options in order of preference, including both zoned and choice schools.

At the middle school level, families also may submit a single application that allows them to rank their school options in order of preference. Some community school districts maintain primarily zoned middle schools, which give priority to students in the geographic zone. Most districts also have choice schools which have admissions methods based on academic or artistic ability, language proficiency, demonstrated interest, or a lottery (unscreened). At the high school level, approximately 75,000 students participate annually in a single application process that covers over 400 schools. The citywide choice process provides an opportunity for all participants to select up to 12 choices from across the five boroughs. The process consistently matches the majority of students to their top choice schools; for the previous five years, high school admissions has matched over 80% of students to one of their top five choices. Students may participate for both 9th grade and 10th grade admissions.

Since the 2012-13 school year, students with disabilities who have IEPs have benefited from improved access to zoned and choice schools. Rather than being assigned to a school based solely on availability of their recommended special education program, students with IEPs participated fully in the standard Kindergarten, middle school, and high school admissions process alongside their peers. This increased level of access will continue to scale up until the NYCDOE can ensure all students with disabilities have access to the schools they would otherwise attend if they did not have an IEP and, furthermore, that their special education programs, supports, and services be available in the schools to which they are matched.

Throughout the 2013-14 and 2014-15 school years, the Division of Specialized Instruction and Student Support (DSISS) partnered with field-based school support teams and schools to proactively support students with disabilities in the following four areas: student engagement in rigorous curriculum with full access to community schools and classrooms, development and implementation of quality IEPs, infusing school-wide and individualized positive behavioral supports, and effective transition planning. For the 2015-16 school year, DSISS will continue this work. All stakeholders will continue to be responsible for ensuring students with disabilities are educated in the most appropriate, least restrictive environment. To that end, through the NYCDOE's special education reform work, schools will engage in professional learning opportunities that focus on the continued commitment to supporting all educators in their understanding and facility with learner variability, access to content, rigorous expectations, inclusion, and the essential knowledge and skills needed for students to be college and career ready. Priorities for professional development are built on themes that reflect research- and evidence-based best practices and are fully integrated with the Common Core Learning Standards and *Advance*.

The NYCDOE has begun to put in place policies and practices designed to ensure that Students with Disabilities (SWDs), English Language Learners (ELLs), and students performing below proficiency have increasing access to diverse and high quality school options across the district. Our current SWD and ELL policies and guidance not only support schools in focusing their programming practices around student needs, but also encourage schools to develop a deep knowledge and understanding of their students' strengths, needs, and preferences in order to drive programmatic planning and/or shifts. Schools are supported in expanding their continuum of services to provide differentiated and individualized levels of support rather than stand-alone special education programs, so that students may receive recommended services based on individual needs at their schools of choice. For ELLs specifically, the NYCDOE encourages families of eligible students to request a bilingual program in their schools, knowing that if there is sufficient interest then schools will create and sustain bilingual programs that benefit not only ELLs, but also students interested in learning a second language.

In addition, for students with specific disabilities who may benefit from specialized instructional and/or social-emotional strategies, the NYCDOE continues to create and expand specialized programs in community schools and specialized schools. For SWDs, the NYCDOE has grown the number of District 75 (D75) specialized schools for students with disabilities, specialized programs in community schools for students with Autism Spectrum Disorders (ASD) known as the ASD Nest Program and the ASD Horizon Program, specialized programs in community schools for students with intellectual disability or multiple disabilities known as Academic,

Career, and Essential Skills (ACES) Programs, and also Bilingual Special Education (BSE) Programs for ELLs with IEPs who are recommended for a special education program in their home/native language. Families of students with specific disabilities may also elect to enroll in their zoned school.

District 75 provides citywide educational, vocational, and behavior support programs for students who are on the autism spectrum, have significant cognitive delays, are severely emotionally challenged, sensory impaired and/or multiply disabled at more than 310 sites. Specialized Programs in community schools (ASD Nest, ASD Horizon, ACES, and BSE Programs) are intended to increase access to community schools even further, for students with these specific disabilities for whom a District 75 school was historically more likely to be recommended. The ASD Nest Program and ASD Horizon Program are two different programs in community schools that serve admitted students with a disability classification of autism. Each program is designed to develop students' academic and social skills, but has different service delivery models and admissions criteria. The ASD Nest Program is primarily designed to support students with ASD who would benefit from intensive social skills development. As the result of significant growth in these programs, in 2014-15, a student on the autism spectrum was more than three times as likely (from 9% to 29%) to attend a community school than in 2007-8. This is especially significant given that over the same time period, the numbers of students classified as autistic has more than doubled, from 5,365 to 13,161 students.

The NYCDOE offers a range of high-quality programs for students performing below proficiency. The Office of Postsecondary Readiness works to support over-age and under-credited students, students enrolled in Career and Technical Education programs and Black and Latino students. The NYCDOE has Transfer Schools, which are small, academically rigorous, full-time high schools designated to re-engage students who have dropped out or who have fallen behind in credits. CTE is delivered in two ways across the NYCDOE: at designated CTE high schools and CTE programs in other high schools. CTE programs offered in high schools are developed in response to future employment opportunities and the potential for career growth in New York City. Currently, CTE programs are offered in fields ranging from aviation technology and culinary arts to emergency management and multimedia production.

In addition to expanding access to high-quality school and program options for SWDs, ELLs, and students performing below proficiency, the NYCDOE is committed to supporting schools in meeting students' unique learning needs. The NYCDOE previously made modifications to the Fair Student Funding formula to provide weights, which provide additional funding, for students who require additional support in order to succeed, including weights for Academic Intervention Services (AIS), ELLs, and Special Education Services. In 2011-12, the NYCDOE revised the funding methodology to provide additional weights to traditional high schools serving overage under-credited (OAUC) students. Providing schools with additional funding for AIS and OAUC further supports students that are performing below proficiency.

Meeting the needs of ELLs and SWDs is an area of special need in our schools. The UFT Teacher Center will support educators in SIG Cohort 6 schools through customized professional learning opportunities targeted to meet the unique needs of each school. Three Teacher Center Field Liaisons will collaborate with administrators and the school-based staff development committee to design learning opportunities to meet the needs of all learners, including ELLs and

SWDs.

The UFT Teacher Center Field Liaison will work in participating schools with Master/Peer Collaborative and Model Teachers and school-based site staff to:

- Design customized professional development
- Provide intensive, ongoing, job-embedded professional development, including one-on-one coaching, in-classroom support and coaching, demonstration lessons, co-teaching, classroom learning labs, study groups and work sessions, to impact student achievement
- Collect, analyze and interpret data for making instructional decisions
- Use data and facilitate the creation of action plans for data-driven professional development, learning laboratories and study groups, etc.
- Integrate instructional technology into teaching and learning

The NYCDOE employs specific strategies to ensure that Priority Schools are not receiving or incentivized to receive disproportionately high numbers of SWDs, ELLs, and students performing below proficiency. One important strategy is the reform of the over-the-counter (OTC) process, which has been critical to managing disproportionately high enrollment of SWDs, ELLs, and students performing below proficiency in Priority Schools. Each summer, the NYCDOE opens temporary registration centers across the city to assist families seeking placement or hardship transfers (primarily in high school grades) during the period before the start of school. Approximately 15,000 new or returning students are placed during this peak OTC period and many are higher-needs students. For the past several years, the NYCDOE has added seats to every high school's OTC count. As a result, the impact of OTC placements at low-performing schools, including Priority Schools, was minimized, and there was an increase in student access to more programs.

For fall 2015, the NYCDOE Chancellor has publicly committed to reducing OTC in Renewal Schools, including all the schools applying for SIG Cohort 6. Additionally, in 2014-15, NYCDOE implemented a one-year elimination of OTC enrollment for the two State-identified Out of Time schools.

Another important strategy is the NYCDOE enrollment "targets" for Students with Disabilities, in which elementary, middle, and high schools allot a percentage of their seats to SWDs, equivalent to the district or borough rate of SWDs. In 2014, students with recommendations of services for 20% or more of their day were included in these targets. This strategy has contributed to an impressive decline in the number of schools serve few SWDs. Between 2007-08 and 2014-15, the percentage of schools that enroll SWDs at a rate of 10% or less has been cut in half, from 19% of schools in 2007-08 to just 9% of schools in 2014-15.

Furthermore, to increase access to some of NYCDOE's highest performing schools, NYCDOE has reduced the screening requirements for seats in selective programs that maintain unfilled seats. Typically, schools that have screened programs are allowed to rank students who meet that program's admissions criteria, and only those students who are ranked may be matched to that school. Since 2012, the NYCDOE has worked with screened schools to increase the number of SWDs ranked and matched to their programs. In situations where schools do not rank a sufficient number of SWDs, additional SWDs are matched to the unfilled seats in order to provide greater

access for these students to high-quality schools. In its first year, this work resulted in 20 programs placing approximately 900 additional students into academically screened seats that would have otherwise gone unfilled. For students entering high school in 2013, the NYCDOE placed almost 1,300 students were placed into these programs. The NYCDOE will continue this work in the upcoming school year.

The Public School Choice transfer process is another strategy that NYCDOE uses to help reduce the number of higher-needs, lower-performing students in Priority schools. Through Public School Choice, all students attending Priority schools are given the opportunity to transfer out of their current school and into a school that is “In Good Standing.” Students submit an application in the spring listing their choices, and they receive an offer over the summer for the upcoming fall. Lower-performing students and lower-income students are prioritized to receive an offer of their choosing. Furthermore, the NYCDOE has slightly revised the process in recent years to make the following two changes: the lowest-performing students within Priority Schools are more accurately identified through the use of indicators beyond merely test scores (including a promotion-in-doubt indicator based on grades and an indicator for students in temporary housing); students attending Priority Schools are prioritized to receive an offer above students attending Focus Schools. In 2014, over 6,500 families applied for transfers through Public School Choice and over 4,500 students received an offer.

G. District-level Labor and Management Consultation and Collaboration

The LEA/school must fully and transparently consult and collaborate with recognized district leaders of the principals’ and teachers’ labor unions about district Priority Schools and the development and implementation of the plan proposed for this specific Priority School proposed in this application. The evidence of consultation and collaboration provided by the LEA must contain each of the following elements:

- i. Describe in detail the steps that have occurred to consult and collaborate in the development of the district and school-level implementation plans.
- ii. Complete the Consultation and Collaboration Form and submit with this application (Attachment A).

The NYCDOE has consulted and collaborated with key stakeholders on the development of SIG Cohort 6 plans. Application and NYCDOE-developed guidance materials were shared directly by staff with the parent leadership group, CPAC; the principals’ union, CSA; and the teachers’ union, UFT. The engagement process with each group took place via meetings, phone calls, and emails about the applications. School Leadership Team (SLT) meetings took place to discuss school plans, which includes the principal, parent representatives, and UFT school leadership.

NYCDOE staff met with the Chancellor’s Parent Advisory Council (CPAC) in a full meeting on June 11 to discuss SIG Cohort 6. CPAC is the group of parent leaders in the NYCDOE; it is comprised of presidents of the district presidents’ councils. The role of CPAC is to consult with the district presidents’ councils to identify concerns, trends, and policy issues, and it advises the Chancellor on NYCDOE policies. NYCDOE staff met with UFT leadership on June 29 and engaged in multiple phone calls and emails with UFT regarding plan and overall school feedback subsequent to this meeting. CSA was also consulted with via phone calls and emails. All groups received district and school drafts for review and feedback.

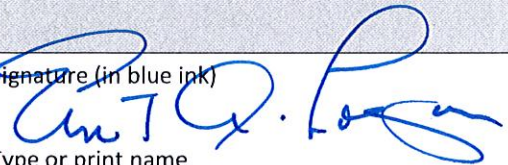

The NYCDOE is committed to collaboration in its efforts to improve Renewal Schools. Teacher leaders in particular are integral to the successful implementation of all other school improvement measures. They serve as indispensable colleagues for school leaders, ensuring that the school community retains its most effective teachers, is supportive of all teachers' growth, and increases student achievement. School-level plans include information about faculty senates or other structures to promote shared school-based governance, responsibility, and collaboration in the interests of furthering the educational mission of each school. Moreover, the success of these schools depends largely on developing in parents an ownership and leadership in schools. This means shifting the paradigm from parents as participants to parents as leaders and decision-makers who work hand-in-hand with school staff and CBOs. Stakeholder collaboration will continue to be a focus for each SIG Cohort 6 school.

In addition to the district-level Attachment A, NYCDOE asked that schools submit a school-level Attachment A, the Consultation & Collaboration Documentation Form, in order to ensure consultation and collaboration took place on the school-level plans with staff and parent stakeholder groups. Signatures include the school's principal, parent group president, and UFT representative. These school-level forms are also attached in addition to the required district-level Attachment A. The district-level form is signed by the president/leaders of the teachers' union, principals' union, and district parent body as of July 17 and July 20. The individuals who signed are Michael Mulgrew, UFT President; Ernest Logan, CSA President; and Nancy Northrup, CPAC Co-Chair.

Attachment A
Consultation and Collaboration Documentation Form

The U.S. Department of Education School Improvement Grant guidelines, under Section 1003 (g) require LEAs to consult and/or collaborate with various groups in the development of this SIG application. This form must be completed and submitted to NYSED as a part of this complete SIG application in order to document that appropriate consultation/collaboration has occurred or was attempted with constituency groups as follows:

1. Representatives of constituency groups who sign the form under their name/title are affirming that appropriate consultation has occurred. (The signature does not indicate agreement).
2. For representatives or constituency groups who have consulted with the LEA but whose signatures are unobtainable, supporting documentation providing evidence of consultation and collaboration efforts (e.g., meeting agendas, minutes and attendance rosters, etc.) must be maintained by the LEA and a summary of such documentation must be completed in the "Summary Documentation" box and submitted to NYSED on this form.

Principals Union President / Lead Date <u>7/17/15</u> Signature (in blue ink)  Type or print name	Summary Documentation if Signature is Unobtainable If the signature of the constituent identified above is unobtainable, provide a summary and description of the supporting documentation that provides evidence of consultation and collaboration on the Priority School identified in this SIG application.
Teachers Union President / Lead Date <u>7/17/15</u> Signature (in blue ink)  Type or print name	Summary Documentation if Signature is Unobtainable If the signature of the constituent identified above is unobtainable, provide a summary and description of the supporting documentation that provides evidence of consultation and collaboration on the Priority School identified in this SIG application.
Parent Group President / Lead Date <u>7/20/15</u> Signature (in blue ink)  Type or print name	Summary Documentation if Signature is Unobtainable If the signature of the constituent identified above is unobtainable, provide a summary and description of the supporting documentation that provides evidence of consultation and collaboration on the Priority School identified in this SIG application.

A. Assessing the Needs of the School Systems, Structures, Policies, and Students – 4 Points

Foreign Language Academy for Global Studies, “FLAGS High School” is a small learning community with grades 9 through 12 located in the South Bronx. The student population of 150 students is comprised primarily of students who live in the socioeconomically disadvantaged neighborhoods near the school with 90% receiving free and reduced lunch; 28% are Black, 67% are Hispanic. In 2015-16, approximately 32% of the FLAGS students are those with disabilities and 30% are English Language Learners. FLAGS also serves a student population that is transient. For example, last year the school experienced almost 50% of the students leaving the school over the course of 11 months and as many students entering the school for the first time as over the counter admits.

FLAGS is a relatively low-enrollment Renewal School. The NYCDOE is currently exploring options for redesigning FLAGS in the future to increase enrollment. As a result of anticipated low student enrollment for school year 2015-16, we have requested a reduced budget amount for the school in year 1.

FLAGS is co-located with a District 75 High School that serves intellectually disabled and emotionally disturbed adolescents on a Jackson Avenue block that has a reputation for being crime-ridden.

In recent years, District 7 has had a significant increase in the number of charter schools (The most in NYC) concurrent with a decline in student selection of FLAGS among their top five preferences in the high school choice process. FLAGS has seen an increase in the number of English language learners, students with disabilities, students in the lowest third city-wide as well as overage and under credited students while showing an overall decrease in total enrollment, which is now down to 150 students. With declining enrollment and the correlated reduction in the school budget, FLAGS faces significant challenges related to maintaining robust programs and resources to support their ELL, SWD, lowest third and overage students such as, delivering academic interventions, providing sufficient social –emotional supports and supporting the professional growth of staff.

FLAGS continues to be identified as a Priority School by the New York State Department of Education because of lagging student achievement as measured by credit accrual and progress towards graduation, performance on Regents exams and graduation rate. Contributing to low student performance is poor student attendance as measured by an average attendance rate of 79.7% (up from 77% in 2013-14) and evidenced by chronic absenteeism among a significant number of students. Parent stakeholders have not been highly active.

As stated above, FLAGS serves a large population of SWDs and ELLs. Most of our general education students enter FLAGS reading below grade level. Their academic needs relate to language acquisition and/or proficiency in grade-level literacy skills. Their struggle with speaking, and listening and reading comprehension in English, and with writing in keeping with grade-level standards, hinders their success in other content areas. Regents exams are often the deterrent to students’ timely graduation.

The NYSED Integrated Intervention Team conducted an on-site diagnostic school review (DTSDE) to inform the development of the school Comprehensive Education Plan on April 29-30, 2014 (prior to the leadership change). Findings from that review indicated that the school had a Developing rating for Tenet 2 and an Ineffective rating for the remaining 4 Tenets. Parent and community input during the Review was obtained through various interviews with each stakeholder group and reflected in Tenet 6 results (ineffective). The NYCDOE annually reviews schools to determine the quality of three components – the instructional core, school culture, and the systems and structures that support the school. The ratings are on the spectrum of well-developed, proficient, developing, and underdeveloped. In the most recent Quality Review, conducted on May 14th 2015, the school earned a grade of developing in the indicators 1.1 (Curriculum), 1.2 (Pedagogy), 2.2 (Assessment), 3.1 (Goal Setting), 4.1 (Teacher Feedback), 4.2 (Teacher Teams), and 5.1 (Monitoring and Revising). The American Institute of Research facilitated a co-interpretation review of data to identify areas of need and strengths of the school. Various stakeholders participated in this process, including administration, teachers, staff, and parents. The key findings highlighted that the prioritized areas of need are improving and reinforced the need for communication of high instructional expectations, disciplinary policies, and behavioral expectations.

In the April, 2014 IIT review of FLAGS, data driven instruction, curriculum, and social emotional learning were identified as priority areas to address. Specifics of the review indicated that DDI structures need to be put in place through the following activities:

- Strategic programming that allows teacher teams to meet consistently to analyze data to drive planning and pedagogy
- Professional Development on the Inquiry process and how to use data to drive Instruction and planning
- Professional Development on how to address a variety of student learning styles and needs based on data analysis
- The implementation of a cohesive common assessment structure that generated skill based data that will drive analysis
- The implementation of a robust AIS program to meet the needs of students identified through data analysis.

That the school needs to create a cohesive curriculum that includes the following:

- Alignment to the CCLS in all content areas
- Rigorous tasks and the use of complex texts
- Opportunities for a variety of learners to access content and materials
- A robust assessment program that provides data that can be used to adjust/modify curriculum

And that the school needs to address the social-emotional needs of students through the following activities:

- The implementation of a research-based PBIS program
- Professional Development for teachers on how to meet the social-emotional needs of adolescents
- Dedicated guidance counselors or consultant that provided 1:1 or small group services to students in crisis
- Parent outreach and workshops to strengthen the home-school connection and infuse PBIS strategies in family structure

The May 2015 NYDOE School Quality review found that “school leaders and faculty are in the process of aligning the curricula to Common Core Learning Standards and that curricula and academic tasks inconsistently emphasize rigorous habits and higher thinking skills across subjects”. Though they did find that “the school’s curricular decisions are creating greater alignment across subjects and tasks according to Common Core Learning Standards and content standards.” The May QR also found that across classrooms teaching practices are becoming aligned to the school’s instructional focus that is informed by the Danielson Framework for Teaching but across classrooms, teaching strategies that include scaffolding routines or questioning inconsistently provide multiple entry points into the curricula. This has led to uneven student engagement and in appropriately challenging tasks and uneven demonstration in higher order thinking skills including the work of English language learners (ELLs) and students with disabilities.

American Institutes of Research review and co-interpretation of the school’s data and prior reviews in June 2015 found in the area of curriculum and instruction that curricula and academic tasks do not typically emphasize rigorous habits or higher-order skills. In addition, curricula and academic tasks do not consistently reflect planning to provide students access to the curricula and tasks and cognitively engage a diversity of learners. They found that teachers need further support around implementing strategies and strengthening the curriculum to emphasize higher order thinking skills.

Working with the Chancellor’s School Renewal team, FLAGS school leadership will prioritize the areas for need illuminated in the school’s 2013-14 ITT Review, 2014-15 Quality Review and AIR co-interpretation review of June 2015. These include the improvement in school culture and systems to support standards-aligned curriculum development, consistently effective teaching practices, social emotion learning and increased family and community engagement. These priorities will address student achievement gaps such as poor performance on Regents exams, insufficient credit accrual and poor graduation rates along with student social emotional wellness evidence by low attendance rates.

We will begin (or expand) implementation of the following school improvement strategies during this school year:

- Intensive professional development for all staff to ensure effective implementation of curriculum and instruction aligned to the Common Core State Standards (CCSS) and to support staff in effectively responding to the differentiated academic and social-emotional needs of all students
- Expanded learning opportunities for all students, including additional instruction provided during after-school and/or summer programming provided in collaboration with community partners
- Transformation into a community school in order to increase student and family access to physical and mental health services and other social-emotional supports made available in or near the school

B. School Model and Rationale - 4 Points

FLAGS will address its prioritized needs through a coherent vision for rigorous curriculum and effective teacher practice, social and emotional learning and increased family and community engagement by selecting the *Innovation Framework* and leveraging integral partnerships with select organizations to become a Community School. FLAGS will adopt an integrated focus on academics, social emotional learning, mental health services, youth development and community engagement to improve student personal and academic learning, support parents in becoming involved with their children's education and foster a healthier South Bronx community. Through a safe, supportive school environment, rigorous curriculum, personalized interventions and instruction that is responsive to the diversity of learner needs, and an emphasis on student ownership of learning and leadership, FLAGS students will attend school consistently, thrive socially, emotionally and academically to develop resiliency and graduate within four years college and career ready. Working with community-based organizations (CBOs) and through a signature feature of the Community School's model--Extended Learning Time--FLAGS will serve as a hub for all of our students and their families during the day, evenings and weekends.

This model will address the identified needs of our student population that includes English language learners, students with disabilities, students that are at-risk-for failure because of poor attendance and past performance most of whom live at the poverty level social-economically. Our core challenges are related to accelerating the performance of students who enter high school below grade-level in reading and mathematics, helping non-English speaking students to become proficient reading and writing English while challenging them through standards-based curriculum, supporting students with disabilities, maintaining a safe and nurturing school environment for all students including those who struggle socially or suffer emotional duress or mental health issues because of a myriad of issues in an urban setting, and in building the school community's capacity to meet these needs.

In 2014 Schools Mayor De Blasio and Chancellor Fariña announced a vision and strategic plan for Community Schools within the context of the Mayor's larger agenda for children and families Initiative that also builds on the Chancellor's Framework for Great Schools. The plan includes launching 100 Community Schools matched with local Community Based Organizations (CBOs) to provide a slate of new services to help students develop and learn. Renewal Schools were identified to become Community Schools and offer tailored whole-student supports, including mental health services and after-school programs.

In accordance with the Chancellor's plan, FLAGS established a Community Schools Leadership Team in March 2015 and identified a lead CBO, the Center for Supportive Schools by April 2015. Working with the American Institutes of Research in May, students, parents and teachers participated in a needs assessment to review data sources including the ITT review, Quality Review and feedback from focus groups to identify specific elements from the Framework for Great Schools to develop goals for improvement. FLAGS' School Leadership Team (SLT) worked in partnership with NYCDOE leadership, School Renewal Director and team and the Center for Supportive Schools to create a Renewal School Comprehensive Education Plan (RSCEP) that maps out the school's steps to accelerate its improvement and expansion of social, emotional and mental health services. The RSCEP includes the creation of Extended Learning Time (ELT)--an extra hour added to the school day, , a key feature of a Community School, that

will give all students additional instructional time and targeted academic and social and emotional supports. Through collaborative conversations with FLAGS' UFT representative and faculty, a School Based Option vote (SBO) was used to identify new session times for students that frame the longer school day and professional learning time for faculty.

On June 25, 2015, the SLT including the Principal, UFT Chapter Chair, teacher, PA president and School Renewal representatives met to review and develop this SIG Grant application and approve its submission.

ELA Goal: Throughout the grant period, students will demonstrate growth towards proficiency in grade level Common Core Learning Standards for ELA and literacy.

Objective – Rigorous Instruction: Beginning September 2015, ELA curricula and academic tasks will emphasize the CC instructional shifts, rigorous habits and higher order skills for all learners in the majority of classes observed. This will be increasing throughout the grant period.

This objective will be assessed as follows:

- The minimum number of teachers rated Effective on Danielson 1e and 3c (as mutually agreed upon by the Director of School Renewal and Principal) is 75% or more each year and stable or increasing in subsequent years.
- The number of students achieving Level 3 on standards-based rubric traits will increase by 20% each year in ELA as measured by the NYC Performance Tasks
- The number of students obtaining a score of 75% or higher on the ELA Regents will increase by 20% in each year of the grant period
- Credit accrual in ELA for each cohort will increase as compared to the number on track in the previous cohort by 10%
- 80% of students will complete at least three CCLS aligned tasks in each year of the grant period.
- NYSESLAT scores will show students' steady progression on raw score and level towards proficiency from their scores in the previous year.

Objective – Rigorous Instruction: Teachers will utilize strategic inquiry and Writing is Thinking strategies in order to modify curriculum across the 9th and 10th grades in order to make data driven instructional decisions and meet the needs of struggling students.

This Objective will be assessed as follows:

- Throughout the 2015-2016 school year, 80% of 9th and 10th grade students will complete a minimum of 2 WIT tasks in each core subject area on a weekly basis. In 2016-2017, this will include the 11th grade and in subsequent years, the entire school.
- By June 2016 and increasing throughout the grant period, 80% of students in the 9th grade will be able to write a well-constructed, grammatically correct paragraph that includes varying complex sentences and vocabulary.
- By June 2016 and increasing throughout the grant period, 80% of students in the 10th grade will be able to write a well-constructed, grammatically correct multi-paragraph essay that fully responds to a given CCLS aligned task.

Objective – Effective School Leadership: Beginning September 2015 and continuing throughout the SIG implementation period leadership will utilize the Danielson framework to provide feedback to teachers on pedagogical practices as well as identify professional development topics to support areas for growth

This Objective will be assessed as follows:

- The minimum number of teachers rated Effective on Danielson 1e, 2d, 3b, 3c, 3d and 4e (as mutually agreed upon by the Director of School Renewal and Principal) is 75% or more each year and stable or increasing in subsequent years.
- The school will receive a rating of Proficient on indicator 4.1 (Teacher Support and Supervision) on the NYCDOE Quality Review in each of the years of the grant period.

Objective – Collaborative Teachers: Beginning September 2015 and continuing throughout the grant period, FLAGS teachers will actively participate in inquiry based teacher teams on a weekly basis in order to assess student work and craft CCLS aligned tasks in response to the data collected.

This Objective will be assessed as follows:

- The school will receive a rating of Proficient on indicator 2.2 (Assessment) and 4.2 (Teacher Teams and Leadership Development) on the NYCDOE Quality Review in each of the years of the grant period

Objective – Collaborative Teachers: Beginning September 2015 and continuing throughout the grant period, teachers at FLAGS will collaborate in teacher teams and utilize the Danielson Framework along with the Common Core Instructional shifts in order to create coherence in teacher’s classroom practice and to reflect a consistent culture of high expectations.

This Objective will be assessed as follows:

- The school will receive a rating of Proficient on indicator 2.2 (Assessment), 4.2 (Teacher Teams and Leadership Development) and 3.4 (High Expectations) on the NYCDOE Quality Review in each of the years of the grant period
- A minimum of 65% of teachers will be rated Effective on Danielson 3c, as mutually agreed upon by the Director of School Redesign (DSR) and Principal.
- A minimum of 65% of teachers will be rated Effective in component 3b of the Danielson framework, as mutually agreed to by the Principal and DSR.
- A minimum 80% of teachers will be rated Effective in component 3d of the Danielson framework, as mutually agreed to by the Principal and DSR.
- The percentage of students on track for graduation as measured by credit accrual and Regents passage will increase 15% by the end of year one (‘15-‘16) and 20% total by the end of year two (‘16-‘17). We aspire to a graduation rate of 58.5% by year two.

Math Goal: Throughout the grant period, student cohorts will increasingly demonstrate growth towards proficiency in subject area Common Core Learning Standards for Math.

Objective – Rigorous Instruction: Beginning September 2015, math curricula and academic tasks will emphasize the CC instructional shifts, rigorous habits and higher order skills for all learners in the majority of classes observed. This will be increasing throughout the grant period.

This objective will be assessed as follows:

- The minimum number of teachers rated Effective on Danielson 1e and 3c (as mutually agreed upon by the Director of School Renewal and Principal) is 75% or more each year and stable or increasing in subsequent years.
- Beginning June 2016, the number of students obtaining a minimum score of 75% on the Common Core Algebra Regents exam will increase by 20% and maintain or increase in each subsequent year of the grant period.
- Beginning June 2016 on-track credit accrual in math for each cohort will increase as compared to the number on track in the previous cohort by 10%
- 80% of students will complete at least three CCLS aligned tasks in math in each year of the grant period.
- NYSESLAT scores will show students' steady progression on raw score and level towards proficiency from their scores in the previous year.

Objective – Effective School Leadership: Beginning September 2015 and continuing throughout the SIG implementation period leadership will utilize the Danielson framework to provide feedback to math teachers on pedagogical practices as well as identify professional development topics to support areas for growth

This Objective will be assessed as follows:

- The minimum number of teachers rated Effective on Danielson 1e, 2d, 3b, 3c, 3d and 4e (as mutually agreed upon by the Director of School Renewal and Principal) is 75% or more each year and stable or increasing in subsequent years.
- The school will receive a rating of Proficient on indicator 4.1 (Teacher Support and Supervision) on the NYCDOE Quality Review in each of the years of the grant period.

Objective – Collaborative Teachers: Beginning September 2015 and continuing throughout the grant period, FLAGS teachers will actively participate in inquiry based teacher teams on a weekly basis in order to assess student work and craft CCLS aligned tasks in response to the data collected.

This Objective will be assessed as follows:

- The school will receive a rating of Proficient on indicator 2.2 (Assessment) and 4.2 (Teacher Teams and Leadership Development) on the NYCDOE Quality Review in each of the years of the grant period

Objective – Collaborative Teachers: Beginning September 2015 and continuing throughout the grant period FLAGS teachers will collaborate in teacher teams and utilize the Danielson Framework along with the Common Core Instructional shifts in order to create coherence in teacher's classroom practice and to reflect a consistent culture of high expectations.

This Objective will be assessed as follows:

- The school will receive a rating of Proficient on indicator 2.2 (Assessment), 4.2 (Teacher Teams and Leadership Development) and 3.4 (High Expectations) on the NYCDOE Quality Review in each of the years of the grant period

- A minimum of 65% of teachers will be rated Effective on Danielson 3c, as mutually agreed upon by the Director of School Redesign (DSR) and Principal.
- A minimum of 65% of teachers will be rated Effective in component 3b of the Danielson framework, as mutually agreed to by the Principal and DSR.
- A minimum 80% of teachers will be rated Effective in component 3d of the Danielson framework, as mutually agreed to by the Principal and DSR.
- The percentage of students on track for graduation as measured by credit accrual and Regents passage will increase 15% by the end of year one ('15-'16) and 20% total by the end of year two ('16-'17). We anticipate a graduation rate of 58.5% by year two and to see continued increases thereafter.

Supportive Environment Goal: FLAGS will promote the social and emotional development of all students by providing a safe, supportive, and respectful environment and offer broader array of services to address student and family needs and results in improved attendance, reduced discipline referrals and suspensions and increased progress towards graduation requirements

Objective – Supportive Environment: Beginning September 2015 and continuing through the life of the grant and beyond, the school leader will ensure that all staff members know and use research-based practices to support students social and emotional learning

Objective will be assessed as follows:

- By June 2016, Peer Group Connection, Achievement Mentoring and other evidence based programs and curricula for student advisement and social emotional learning will be implemented with fidelity by teachers with guidance from identified CBOs.
- During the 2015-2016 school year, FLAGS staff members will participate in ongoing training from Peer Group Connection, Achievement Mentoring and other evidence based programs to support implementation of program which will be demonstrated in 80% of teachers receiving an effective in Danielson 4e Growing and Developing Professionally.
- Students will be show growth when assessed by their teachers using Habits for Work and Learning (HOWLs) rubric
- Students perception of their social and emotional growth and leadership will be positive on self-reflection surveys
- 5 percentage points in parents satisfaction with our school on the School Environment Survey
- 20% increase in percentage of stakeholders who answer on School Survey questions related to perception of safety and being known positively (agree or strongly agree)

Objective – Supportive Environment: During the 2015-2016 school year and continuing through the life of the grant, teachers and staff at FLAGS will utilize

structures and protocols for prevention and intervention by referring students to services that support social and emotional development, mental health and academic success.

Objective will be assessed as follows:

- By June 2016, student attendance will increase from 79% to 80.1%.
- Reduction in number of chronically absent students with attendance in 70 to 89% interval by 10%
- 75% compliance rating on timely IEP annual and tri-annual reviews
- Significant reduction in severely over-age under credited students (3rd, 4th and 5th year students and other with fewer than 15 credits) through transition support
- By June 2016, at least 40.2% of year 2 and 3 students will be on track towards graduation.
- By June 2016, the 4 year graduation rate will be at least 50.4
- The school will maintain or exceed an overall proficient rating on sub-indicator 1.4 on the 2015-2016 Quality review.

Objective – Respect: Students and adults treat each other respectfully and student voice is welcome and valued.

Objective will be assessed as follows:

- 5 percentage points increase in parents satisfaction with our school on the School Environment Surveys
- 20% increase in percentage of stakeholders who answer on School Survey questions related to perception of safety and being known positively (agree or strongly agree).

Collaborative Teachers Goal: Teachers at FLAGS will collaborate in teacher teams and utilize the Danielson Framework along with the Common Core Instructional shifts in order to create coherence in teacher's classroom practice and to reflect a consistent culture of high expectations.

Objective – Collaborative Teachers: Beginning in September 2015, teaching practices will reflect a culture of high expectations and will be aligned to the curricula and articulated set of beliefs that is informed by the Danielson Framework and Common Core Instructional shifts.

Objective will be assessed as follows:

- The school will receive a rating of Proficient on indicator 2.2, 4.2 of the spring 2016 Quality Review.
- A minimum of 65% of teachers will be rated Effective on Danielson 3c, as mutually agreed upon by the Director of School Redesign (DSR) and Principal.
- A minimum of 65% of teachers will be rated Effective in component 3b of the Danielson framework, as mutually agreed to by the Principal and DSR.
- A minimum 80% of teachers will be rated Effective in component 3d of the Danielson framework, as mutually agreed to by the Principal and DSR.
- The percentage of students on track for graduation as measured by credit accrual and Regent passage will increase 15% by the end of year one ('15-

'16) and 20% total by the end of year two ('16-'17). We aspire to a graduation rate of 58.5% by year two.

Objective – Collaborative Teachers: During the 2015-2016 school year FLAGS teachers will actively participate in inquiry based teacher teams on a weekly basis in order to assess student work and craft CCLS aligned tasks in response to the data collected.

Objective will be assessed as follows:

- The school will receive a rating of Proficient on indicator 2.2, 4.2 of the spring 2016 Quality Review.
- The percentage of students on track for graduation as measured by credit accrual and Regent passage will increase 15% by the end of year one ('15-'16) and 20% total by the end of year two ('16-'17). We aspire to a graduation rate of 58.5% by year two with continued increases throughout the 5 year grant period..

Strong Family and Community Ties Goal: FLAGS will renew its culture to be one of partnership where school, families, parents and community foster student academic, social and emotional well-being.

Objective Strong Family and Community Ties: Beginning September 2015, FLAGS will implement an effective school community program by collaborating with Center for Support of Schools and providing programs and resources that support students, parents, and school staff.

Objective will be assessed as follows:

- 25% increase in parent attendance at parent conferences from first semester 2014 compared to first semester 2015
- 100% of teachers contacting 100% of their parents each marking period
- Two workshops per month with 10 parents in attendance
- Meet City average attendance benchmark of increase from 79% to 80.1%
- 25% percentage points in parents satisfaction with our school on the School Environment Surveys
- By June 2016, at least 40.2% of year 2 and 3 students will be on track towards graduation. By June 2016, the 4 year graduation rate will be at least 50.4%

Attachment B

School-level Baseline Data and Target-Setting Chart**

SCHOOL-LEVEL BASELINE DATA AND TARGET SETTING CHART	Unit	District Average	SY10	SY11	SY12	SY13	Baseline Data	Target for 2015-16	Target for 2016-17	Target for 2017-18	Target for 2017-19	Target for 2017-20

D. School Leadership – 6 points
--

The specific characteristics and core competencies that must be evident in the principal that leads FLAGS' are aligned with the "Competencies for Determining Priority School Leaders". First, it will be vital that the FLAGS' principal demonstrate the ability to uphold the vision for effective teaching and learning as defined by the DOE's adopted teacher evaluation rubric, Danielson's Framework for Teaching (FfT), and the Common Core Learning Standards (CCLS) instructional shifts. She must have the ability to convey the how classroom level change is essential to the school improvement process. Communication of effective teacher practice involves defining and describing examples and non-examples of specific targeted strategies and also identifying exemplary practices in various disciplines to foster teachers' new understanding which is prerequisite to change. Because the vast majority of FLAGS' faculty was given feedback consistent with effective or highly ratings prior to 2014-15 and observational data during the 2014-15 school year has shown that these ratings do not accurately reflect current teacher development, it is incumbent upon the principal to be able to continually explain how and why certain practices are not actually effective and to provide actionable feedback and ratings aligned to the FfT and the CCLS.

Secondly, the principal must possess the expertise to identify and support necessary changes to ensure CCLS-aligned curriculum and programming is accessible to the diversity of learners at FLAGS including its large population of English language learners and students with disabilities to put them on the path for college and career readiness. This can only happen if FLAGS' leadership demonstrates the competence to create differentiated professional development opportunities that support all teachers' improved curriculum, instruction and assessment practices. Since FLAGS has both veteran faculty members and teachers new to the profession (currently four), professional development tailored to the continuum of adult learning needs is also crucial to moving the school forward.

Another important set of competencies for Priority School principals that is also essential for the FLAGS' leadership relates to being able to develop cohesive improvement plans in collaboration with key stakeholders, informed by a theory of action, current data, and evidence of best practice. FLAGS' 2015-16 Renewal School Comprehensive Education Plan (RSCEP) articulates a coherent vision for change predicated on the Chancellor's research-based Framework for Great Schools, transition to a Community School, adoption of Expanded Learning Time, and key data about its student outcomes and achievement gaps that informs the plan. The RSCEP also incorporates numerous action plans associated with the receipt of Community Schools funding. Over the next five years, FLAGS' school leader must have the ability to align resources to the vision for school improvement, utilizing the School Improvement Grant in a way that is complementary to the use of the Community School's funding to result in revitalization of school's culture, structures and instructional cores and reversal of the negative trends in student performance indicators. With an expanded vision to serve the whole child as a Community School, FLAGS' principal must possess the passion and capacity to work with community based organizations effectively to identify and obtain critical social-emotional and mental health services for all students and to support faculty and parents in contributing to the development of these services.

Progress must be defined by measurable goals for student academic and social and emotional growth that are monitored systematically using an array of data sources to adjust policies, procedures and strategic improvement plans as necessary. According to the leadership competencies for Priority Schools, monitoring progress towards school goals also requires expertise in implementing a whole school strategy for data driven instruction (DDI). Because the ITT and Quality Reviews in the 2013-14 and 2014-15 school year found inconsistent practice related to DDI, specifically teacher analysis of periodic common performance assessments and other data sources, it will be essential going forward for FLAGS' leadership to provide appropriate professional development support to ensure teachers successfully use common assessments and identify trends in data to inform instructional decisions and progress toward schoolwide goals.

Parent involvement has been quite limited at FLAGS according to the ITT, DOE School Survey and QR and parent involvement statistics as have opportunities for student voice. Consequently, the principal must re-engage educators, students, families and community partners in reciprocal communication to strengthen all partnerships, enhance mutual accountability for student learning and to foster collaboration towards the accomplishment of identified goals. This will require an understanding on the part of the principal of the influence of race, ethnicity, language, class and gender in interactions with all constituencies and the ability to cultivate a culture of respect for all members of FLAGS' diverse school community.

Leslie Miller Chislett has over twenty five years of experience as a teacher, instructional leader and school administrator. Her career has been distinguished by her passion for innovative teaching and learning models. Ms. Chislett began her career in the elementary classroom and soon became a literacy coach and enrichment teaching specialist in a K-8 school in Rochester, New York. Desiring to ensure authentic, rigorous learning experiences for all students, Ms. Chislett pursued a Masters of Education in Talent Development from the University of Connecticut and Certificate of Advanced Studies in Educational Leadership from Canisius College in Buffalo. After serving as an Assistant Principal in a large primary school, and directing gifted and enrichment programming on the district level in upstate New York, Ms. Chislett relocated to Colorado to serve as state director of gifted education. To pursue her growing passion for whole school reform models, Ms. Chislett became principal of an Expeditionary Learning Magnet School in need of improvement in Denver. In 2007, she relocated to New York City to serve as Assistant Principal at Bronx Expeditionary Learning High School, a new small school that she helped develop systems for improvement and an interdisciplinary curriculum. From there, Ms. Chislett became Director of Knowledge Sharing in the DOE's Division of Accountability and Performance where her work focused on disseminating promising practices Citywide through the ARIS Connect platform. As Chief Academic Officer for Cluster One, Ms. Chislett led professional development to support Common Core curriculum and assessment implementation. Most recently, as Director of Professional Development in the Office of School Quality, Ms. Chislett evaluated schools during the Quality Review and ITT processes. Desiring to again lead school change firsthand and join the Chancellor's School Renewal Initiative, Ms. Chislett assumed the principalship of FLAGS High School in August of 2014.

Throughout her career, Ms. Chislett has gained expertise that qualifies her to lead a Priority school being transformed through an innovation model. While overseeing educational innovations on the classroom, school, district and state level, she gained skill in communicating vision for excellence, planning strategically, obtaining stakeholder buy-in, using data and evidence-based practices to inform practice, managing teams, and designing curriculum, assessment and professional development to result in student achievement. Ms. Chislett has led initiatives to build the capacity of teachers, school leaders, and superintendents through training, resource development, on-going support and accountability for improvement. Her breadth and depth of experience makes her the right leader to bring needed improvement to the FLAGS community.

During the first year of her leadership, Ms. Chislett has realigned resources to support school goals, created structures for professional collaboration that engage teachers in analyzing student performance on CCLS-aligned tasks, and improved school culture by implementing a peer leadership and advisory program. The impact of these initial changes has been a shift in student perception of their school as a positive safe place in which they are known, increased attendance and advances in credit accrual for the freshman class. Expanded Learning Time has been implemented on a limited level and a vital CBO partnership has been forged with the Center for Supportive Schools.

Ms. Chislett has articulated a vision for Effective School Leadership in the 2015-16 RSCEP which incorporates the following targeted behaviors and results to make school reform comprehensive:

- Support stakeholders to understand the vision for school improvement, instructional focus and Community School purpose with a shared sense of urgency about achieving school-wide goals
- Effectively use evidence-based systems to examine and improve individual and school-wide practices in critical areas (curriculum, teacher effectiveness, family engagement, social and emotional health).
- Monitor interim checkpoints cited in the RSCEP using data-based tools and sources (such as NYC Schools Account, Progress Towards Graduation Tracker, School Performance Data Explorer, SKEDULA, STARS Scholarship reports, dashboard of social and emotional learning and attendance data) and communicate progress towards goals; make revisions as needed
- Foster shared accountability through data-based conversations and protocols that require teachers and other stakeholders to use an inquiry approach when examining data and to use data to substantiate progress or impact of our efforts.
- Make strategic decisions to organize resources concerning human, programmatic and fiscal capital so that school improvement and student goals are achieved.
- Conduct targeted and frequent classroom observations, support and track teacher development using student data, feedback and professional development, and hold faculty accountable for continuous improvement

Assistant Principal – FLAGS has one assistant principal who is responsible all operational areas of the school. She has oversight of budget, procurement, payroll, and facilities. Instructionally, she facilitates teacher teams, shares responsibility for teacher effectiveness and development, oversees student enrollment, English Language Learner compliance and serves as our World

Languages teacher. She oversees student discipline, incident reporting and the SAVE room as well as substitute coverages and ATR teacher placement.

School Implementation Manager (SIM) - The SIM serves as the project manager ensuring that schools receive appropriate guidance, technical assistance, and coaching in order to improve outcomes for students and pedagogical practices through implementation of the identified intervention model. The SIM is responsible for managing the accountability structures put in place to assure ongoing monitoring and intervention in schools undertaking the intervention models, and are responsible for meeting federal and state reporting requirements related to schools' interim and summative performance.

The SIM provides direct targeted support for all the schools in their caseload. SIMs support and monitor the whole school reform model articulated in the schools approved plan. This support is both on and off site. SIMs facilitate a case study protocol, which examines on a monthly basis evidence of practice and impact around the goals outlined in the SIG plan. Through the case study protocol SIMs engage in any of the following with building leadership: classroom observations, observe expanded learning time (ELT) program(s), cabinet & partnership meetings, curriculum review, teacher team/inquiry team meetings, learning walks, data analysis, as well as leadership level conversations developing next steps at the school level. The SIM is on-site in each school at least twice per month. Additional visits support crafting quarterly progress reports, budget modifications, annual renewals, and SED site visits

The leadership team at FLAGS consists of the principal, assistant principal, dean and two guidance counselors. One counselor oversees college advisement and the other counselor supports the development of an advisory program and to handle mandated counseling for students with disabilities. One strategy employed by the principal of the new administration to build buy-in was to communicate high expectations related to the vision for accelerated student achievement and positive school culture resulting in social and emotional growth. Because effective instructional leadership and systems realignment are essential to ensure students the programs and services they need to succeed, changes were made to the leadership configuration and will continue to be made. The current assistant principal supervised instruction until it became apparent that a "renorming, re-calibration" strategy should be adopted by the new principal, who is an instructional expert and took over the role of observing and rating teacher practice. The assistant principal was assigned to oversee operations. In this new role, the assistant principal has been rated unsatisfactory. This rating is due in part to her lack of leadership initiative in the area of systems development to create and sustain a supportive and safe school environment.

Leadership support is also provided by the dean who responds to disciplinary issues, conducts investigations and parent outreach and creates required incident reports. His work in these responsibilities is fairly consistent.

The guidance counselors also provide significant leadership input into developing appropriate interventions for students who are struggling or at risk, youth development and college advisement. The new counselor shows the greatest capacity to social and emotional learning experiences and supports the Community School Vision. The current budget, without the SIG can no longer sustain two counselors. Through the grant, a bilingual counselor who can oversee

student intake and work alongside the ESL coordinator is envisioned since FLAGS has so many over-the-counter students many of whom are ELLs.

Leslie Miller Chislett

LICENSURE

NYS School District Administrator, Colorado and NYS School Administrator Supervisor, NYS Teacher, K-6

EDUCATION

Doctoral Coursework Educational Leadership and Innovation, University of Colorado at Denver
Certificate of Advanced Study, Educational Leadership Program, Canisius College
M.A., Educational Psychology, Talent Development Program, University of Connecticut
B.S., Elementary Education, Roberts Wesleyan College

LEADERSHIP EXPERIENCE

2014-present

Foreign Language Academy of Global Studies, "FLAGS" High School, NYC Department of Education
Interim Acting Principal

2008-2014

Division of Performance, Accountability and School Support, NYC Department of Education:

Director of Professional and Resource Development, Office of School Quality (since 2012)

Foster school accountability by leading design and facilitation of professional development in quality criteria for school and principal performance evaluation; conducting reviews to measure how well a school is organized to support student achievement, writing public reports detailing a school's strengths and areas for improvement; collaboratively planning the Citywide Children First Intensive Institutes for Common Core Learning Standards (CCLS) curriculum implementation and Teacher Effectiveness evaluation practices.

- Developed curricula, implemented monthly training for superintendents and reviewers to result in calibrated understanding of *Quality Review* indicators, evidence-based reports, Principal Practice Observation protocols and ratings for school evaluation and principal evaluation
- Conducted multiple Quality Reviews, joint NYSED DTSDE Reviews and Principal Practice Observations that provide actionable recommendations for school or leadership improvement
- Leveraged practices and artifacts as exemplars furthering system knowledge of well-developed schools
- Joined central curriculum committee in designing case studies and other adult learning experiences that deepened the capacity of network team members to support schools in CCLS-aligned curriculum, instruction and assessment, Citywide instructional expectations

Chief Academic Officer, Cluster One (2010-2012)

Oversaw academic initiatives for 12 networks serving over 300 schools by advising network support of school improvement, directing professional development in CCLS curriculum alignment, instruction, assessment and leadership development; managing funding, supporting network performance management

- Crafted instructional agendas for network leader meetings to result in a professional learning community committed to shared school improvement practices such as instructional rounds, and increased student achievement
- Helped central Talent Office plan and facilitate monthly *Network Leadership Institutes* to yield coherent and effective network structures and practices
- Led monthly *Achievement Institutes* for over 75 network coaches resulting in expanded knowledge and skill in performance assessment, curriculum standards alignment and collaborative analysis of student work protocols as part of system-wide CCLS initiative
- Supervised cluster instructional team to strategically support network personnel and result in improved school compliance metrics related to mandates for ELLs and SWDs

Domain Leader, Knowledge Sharing Team (2008-2010)

Fostered system-wide dissemination of effective practices through Achievement Resources Innovation System (ARIS) technology; management of grants, vendors, and facilitating professional development

- Contributed to rollout and on-going enhancement of the *ARIS Connect* repository of research-based content and teacher-made resources
- Fostered use of social networking tools producing on-line communities of practice
- Envisioned and executed creation of *Promising Practices Library* to showcase City schools

- 2007-2008 **Bronx Expeditionary High School, Bronx, NY**
Assistant Principal for Instruction and Curriculum
 Shared leadership in a 9-12 school with 400 students by directing curriculum and professional development, guiding instructional planning, mentoring and coaching teachers, assisting with daily operations of school
- Led curriculum, instruction and assessment initiatives to result in teacher professional growth, student progress towards graduation and school improvement as measured by Quality Review
- 2005-2006 **Renaissance Expeditionary Learning Magnet School, Douglas County Schools, Parker, CO**
Principal
 Led a K-6 school with 200 students by developing and monitoring school improvement plan, managing resource allocation, guiding professional learning in curriculum, pedagogy and portfolio assessment, facilitating shared decision-making with stakeholders, contributing to new building construction plan and school relocation, directing marketing, faculty and student recruitment, supervising 35 faculty and staff.
- Re-aligned former charter school to meet district expectations for stake-holder involvement, curriculum standards, effective classroom practices and supervision of teaching and learning
 - Improved teacher practice to result in increased literacy achievement as assessed by state and district score card metrics
- 2002-2005 **Cherry Creek Schools, Greenwood Village, CO**
Director of Gifted and Talented Education, K-12
 Directed gifted education programming in district of 45,000 by chairing district *Gifted Education Task Force* and strategically planning program identification reforms, managing budget, delivering staff development, supervising district program specialists, and directing early kindergarten enrollment process.
- Reformed identification process to result in equitable inclusion of culturally, linguistically and racially diverse students in district gifted education programs and closing of achievement gaps
 - Created cadre of differentiation coaches to support and expand use of strategies to create student entry points in classrooms across 50 schools resulting in improved curriculum access for diverse learners
- 2001-2002 **Special Education Services Unit, Colorado Department of Education, Denver, CO**
State Director of Gifted Education
 Directed gifted education programming and policy on a state level by chairing *State Gifted Advisory Committee to the Colorado Board of Education*, managing school funding process, providing technical assistance to districts, designing staff development, supervising regional facilitators, developing state identification and teacher preparation guidelines, managing grants
- Steered federal and state grant funding to produce increased opportunities for low-income urban and rural students to take AP courses on-line
 - Laid groundwork leading to approval of state gifted education teacher endorsement
- 1998-2001 **Victor Primary School, Victor Central Schools, Rochester, NY**
Assistant Principal
 Co-led a pre K-3 school of 1,100 students, 120 faculty and staff members by guiding curriculum, program and assessment initiatives, directing daily operations, supporting teachers, evaluating teacher performance, hiring new staff, delivering staff development in differentiated instruction and balanced literacy
- Led instructional improvement in math and literacy to result in consistency in pedagogy across classrooms and student achievement gains as measured by state and district assessments

TEACHING AND CONSULTING EXPERIENCES

- 2012-2013 **Curriculum and professional development designer for DTSDE statewide reviewer institutes**
- 2006-2007 **Colorado State Assessment item reviewer, Mid Continent Regional Education Laboratory (MCREL)**
- 1996-2005 **Graduate Workshop Instructor, University of Connecticut, Summer Enrichment Teaching *Confratute***
- 1993-1998 **Enrichment Services Coordinator/Teacher, K-12, Rush-Henrietta School District, Henrietta, NY**
- 1992-1993 **K-2 Teacher, Council Rock School, Brighton Central Schools, Rochester, NY**
- 1988-1992 **English Language Arts Teacher, Enrichment Coordinator, Faith Temple School, Rochester, NY**

E. Instructional Staff – 6 Points
--

The majority of our students are below grade level in ELA and math. Our growth with individual sub-groups has been stagnant. Most of our student population has been identified for AIS services. 30% of our population is ELL's and 32% are SWD's. Currently our AIS teachers need support adapting our curriculum for access by our struggling population and are hoping through this grant to hire an additional supplemental ELL teacher/coach to support our ELL's and a data/math coach to support all staff in using assessment of student performance to drive instruction. As evidenced by our HEDI rating breakdown 43% of teachers are developing or ineffective overall while 46% of teachers are rated Developing or Ineffective in Danielson competency 1e, planning coherence for instruction and 62% of teachers are rated Developing or Ineffective in competency 3c, student engagement. We are in the process of re-organizing our day to allow for more one-to-one support by our coaching staff. Of fourteen regularly appointed staff at FLAGS this school year, eight (8) were rated Effective in their MOTP component of the APPR, five (5) were Developing and one (1) was rated Ineffective. None were rated Highly effective. As Measures of Student Learning (MOSL) scores have not yet been calculated, final ratings are not yet available.

The current school staffing picture in terms of quality, effectiveness and appropriateness for the needs of the students at FLAGS is one of inconsistency. There is a quality differential between the more veteran staff that have been with the school for years and staff brought in by the new administration this year. FLAGS' diverse population of students including English language learners and students with disabilities requires engaging curriculum and instruction that is scaffolded to give them access to standards-based content. Typically, the instruction has not reliably engaged students as evidenced through observations and by student performance on standardized measures. Instructional capacity has lacked in the area of mathematics, social studies and in the general area of support for English language learners. Guidance systems to ensure that newly enrolled students' transcripts are updated as they come to school from a variety of backgrounds and then programmed effectively are lacking. The ELL coordinator, Data Coach and Guidance Counselor supported by this grant will as well as the supports (Strategic Inquiry) provided by Renewal Schools will substantially address the weaknesses in the schools current staffing situation.

To implement the Community Schools Model we will need the new staff proposed. This includes a part time ESL coordinator to oversee assessment and programming for ELLs and provide staff development to assist language acquisition and literacy development needs of our students and to build teacher capacity. We will also need a math coach to assist with the improvement of math instruction and data analysis and to teach innovative electives that support student success on the Regents exams while giving them access to new content such as Financial Math or Technology Explorations in math. We also need a bilingual counselor to assist with student intake, counseling, college advisement and crisis intervention. These additions, in keeping with the expanded focus on curriculum, instruction and assessment and expanded social and emotional support for our diverse population will drive substantive and lasting improvement to student's success at FLAGS throughout the implementation period of the grant.

The characteristics and core competencies necessary to meet the needs of the students are shown below by teaching area. In order for our coaches to support teacher growth it will be most important for them to provide actionable evidence-based feedback to teachers in ways that ensure that

instruction is constantly improving in its alignment to the Common Core and create differentiated professional development opportunities for teachers based upon their experience level.

All teachers, whether new to the school or not, need to demonstrate effective instruction aligned with Danielson components, especially design of coherent instruction, student engagement and questioning and discussion techniques to result in high levels of thinking. In particular, teachers need knowledge of and competence in the Common Core standards, and instructional shifts. How the literacy standards relate to each discipline is particularly important. Deepened learning for all faculty will involve understanding how social and emotional learning intersects with classroom instruction and the necessity of additional structures like advisory or team referral protocols for supporting students. In addition, data driven instructional skills such as use of protocols for inquiry, analysis of student work and data, use of evidence to determine the effectiveness of instructional strategies. Progress monitoring and reflection are vital for our school's continuous improvement.

Math Coach	Knowledge of CC shifts (rigor, procedural fluency, and conceptual understanding); coaching skills, curriculum development expertise and data analysis to support strategic programming and curriculum refinement
ESL Coordinator	Knowledge of research-based curriculum, instruction and assessment strategies and programming models; ability to oversee implementation of programming aligned with state and local requirements for serving ELLS. Experience in delivering professional development.
Bilingual Counselor	Knowledge and skills in youth and college advisement and access for first-time college goers, vision for and experience in creating a college going culture, skill in developing systems to handle the intake and placement for a diverse population of learners that is also transient and of whom many are under-credited; skill in social and emotional counseling

A citywide “open market” staff hiring and transfer system is available every year from spring through summer that principals may use to identify school pedagogical staff seeking transfers as well as those who wish to apply to specific vacancies or schools. Principals are thus able to recruit, screen, and select instructional staff new to their schools based on need. While principals have discretion over the school's budget and staffing decisions, one barrier that schools may face are hiring restrictions set by the district for certain subject areas, grade levels, and titles or licenses. Exceptions are given in certain cases based on critical needs such as for high-need subject areas. Schools are also supported by human resource directors on budgeting, recruiting and hiring procedures. In addition, all principals have access to an online human resources portal for up-to-date data and activities related to talent management. Similarly, resources are available to instructional staff on recruitment fairs, workshops, school vacancies, transfer options, as well as professional development, citywide award programs, and leadership opportunities to promote staff retention.

Center for Supportive Schools

As a Renewal School, the Center for Supportive Schools (CSS) was selected as the school's lead CBO partner. In partnership with the school, CSS will hire a Community School Director. The Director will be responsible for the day-to-day management of the community school strategy, facilitating and providing leadership for the collaborative process of developing a continuum of services for children, families, and community members. The Director will drive development of community school action plans and planning for sustainability. S/he will track the school's progress against performance goals, collect school data, and support program evaluation activities and manage partnerships. The Director will ensure that the community school strategy is implemented at exceptional levels of quality with full support, buy-in, and regular communication with stakeholders across the school community. Specific position responsibilities will include:

- Build and maintain relationships with administration, faculty, staff, students, parents, and community partners
- Organize and expand upon the membership of the Community School Team (CST) to include diverse school community stakeholders and CBOs
- Conduct a needs assessment process, including: reviewing school and student-level data; conducting focus groups with parents, students, faculty, staff, administrators, and community partners; and reviewing and/or conducting school climate and culture survey
- Conduct a community asset assessment to identify viable partnerships that can meet the needs of students and families of the school community, including developing metrics for partnership evaluation
- Recruit and develop partnership agreements with people and community organizations willing to offer programs and services for students and families at the school in accordance with identified needs
- Identify evidence and research-based practices and/or partnerships that address priority areas for the community school strategy, which may include but are not limited to: Parent/Family Engagement; Community Engagement; Youth Development; Academic Rigor and Instructional Practices; Health and Mental Health; Tutoring; After school programming; Mentoring; and Early Childhood
- Develop, maintain, and publicize a schedule of programs and activities offered at the school
- Implement and maintain a process that encourages referrals to programs and services offered at the school
 - Identify needs of chronically absent students, apply interventions, and track and monitor impact of interventions on weekly basis, as part of weekly Student Success Summit
- Collect and monitor program implementation data and student data for each partnership that allow easy data analysis and interaction by the SLT and other school stakeholders

Strategic Inquiry Consulting

Strategic Inquiry is a model of school improvement that was developed and refined over ten years of practice and research in New York City schools. In 2014, Strategic Inquiry partnered with the NYC DOE School Renewal Initiative to provide support to 14 NYC Renewal High Schools to

implement strategic inquiry with a specific focus on writing. The vision for Strategic Inquiry is to support the spread of inquiry and Judith Hochman's Writing is Thinking strategies through on-site training from a consultant to provide the following services:

- Provide direct training in inquiry and/or writing as needed
- Support school leads in conducting learning walks and inter-visitations
- Support curriculum development that is aligned with the writing strategies and common core
- Support strong pedagogy/instructional implementation of this curriculum and the WiTsi strategies across the curriculum.

The on-site consultant will also help develop the capacity of the above leaders and the school based teams to implement other forms of inquiry and provide support and coaching as needed. This will have a direct impact on building teacher knowledge in effective literacy strategies and support students in meeting common core standards across all content areas.

Connect with Kids

Connect with Kids Education Network (CWK) is an instructional media company that produces documentary-style videos and evidence-based curricula designed to improve student behavior, health and wellness. Using the power of storytelling and peer-to-peer learning, Connect with Kids programs spark emotional connection and inspire positive behavior and cultural change. Connect with Kids will establish a school website by our teachers and also by the community with video-based resources for social emotional learning that will be used during advisory. They will also develop a parent facing website with resources on parenting and support of adolescents in several languages to facilitate communication.

WEDIKO

Wediko Children's Services is a non-profit organization committed to improving children's lives. Using a strength-based approach, Wediko responds to the needs of children who face repeated obstacles to development due to emotional, behavioral, environmental, and learning issues. Through a continuum of flexible services and multi-disciplinary training programs, Wediko develops enduring partnerships with children, families, schools, and the community. Wediko strives to capture success and restore a sense of competence and hope.

Family Support Services:

Wediko offers families customized supports to enhance children's academic confidence and social and emotional well-being.

Examples of this work include:

- Outreach and Home Visits - to a targeted subgroup of students (focused on attendance and academic outcomes)
- Resource Referrals for families in need, including accompanying students and families to Intake appointments
- Family Meetings - Identifying strengths and needs, setting goals

CUNY – College Support

Pre-college transition math and English courses, Bridge to College summer support, and College Advisement at CUNY community colleges

CaseNEX - DataCation

CaseNEX offers an array of tools to help schools break down complex student data to inform and support instruction, professional development, curriculum planning, accountability, and policy. Through the use of the DataCation platform, the school will be able to:

- Streamline student academic and social-emotional data from various sources to facilitate communication amongst school staff, parents, and students
- Continuously engage parents by providing them the most up-to-date information on their children's academic and social-emotional progress and ability to communicate with school staff at their convenience through the use of the PupilPath portal
- Provide teachers with a platform for analyzing trends of student performance through item skills analysis reports using the Data Driven Classrooms portal to support inquiry
- Provide students with the opportunity to track their individual progress in their enrolled courses so that they are able to take ownership of their learning
- Provide professional development to staff and parents in order to maximize the use of the various data portals
-

Brienza's Academic Advantage

Brienza's Academic Advantage works in tandem with schools to help students succeed. Brienza's Academic Advantage curriculum choices align to Common Core Curriculum Standards, and help students develop the skills to demonstrate content and the understanding of the concepts which will prepare them for performance based assessments. Brienza's services will be used to provide an effective expanded learning time program, built around hands-on, innovative approaches to prepare students for the SATs and Regents in core subject areas.

The key external partners are held accountable via:

- Regular check-ins with Principal, Director of School Renewal, and Community Schools Director
- Evidence of teachers' implementation of CCLS Literacy and Math units of study via observations in ADVANCE and subsequent feedback to coaches
- Indicators of school culture and student social-emotional growth such as attendance, student self-reflections and OORs related incidences
- Teacher integration of technology within the classroom (e.g. SKEDULA, Connect with Kids curricula)
- Student Support Summits (SSS) reports to monitor interventions; SKEDULA anecdotal trends
- Coaches' and partners support logs (shared online)
- ELT Attendance Logs
- Walk-throughs for data on targeted program elements and strategies implementation
- Daily, weekly verbal debriefing, emails and additional planned meetings as needed.
- Review of documents and resources on Google Doc and Dropbox (memorializing support provided)
- Parent involvement data to reflect impact of engagement efforts

For individualized specifics on partner accountability, see attached chart:

CENTER FOR SUPPORTIVE SCHOOLS

PGC has been rigorously evaluated by research organizations, universities, and independent evaluators. Results consistently demonstrate improvements in students' leadership, academic, social, and emotional skills that lead to: significantly lower dropout rates; improved grades; improved attendance; fewer discipline referrals; and avoidance of high-risk behaviors.

For example, with funding from the National Institute on Drug Abuse, Rutgers University conducted a randomized, longitudinal study of the effect of PGC on four-year cohort graduation rates. Participants were 269 9th graders from Union City High School in NJ, a school serving a predominantly Latino and low-income population. Participants were randomly assigned either to receive the program (n = 94) or to participate in the control group (n = 175). Results indicated that *PGC improves the graduation rates of participants by nine percentage points*, with 77% of the students in the program group graduating from high school in four years compared to only 68% in the control group (p = .075). Results also show that PGC improves the graduation rate of male participants by 18 percentage points with 81% of the males in the program group graduating from high school in four years compared to only 63% in the control group (p = .023), *cutting by half the number of male students who would otherwise dropout* (Johnson, Simon, and Mun, 2013)

WEDIKO

Academy for Personal Leadership & Excellence, 10X363: Wediko created programming according to a needs assessment with key school staff and met regularly throughout the year to assess progress. Wediko provided the following year-long services weekly during the past four school years: Side-by-Side™ workshops, counseling on attendance and SEL issues, coaching of PBIS Leadership Team (comprised of key school and CBO staff), and attended all team meetings (e.g. Attendance, SLT meeting, PPT, ASD Nest).

School data shows that the number of critical incidents (bullying, physical aggression, etc.) from 2011-2012 to 2012-2013 decreased from 194 to 104 and continued decreasing for the following years. Teachers' evaluations showed a twofold increase in students' social and emotional skills. Also, a proposal written collaboratively by all SLT members (including Wediko) secured a grant for a school/community garden for this school year.

New Directions Secondary School (NDSS): In 2013-2014, Wediko supported the opening of this new model of middle school to serve over-age and under-credited students. The school design takes much from the community schools model. Wediko was a part of all planning processes in the year prior, meeting monthly with the principal to co-create the vision for the school, select CBO support services, and build structures to support social and emotional learning, improved student attendance, and academic goals. Wediko's team provided daily outreach phone calls, counseling, frequent family meetings at school and home visits, advisory sessions, in-classroom support and case coordination with collaborating agencies.

The program manager led a comprehensive attendance team (including the principal and key staff) that met three times a week to case conference individual students, participated in School Leadership Team, and initiated and coached a PBIS Team. Further, Wediko partnered with another school in the building and collaborated with the LYFE program (for pregnant and parenting students) and Montefiore Health Clinic to create a comprehensive referral manual of community resources for students and families. Wediko provides 6 full-time staff and additional weekly support from seasoned clinicians to support this partnership and shares credit with the academic staff for student gains including an 11% improvement in attendance, a 33% improvement in the ELA state test pass rate, and a 48% improvement in the Math state test pass rate this past school year. Wediko staff members won a grant for \$5000 from Lowe's to create a counseling center.

Jonathan Levin High School for Media and Communications : This high school is phasing out due to poor performance, particularly serving a high proportion of students with special needs and English Language Learners, and will be closed in 2016. Wediko's help was focused on students with poor attendance who were identified as at-risk of dropping out, and to support students who do not have enough credits accumulated to graduate by 2016 in exploring more viable academic options. Of the 39 students Wediko worked with, 26 of them improved their attendance significantly, cutting their absences in half. These students also completed more classwork and homework. Wediko provided intensive supports to all 39 students, and helped 7 students move to schools they would be more likely to graduate from.

BRIENZA'S ACADEMIC ADVANTAGE

Brienza's Academic Advantage is an academic solutions company led by experienced educators who provide proven results-focused K-12 tutoring, test preparation, and professional development services both in schools and at our full-service learning centers in Brooklyn, Staten Island and Queens. Based in Brooklyn, NY, Brienza has been providing high quality educational services, such as tutoring and test preparation courses, in the New York area for eighteen years, delivering personalized learning programs that improve academic achievement, enhance self-esteem, raise test scores, and promote excellence in learning and teaching. In the years 2004 through 2012, Brienza worked with 164 schools,

servicing more than 25,700 students, 17% of whom were classified as Special Education students and 22% of whom were English Language Learners. Each year student enrollment has increased due to Brienza's growing reputation for its management of programs, excellent curricula, and dedicated staff and teachers. Twenty one of the schools Brienza has worked with in New York have subsequently been removed from the Schools In Need of Improvement (SINI) list.

In 2002, Brienza applied to the New York State Education Department to provide Supplemental Educational Services (SES) under the No Child Left Behind Legislation. Brienza was granted authorization to become an SES provider and subsequently was awarded a contract to provide SES programs to eligible schools in New York City. To date, Brienza has successfully provided SES programs to over 25,000 students.

High Quality, Research-based, Targeted Instruction in Mathematics:

Brienza's philosophy has been to allow students to reach their full potential by providing high quality research-based academic assistance. The program has been designed to provide specific, focused, and accurate assessments of students' strengths and weaknesses, and then to provide targeted instructions based on those results. Using student learning plans developed for each student, teachers utilize a variety of multi-sensory approaches-auditory, kinesthetic, visual, and tactile-to assure that instructional methods and lesson plans are compatible to the student's style of learning. This approach has proven highly successful in Brienza's SES program and should provide equally rewarding results at the end of the implementation of the ELT Tutoring program.

Research-based instructional methods include data driven instruction, diagnostic assessments at intake, followed by ongoing and post program assessments, differentiated instruction, pre-service professional development, understanding learning styles, higher order thinking skills, effective questioning techniques, and small group discussions. As a result of using these methods, student achievement will be maximized.

Summary of Demonstrated Record of Effectiveness Data.

The research method utilized is a comparison of the students' pre- test scores and the post-test results. At the beginning of the program, each student is administered the Edmentum Assessment pre-test embedded in the Plato Learning Curriculum, which is aligned with the New York State Standards. The scores are recorded in our data management system and analyzed. Once the students have completed a minimum of 75% of their instructional hours a post-test is administered.

Brienza's Academic Advantage was established as a full service learning center in 1998. The learning center provides one-on-one private tutoring for K-12 students. Brienza also offers test preparation for SATs, the Specialized High School entrance exam, the Catholic school entrance exams, and the NY State tests. Since its inception, Brienza has serviced thousands of students successfully. Over the years, Brienza has steadily increased its offerings and expanded its capacity by serving schools with during and after school, and weekend programs. Because of the organization's stellar reputation and high rate of success, it was a natural transition to begin offering services under the Supplementary Education Services (SES) program when it was established.

While Brienza continues to provide services such as private and small group tutoring, test preparation, and study skills to K-12 students in its learning centers in Brooklyn, Staten Island and Queens, since 2002 the organization also has provided SES to schools on a consistently expanding scale. On average, during the period 2004-2012 Brienza students achieved an overall increase of 23.66% in Math scores. Brienza currently has eight (8) ELT programs serving 650 students in New York City.

In a 2010 survey of Brienza's New York City SES after-school tutoring programs given to participant teachers and students and students' parents, there was overwhelming acclaim for the program. The teachers reported the effectiveness of the program in the participating students' ability to comprehend and in improvement in their grades. More than 95% percent of parents surveyed felt that the tutoring program was important to their children, and over half reported a vast improvement in their children's grades and overall attitudes. Most of the students appreciated the program because they felt that they understood more, that their Math grades improved, and that they felt better about themselves. The students cited the lack of interruptions and noise as a positive factor, and they appreciated the individual attention they received from their tutors/teachers.

Connect with Kids

I. RESEARCH IN KANSAS CITY SCHOOLS

CWK Network and five school systems in the Kansas City area undertook a large-scale study to measure the impact of the *Connect with Kids* programs. The 800 participating students and 50 teachers included represented urban, rural and suburban settings from 12 schools, 5 school systems. The study was conducted throughout a full school year and included a control group. The pre and post measures were administered to both students and teachers to determine the extent to which students improved in their classroom behavior from the beginning of the school year to the end. Many students participating in the *Connect with Kids* program improved over the course of the year while students in comparison classes without the program actually declined in their behavior. The study confirms that through the proper implementation of the *Connect with Kids* program, student classroom behavior improves significantly in each of the following important youth areas:

Bullying and Violence Prevention:

- ☑ Less likely to solve problems by fighting.
- ☑ Less likely to pick on or bully other students.
- ☑ Less likely to attempt to retaliate against those who made them angry.
- ☑ Less likely to tolerate bullying from others.

Academic Motivation:

- ☑ More likely to do their best even when schoolwork is hard.
- ☑ More likely to continue to pursue goals despite setbacks and failures.
- ☑ Less likely to give up when faced with problems.

Classroom Management:

- ☑ More likely to report violations of school rules to teachers
- ☑ Less likely to blame others when they get in trouble
- ☑ More likely to obey the teacher and follow class rules
- ☑ More likely to help others even if they are not friends
- ☑ More likely to be patient with one another and share things with fellow students.

Based on this research, Connect with Kids was selected by the U.S. Department of Education's coveted What Works Clearinghouse as an evidence-based program and the Company was named as an "Effective Producer" of programs.

II. RESEARCH IN WASHINGTON D.C. SCHOOLS

Harvard research scientists from The Center on Media and Child Health (CMCH) conducted a nine-month study on the impact of *Connect with Kids* programs that involved parents, teachers, and students in Fairfax County Public Schools and District of Columbia Charter Schools. The study revealed the following compelling results:

Parent Involvement

- The *Connect with Kids* model, which includes classroom and community outreach strategies, significantly improves youth behavior and communication between parents and their children.
- *Connect with Kids* programs serve as powerful teaching tools and help to facilitate conversations between parents and children around important topics.
- Parents see the *Connect with Kids* programs as providing a valuable viewing experience and covering topics that are often difficult to discuss with their children.
- Many parents reported that viewing the video with their child opened lines of communication that would not have otherwise been available.
- Parents believed that the videos allowed for in-depth discussions and processing that would not have been possible in an unaided dialogue.
- **Example:**
 - 99% of respondents in the DC Metro area study reported that they enjoyed watching *Silent Witness*. a Connect with Kids program on bullying prevention.
 - 91% of parents reported in the DC Metro Area study that they had a useful discussion with their child after watching *Silent Witness*.
 - 82% of respondents in the DC Metro area study reported that watching the program with my child increased my ability to discuss this issue with him/her."
 - 91% of parent respondents in the DC Metro area study reported that the program "*encouraged* me and my child to discuss the topics addressed in the show."

Classroom Management, Bullying Prevention and Communication

- ☑ Increased respectful and responsible behaviors.
- ☑ Decreases in selection of physical and verbal aggression as a behavior choice while students in the control group actually exhibited an increase in this behavior.
- ☑ Increased communication among students and adults.

III. RESEARCH IN NEW YORK CITY SCHOOLS

A three-year study at 18 New York City archdiocesan high schools showed that in schools using CWK programs, students were less likely to use drugs and alcohol and more likely to rely on effective strategies for refusing illegal substances. Results from analysis indicated the following:

Drug and Alcohol Prevention

- ☑ A positive impact on a change in attitude regarding use of harmful substances. Increased confidence in having clear strategies for removing oneself from situations if offered substances, as well as clear reasons for refusing substances if they are offered.
- ☑ Significant increase in awareness of the dangers of using harmful substances.
- ☑ Increased awareness that infrequent use of a substance, even if only once, can have negative consequences.
- ☑ Significant decrease in the likelihood of using tobacco, marijuana, alcohol, and prescription drugs.

CUNY – At Home in College

Evidence of Academic Success - Results

The following outlines the impact At Home in College has had over the past seven years.

Situation

52.7% of graduates from the New York City Class of 2014 were not considered academically college-ready. This represents 27,953 students who, if enrolled in CUNY schools, would be required to take remedial courses. The percentage has been fairly consistent for the past few years.

Solution

CUNY's At Home in College program serves twelfth graders who are on track to graduate but have not met college-ready benchmarks. CUNY provides a twelfth grade ELA and math Transition Course curriculum aligned with the Common Core Learning Standards and Practices, and that help prepare students for the CUNY placement tests in reading, writing, and mathematics. We provide year-long professional development for the instructors, as well as for guidance counselors, who implement a bi-monthly College Access & Success Workshop for program participants. CUNY also provides each student participant with a scholarship to cover the costs of the CUNY application fee. Students come to a CUNY campus twice in the year to sit for the placement tests as a school-cohort, and we provide college tours, support for FAFSA completion, and two interactive workshops with arts educators that help build students' self-advocacy skills for college.

Results

The impact on students' preparation for college and matriculation has been significant:

- Postsecondary Enrollment Rates: More than 70 percent of the high school participants who graduated eventually enrolled in a postsecondary institution. These rates were consistent across race/ethnicity categories and are higher than the city-wide average. Based on an analysis comparing similar students across the city, 42.4 percent of the At Home in College graduates from 2013-14 enrolled in a CUNY college versus 37.6 percent of a matched comparison group.
- Performance on CUNY Placement Exam: Students who enter college needing less developmental coursework are more likely to persist in college. Participating high school students saw noticeable gains on the CUNY Placement Exam, which will result in less developmental course-taking when students enroll in CUNY. Outcomes for the 2013-14 cohort demonstrate this, with At Home in College students placing

out of the lowest level of math remediation at 8.0 percentage points higher when compared to similar students, and 4.4 percentage points higher for students placing out of the highest level of math when compared to similar students. Outcomes in Reading and Writing were even stronger, with At Home in College students placing out of Writing and Reading remediation at 14.8 points and 14.7 points higher of participants placing out of Writing and Reading remediation, respectively, than students in a matched comparison group.

CaseNex – DataCation

DataCation-CaseNEX, launched an on-site professional development component to the services offered by the company beginning in the summer of 2011. A framework was designed and a plan implemented to support DataCation-CaseNEX's tools such as Skedula, and the Teacher Performance Record (TPR).

Pre-work: Review data and information on the school; meet with clients; determine long-term goal and interim objectives.

Outcomes:

By June, 2012, participating teachers will be able to apply research-based teaching strategies in their practice by choosing and using appropriate strategies in the delivery of instruction as measured by reaching a proficient level in **the Danielson Framework** rubrics 1e, 2b, 2d, 3b, 3c, 3d.

There will be a measureable increase in student achievement as measured by Regents' exams, teacher made and interim assessments and in course grades.

Plan: Use the NYC or Learning Forward standards and the template and questions from the NYC Standards for Professional Development, to design a plan that addresses content, context and process, that is outcome-driven based on data, and that is client-focused. The consultants devised a front-loaded calendar of sequential activities over 26 days to address leadership needs and teacher needs to build the capacity to choose and use research-based strategies proven to increase student achievement.

Execution: A number of barriers such as date changes, cancellations and last minute changes in priorities or requested activities required a degree of flexibility and adjustment to help the client stay focused and to work to achieve outcomes.

Findings

In the mid-year analysis, through observation, feedback and assessment, the consultants determined that **by November 15th, 17 of 35 regular participants could formulate objectives; 19 could design activities with the critical attributes of “active participation,” and 7 regularly employed “wait time.”** Also by November 15th, the composite feedback from the learning walk showed 10 examples of questions at the analysis level or higher; 18 examples of the use of active participation, and 7 examples of knowledge of results **as compared with the baseline walkthrough of 9/21-22** when 5 teachers had questions at higher levels of Bloom; 10 teachers had partial examples of “active participation;” none had examples of “knowledge of results,” and 3 used “wait time.”

By April and May, the consultants observed more consistent use of the Essential Elements of Instruction. In fact, they felt comfortable offering letters of reference to 15 of the 35 regular participants based on performance and professional growth should they choose to use them in their applications for positions when the school closed.

Effects on student achievement were difficult to measure. Not only were there multiple supports available to teachers, the consultants did not have access to Regents and scholarship data upon the completion of their assignment.

Anecdotal evidence supplied by participants included comments like:

“I always use low-inference observations in my reports. ...It is easier to give feedback without becoming personal.” (AP)

“I learned to focus on the objective and let students know what they have to learn.”

“Students are more engaged in my class now.”

“I use the book you gave me [Guide to Essential Elements of Instruction] to plan my lessons. It’s my Bible.”

‘What was the name of the person you quoted [Marzano]? I want to check on the statistics about student gains when you cue them to the objective.’

An exemplar of a teacher/learner was Mr. A. who gave a demo lesson to his colleagues. Mr. A. is a mentor and lead teacher as well as a math teacher. The consultants wrote this email to provide specific and immediate feedback regarding his accomplishments:

From: Win

To: _____

Cc: _____ploboen _____; bettymcculloughmcgrath

Sent: Wed, Mar 14, 2012 6:39 pm

Subject: feedback and thanks for your mini-lesson

Dear Mr. A,

Thank you so very much for teaching a lesson in front of your colleagues to practice the use of feeling/tone and knowledge of results. You maintained patience and good humor even when your “students” were a bit unruly. In fact, you demonstrated how to engage students and motivate them even when students are impulsively calling out or reluctant to respond. Your demeanor, a low voice and broad smile, and encouragement “you’re on the right track,” were textbook examples of how to establish a positive feeling/tone. This affects motivation and encourages students to focus on the work. Betty and I wanted to share some more of the specific feedback on teacher actions we noticed:

1. When you walked around the group and stood near Mr. G., you used level of concern, proximity. This has the effect of raising the student’s stress level to a productive one, “eustress,” and is likely to increase motivation, to help students’ focus their neural energy on the lesson objective.
2. When you said, “Today we are going to talk about health and most importantly health literacy,” you cued students to the target objective.
3. When you asked, “when you go shopping what is it you look for first?” Students responded, “soda,” “I don’t buy food,” etc. By asking students to access prior knowledge, you were using “anticipatory set.” The effect of this is to help students get ready to learn and to provide a hook for new learning, which will promote retention.
4. When Mr. O. in answer to the previous questions said, “I look for low sugar.” You followed up with, “Where do you find out whether something is low in sugar?” In response to his reply, “I read the label on the side of the box,” you said, “That is exactly what health literacy is—

reading the labels and making choices.” This is an example of knowledge of results because you gave an immediate response and told him specifically what was right with his answer. Knowledge of results is important because once again it increases motivation.

5. When you said, “Turn your paper over we have a little assessment to start,” you were diagnosing students’ knowledge of health literacy in order to guide your decisions about what you needed to teach. Additionally when students complained “a test already” you stood near each, turned the paper over for one, and encouraged, “OK, get started. This one is just what you think.” You maintained an even feeling/tone and used level of concern proximity and materials to motivate students to focus on the lesson.

6. When you said, “we have another three minutes,” you correctly employed level of concern: time to raise stress and focus students on the task at hand. Similarly when you said “45 more seconds” you used level of concern: time.

7. You asked students to answer the questions aloud using the ice cream nutrition label. When you said, “How many calories would you eat if you ate the whole container of ice cream?” Ms. N1 said, “250.” You asked whether anyone else had a different answer. Ms. N2 said, “no. it is 1,000.” You asked, “why?” She responded, “It says 250 calories per serving or per cup. And I multiplied 4 cups by 250 to get 1,000.” You wrote on the white board, “4 c. x 250 = 1,000.” And said, “You are exactly correct.” This is an example of knowledge of results again because it was immediate feedback and your writing the example on the board confirmed the specific steps Ms. N2 had used.

You had other examples such as “If you are allergic to vinyl, ____, peanuts and honeybees, are you able to eat this ice cream?” Someone said yes, and then another answered no “because one of the ingredients is peanut oil and if you ate this you would swell up and die.” You again offered, “correct.”

For closure, an opportunity for students to summarize the learning in their own words, which increases retention, you asked, “Which of the questions was easiest for you? Why?” and “Which of the questions was most difficult to answer? Why?” These were not only examples of closure, but required students to evaluate and offer support for their opinions—an extremely high level question. In fact all the questions about the nutrition label, the assessment, were at levels of analysis or higher.

Once again, you were a trouper and a terrific model of how to incorporate many of the strategies we learned into a mini-lesson.

Thank you!
Betty and Win

**MEMORANDUM OF UNDERSTANDING
BETWEEN Center for Supportive Schools (CSS)
AND
NEW YORK CITY DEPARTMENT OF EDUCATION**

1. **Parties.** This Memorandum of Understanding (hereinafter referred to as “MOU”) is made and entered into by and between Center for Supportive Schools (CSS) (“CSS”) and New York City Department of Education (“NYCDOE”) effective as of signature date, below.
2. **Purpose.** The purpose of this MOU is to establish projected responsibilities under which CSS provides services to FOREIGN LANG ACAD OF GLOBAL STUDIES a Priority School as identified by NYSED, in order to jointly redesign and turnaround the school into a high performing, high quality organization.

3. Projected Responsibilities for CSS

CSS partners with schools to improve academic achievement, social and emotional learning, attendance, graduation, and health outcomes. A school with CSS’s partnership, guidance, and support forms a collaborative of students, families, faculty, administrators, and local CBOs that together create and sustain a personalized learning community that meets the multifaceted needs of all its students. CSS will work collaboratively with the School Leadership Team (SLT) and Community School Team (CST) to develop a community school vision that addresses the specific needs of students and families. This collaboration would involve a comprehensive needs and asset assessment process and defined meeting structures that encourage the participation of all voices in developing a common vision.

CSS envisions a community school where:

- Each child is strongly connected with at least one peer and a school-based adult;
- Each family is strongly connected with at least one school-based adult, and participates in the school community and takes leadership in partnering with the school to provide their student(s) with an outstanding education; and
- All students and families benefit from comprehensive expanded learning and enrichment activities and appropriate mental health services.

In the event that FOREIGN LANG ACAD OF GLOBAL STUDIES is awarded a 1003(g) SCHOOL IMPROVEMENT GRANT (SIG) (RFP# TA-16), CSS agrees to negotiate in good faith and proceed in a timely manner to conclude a mutually acceptable service agreement, based on the Proposal Narrative submitted by the DOE as part of the grant application process, which agreement shall include provisions concerning confidentiality of personally identifiable pupil records, including Chancellor’s Regulation A-820 and the Family Educational Rights and Privacy Act (20 U.S.C. 1232g), and Center for Supportive Schools compliance with DOE’s security clearance procedures for all Staff that will have direct contact with DOE students or personally identifiable student records.

CSS will tailor existing products and services for implementation in FOREIGN LANG ACAD OF GLOBAL STUDIES. These products and services include:

Center for Supportive Schools (CSS) will be the school’s lead CBO partner. In partnership with the school, CSS will hire a Community School Director. The Director will be responsible for the day-to-day management of the community school strategy, facilitating and providing leadership for the collaborative process of developing a continuum of services for children, families, and community members. The Director will drive development of community school action plans and planning for sustainability. S/he will track the school’s progress against

performance goals, collect school data, and support program evaluation activities and manage partnerships. The Director will ensure that the community school strategy is implemented at exceptional levels of quality with full support, buy-in, and regular communication with stakeholders across the school community. Specific position responsibilities will include:

- Build and maintain relationships with administration, faculty, staff, students, parents, and community partners.
- Organize and expand upon the membership of the Community School Team (CST) to include diverse school community stakeholders and CBOs.
- Conduct a needs assessment process, including: reviewing school and student-level data; conducting focus groups with parents, students, faculty, staff, administrators, and community partners; and reviewing and/or conducting school climate and culture survey.
- Conduct a community asset assessment to identify viable partnerships that can meet the needs of students and families of the school community, including developing metrics for partnership evaluation.
- Recruit and develop partnership agreements with people and community organizations willing to offer programs and services for students and families at the school in accordance with identified needs.
- Identify evidence and research-based practices and/or partnerships that address priority areas for the community school strategy, which may include but are not limited to: Parent/Family Engagement; Community Engagement; Youth Development; Academic Rigor and Instructional Practices; Health and Mental Health; Tutoring; After school programming; Mentoring; and Early Childhood.
- Develop, maintain, and publicize a schedule of programs and activities offered at the school.
- Implement and maintain a process that encourages referrals to programs and services offered at the school.
- Identify needs of chronically absent students, apply interventions, and track and monitor impact of interventions on weekly basis, as part of weekly Student Success Summit.
- Collect and monitor program implementation data and student data for each partnership that allow easy data analysis and interaction by the SLT and other school stakeholders.

4. Projected Responsibilities for NYCDOE

- Provide adequate space for on-site meetings, workshops, coaching and professional development sessions.
- Process timely payments for all services rendered, in accordance to the mutually acceptable service agreement and to NYCDOE's standard operating procedures.
- Comply with all information and program evaluation requests of NYSED
- Comply with all financial management and reporting requirements of NYSED

5. Joint projected Responsibilities for Center for Supportive Schools (CSS) and NYCDOE

Reach annual targets for all metrics described in the Application Narrative Attachment B: *School-level Baseline Data and Target-Setting Chart*

6. Terms of Termination

This MOU shall remain in effect as of the signature date until:

- Official announcement or notice of the cancellation of the Notice Inviting Applications;

- Receipt of written notice from the NYSED that it will not award a SIG grant to FOREIGN LANG ACAD OF GLOBAL STUDIES.
- Receipt of written notice from NYSED that NYCDOE has received a SIG grant award, **and** a final service agreement is negotiated between CSS and NYCDOE.

Either Center for Supportive Schools or NYCDOE may terminate this MOU by giving thirty (30) days written notice to the other party.

7. **Payment.** No payment shall be made to either party by the other party as a result of this MOU.
8. **Assignment.** Neither party may assign this MOU or any of its rights or obligations hereunder without the prior written consent of the other party.
9. **Signatures.** In witness whereof, the parties to this MOU through their duly authorized representatives have executed this MOU on the days and dates set out below, and certify that they have read, understood, and agreed to the terms and conditions of this MOU as set forth herein.

The effective date of this MOU is the date of the signature last affixed to this page.

G. Organizational Plan – 4 Points

One of the advantages of FLAGS being a small learning community is the ability of staff members at all levels to have frequent and daily interactions. In addition, structures for effective communication that moves the work aligned with goals are established. Where applicable minutes are kept to track decisions and next steps

- Principal, AP and Dean meet daily as cabinet to share operational matters.
- Guidance Counselors and principal meet weekly to discuss cohort data analysis and over-age under-credited students.
- Attendance team meets weekly on Fridays to focus on chronic absences, LTAs intervention, success mentoring, parent outreach
- Grade teams meet 1-2 times weekly to focus on data and conduct inquiry related to cohort subgroups. Referrals for interventions stem from these meetings.
- Department teams meet 1-2 times weekly to focus on curriculum alignment with CCLS and analyze Regents and interim assessment data. Plan for adjusting curriculum for access by underperforming cohort subgroups.
- School Intervention Team meets weekly for IEP progress monitoring for SWDS.
- Professional Electronic Communications sent twice per week (the “PEN”) to all faculty and staff informing them of PD foci and pertinent issues
- Beginning 2015-16, Student Success Summit (SSS) will meet as needed to focus on needs surfaced from grade team to link students to Community School Services (e.g. mental health clinic)
- Consultative Council consists of UFT rep and other members and meets twice monthly to discuss curriculum and other matters of concern to improve culture
- Peer Group Connection Stakeholders meet quarterly to monitor and adjust program
- Beginning 2015-16, Community School Leadership team will meet twice monthly to monitor and adjust implementation of our Community School Model

In May 2010, New York State passed education law 3012-c, mandating significant changes to how educators throughout New York State are evaluated and supported. The law is intended to foster teacher development and create more rigorous, fair and accurate assessments of teacher effectiveness than the previous Satisfactory/Unsatisfactory evaluation system, through the use of multiple measures. Key Features of 3012-c: All classroom teachers are evaluated annually on a 4-point rating scale (Highly Effective, Effective, Developing, Ineffective) NYC adopted the Danielson framework to provide feedback to teachers. 60% of a teacher’s evaluation is based on measures of teacher practice. Under 3012-c, at least half of this 60% must be based on classroom observations using a research-based rubric of teacher practice; additional measures of teacher practice may include student surveys, parent surveys, and teacher portfolios.

40% of a teacher’s evaluation is based on measures of student learning.

Teachers receive timely and constructive feedback, including individualized improvement plans for teachers who receive a Developing or Ineffective rating. NYC has also created the ADVANCE system. The Advance teacher development and evaluation system draws upon multiple measures (e.g. teacher practice as observed in the classroom and student learning as demonstrated on certain tests). It provides teachers with specific feedback across four ratings categories, rather than simply providing teachers with a "Satisfactory" or "Unsatisfactory" rating, as they received in the past.

Advance helps teachers set goals for themselves and measure their progress over the course of the year. It also ensures that teachers receive meaningful feedback and support from principals, who are partners in their professional growth.

Since FLAGS has small instructional staff with 14 teachers, the principal will take sole responsibility for conducting and reporting the results of pre-observation conference, classroom observations and post-observation conferences. Of the 14 teachers, 13 chose Advance's Option 1 (At least 1 formal observation and at least 3 informal observations) and 1 chose Option 4 (only for 'effective' in the prior year, at least 4 informal observations). The principal will collaboratively set goals with all instructional staff based on ADVANCE ratings from previous year. The principal will engage in a round of informal non-evaluative observations with all teachers before beginning official ADVANCE ratings. Principal will engage in cycle of pre-observation conference, classroom observation and post-observation conferences with 2-3 teachers per week.

<u>Administration Instruction and Support Team</u>	
Title	School Wide Area of Responsibility
Principal	Reports to Superintendent Vision and Instructional Leadership: School improvement and RSCEP goal setting and monitoring; Instructional, organizational and operational alignment; Curriculum, instruction and assessment direction, Supervision of teacher effectiveness and development, Special Education services oversight, Grade, Department and Attendance Teams, Community School Leadership Team, School Intervention Team, Consultation Committee
Assistant Principal	Reports to Principal Oversight of operations including budget, procurement, personnel payroll, facilities, discipline, incident reporting and SAVE room. Supervision support: teacher team facilitation, teacher effectiveness and development, Enrollment and English Language Learner compliance, World Language program teacher, Substitute coverages, ATR placement
Math Coach, Data Specialist	Reports to Principal Math coach, data dissemination, programming support, Grade and Department Teams, Community School Leadership Team (Proposed SIG funded)
ESL Coordinator	Reports to Principal Staff development/build teacher capacity to assist ELL's in their language acquisition and literacy development. Assessment and programming for ELL's, Grade and Department Teams (Proposed SIG funded)
Subject Area Teachers	Reports to Principal/Assistant Principal Grade Team, Department Team, School Intervention Team Inquiry Team, Consultation Committee
Parent Coordinator	Reports to Principal Parent and community outreach, new student recruitment, PA and SLT liaison, SAVE room-family liaison, Attendance Team, Community School Leadership Team
Programming/ Assessment Coordination	Reports to Principal Programming and assessment support and coordination for MOSL and Regents (part time, F status)
Dean	Reports to Assistant Principal

	Student behavioral crisis intervention, monitoring student entry during scanning and departure, hallway and cafeteria supervision, disciplinary incident investigation, and Online Occurrence Reporting date input, parent contact, Attendance Team, School Intervention Team, Community School Leadership Team
Secretary	Reports to Principal/Assistant Principal Administrative assistance, support for organizational functions, supply requisition, payroll data input and purchasing execution
School aide	Reports to Assistant Principal General office management, reception, Pupil Accounting, distribution of student working papers, 21 st Century Grant data and attendance tracking
<u>Guidance and Student Support Services</u>	
Guidance Counselor	Reports to Principal Oversight of PGC and advisory, mandated counseling for SWDS, crisis intervention, Attendance Team, School Intervention Team
Bilingual Guidance Counselor	Reports to Principal New Student intake, College access and advisory, Crisis intervention, Attendance Team, School Intervention Team (Proposed SIG funded), Community School Leadership Team
Speech Therapist	Reports to Principal School Based Support Team (SBST) School Intervention Team
SBST Worker	Reports to Principal School Based Support Team (SBST) School Intervention Team
Psychologist	Reports to Principal School Based Support Team (SBST) School Intervention Team

Time Period	Event
September 2015 to Mid-October 2015	Initial planning Conferences & Goal Setting around Danielson component
September 2015	Informal non evaluative observations with actionable feedback
September 2015	Professional development begins along with onsite SRI content coaching
Mid October 2015	Begin ADVANCE observations
October -November 2015	Cycle 1 observations for all teachers
December 2015-January 2016	Cycle 2 observations for all teachers
February -March 2016	Cycle 3 observations for all teachers
April-May 2016	Cycle 4 observations for all teachers
June 2016	End of Year Conferences

Curriculum:

Our vision is to ensure all students access to rigorous, compelling curricula that is aligned with the Common Core Learning Standards and NYS subject-area standards and fosters active learning resulting in high levels of engagement, thinking and learning. Along with rigorous curricula, effective instruction must be ensured in each classroom to deliver the curricula with fidelity and to meet diverse student needs. To accomplish this we will adopt ELA and Math curricula from Engage New York, WiTsi writing exercises embedded within Engage NY units (developed by the Renewal Team), New Visions Social Studies and NYC Core Science Curricula. These curricula are aligned and inclusive to the Common Core Learning Standards.

Partnership with Strategic Inquiry (Paid through the Renewal School Initiative) and the SIG funded Math/Data Coach and ELL Coordinator will offer teachers training and professional development and guidance as they align instruction in the four core content areas – math, literacy, social studies and science to the CCSS for literacy and math. The SIG plan supports the alignment to appropriate CCSS standards, assessment and instructional delivery it will also ensure effective supports for ELLs and students with disabilities.

The professional development and support that teachers receive in curriculum development will lead to increase student achievement through the strategic examination of student work, alignment of resources and scaffolds necessary for all students work towards grade level mastery in the CCSS. Additionally it is expected that all our curriculum will include effective supports for students with disabilities and ELLs by the end of the 2015-2016 school year. The administration, coaches and trainers from partner organizations will be held responsible for these shifts in teacher curriculum design. Periodic meetings with these stakeholders will be conducted to assess the impact of the professional development and resource allocation to teachers on delivery of instruction, student learning and student achievement

Instruction:

As required by the six instructional shifts as outlined below, SIG will provide professional development and coaching for teachers to assist students in deepening their understanding in math and literacy. Our full time Math/Data coach, ESL Coordinator and Strategic Inquiry coaches will provide teachers with professional development as they align their instruction to CCSS literacy and math standards and related assessments. These coaches will focus teacher's attention on each of the six shifts in math and literacy. Literacy instruction across content areas will focus on student-centered, text and evidence-based reading and writing. Teachers will continue to build and revise units around grade-level tasks and reading passages while also creating time and space for students to practice and engrain fundamentals. In mathematics teachers will align their planning and instruction to the CCSS and ensure that units of study deepen students understanding of core concepts and material. Balanced with these instructional practices will be routines, expectations, and procedures for memorizing and mastering fundamental of mathematics. In all subject areas, coaches and teachers will develop units of study and culminating tasks that require higher order thinking skills and the application of deep content understanding for success. These tasks will be designed to challenge students to make choices about which skills are appropriate to apply within certain situations and with given prompts.

ELA:

Shift 1: Balanced Literacy/Information Texts - curricular units and modules from EngageNY are arranged with a variety of nonfiction and fiction texts that require students to synthesize various text types to respond to various CCLS performance based assessments.

Shift 2: Knowledge in the Disciplines – authentic primary source documents are utilized in social studies curriculum, informational text and data sources anchor science curriculum. Finally, Engage NY ELA modules encompass texts that support discussion of themes and ideas in history curriculum.

Shift 3: Staircase of Complexity – texts build in complexity within units and modules at which time students use close reading strategies and annotation strategies to access difficult text. EngageNY utilizes masterful reading and multiple readings for gist and meaning to support

Shift 4: Text-Based Answers – text-based responses are evidenced in both written performance tasks and oral conversation, as Engage NY units rely on text dependent question sequence as drivers for the lessons, units and modules progression.

Shift 5: Writing from Sources – performance tasks require students to draw on and synthesize information and analysis from anchor texts rather than creating personal responses.

Shift 6: Academic Vocabulary – students learn a variety of vocabulary as identified by EngageNY units at the lessons level. Students utilized vocabulary words in written tasks in order to gain ownership and build the

Math:

Shift 1: Focus – the EngageNY Math curriculum is organized so that teachers focus on the major content that is recommended by the CCLS. Teachers focus deeply on these prioritized standards so that students have deep conceptual understanding of fewer standards.

Shift 2: Coherence- the 9-12 EngageNY curriculum is titled “The Story of Functions” which is meant to capture the coherence between grade levels. As students study functions throughout high school, the standards are connected to each other within the grade and between grades, gradually increase in complexity.

Shift 3: Fluency – the EngageNY math curriculum identifies and provides explicit opportunities for students to develop speed and accuracy in the recommended fluencies for each grade level.

Shift 4: Deep Understanding – EngageNY provides tasks and learning experiences that support students in developing deep conceptual understanding of the mathematics learned. Problems and tasks require students to write and speak about their understanding.

Shift 5: Application – The End of Module assessments embedded the EngageNY curriculum require students to apply the math learned to new situations.

Shift 6: Dual Intensity – Within each EngageNY Module (unit), the lessons are organized to allow for a balance between fluency, deep understanding and application. Students are practicing the math skills required as prerequisites for more challenge problems, while also developing conceptual understanding of the content.

The DOE is using the umbrella term “Expanded Learning time” (ELT) to refer to both the Renewal Hour and other after school programming. There are two basic models which schools can choose from, integration into the regular day or offering ELT before or after the regular school day. Some of the key features to this approach are as follows: Renewal Schools provide at least one hour of expanded learning time to every student, programming is data-driven by student needs, when ELT is offered before or after the regular school day an additional hour will be offered supplemental

academic opportunities Monday through Thursday while the Friday Renewal Hour will focus on enrichment activities, for high schools the additional hour can be credit bearing unless being used for regents review, and staff from the CBOs can also provide support during this time as well as afterwards

Our Expanded Learning Time (ELT) hour will become a “College and Career Readiness” block. As shown below, one day a week will focus on explicit learning-to-learn skills that will be specific to each grade-level and taught using identified resources supplied by one of our CBOs (Connect for Kids). Three days a week students will participate in Regents prep or credit-bearing electives that reinforce basic math or literacy skills. The fifth day will be dedicated to our advisory “PAUSE” where student social and emotional learning is nurtured. Ninth grade PAUSE will utilize the Center for Supportive Schools’ Peer Group Connection outreach lessons that assist freshmen students in transitioning to high school and allow juniors and seniors to function as leaders.

College and Career Readiness Block

CCR (Learn-to-Learn) Skills and Future Planning	Elective or Regents Prep	Elective or Regents Prep	Elective or Regents Prep	PAUSE (Advisory)
<i>Note-taking</i> <i>Annotation</i> <i>Study skills</i> <i>Group roles, protocols</i> <i>College knowledge</i> <i>Portfolio projects</i>	Elective example: <i>Technology Explorations in Math</i> <i>Current issues in Non-fiction text</i>			<i>PGC for Freshman</i>

- Department Teams and DDI:** At FLAGS, assessments are aligned to curricula, which are guided by CCLS and content specific standards. Individual teachers and teacher teams use data from Measure of Student Learning (MOSL) baseline performance assessments, unit pre-assessments and student work samples, to diagnose student needs and design scaffolds (e.g. models, questions, writing structures, group work, native language translations, non-linguistic representations and other varied presentations of the content) to promote student success. Units begin with the use of the actual post-test or similar task as the “pre-test” (or “baseline”). Educators use this information to make decisions about lesson planning. The information gathered from the pre-test is pivotal because it determines the adjustment educators need to make to deliver relevant instruction as per students’ academic needs during a unit of instruction. We then compare the growth between the pre and post to determine curricular adjustments, unit planning and student interventions.
- Leveraging MOSL Assessments** Our school will continue to leverage the administration of NYC Performance Assessment Tasks (PA) that serve as MOSL assessments for teacher evaluation purposes by using these tasks as baselines, interim and end-of-year assessments for each course we offer, where available, to assess student growth towards the standards. Administering the various assessments and analyzing baseline trait-level data will assist us in further recognizing where our students struggle with these very

rigorous, multi-step performance tasks. In the past these tasks have been exceptionally challenging for our school's large population of students with disabilities (SWDs) and English language learners (ELLs) because they involve the reading and written analysis of complex texts, math and science problems and require significant stamina to complete. However, it is our belief that if students are to gain success in these types of performances that they need similar experiences throughout the year and that standards-aligned content and skills need to be further prioritized. After a baseline assessment in the fall, teachers will administer at least one MOSL interim assessment and will have the option to use the MOSL "instructionally". Using the MOSL instructionally means that teachers will scaffold instruction as they guide students through the subtasks that make up the Performance Assessment. For example, on the Social Studies MOSLs students must identify the claims and sources in seven document-based questions (DBQs), organize the DBQs in a "document integration" task where they determine if the documents contain evidence to support or refute an inquiry question and how, and then use the evidence to support one position in an argument essay. Some teachers will use the actual baseline given in the fall instructionally or the previous year's MOSL PAs; others will create their own assessments using the format of the baseline as a model but incorporating content relevant to current units. As stated above, in ELA, Algebra and Geometry teachers will use MOSL-like tasks embedded in Engage NY modules as the pre-assessment and culminating performance for most units. In science, labs will culminate in a MOSL-style assessment task. Leveraging the NYC Performance Assessments will help us to prioritize the MOSL rubric traits, and as a result, our curriculum and assessment practices will be further aligned with the demands of the CCLS. As department teams meet to design these tasks and review student performance data, teachers will identify and target gaps for all students including ELLs and SWDs. We will monitor gains in terms of rubric traits on interim MOSLs and continue to adjust curriculum and supports to increase success on end-of-year assessments and Regents exams.

- Teacher teams meet two-three times per week via common planning time. During this time teachers work together to have data specific focused discussions. Teachers meet every 5-7 week to discuss end of module assessments and trends in data.
- Individual teachers and teams "unpack" unit plans and analyze tasks to predict student strengths and struggles and then formulate pacing guides and tailor lesson plans to student needs. Professional development, coaching and feedback aligned to the Danielson Framework components is provided to assist teachers in implementing the curricula.
- Ongoing checks for understanding are a part of our school-wide expectations. All modules have been designed to formally check-in on students' learning. However, educators utilize participation cards, conference sessions, end of module self-evaluations, partner and class discussions, and our TAG protocol to assess students' understanding. TAG is a protocol used for peer feedback, which takes place as follows: Tell something you liked about the work; Ask a question to better understand the work, Give a suggestion that will make the work better.
- **Grade Level DDI:** Using the Writing is Thinking Strategic Inquiry (WiTsi) model teachers, in 9th and 10th grade, will engage in Data Driven Instruction Inquiry though the

analysis of student work to target writing deficits. Teachers in 9th and 10th grade inquiry teams will be interdisciplinary. During the month of September students will engage in common baseline assessment in all core subject areas. Teachers in grade level teams will then analyze student work, during common planning time, to determine the focus of their first cycle of inquiry around a specific writing skill set along with target students that they will track for the duration of the year. Teachers will then use formative WiTsi tasks to assess student progress weekly during common planning meeting and make instructional decision based on student work products. Cycles of inquiry will be based on student's mastery of targeted skills. Progress will also be monitored through the use of the performance based assessments in ELA as a midpoint indicator. An end of year assessment that mirrors the skills assessed in the baseline will be administered in order to measure student progress. Teachers in 9th and 10th grade will be provided ongoing professional development on utilizing WIT strategies in the classroom. Inquiry leaders will receive training around facilitation of strategic inquiry through the train the trainer model.

Central to our school's approach to providing academic, social-emotional and student support is the focus on developing student's social and emotional wellness. A variety of strategies and structures are used to support students, identify those at-risk and provide interventions. The Community School Model will assist us in improving our systems for responsive interventions. Currently, Grade Teams utilize Common Planning Time (CPT) meetings 1-2 times weekly to engage in "student talk" about students whom they share. They also conduct "inquiry" focused on locating strategies, interventions for struggling students (e.g. those with at-risk behavior, chronically absent or disengaged). Working with guidance counselors as facilitators, grade teams pour over data on credit accrual, class attendance and anecdotes to identify needs of specific students such as over age-under-credited students, and generate social, emotional and academic interventions. These include but are not limited to calls to parents, parent conferences, individual conduct plans, counseling or conferencing with the student. A required protocol is used to ensure teachers are tracking the status of the interventions and their benefits to students.

An attendance team comprised of the guidance counselor, attendance teacher, parent coordinator and bilingual para-professionals meets weekly to review data and devise attendance interventions.

The School Intervention Team (SIT) made up of the school psychologist, guidance counselor, special education teachers, classroom teachers and the Center for Supportive Schools' director meets weekly to review students' IEPs, services and devise functional behavioral assessments and behavioral intervention plans as needed.

The guidance team composed of the principal, guidance counselor, and support staff also meet once weekly to review student transcripts and monitor needed services, progress towards graduation and arrange alternative placement for students who have not succeeded at FLAGS, who are at risk for failure and significantly under-credited.

The Community School Model will help our school develop more robust services to deepen our support of student's social, emotional and mental health. SKEDULA will be also used to

communicate students' behavioral or emotional support needs via electronic anecdotes and referrals for services such as conflict resolution support, counseling, dean's office disciplinary response or related parent outreach. Receipt of the SIG grant and Community School-funded CBO partners will create an opportunity for us to improve coordination of services to students starting with a refined protocol for referral.

Our school's approach to school climate and discipline is proactive and responsive to student needs. In 2014-15, FLAGS began working with the Center for Supportive Schools at Princeton University to implement an evidenced-based advisory program called Peer Group Connection ("PGC"). This has involved developing an elective leadership course where juniors and seniors learn to serve as Peer Leaders and facilitate advisory lessons for ninth graders that focus on self-reflection and team building skills to assist transition to high school. Peer leader "outreach" occurs twice weekly during a period we call PAUSE (Preparing All of Us Socially and Emotionally). During PAUSE teachers work with the rest of the student body in grades 10 through 12 as advisors. As our lead CBO, the Center for Supportive Schools will continue to support our implementation of the PGC program as well as other evidenced-based programs to deepen student social-emotional development. "Connect with Kids" will assist our school through the SIG grant by providing our faculty professional development in the use of video-based social-emotional curriculum resources during PAUSE advisory to foster discussion and reflection on social issues and personal choice.

Habits of Work and Learning (HOWLs) provide a framework to discuss personal attributes that correlate with college and career readiness. Teachers plan a "HOWL target" and make this visible to students in addition to a content-based Learning Target for their lessons. Routines such as reinforcement of participation through "HOWLs points" are used to support students to engage in discussion and instructional tasks.

In addition to having students be reflective about their HOWLs and responsibility to self and the learning community, the ladder of consequences is used as the framework for our response to discipline. Lunch time detention is also used for minor infractions. Parents are often called to assist with helping students to take positive steps towards their personal growth. A SAVE room exists to provide students education about nonviolence and for crisis intervention. This enables us to have a coordinated response to disciplinary infractions.

Together, leadership, faculty and staff will work together to consistently communicate expectations that are connected to a path to college and career readiness and offer ongoing feedback and support to help families understand student progress toward those expectations. Some of the mechanisms and strategies to encourage family involvement and communication to support learning include:

- Frequent communication through phone calls, letters and conferences about student academic performance, attendance patterns and social or emotional issues.
- Teachers will use SKEDULA/Pupil Path to show to students and parents how grades are composed and make their gradebooks visible online. Training will be provided to support parents in accessing information via Pupil Path.
- Guidance counselors will identify students who are not passing classes and send letters after each semester to inform parents of students that are placed on academic probation.

This will improve our partnership with parents and is intended to motivate students to attend the academic support services (tutoring and Saturday academy) available to them.

- Calls will be made frequently by the school's attendance team, School Messenger program and classroom teachers to support students who are at risk because they are chronically absent in attending regularly.
- Monthly Parent Association meetings and other workshops will be conducted with CBOs,, WEDIKO and others to assist parents in understanding how students make progress towards graduation
- A website with parent-friendly English and Spanish resources will be developed by Connect with Kids and woven into parent-outreach sessions
- Parent classes will be held to support use of data platforms (PupliPath and NYC Schools)
- Open door policy to help parents feel welcomed to visit with school leadership
- Parent room will be maintained and available for parents to visit and use computers
- Parent Association will elect members and provide representatives to School Leadership Team
- A new Parent Coordinator will be hired, trained and communicate events through a monthly school newsletter to foster involvement
- A Community Schools Coordinator will be hired and funded by the Community School's grant and will help to ascertain needed additional services to support parents and families
- WEDIKO will support school with home visits for students at-risk for failure

Parent satisfaction will be gauged by improvement on the School Survey, positive perception of school during parent focus groups facilitated during the Quality Review and by the Community Schools Coordinator.

I. Training, Support, and Professional Development – 6 Points

During the spring of 2015 members of the FLAGS school community, including leaders, teachers and parents, were involved in the development of a Renewal School Comprehensive Education Plan (RSCEP) for the school. The RSCEP identifies the school's priority needs based on data gathered from the Quality Review, State Integrated Intervention Team Report, and American Institute for Research co-interpretation. Additionally, in late June, the School Leadership team (including UFT Chapter Chair and PA President) met again to review the data, assess areas where the renewal plan required additional support and developed this SIG plan. Based on our needs, key stakeholders developed a plan for training and professional development that are outlined in the attached Professional Development plan.

During the 2015-16 school year FLAGS leadership will be regularly evaluating the effects of the training, support and professional development provided by the organizations outlined above to determine if adjustments are necessary. The impact of training and professional development on improving teacher practice will be measured using ADVANCE teacher rating data. Specifically, cycles for review of observations data in October, December, February, April and June will inform evaluation of the supports provided. Student progress will be monitored through the review of students marking period grade data, credit accrual at the end of terms and graduation rate. Periodic assessments, in the form of CCLS tasks, the MOSL and January Regents data will also inform on a regular basis, whether the training, support and professional development is having the anticipated impact or needs to be modified. Social emotional progress will be measured by student attendance data and school occurrences and suspensions tracked in OORS. Through progress monitoring the effectiveness of supports provided will be continuously measured throughout the year and all stakeholders will collaboratively determine next steps in the implementation process.

Professional Development Structure – Year 1, September 1, 2015 – June 30, 2016	Agent/ Organization Responsible	Desired Measurable Outcome	Method by which outcomes will be analyzed and reported
<p>Teacher Team/ Intravisiatation- Department and Grade level teams:</p> <p>Through the use of structured common planning time, teachers will collaboratively share best practices, create common assessments and conduct intravisiatation. This will be crucial to implementation of SIG plan as it provides teachers with the time and structures to implement and integrate strategies learned from other professional development opportunities. These teams will each meet 1-2 times per week.</p>	Teacher led/ school based	<p>The school will receive a rating of Proficient on indicator 2.2, 4.2 of the Spring 2016 Quality Review.</p> <p>A minimum of 65% of teachers will be rated Effective on Danielson 3c.</p> <p>A minimum of 65% of teachers will be rated Effective in component 3b of the Danielson framework.</p> <p>The percentage of students on track for graduation as measured by credit accrual and Regent passage will increase 15% by the end of year one ('15-'16)</p>	<p>Review of ADVANCE Teacher ratings</p> <p>Observation of teacher team meetings</p> <p>Progress toward graduation tracker for 2015-16 school year.</p>
<p>Workshop-Engage NY Curriculum PD for Math and ELA Implementation: 7 PDs will be offered throughout the school year in order to support teachers in utilizing and adapting Engage NY curriculum for students. This is essential to the implementation of SIG grant as it will support the increase in rigor for students in order to meet goals outlined in ELA and Math.</p>	School Renewal Initiative	<p>By June 2016, the minimum number of teachers rated Effective on Danielson 1e and 3c is 75% or more</p> <p>By June 2016, the number of student obtaining a score of 75% or higher on the Regents exam or higher will increase by 25%. and in each subsequent year</p>	<p>Review of ADVANCE Teacher ratings</p> <p>Review of students transcripts</p> <p>Review of student portfolios for CCLS aligned task completion</p>

		<p>By June 2016 credit accrual in ELA and Math for each cohort will increase as compared to the number on tract in the previous cohort by 10%</p> <p>By June 2016 80% of students will complete at least 3 CCLS aligned task in Math and ELA.</p>	
<p>Workshop- Science Curriculum PD: 2 PDs will be offered during the course of the school year in order to support teacher in utilizing and adapting Science Curriculum from sources such as New Visions. This is essential to the SIG plan as it will support science teachers in the implementation of a CCLS aligned curriculum.</p>	<p>School Renewal Initiative</p>	<p>By June 2016, the minimum number of teachers rated Effective on Danielson 1e and 3c is 75% or more</p> <p>By June 2016, the number of student obtaining a score of 75% or higher on the Regents exam or higher will increase by 25%. and in each subsequent year</p> <p>By June 2016 credit accrual in Science for each cohort will increase as compared to the number on tract in the previous cohort by 10%</p> <p>By June 2016 80% of students will complete at least 2 CCLS aligned task in Science</p>	<p>Review of ADVANCE Teacher ratings</p> <p>Review of students transcripts</p> <p>Review of student portfolios for CCLS aligned task completion</p>

J. Communication and Stakeholder Involvement/Engagement – 4 points

FLAGS will utilize the monthly SLT and PTA meetings to regularly update parents, families, the community and other stakeholders on the implementation status of the SIG plan. During these meetings stakeholders in the school will present the impact that key strategies have had on the school community. The school leader will elicit feedback from the parents, families, the community and other stakeholders during these meetings. Additionally, the school leader will use the monthly Professional Electronic Notification system (PEN) to communicate with staff about the implementation of the Community School model share updates on our leading indicators: student attendance, school occurrences, credit accrual as well as interim assessment data as it becomes available as a data 'snapshot'. This data 'snapshot' will be shared with parents and the School Leadership Team to create a continuing dialogue on the progress the school is making towards stated goals and to address challenges if outcomes are not being met.

K. Project Plan Narrative/Timeline – 6 Points

The overarching goal for year-one implementation is to have buy-in from all stakeholders, provide extensive professional development to teachers and key staff members to support the implementation and sustainability of new initiatives, and to form a collaborative relationship with our Community Based Organization, Center for Supportive Schools, to streamline supports provided to students and parents.

- Baseline and interim assessments will be administered effectively and results analyzed by teacher teams in a timely basis to impact instruction
- Through professional development activities with Strategic Inquiry and in-house and SRI coaching, ELA and Math curricula and academic tasks will emphasize the CC instructional shifts, rigorous habits and higher order skills for all learners
- With the assistance of Strategic Inquiry's coaching and professional development, Teachers will utilize strategic inquiry and Writing is Thinking strategies in order to modify curriculum across the 9th and 10th grades, make data driven instructional decisions and meet the needs of struggling students.
- Leadership will utilize the Danielson framework to provide feedback to teachers on pedagogical practices as well as identify professional development topics to support areas for growth
- Through a revised schedule and extended work day, FLAGS teachers will actively participate in inquiry based teacher teams on a weekly basis in order to assess student work and craft CCLS aligned tasks in response to the data collected.
- Through a revised schedule and extended work day, teachers at FLAGS will collaborate in teacher teams and utilize the Danielson Framework along with the Common Core Instructional shifts in order to create coherence in classroom practice and to reflect a consistent culture of high expectations.
- The school leader will ensure that all staff members know and use research-based practices to support students social and emotional learning
- Teachers and staff at FLAGS will utilize structures and protocols for prevention and intervention by referring students to services that support social and emotional development, mental health and academic success.
- Students and adults treat each other respectfully and student voice is welcome and valued.
- FLAGS will implement an effective school community program by collaborating with Center for Support of Schools and providing programs and resources that support students, parents, and school staff.

The roll out of the plan will begin on September 1, 2015 when the Principal informs the school community that they are the recipient of a School Improvement Grant, provides a clear outline and vision to all stakeholders on short-term and long-term goals of the grant, expectations, partnerships, and supports that will be funded through the grant.

The early wins; that will indicate successful early implementation of the SIG plan will include:

- Fully active, collaborative and on-schedule work with partner organizations

- Professional development kick off in September to address teachers' curriculum implementation and use of Writing is Thinking Strategies and Strategic Inquiry.
- Restructuring of the school's daily schedule to incorporate: extensive collaborative planning for all teachers on a daily basis. Additionally class periods will be expanded from 45 to 60 minute periods to provide students will increased instructional time.
- Coaching and support for school leaders as they develop and monitor teacher improvement through the use of cabinet inquiry.
- The continuation and expansion of data driven inquiry teams for the systematic analysis of student work to inform teacher practice.
- Early rounds of interim assessments show accelerating student growth
- The implementation of the Expanded Learning Time model will improve student engagement levels and student achievement
- The appointment of a Community School Director who will be responsible for the management of the community school strategy, facilitating and providing leadership for the collaborative process of developing a continuum of services for children, families, and community members.

iii. Leading indicators of success to be examined at least quarterly.

- Using ADVANCE teacher rating data from the 2014-15 school year as a baseline, teachers will show growth in the instructional core by January 2016.
- Students in grades 9-12 will complete at least 1 CCLS aligned task per marking period
- Core class passing rates each quarterly marking period.
- Increase in students on track for 4 year graduation as measured by the "Progress to Graduation tracker" which is released at the end of each semester.
- Daily student attendance rate will increase.
- Weekly teacher attendance rate will increase.
- Reduction in number of chronically absent students with attendance in 70 to 89% range.
- Reduction in over-age under credited students.

Improved student performance on interim assessments

INSTRUCTIONS

- ❖ Submit the original budget and the required number of copies along with the completed application directly to the appropriate State Education Department office as indicated in the application instructions for the grant program for which you are applying. DO NOT submit this form to the Grants Finance.
- ❖ Enter whole dollar amounts only.
- ❖ Prior approval by means of an approved budget (FS-10) or budget amendment (FS-10-A) is required for:
 - Personnel positions, number and type
 - Equipment items having a unit value of \$5,000 or more, number and type
 - Minor remodeling
 - Any increase in a budget subtotal (professional salaries, purchased services, travel, etc.) by more than 10 percent or \$1,000, whichever is greater
 - Any increase in the total budget amount.
- ❖ Certification on page 8 must be signed by Chief Administrative Officer or properly authorized designee.
- ❖ High quality computer generated reproductions of this form may be used.
- ❖ For further information on budgeting, please refer to the Fiscal Guidelines for Federal and State Aided Grants which may be accessed at www.oms.nysed.gov/cafe/ or call Grants Finance at (518) 474-4815.

SALARIES FOR PROFESSIONAL PERSONNEL: Code 15

Include only staff that are employees of the agency. Do not include consultants or per diem staff. Do not include central administrative staff that are considered to be indirect costs, e.g., business office staff. One full-time equivalent (FTE) equals one person working an entire week each week of the project. Express partial FTE's in decimals, e.g., a teacher working one day per week equals .2 FTE.

07X520			
Specific Position Title	Full-Time Equivalent	Annualized Rate of Pay	Project Salary
Teacher	0.60	80,000	48,000
Coach (Math, Literacy, Special Ed)	1.00	80,000	80,000
Guidance Counselor	1.00	0.00	81,468

M/WBE Documents**M/WBE Goal Calculation Worksheet**

(This form should reflect Multi-Year Budget Summary Totals)

RFP # and Title: 1003(g) School Improvement Grant (SIG) (SIG Round 6). RFP Number: TA-16

Applicant Name: Foreign Language Academy of Global Studies (07X520)

The M/WBE participation for this grant is 20% of each applicant's total discretionary non-personal service budget over the entire term of the grant. Discretionary non-personal service budget is defined as the total budget, excluding the sum of funds budgeted for direct personal services (i.e., professional and support staff salaries) and fringe benefits, as well as rent, lease, utilities, and indirect costs, if these are allowable expenditures.

Please complete the following table to determine the dollar amount of the M/WBE goal for

	Budget Category	Amount budgeted for items excluded from M/WBE calculation	Totals
1	Total Budget		\$ 1,859,697
2	Professional Salaries	\$ 939,094	
3	Support Staff Salaries	\$ -	
4	Fringe Benefits	\$ 391,403	
5	Indirect Costs	\$ -	
6	Rent/Lease/Utilities	\$ -	
7	Sum of lines 2, 3, 4, 5, and 6		\$ 1,330,497
8	Line 1 minus Line 7		\$ 529,200
9	M/WBE Goal percentage (20%)		20%
10	Line 8 multiplied by Line 9 =M/WBE goal amount		\$ 105,840.00

M/WBE COVER LETTER Minority & Woman-Owned Business Enterprise Requirements

RFP # and Title: 1003(g) School Improvement Grant (SIG) (SIG Round 6). RFP Number: TA-16

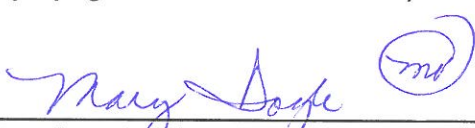

Applicant Name: Foreign Language Academy of Global Studies (07X520)

In accordance with the provisions of Article 15-A of the NYS Executive Law, 5 NYCRR Parts 140-145, Section 163 (6) of the NYS Finance Law and Executive Order #8 and in fulfillment of the New York State Education Department (NYSED) policies governing Equal Employment Opportunity and Minority and Women-Owned Business Enterprise (M/WBE) participation, it is the intention of the New York State Education Department to provide real and substantial opportunities for certified Minority and Women-Owned Business Enterprises on all State contracts. It is with this intention the NYSED has assigned M/WBE participation goals to this contract.

In an effort to promote and assist in the participation of certified M/WBEs as subcontractors and suppliers on this project for the provision of services and materials, the bidder is required to comply with NYSED's participation goals through one of the three methods below.

Please indicate which one of the following is included with the M/WBE Documents Submission:

- ☒ Full Participation – No Request for Waiver (PREFERRED)
☐ Partial Participation – Partial Request for Waiver
☐ No Participation – Request for Complete Waiver

By my signature on this Cover Letter, I certify that I am authorized to bind the Bidder's firm contractually.

NOT APPLICABLE

2014 CONTRACT

MEMORANDUM OF AGREEMENT

MEMORANDUM OF AGREEMENT (the "MOA" or "Agreement") entered into this _____ day of _____ by and between the Board of Education of the City School District of the City of New York (the "Board") and the United Federation of Teachers, Local 2, AFT, AFL-CIO (the "Union") modifying certain collective bargaining agreements between the Board and the Union that expired on October 31, 2009, as set forth more particularly below.

IN WITNESS THEREOF NOW, THEREFORE, it is mutually agreed as follows:

1. INTRODUCTION

The collective bargaining agreements between the Board and the Union which expired on October 31, 2009, covering the titles and/or bargaining units set forth in paragraph 3, below, shall be replaced by successor agreements that shall continue all their terms and conditions except as modified or amended below.

2. DURATION

The terms of the successor agreements shall be from November 1, 2009 through October 31, 2018.

3. WAGES

A. Ratification Bonus

A lump sum cash payment in the amount of \$1,000, pro-rated for other than full time employees, shall be payable as soon as practicable upon ratification of the Agreement to those employees who are on the payroll as of the day of ratification. This lump sum is pensionable, consistent with applicable law, and shall not be part of the Employee's basic salary rate.

B. 2009-2011 Round –

Salaries and rates of pay as customarily done:

- i. 5/1/15: 2%
- ii. 5/1/16: 2%
- iii. 5/1/17: 2%
- iv. 5/1/18: 2%

C. Structured Retiree Claims Settlement Fund

Upon ratification, the City shall establish a Structured Retiree Claims Settlement Fund in the total amount of \$180 million to settle all claims by retirees who have retired between November 1, 2009 through June 30, 2014 concerning wage increases arising out of the 2009-2011 round of bargaining. The Fund will be distributed based upon an agreed upon formula.

D. Retirements after 6/30/14 shall receive lump sum payments based on the same schedule as actives as set forth below in paragraph E.

E. Lump Sum Payments stemming from the 2009-2011 Round and schedule for actives for those continuously employed as of the day of payout.

- i. 10/1/15 – 12.5%
- ii. 10/1/17 – 12.5%
- iii. 10/1/18 – 25%
- iv. 10/1/19 – 25%
- v. 10/1/20 – 25%

F. General Wage Increases

Salaries and rates of pay as customarily done:

- i. 5/1/13: 1%
- ii. 5/1/14: 1%
- iii. 5/1/15: 1%
- iv. 5/1/16: 1.5%
- v. 5/1/17: 2.5%
- vi. 5/1/18: 3%

G. Entry Level Salary Schedule

- a. A joint labor-management committee shall be established to discuss increases to the entry level steps on the salary schedule for the pedagogues and increases for physical therapist, hearing officers (Per Session), nurses, and occupational therapist titles.
- b. A fund in the amount of \$20 million shall be established for these purposes.

H. Healthcare Savings

- a. The UFT and the City/DOE agree the UFT will exercise its best efforts to have the MLC agree to the following:
 - i. for fiscal year 2015 (July 1, 2014-June 30, 2015),

there shall be \$400 million in savings on a city-wide basis in health care costs in the NYC health care program.

- ii. for fiscal year 2016 (July 1, 2015-June 30, 2016), there shall be \$700 million in savings on a citywide basis in health care costs in the NYC health care program.
- iii. for fiscal year 2017 (July 1, 2016-June 30, 2017), there shall be \$1 billion in savings on a citywide basis in health care costs in the NYC health care program.
- iv. for fiscal year 2018 (July 1, 2017-June 30, 2018), there shall be \$1.3 billion in savings on a citywide basis in health care costs in the NYC health care program.
- v. for every fiscal year thereafter, the savings on a citywide basis in health care costs shall continue on a recurring basis.
- vi. The parties agree that the above savings to be achieved on a Citywide basis are a material term of this agreement.
- vii. In the event the MLC does not agree to the above citywide targets, the arbitrator shall determine the UFT's proportional share of the savings target and, absent an agreement by these parties, shall implement the process for the satisfaction of these savings targets.
- viii. Stabilization Fund: (1) Effective July 1, 2014, the Stabilization Fund shall convey \$1 billion to the City of New York to be used in support of the pro rata funding of this agreement. (2) Commencing on July 1, 2014, \$200 million from the Stabilization Fund shall be made available per year to pay for ongoing programs (such as \$65 welfare fund contribution, PICA payments, budget relief). In the event the MLC does not agree to provide the funds specified in this paragraph, the arbitrator shall determine the UFT's proportional share of the Stabilization Fund monies required to be paid under this paragraph.

I. Dispute resolution regarding paragraph H.

- a. In the event of any dispute, the parties shall meet and confer in an attempt to resolve the dispute. If the parties cannot resolve the dispute, such dispute shall be referred to Arbitrator Martin F. Scheinman for resolution.
- b. Such dispute shall be resolved within 90 days.
- c. The arbitrator shall have the authority to impose interim relief that is consistent with the parties' intent.
- d. The arbitrator shall have the authority to meet with the parties at such times as the arbitrator determines is appropriate to enforce the terms of this agreement.
- e. The parties shall meet and confer to select and retain an impartial health care actuary. If the parties are

unable to agree, the arbitrator shall select the impartial health care actuary to be retained by the parties.

- f. The parties shall share the costs for the arbitrator and the actuary the arbitrator selects.

J. Covered Titles and Rates of Pay

The increases pursuant to B and F above and lump sum payments pursuant to E above cover the following titles and rates of pay:

1. Teacher
2. Teacher's Assistant
3. Teacher Aide
4. Educational Assistant
5. Educational Assistant A-I
6. Educational Assistant A-II
7. Educational Assistant B
8. Educational Associate
9. Auxiliary Trainer
10. Bilingual Professional Assistant
11. Guidance Counselor
12. School Psychologist and School Social Worker and related titles
13. School Secretary and related titles
14. Laboratory Specialist and Technician
15. Mental Health Worker
16. Attendance Teacher
17. Bilingual Teacher in School and Community Relations
18. Education Administrator
19. Education Analyst/Officer
20. Associate Education Analyst/Officer
21. School Medical Inspector
22. Director and Assistant Director of Alcohol and Substance Abuse Programs
23. Registered Nurse, Occupational Therapist, Physical Therapist and related titles
24. Supervising Nurse, Supervising Physical Therapist and Supervising Occupational Therapist
25. Supervisor of School Security
26. Adult Education Teacher
27. Sign Language Interpreter
28. Occasional Per Diem Teacher
29. Occasional Per Diem Secretary
30. Occasional Per Diem Paraprofessional
31. Education Associate A
32. Auxiliary Trainer A
33. Educational Associate B
34. Auxiliary Trainer B
35. Per Session Rate
36. Coverage Rate
37. Shortage Rate
38. Daily Training Rate
39. Staff Development Rate
40. Lead Teacher Differential
41. Hearing Officer (Per Session)

All longevities, step increments, differentials and other

rates of pay not otherwise covered in Appendix A or elsewhere in this Agreement shall be increased as customarily done in a manner consistent with the increases set forth in paragraphs B, E and F above, unless explicitly excepted.

K. Any disputes arising under this section 3 of this Agreement shall be determined by Martin F. Scheinman. The parties shall share the costs of his services.

4. PAPERWORK

Article 7R of the collective bargaining agreement covering teachers shall be amended to add the following:

Curriculum

The Board of Education (DOE) agrees to provide teachers with either a year-long or semester long Curriculum that is aligned with State Standards in all Core Subjects.

Curriculum is defined as:

- a) a list of content and topics;
- b) scope and sequence; and
- c) a list of what students are expected to know and be able to do after studying each topic.

Core Subjects are defined as follows: Math (including, but not limited to, Algebra and Geometry), Social Studies, English Language Arts, Science (including, but not limited to, General Science, Biology, Earth Science, Chemistry and Physics), Foreign Languages and other subject areas named by the DOE and shared with the UFT. It is understood that the DOE's obligation to provide curriculum shall extend to Core courses that may be electives.

It is further understood by both parties that there are instances where teachers may want to participate in the development of curriculum. Such instances include, but are not limited to, the creation of new themed schools or programs within a school, or where a teacher or group of teachers wishes to create or help create a set of lessons around a particular theme or subject, where approved by the principal. Nothing in this agreement is intended to prohibit voluntary collaboration or work by teachers and other school staff on curriculum.

However, if there is a specific request by the DOE or a school administrator for a teacher or teachers to write curriculum, then the teacher(s) must be given sufficient time during the work day to do so, in accordance with provisions of the collective bargaining agreement or given sufficient time after school, in accordance with the provisions of the collective bargaining agreement pertaining to Per Session.

The failure to provide curriculum as defined above shall be subject to the grievance and arbitration procedures set forth in Article Twenty-Two of the collective bargaining agreement. However, such grievances shall be strictly limited to whether a curriculum, as defined above, was provided. The sufficiency and quality of the curriculum provided shall not be grievable.

Paperwork Reduction

The following shall replace Article 8I of the collective bargaining agreement covering teachers and shall be added to the other UFT-BOE collective bargaining agreements:

A Central Paperwork Committee (the "Central Committee") will convene within 30 days of the ratification of this agreement by the UFT. The Central Committee will be made up of an equal number of representatives appointed by the UFT President and the Chancellor. The representatives appointed by the Chancellor will include someone from the office of the Deputy Chancellor for Teaching and Learning. The Central Committee will meet at least monthly, on the first Wednesday of the month or at a mutually agreeable time, to review system-wide paperwork issues (whether paper or electronic), including, but not limited to, the requests for data in connection with the Quality Review process. The Central Committee will also establish, subject to agreement by the Chancellor and the UFT President, system-wide standards for the reduction and elimination of unnecessary paperwork ("System-wide Standards"). Should the Central Committee fail to establish System-wide Standards approved by the Chancellor within 60 days of their first meeting, either the UFT or the Board (DOE) may request the assistance of a member of the Fact-Finding Panel of Martin F. Scheinman, Howard Edelman and Mark Grossman, or another mutually agreeable neutral, to help facilitate the Central Committee's discussions. Should the intervention of a neutral not result in an agreement by the Central Committee approved by the Chancellor within 60 days of the neutral's involvement, the DOE and UFT will submit position statements to said neutral who will issue a binding decision. The neutral's decision setting the System-wide Standards shall be subject to Article 75 of the New York State Civil Practice Law and Rules.

Once the System-wide Standards have been established they will be distributed to all schools and key stakeholders (including SLT Chairpersons, PA/PTA Presidents, UFT Chapter Leaders, UFT District Representatives, District Superintendents and CSA Representatives). Thereafter, District/High School Superintendency Paperwork Committees ("District Committees") shall be established in each community school district and high school superintendency. The District Committees shall meet monthly, at a regularly scheduled time, for the purpose of addressing paperwork issues (whether paper or electronic) at the school level and to ensure the system-wide standards are being implemented properly in schools. These District Committees will be made up of an equal number of representatives appointed by the UFT President and the Chancellor. The representatives appointed by the Chancellor shall include the District/High School Superintendent or his/her designee.

Employees (including those in functional chapters) may request that their Chapter Leader raise school-specific paperwork issues (whether paper or electronic) before the District Committee. Subject to approval by the Chancellor, if a District Committee agrees on the resolution of the paperwork issue,

the resolution shall be enforced by the District or High School Superintendent. In the event that a District Committee cannot agree on the resolution of an issue raised by a Chapter Leader of an individual school, the District Committee shall refer the issue to the Central Committee for review. Subject to approval by the Chancellor, if the Central Committee agrees on the resolution of an issue raised by a Chapter Leader, the resolution shall be enforced by the District or High School Superintendent.

For alleged violations of the System-wide Standards the UFT may file a grievance, in accordance with the grievance and arbitration procedures set forth in Article 22 of the collective bargaining agreement. It is understood that, prior to a grievance being filed, the paperwork issues shall go through the committee process as described above. Such grievances shall be filed directly with the DOE's Office of Labor Relations ("OLR"), which may be scheduled for arbitration within 20 days of notice to OLR. The parties shall negotiate pre-arbitration hearing procedures so that each party is aware of the allegations and defenses being raised at the arbitration. All arbitration days shall be part of the existing number of days as set forth in the CBA (as modified by this Agreement). An arbitrator may hear up to three (3) paperwork grievances on each arbitration date. The arbitrator will issue a brief award that is final and binding upon the parties, within five (5) school days of the arbitration.

Unit Planning

Article 8E of the collective bargaining agreement covering teachers shall be amended to add the following:

A "Unit Plan," also known as a "Curriculum Unit," means a brief plan, by and for the use of the teacher, describing a related series of lesson plans and shall include: (1) the topic/theme/duration; (2) essential question(s); (3) standard(s); (4) key student learning objectives; (5) sequence of key learning activities; (6) text(s) and materials to be used; and (7) assessment(s).

Teachers that are provided with a Curriculum (as defined in this agreement) have a professional responsibility to prepare Unit Plans. No teacher shall be required to prepare a Unit Plan for each curriculum unit, other than the attached, brief, one-page form agreed upon by the UFT and DOE, including teachers of multiple subjects for the same group of students (e.g., elementary school teachers, teachers of self-contained classes), who will include each subject taught on the attached one page form. Teachers shall not be required to prepare a Unit Plan in any format other than the attached form, agreed upon by the UFT and DOE.

A principal or supervisor may collect and/or copy a Teacher's Unit Plan provided that the principal/supervisor either (i) discusses the Unit Plan at the next professional conference (e.g. pre-observation or post-observation conference) pursuant to the observation cycle or as otherwise permitted by the parties' APPR plan, or (ii) uses the Unit Plan for professional learning (e.g., non-evaluative conferencing with the principal or

other administrators) within 20 school days of the collection or copying, absent unforeseen and unusual circumstances.

5. WORKDAY

I. SINGLE SESSION SCHOOL

Article 6 of the Teachers' CBA shall be amended to add the following:

Detailed below are the terms for a one (1) year pilot to occur during the 2014-2015 school year only. Should the parties wish to continue this model, they must agree in writing to do so by June 15, 2015. If no such agreement is reached, the workday shall automatically revert to the provisions of Article 6 in the 2007-2009 teachers' collective bargaining agreement and corresponding articles in other agreements.

The following shall apply to single session schools only. The parties have agreed to repurpose the 150 minutes per week of extended time in Article 6.A.2 and all faculty and grade conference time as set forth below:

A. Default Workday Configuration for Teachers:

Unless modified through a School Based Option ("SBO") pursuant to Article 8B of the Teachers' CBA, the following shall apply to Teachers in Single Session Schools:

1. The school day shall be 6 hours and 20 minutes Monday through Friday.
2. On Mondays and Tuesdays, the day shall start no earlier than 8 a.m. and end no later than 4:00 p.m. The parties have agreed to repurpose the 150 minutes per week of extended time and all faculty and grade conference time be used instead as follows:
 - a. On Mondays when school is in session there will be an 80-minute block of Professional Development immediately following the conclusion of the school day. Professional Development shall be collaboratively developed by a school based committee as set forth below in section B of this Article. If less than the entire 80-minute period is taken up by Professional Development activities, then the time will be utilized for Other Professional Work as set forth below.
 - b. On Tuesdays when school is in session there will be a 75-minute block immediately following the conclusion of the school day that consists of 40-minutes for Parent Engagement activities as set forth below in section C of this Article, immediately followed by a 35 minute block of time for Other Professional Work as set forth in Sec. D of this Article. If less than the entire 40-minute block of time is taken up by Parent Engagement activities, then the time will be utilized for Other Professional Work as set forth Section D of this Article.

3. On Wednesday through Friday, the day shall begin no earlier than 8 a.m. and end no later than 3:45 p.m.
4. On citywide professional development days the workday shall be 6 hours and 50 minutes.

B. Professional Development:

Each school (and program functioning as a school) shall form a School-Based Staff Development Committee ("SDC"). Such committee will include the Chapter Leader and consist of equal number of members selected by the Chapter Leader and the Principal, respectively. The SDC shall collaboratively review, consider and develop the school-based professional development that is offered during the Professional Development block to be relevant to all participating staff-members, supportive of pedagogical practices and programs at the school and reasonable to prepare and complete during the Professional Development block. The Principal shall review the SDC's work but shall have final approval of Professional Development.

School and District and Functional Chapter Based Staff Development Committees, as described below and in corresponding agreements, shall each meet during the last clerical half day scheduled in June and/or a portion of the time during the workdays prior to the start of the instructional year when students are not in attendance, to begin their work regarding the upcoming and following school year's professional development. In addition, each may choose to also meet to continue their work during times when Other Professional Work, as defined herein, is appropriate.

It is recognized by the parties that some Professional Development activities will be appropriate for all staff and some will be most relevant to certain groups of staff members. Accordingly, schools are encouraged, where appropriate, to include differentiated professional development activities for groups or titles, including functional chapters, that is aligned to the groups' or titles' roles.

C. Parent Engagement:

Appropriate activities for the 40-minute Parent Engagement block are: face-to face meetings (individual or group) with parents or guardians; telephone conversations with parents or guardians; written correspondence including email with parents or guardians; creating newsletters; creating content for school/class websites and/or answering machines; preparing student report cards; preparing student progress reports, and preparing for any of the Parent Engagement activities listed herein. Teachers shall select from the activities listed to engage in during these blocks of time unless otherwise directed by the principal to another activity specified herein.

D. Other Professional Work:

Appropriate Other Professional Work for any period of time, during these specified blocks, during which Parent Engagement and/or Professional Development activities are not taking place are: collaborative planning; Lesson Study; Inquiry and review of student work; Measures of Student Learning ("MOSL") -related work; IEP related work (excluding IEP meetings); work with or related to computer systems/data entry; preparing and grading student assessments; mentoring; as well as responsibilities related to teacher leader duties for all individuals in Teacher Leadership Positions. Teachers shall select from the activities listed to engage in during these blocks of time unless otherwise directed by the principal to another activity specified herein. In addition to the activities listed here, a teacher or a group of teachers may propose additional activities that may include working with a student or students for any portion of the school year, which requires approval by the principal. In addition, as provided for in Section I.B., an SDC may choose to also meet to continue its work during times when Other Professional Work is appropriate.

There will be one (1) or two (2) periods of time during the school year, based upon a school's MOSL selections, one in the Fall and one in the Spring, each of which shall be a minimum of 6 weeks in duration, that will be designated as "MOSL windows" for the entire school district by the DOE. The 6 week time periods need not be consecutive weeks. During these "MOSL windows" teachers shall be permitted to devote as much time as necessary during the entire Parent Engagement periods of time to perform MOSL related work. Should teachers not have the need to do MOSL related work during the MOSL window, they shall engage in either Parent Engagement or Other Professional Work as set forth herein.

E. Evening Parent-Teacher Conferences:

1. The two (2) existing afternoon Parent-Teacher Conferences shall be unchanged.
2. The two (2) existing evening Parent-Teacher Conferences shall be unchanged except that they shall be three (3) hours long.
3. There shall be two (2) additional evening Parent-Teacher Conferences. Each additional conference shall be three (3) hours long. Such conference time, together with a portion of the Tuesday activities block, shall replace all existing faculty and grade/department conferences as designated in the By-Laws and collective bargaining agreement.
4. The four (4) evening Parent-Teacher Conferences shall be held in September, November, March and May, respectively on dates to be determined by the

DOE. All conferences shall begin no earlier than 4:30 p.m. and end no later than 8:00 pm.

5. The September conference shall not be a traditional Parent-Teacher Conference but rather used for an alternative event using one of the following formats as determined by the school Principal and Chapter Leader in consultation with the School Leadership Team ("SLT"): Curriculum Night; Meet the Staff Night; Common Core or other training for Parents Night, or another non-traditional format mutually agreed upon by the Principal and Chapter Leader in consultation with the SLT. Should the principal and Chapter Leader not agree on a format, the default format for the September Conference shall be "Meet the Staff" night. It is understood that in schools which had previously exchanged faculty conference time for an evening event, those events are subsumed within the four (4) evening Parent-Teacher Conferences.
6. All existing rules, regulations and procedures regarding Parent Teacher Conferences continue to apply unless specifically modified herein.

F. School-Based Options ("SBO"):

In addition to the above described default schedule, the following configuration of the workday shall be approved by the President of the UFT and Chancellor if the other requirements of the SBO process as set forth in Article 8.B of the Teachers' CBA and corresponding articles of other contracts where applicable. The start and end time of the work day shall be specified in each of the SBOs.

1. 100/55 Option:

- a. The school day shall be 6 hours and 20 minutes.
- b. On Monday, the day shall begin no earlier than 8:00 am and end no later than 4:00 pm. On Tuesday through Friday the day shall begin no earlier than 8 am and end no later than 3:45 pm.
- c. On Monday there shall be a 100 minute Professional Development period immediately following the end of the school day. If less than the entire 100 minute period is taken up for Professional Development, the time shall be utilized for Other Professional Work.
- d. On Tuesday there shall be a 55 minute block for Parent Engagement. If less than the entire 55 minute period is taken up by Parent Engagement Activities, then the time shall be utilized for Other Professional Work

2. 80/40/35 Option:

- a. The school day shall be 6 hours and 20 minutes.
- b. On Monday, the day shall begin no earlier than 8:00 am and end no later than 4:00 pm. On

Tuesday through Friday the day shall begin no earlier than 8 am and end no later than 3:45 pm.

- c. On Monday there shall be an 80 minute Professional Development period immediately following the end of the school day. If less than the entire 80 minute period is taken up for Professional Development, the time shall be utilized for Other Professional Work.
- d. On Tuesday there shall be a 40 minute block for Parent Engagement immediately following the end of the school day. If less than the entire 40 minute period is taken up by Parent Engagement Activities, then the time shall be utilized for Other Professional Work.
- e. On Thursday immediately following the end of the school day, there shall be 35 minute period to be used for Other Professional Work.

The Chancellor and UFT President shall agree upon a third pre-approved SBO option for the 2014-15 school year.

Consistent with the contractual requirements, other SBO configurations voted on by schools shall be considered.

II. PARAPROFESSIONAL

Article 4 of the Paraprofessional CBA shall be amended to add the following:

The below sections are part of a one (1) year pilot to occur during the 2014-2015 school year only. Should the parties wish to continue this model, they must agree in writing to do so by June 15, 2015. If no such agreement is reached, the workday shall automatically revert to the provisions of Article 4 in the 2007-2009 Paraprofessional CBA.

A. Workday.

Unless modified through a School Based Option ("SBO") pursuant to Article 8B of the Teachers' CBA, the following shall apply to Paraprofessionals in Single Session Schools:

Paraprofessionals shall have the same default workday as teachers in single session schools (as set for in Art. 6, Sec. ____ of the Teachers CBA), except that on Tuesdays when school is in session paraprofessionals shall only be required to work a 70-minute block immediately following the conclusion of the school day.

Any SBO adopted by a school reconfiguring the workday shall not increase or decrease the workday of paraprofessionals.

B. Professional Development.

1. Paraprofessionals shall participate in Professional Development activities per the guidelines set forth in Art. 6, Sec. ____ of the Teachers CBA (I.B., above).

2. There shall be a citywide Paraprofessional Staff Development Committee ("SDC") consisting of the Paraprofessional Chapter Leader and equal numbers of members selected by the DOE and the Paraprofessional Chapter Leader. The Paraprofessional SDC shall collaboratively review, consider and develop professional development programs relevant to Paraprofessional duties for both citywide professional development days and for schools to consider. The DOE shall review the SDC's work but shall have final approval of Professional Development

C. Parent Engagement.

During this block of time, as defined in Art. 6, Sec. ____ of the Teachers CBA, paraprofessionals shall assist teachers in Parent Engagement activities or other activities appropriate to their title subject to approval by the principal.

D. Other Professional Work.

During either of the Professional Development or Parent Engagement blocks of time, as defined in Art., 6, Sec. ____ of the Teachers CBA, when teachers may engage in Other Professional Work and when no relevant appropriate professional development is offered, paraprofessionals shall assist teachers by performing Other Professional Work appropriate to their title.

III. FUNCTIONAL CHAPTERS

- A. Each UFT-represented functional chapter employed by the Board "DOE" except Paraprofessionals (which are provided for in Sec. II herein), shall amend its CBA to add the following:

The below sections are part of a one (1) year pilot to occur during the 2014-2015 school year only. Should the parties wish to continue this model, they must agree in writing to do so by June 15, 2015. If no such agreement is reached, the workday shall automatically revert to the provisions of the respective 2007-2009 CBAs.

1. For each UFT-represented functional chapter employed by the Board ("DOE") there shall be a citywide Staff Development Committee ("SDC") consisting of the Functional Chapter Leader and equal numbers of members selected by the DOE and the Functional Chapter Leader. Each citywide functional chapter committee shall collaboratively review, consider and develop professional development programs relevant to the respective chapter's duties and reasonable to prepare and complete within the chapter's existing workday. The DOE shall review the SDC's work but shall have final approval of professional development.
2. Unless explicitly stated herein all functional chapters shall continue with their work day schedules as reflected in the 2007-2009 collective bargaining agreements.

- B. The CBAs for Guidance Counselors (Art. 6), and School Psychologists and Social Workers (Art. 6) shall be amended to add the following:

This is part of a one (1) year pilot to occur during the 2014-2015 school year only. Should the parties wish to continue this model, they must agree in writing to do so by June 15, 2015. If no such agreement is reached, the workday shall automatically revert to the provisions of Article 6 in the 2007-2009 Guidance Counselors and School Psychologists and Social Workers CBAs.

The workday for Guidance Counselors, School Psychologists, and Social Workers shall remain the same. However, the parties agree that existing faculty conference time shall be repurposed so that Guidance Counselors, School Psychologists and Social Workers shall attend the four previously mentioned evening Parent Teacher Conferences. They shall attend the evening parent-teacher events as follows:

September – 3 hours
November – The first 2 hours 10 minutes
March – 3 hours
May – The first 2 hours and 10 minutes.

IV. MULTI-SESSION / DISTRICT 75 and 79 SCHOOLS:

Article 6 of the Teachers' CBA shall be amended by adding the following language immediately after Sec. I, above:

The following shall apply to Multi-session, District 75 and District 79 Schools only, for the duration of the pilot and, if continued, thereafter:

- A. The parties both understand and agree that staff in multi-session and Districts 75 and 79 schools need and deserve support and professional development and that such schools would also benefit from additional parent engagement opportunities. Each school should have an opportunity to address those needs within its unique scheduling and programmatic structures. Accordingly, the default workday and workday configuration, including faculty and grade/department conferences, for multi-session and Districts 75 and 79 Schools remains as set forth in the 2007-2009 collective bargaining agreements.
- B. Each multi-session school and each District 75 and 79 school shall form a School-Based Staff Development Committee ("SDC"), in accordance with the parameters outlined for such Committees in the Single Session Schools section above. In addition to the duties of a SDC in a single session school, multi-session and District 75 and 79 SDCs shall discuss potential SBO's for the configuration of time appropriate to the scheduling needs of those schools so as to provide for appropriate blocks of time to be used for Professional Development, Parent Engagement, and Other Professional Work. The UFT and the DOE

agree to consider any such proposed SBO in light of the individual school's scheduling and programmatic needs.

- C. There shall also be Central District 75 and District 79 SDCs consisting of an equal number of members selected by the applicable UFT District Representative and the District Superintendent, which shall address specific professional development and scheduling needs in District 75 and 79, respectively.
- D. The parties agree to discuss and develop mutually agreeable SBO options for Multi-Session, District 75 and District 79 schools

6. TEACHER EVALUATION/PEER VALIDATOR

Article 8J of the Teachers' CBA shall be amended to include the following:

The Board (DOE) and UFT agree that the following, subject to approval by the Commissioner of Education, represents the Parties APPR Plan as required by Education Law § 3012-c.

This Article replaces the Commissioner's June 1, 2013 APPR decision and subsequent clarification decisions dated September 5, 2013 and November 27, 2013 (collectively "the Commissioner's Decision").

Except as modified herein, the terms of the Commissioner's Decision are incorporated by reference and remain in full force and effect. Except as stated herein, any dispute regarding this APPR Plan and the Commissioner's Decision shall be resolved exclusively through negotiation between the parties or the grievance process set forth in Article 22 of the parties' collective bargaining agreement. Any issue regarding the implementation of the APPR Plan with respect to the Measures of Student Learning and scoring that was not addressed in the Commissioner's Decision, shall be resolved through negotiations between the parties and, in the absence of an agreement, referred to the State Education Department for clarification.

The Parties agree to submit a draft APPR Plan to the State Education Department no later than May 15, 2014.

Teacher Practice Rubric

In order to simplify and focus the use of Danielson's *Framework for Teaching* (2013 Edition), and reduce unnecessary paperwork, only the following eight (8) components of the rubric shall be rated: 1(a), 1(e), 2(a), 2(d), 3(b), 3 (c), 3(d), and 4(e). These eight (8) components shall be referred to herein as the "Danielson Rubric." Any reference to Danielson or the Danielson Rubric in the Commissioner's Decision shall be deemed to refer only to these eight (8) components. In each observation, all components of the Danielson Rubric shall be rated for which there is observed evidence. The remaining components of the *Danielson Framework for Teaching* (2013 Edition) not describe herein will continue to be used by the Parties for formative purposes.

Observation Cycle

1. Feedback following an observation must be provided to the teacher within fifteen (15) school days of the observation. Feedback must be evidence-based and aligned to the Danielson Rubric.
2. Evaluator forms shall be provided to the teacher no later than forty-five (45) school days following the observation. From the time an observation (formal or informal, as defined by the Commissioner's Decision) is conducted until the time the teacher receives the evaluator form for that observation, only one (1) additional evaluative observation (formal or informal) may be conducted.
3. The parties agree that Teacher Artifacts (as defined in the Commissioner's Decision) shall not be used in determining the Other Measures of Effectiveness ("Measures of Teaching Practice") subcomponent rating. Teachers are not required to submit Teacher Artifacts (as defined in the Commissioner's Decision) except principals have the discretion to collect evidence related to the Danielson Rubric in a manner consistent with the collective bargaining agreement and the Commissioner's Decision. The DOE and UFT shall jointly create guidance for evaluators on the collection of evidence for the Danielson Rubric. Whenever possible, the Parties will jointly present this guidance to school communities.
4. An evaluator shall provide a score on any component that is observed from the Danielson Rubric regardless of the observation option selected by the teacher and regardless of whether it is a formal or informal observation (as defined by the Commissioner's Decision).
5. In addition to the two observation options set forth in the Commissioner's Decision, teachers who have received "Highly Effective" as their final APPR rating in the previous year may choose Option 3. Option 3 consists of a minimum of three (3) informal observations that are used for evaluative purposes. Option 3 is subject to the same procedures and scoring rules as Options 1 and 2 as provided for in the Commissioner's Decision as modified by this APPR Plan.

A teacher that chooses Option 3 shall make his/her classroom available for three (3) classroom visits by a colleague per school year. The classroom visits described herein shall not be used for any evaluative purpose. Any additional classroom visits by colleagues shall only be with the consent of the teacher selecting Option 3. The date and time of such visits shall be scheduled jointly by the teacher selecting Option 3 and the principal.
6. An evaluator may assess a teacher's preparation and professionalism only if the evaluator's conclusions are based on observable evidence pertaining to components 1a, 1e, and/or 4a of the Danielson Rubric during an observation or if the evaluator observes evidence for these components during the fifteen (15) school days immediately preceding a classroom observation.

7. The parties agree to create an evaluator form that will allow evaluators to rate and delineate between all components observed during a classroom observation as well as (for components 1a, 1e, and 4e only) observed within fifteen (15) school days prior to the classroom observation as part of an assessment of a teacher's preparation and professionalism. Each evaluator form shall contain lesson-specific evidence for components observed during a classroom observation and teacher-specific evidence for components observed as part of an assessment of a teacher's preparation and professionalism.
8. An evaluator shall not include or consider evidence regarding the preparation and professionalism on an evaluator form if such evidence (or conduct) is also contained in a disciplinary letter to the teacher's file, unless the evidence was directly observed by the evaluator during a classroom observation (in which case the evidence may be on both an evaluator form and in a disciplinary letter). Evidence not related to components 1a, 1e, and/or 4e, or directly observed by the evaluator in the fifteen (15) school day period immediately preceding a classroom observation shall not be considered in a teacher's evaluation.
9. Consistent with the Commissioner's Decision, there shall be Initial Planning Conferences ("IPC") and Summative End of Year Conferences (as defined therein). Teachers shall have the sole discretion of setting professional goals as part of the IPC. The DOE will explicitly state this in guidance for evaluators and educators for the 2014-15 school year and thereafter.

Videotaping and Photographing

1. All observations shall be conducted in person. The teacher and evaluator may mutually consent to evaluators not being present when videotaping.
2. A teacher may choose to have his/her observations videotaped. If a teacher chooses to have his/her observations videotaped he/she shall select among the following options:
 - (a) the evaluator will choose what observations, if any, will be videotaped; or (b) the evaluator shall videotape the observations in the following manner: (i) if the teacher selected Option 1, the formal observation shall be videotaped; (ii) if the teacher selected Option 2, two (2) of the informal observations shall be videotaped (at the evaluator's option); or (iii) if the teacher selected Option 3, one (1) of the informal observations shall be videotaped (at the evaluator's option).
3. Evaluators who take photographs during observations relevant to the Danielson Rubric, should, to the extent practicable, be unobtrusive (for example, photographs may be taken at the end of the observation).

Covered Employees

1. The DOE and the UFT agree to jointly request that the State Education Department issue a determination as to whether teachers of programs for suspended students and teachers of programs for incarcerated students are subject to Education Law § 3012-c (and therefore subject to this APPR Plan). Such decision shall be incorporated by reference into this APPR Plan.
2. In order for a classroom teacher to be covered by this APPR Plan, the teacher must be teaching for at least six (6) cumulative calendar months in a school year. If the teacher does not satisfy this requirement he/she shall not be covered by this APPR Plan and shall be subject to the evaluation system set forth in Article 8J of the collective bargaining agreement and Teaching for the 21st Century.
3. The following shall apply to teachers who are teaching for more than six (6) cumulative calendar months in a school year but less than the full year due to either (a) paid or unpaid leave of absence; (b) reassignment from teaching responsibilities; or (c) the teacher commenced, or separated from, employment mid-year:
 - (a) When a teacher is absent from the first day of school until the last Friday of October, the IPC (as defined in this APPR Plan) shall be conducted within ten (10) school days of his/her return to school.
 - (b) When a teacher is absent between the last Friday of April and the last Friday of June, and the absence was foreseen and the evaluator was aware that the teacher would not be present during this period (e.g., they are taking a maternity leave), the Summative Conference shall be held before the teacher leaves.
 - (c) When a teacher is absent between the last Friday of April and the last Friday of June and the absence was unforeseen (e.g., extended leave) and therefore the evaluator could not conduct the Summative Conference ahead of time, the Summative Conference shall be held no later than the last Friday of October in the following school year. Evaluators shall have the discretion to conduct the IPC and Summative Conference at the same time but must fulfill all the requirements of both conferences.
 - (d) When a teacher is unexpectedly absent for the remainder of the school year (e.g., extended leave), the teacher shall have a minimum of two (2) observations, which shall fulfill the observation requirements set forth herein.
 - (e) When a teacher is absent during the period when the baseline or post-test assessments are administered, and the teacher was assigned individual target populations for his/her State and/or Local Measures, the teacher will still receive Local and/or State Measures for individual target populations.

- (f) When a teacher is absent during the period when the targets are set (for assessments with goal-setting), the teacher shall set targets and have their targets approved within the first month of his/her return to school.

The DOE shall explicitly state the rules described herein in guidance for educators for the 2014-15 school year and all school years thereafter.

Multiple Observers

For formative purposes (observations conducted entirely for non-evaluative purposes), no more than four (4) observers (either school-based or from outside of the school) may be present in a classroom. Additional observers may be present in teacher's classroom with the teacher's consent. The visits described in this paragraph shall not be considered when scoring the Measures of Teacher Practice subcomponent.

For evaluative purposes, no more than one (1) evaluator (as defined by the Commissioner's Decision) and two (2) school-based observers (i.e., the Superintendent or Assistant Superintendent or trained administrator of the teacher's school) may be present during a formal or informal observation. The evaluator shall be solely responsible for the observation report. The DOE and UFT shall jointly create guidance for evaluators on the role of multiple observers. Whenever possible, the Parties will jointly present this guidance to school communities.

In extraordinary circumstances, only one (1) of the two (2) observers described herein may be an observer from outside of the school may observe. The outside observer may only be either a Network Leader or Deputy Network Leader (or its functional equivalent).

Student Surveys

The DOE shall pilot student surveys during the 2013-2014 at mutually agreed upon schools and in all schools during the 2014-2015 school year. During the pilot, student surveys shall not be used for evaluative purposes. At the conclusion of each pilot year, the DOE and UFT shall meet to discuss the results of the pilot and discuss the possibility of continuing/discontinuing the pilot and use of the surveys for evaluative purposes. If agreement is not reached at the conclusion of each pilot year, the student surveys shall be used for non-evaluative purposes in the 2014-2015 school year and evaluative purposes starting in the 2015-16 school year and thereafter. The implementation and scoring of the student surveys in 2015-16 and thereafter shall be consistent with the Commissioner's Decision.

Scoring

For all formal and informal observations (as defined by the Commissioner's Decision), all components of the Danielson Rubric shall be rated for which there is observed evidence. At the end of the school year, Overall Component Scores shall be created for each of the eight (8) components. The Overall

Component Scores shall be the average of each rated component from the observations and/or assessments of a teacher's preparation and professionalism.

An Overall Rubric Score will then be calculated by taking the weighted average of the Overall Component Scores, using the following weightings: 1a (5%), 1e (5%), 2a (17%), 2d (17%), 3b (17%), 3c (17%), 3d (17%), 4e (5%).

Formal and informal observations (as defined by the Commissioner's Decision) shall not receive average observation ratings.

Formal and informal observations (as defined by the Commissioner's Decision) will no longer be afforded the weights as provided for in the Commissioner's Decision.

The Overall Rubric Score shall be the basis for the 60 points of the Measures of Teaching Practice subcomponent, unless the student surveys are used for evaluative purposes. If student surveys are used for evaluative purposes, the Overall Rubric Score shall count for 55 of the 60 points of the Measures of Teaching Practice subcomponent score. The implementation and scoring of the student surveys in 2015-16 and thereafter shall be consistent with the Commissioner's Decision.

Courses That Are Not Annualized

In the event that Measures of Student Learning (MOSL) assessment options do not include options for non-annualized courses: 1) in a school where each of the terms covers content where the second term builds on content from the first, the fall teacher shall administer the baseline and the spring teacher shall administer the post-test. Teachers from all terms will be held accountable for the students' results; or 2) in a school where the second term does not build on content from the first, these teachers shall be assigned Linked or Group Measures. Notwithstanding the foregoing, with respect to a teacher of a course leading to a January Regents, the post-test is the January Regents and a baseline shall be administered in the fall.

For Group and Linked Measures (as defined herein), if a student takes the same Regents exam in January and June, only the higher result will be used for State and Local Measures. For non-Group and Linked Measures, if a student takes the same Regents exam in January and June, and has the same teacher in the fall and spring, only the higher result will be used for State and Local Measures. If the student has different teachers in the fall and spring, the January Regents will be used for the fall teacher and the June Regents for the spring teacher.

Students will be equally weighted in a teacher's State and/or Local Measures subcomponent score if they are in a teacher's course for the same length of time (regardless of whether they take the January or June Regents).

For assessments that use growth models, the DOE will calculate scores following the rules outlined above. For assessments that use goal-setting, the teacher who administers the baseline will recommend targets for the students and the principal will approve. Fall term teachers shall set targets on the same

timeline as other teachers. It is recommended that in the fall principals consult with subsequent term teachers about student targets if their assignments are known. Principals shall share these targets with subsequent term teachers within the first month of the start of the new term and provide these teachers with an opportunity to recommend any additional changes to student targets. Principals shall communicate any changes to targets to all affected teachers.

For assessments that use goal-setting, teachers of subsequent term courses who have students who have not previously had targets for them shall set and have their targets approved within the first month of the start of the new term.

State and Local Measures selections for teachers of non-annualized courses, including the application of the 50% rule, shall be determined based upon the teachers' entire school year schedule. As subsequent term selections may not be known in the fall, teachers shall administer all applicable assessments for the grades/subjects they are teaching in the fall.

Rules Regarding Measures of Student Learning

For the 2014-2015 school year and thereafter the DOE shall issue guidance to the School MOSL Committee that sets forth and explains the rules described herein.

There is no limit on the number of Local Measures that a School MOSL Committee, as defined in this APPR Plan, can recommend for a particular grade or subject. If a School MOSL Committee selects the same assessment but different group for the Local Measures subcomponent, the following are allowable subgroups since the DOE is currently analyzing the performance of these groups of students: 1) English Language Learners, 2) students with disabilities, 3) the lowest-performing third of students, 4) overage/under-credited students, or 5) Black/Latino males (consistent with New York City's Expanded Success Initiative).

School MOSL Committees shall consider, when selecting subgroups for Local Measures that the intent of having both Local and State Measures is to have two different measures of student learning. Using subgroups for Local Measures, by nature of the fact that they are a subset of the overall population, will in many instances mean that State and Local Measures are more similar to one another than if different assessments are used for State and Local Measures. Therefore, subgroups should not be selected for teachers in some schools if the subgroup selected reflects the entire population of students the teacher serves (e.g., if a teacher only teaches English Language Learners, the Committee shall not select English Language Learners for their Local Measures and all of their students for the same assessment on their State Measures).

In the event that schools inadvertently select the same measures for State and Local Measures (after to the extent possible they have had an opportunity to correct), the lowest third performing students will be used for Local Measures and the entire populations of students used for State Measures.

The Central MOSL Committee will revisit the list of allowable

subgroups annually, taking into account feedback from educators. If the Central MOSL Committee cannot agree on new/different subgroups, the current list of subgroups will be used.

Evaluators cannot choose to go above the 50% rule in selecting teachers' State Measures. The 50% rule will be followed for State Measures, per State Education Department guidance, such that teachers' State Measures must be determined as follows: for teachers of multiple courses, courses that result in a state growth score must always be used for a teacher's State Measures. If a teacher does not teach any courses that result in state growth scores, or state growth score courses cover less than 50% of a teacher's students, courses with the highest enrollment will be included next until 50% or more of students are included.

The 50% rules shall not apply to Local Measures. School MOSL Committees shall select the method that shall be used to determine which courses shall be included in a teacher's Local Measure. In the 2014-15 school year and thereafter, the DOE will 1) state this rule, provide guidance for teachers of multiple courses, and describe the benefits and considerations of not following the 50% rule for Local Measures and 2) explain how to record and track Local Measures selections for individual teachers when the 50% rule is and is not used for Local Measures.

The process for setting student targets for Local Measures is the same as the process for setting student targets for State Measures. The only exception is Group Measures (not including Linked Measures) for Local Measures. For Group Measures, the School MOSL Committees will have the option of recommending for Local Measures that student targets are set either 1) following the process used for State Measures or 2) by the Committee. If the School MOSL Committee chooses to create the targets and the principal accepts the School MOSL Committee's recommendation, the School MOSL Committee must create these targets no later than December 1. Targets must be submitted using a format determined by the DOE. In the event that the School MOSL Committee cannot agree on Group Measures targets for Local Measures, Group Measures targets will be determined following the process used for State Measures which requires that superintendents must finalize targets by January 15.

School MOSL Committees may recommend which baselines will be used for Local Measures from a menu of options created by the DOE. The only exceptions are instances where the same assessments are used for teachers in the same grades/subjects for State Measures. In these instances, the Principal shall select the baselines that will be used for State and Local Measures.

School MOSL Committees may recommend that Local Measures, Group Measures and Linked Measures may be used with state-approved 3rd party assessments. The DOE shall create guidance that will include a description of which 3rd party assessments it can use to create growth models.

School MOSL Committees may recommend that for Local

Measures, Group Measures and Linked Measures may be used with NYC Performance Assessments. The DOE shall create guidance which will include a description of which NYC Performance Assessments it can use to create growth models, as well as the implications of selecting Group Measures with NYC Performance Assessments for scoring.

Regarding the Local Measures school-wide default, if a School MOSL Committee makes recommendations for Local Measures in only some grades/subjects, the principal may accept those recommendations and the Local Measures default would apply for the grades and subjects for which there is no recommendation. Principals must choose to accept either all a School MOSL Committee's recommendations or none of the School MOSL Committee's recommendations. If the School MOSL Committee recommends the Local Measures default (or the principal does not accept the School MOSL Committee's recommendations and therefore the Local Measures default must be used), teachers must administer NYC Performance Assessments in grades 4-8 ELA and Math (if they are included in the DOE's menu of NYC Performance Assessments that are approved by the Commissioner annually). In the foregoing scenario, the DOE growth models will be used to calculate a teacher's score on the NYC Performance Assessments in grades 4-8 ELA and Math.

Growth Model Conversion Charts

For assessments where schools opt to use DOE-created growth models for State or Local Measures, including the Local Measures default, the DOE shall create scoring charts that convert growth model scores into 0-20 points, taking into account confidence intervals. These charts must be shared and discussed with the MOSL Central Committee (as defined herein) annually. In addition, analyses will be conducted and shared with the MOSL Central Committee regarding the comparability of Individual, Group, and Linked Measures. If members of the MOSL Central Committee do not agree with any element of the growth model conversion charts and/or how they were created, the MOSL Central Committee members that are in disagreement may submit in writing to the Chancellor their reasons for disagreement.

The parties agree to convene a MOSL Technical Advisory Committee (the "MOSL TAC") consisting of one person designated by the DOE, one person designated by the UFT, and a person mutually-selected by the Parties. To ensure a meaningful and fair distribution of ratings, the MOSL TAC shall review the methodology and approach to the creation of growth models and their conversion charts and provide recommendations to the Chancellor. The Chancellor shall have final decision-making authority on the growth model conversion charts.

Measures of Student Learning Options

1. For the 2014-15 school year and thereafter the DOE shall create new measures (referred to as "Linked Measures") for Local and State Measures of Student Learning such that there is an option for each teacher to be evaluated based upon assessment results of students he/she teaches. Some or all assessments are not linked to courses the teacher teaches.
2. For the 2013-14 school year, the following process for "procedural appeals" will only apply to "Group Measures" (i.e., measures where teachers are evaluated based on the performance of some or all students they do not teach). For the 2014-15 and 2015-16 school years, the following process for "procedural appeals" will apply to Linked Measures and Group Measures. For the 2016-17 school year and thereafter the following process for "procedural appeals" will apply only to Group Measures. In all cases, teachers with 50% or more of their Local or State Measures based on Linked Measures/Group Measures shall be eligible for the procedural appeals process.
3. If a teacher receives "Ineffective" ratings in both the State and Local Measures subcomponents and either is based on Linked Measures or Group Measures, and in that year the teacher receives either a "Highly Effective" or "Effective" rating on the Measures of Teaching Practice subcomponent, the teacher shall have a right to a "procedural appeal" of such rating to a representative of the DOE's Division of Teaching and Learning.
 - a. If the teacher receives a "Highly Effective" rating on the Measures of Teaching Practice subcomponent, there shall be a presumption that the overall APPR rating shall be modified by the DOE such that the overall "Ineffective" rating becomes either an "Effective" rating (in the instance where *both* the State and Local Measures of Student Learning subcomponents are based on Linked Measures or Group Measures) or a "Developing" rating (in the instance where only one of the State or Local Measures of Student Learning subcomponents is based on Linked Measures or Group Measures);
 - b. If the teacher receives an "Effective" subcomponent rating on the Measures of Teaching Practice, there shall be a presumption that the overall APPR rating shall be modified by the DOE such that the overall "Ineffective" rating becomes a "Developing" rating if *both* the State and Local Measures of Student Learning subcomponents are based on Linked Measures or Group Measures. If only one of the State or Local Measures of Student Learning subcomponents be based on Linked Measures or Group Measures, the rating shall be appealed to the principal, who shall have the discretion to increase the teacher's overall APPR rating. If the principal does not respond to the

appeal, the teacher's overall APPR rating shall be modified to a "Developing" rating.

- c. The above-described procedural appeal process is separate and distinct from, and in addition to the appeal processes set forth in the Commissioner's Decision.
4. In the event a teacher receives an "Highly Effective" rating in both the State and Local Measures of Student Learning, and neither is based on Linked Measures or Group Measures, and in that year the teacher is rated "Ineffective" on Measures of Teaching Practice subcomponent, and this results in the teacher receiving an "Ineffective" overall APPR rating, the UFT may choose to appeal the rating to a three (3) member Panel consistent with the rules for Panel Appeals as described in Education Law § 3012-c (5-a) and the Commissioner's Decision. However, these appeals shall not be counted towards the 13% of "Ineffective" ratings that may be appealed pursuant to Education Law §3012-c (5-a)(d) and the Commissioner's Decision.
5. The Parties agree to meet each fall to review and discuss other types of anomalies in scoring and determine appropriate actions.
6. The DOE and UFT shall establish a Measures of Student Learning Central Committee consisting of an equal number of members selected by the DOE and the UFT (herein referred to as the "MOSL Central Committee"). The MOSL Central Committee shall convene within sixty (60) days after the ratification of this agreement by the UFT and each month thereafter. The MOSL Central Committee shall explore additional assessment options for the 2014-15 school year, which could include state-approved 3rd party assessments or existing assessments (e.g., Fitnessgram, LOTE exams), and review and approval by the Chancellor, which would be offered as non-mandated options for State and Local Measures. The MOSL Central Committee shall also examine the current range of options and discuss expanded options for the State and Local Measures of Student Learning including, but not limited to, subject-based assessments, the use of portfolios, project-based learning, and/or semi-annualized/term course assessments. The MOSL Central Committee will also examine potential changes to the Local Measures default each school year. The MOSL Central Committee shall propose expanded options for the 2015-16 school year and thereafter. Expanded options proposed by the MOSL Central Committee shall be implemented for the 2015-2016 school year and thereafter subject to review and approval by the Chancellor. All MOSL options for the 2014-15 school year and thereafter shall be shared with the MOSL Central Committee. The MOSL Central Committee shall review all MOSL options to determine which options shall be proposed to the Chancellor for approval. If members of the MOSL Central Committee cannot agree which options should be proposed to the Chancellor, the MOSL Central Committee members that are in disagreement may submit in writing to

the Chancellor their reasons for disagreement. The Chancellor shall have final decision-making authority.

7. There will be no State Measures default. Principals must make decisions for State Measures for all applicable grades/subjects in their school by the deadline. For the 2014-15 school year, the Local Measures default for all schools shall be a school-wide measure of student growth based on all applicable assessments administered within the building which are limited to NYC Performance Assessments, if developed by August 1 prior to the start of the school year, and/or state-approved 3rd party assessments (Chancellor must select by August 1 prior to the start of the school year), and/or state assessments. The DOE and UFT shall annually review the Local Measures default and discuss the possibility of altering the default. If agreement is not reached at the conclusion of each year, the default will be the same as that used in the 2014-15 school year.
8. All decisions of the School MOSL Committee (as defined in the Commissioner's Decision) must be recommended to the principal and the principal must 1) accept the recommendation (or opt for the Local Measures default) and 2) select the State Measures no later than ten (10) school days after the first day of school for students.
9. In the event that a school uses the goal-setting option for State or Local Measures, teachers must submit their proposed goals to their building principal or designee no later than November 1 of each school year absent extraordinary circumstances. The principal or designee must finalize teacher's goals no later than December 1 of each school year, absent extraordinary circumstances.
10. Teachers whose MOSL scores would have been subject to chart 2.11 or 3.13 of the Commissioner's Decision shall now be assigned points such that 85%-100% of students must meet or exceed targets for a teacher to be rated Highly Effective; 55%-84% of students must meet or exceed targets for a teachers to be rated Effective; 30%-54% of students must meet or exceed targets for a teacher to be rated Developing; and 0%-29% of students must meet or exceed targets for a teacher to be rated Ineffective.

Peer Validator

1. Except as modified herein, the Peer Validator shall replace the Independent Validator and fulfill all of the duties of and comply with the provisions applicable to the Independent Validator set forth in Education Law § 3012-c(5-a) and the Commissioner's Decision.
2. **Term:** The Peer Validator program shall be two (2) school years (2014-15 and 2015-16). At the end of the two years, the parties must agree to extend the Peer Validator program and in the absence of an agreement the parties shall revert to the Independent Validator process as set forth in Education Law § 3012-c(5-a) and the Commissioner's Decision.
3. **Selection:** A joint DOE-UFT committee composed of an

equal number of members from the UFT and the DOE (the "Selection Committee") shall be established to determine selection criteria and screen and select qualified applicants to create a pool of eligible candidates. The Deputy Chancellor of Teaching and Learning shall select all Peer Validators from the pool of all eligible candidates created by the Selection Committee. To be eligible to become a Peer Validator an applicant must have at least five (5) years teaching experience; be tenured as a teacher; have received an overall APPR rating of Highly Effective or Effective (or Satisfactory rating where applicable) in the most recent school year; and either be a teacher, a teacher assigned, an assistant principal with reversion rights to a tenured teacher position, or an education administrator with reversion rights to a tenured teacher position.

4. Duties: The term for a Peer Validator shall be for two (2) years. All Peer Validators shall work under the title of Teacher Assigned A and shall have the same work year and work day as a Teacher Assigned A as defined in the collective bargaining agreement. Peer Validators shall report to the Deputy Chancellor of Teaching and Learning or his/her designee. Peer Validators shall conduct observations consistent with the Commissioner's Decision and shall not review any evidence other than what is observed during an observation by the Peer Validator. All assignments are at the discretion of the DOE, however Peer Validators shall not be assigned to any school in which s/he previously worked. The parties agree to consult regarding Peer Validator assignments and workload. Peer Validators shall be reviewed and evaluated by the Deputy Chancellor of Teaching and Learning or his/her designee. The review and evaluation of a Peer Validator shall not be based in any way on whether the Peer Validator agrees or disagrees with the principal's rating. A Peer Validator may be removed from the position at any point during the program provided that both the DOE and UFT agree. Teachers who become Peer Validators shall have the right to return to their prior school at the end of their term as a Peer Validator.

5. Compensation: Peer Validators shall receive additional compensation in the amount of fifteen thousand dollars (\$15,000.00) per year for the term of this agreement above the applicable teacher compensation in accordance with the collective bargaining agreement.

7. TEACHER LEADERSHIP POSITIONS

Article 11 of the Teachers' CBA shall be amended to add the following. In addition, the Section on Teacher Ambassador and applicable parts of the "General" Section shall be added to the CBAs for Guidance Counselors, Social Workers and School Psychologists.

The Union and DOE wish to create opportunities for exemplary teachers to remain in their title of teacher but to extend their reach and role through the establishment of Teacher Leadership positions including Master Teacher, Model Teacher, and Teacher Ambassador.

A joint UFT-DOE Committee will be established for the Teacher Leadership Initiatives. For the 2014-15 school year, the Joint Committee on Teacher Leadership Initiatives will begin meeting as soon as practicable to ensure a timely implementation of the Teacher Leadership Initiative. Thereafter, the Joint Committee on Teacher Leadership Initiatives will meet on a monthly basis or on another mutually agreeable basis to discuss policy aspects of the Teacher Leadership Initiative such as: the focus for Teacher Leadership work; identification and dissemination of best practices; professional development priorities and design; and research including focus groups and surveys to obtain feedback and ensure continuous improvement in implementation. The Joint Committee on Teacher Leadership Initiatives shall issue findings and proposed actions to the Chancellor and the UFT President.

Teacher Ambassador

Teacher Ambassadors are teachers and other educators who volunteer to participate and are selected to be assigned for one year (the "Ambassador Year") to a paired Education Exchange School. Education Exchange Schools are schools paired within a borough where there has been a determination of interest and value in the sharing of instructional best practices, initiatives, and strategies through the temporary exchange of classroom teachers. Schools will be paired together based on a variety of factors such as school level, geography, and capacity to benefit from shared experience and exchange with another school community.

The Chancellor will solicit recommendations for pairings from the broader education community and invite interested schools to submit a proposal. Interested schools will submit a proposal with a plan indicating the reasons schools wish to participate; evidence of consultation with the school community through the appropriate channels, e.g. the School Leadership Team; anticipated benefits to both schools, and plan for implementation. The DOE and UFT will jointly review the applications. The UFT will be consulted on Education Exchange School pairings before final designations are made. Education Exchange Schools will be selected by the Chancellor and the number of schools, if any, positions, and licenses will be at the discretion of the Chancellor. The Chancellor reserves the right to cancel the exchange for any pairing by notification to the UFT and affected parties by August 31.

During the Ambassador Year, in addition to classroom teaching responsibilities, the Teacher Ambassadors will be expected, consistent with the collective bargaining agreement ("CBA"), to support and engage in activities to promote the sharing, implementation and development of instructional best practices in both Exchange Schools. Teacher Ambassadors will have the same contractual rights and privileges as teachers except as set forth below.

Teacher Ambassadors shall receive additional compensation in the amount of \$7,500 per year for the term of this agreement above the applicable teacher salary in accordance with the CBA.

Teacher Ambassadors will work an additional two days during the summer to be scheduled during the week preceding Labor Day and an additional two hours each month outside the normal workday, according to a schedule and plan set and approved by the Education Exchange School's principal.

For teachers serving as Teacher Ambassadors school seniority during and after the Ambassador year shall be considered to be continuous as if there is no change in schools.

Teaching program assignments shall be at the discretion of the Education Exchange School principal.

The Ambassador Year will be for one school year, e.g. September to June. During that time, the Teacher Ambassador will be assigned to the Exchange School. At the conclusion of the Teacher Ambassador year, the teacher will be assigned back to their home school (i.e., the school they were assigned to prior to the Ambassador Year). Teacher Ambassadors must commit to serve the full school year in the Exchange School and must commit to serve at their home school at the conclusion of their Teacher Ambassador year for a minimum of one additional school year. The Chancellor may waive these provisions in extraordinary circumstances.

Teacher Ambassadors will be selected in the following manner:

Postings will be developed jointly by the Exchange School principals in consultation with the UFT. The postings will delineate the teaching assignments in each school (e.g., grade level(s) and subject). Postings will require an Effective or Highly Effective rating (or Satisfactory rating where applicable) in the prior school year for eligibility. Selection will be made by both principals in accord with the selection criteria contained in the posting. Selections will be made by the end of the school year or as soon thereafter as possible.

Master Teacher

In addition to their duties as a teacher, Master Teachers will take on additional responsibilities to support the instructional practice of other teachers in their school. Master Teachers will work closely with school leadership on developing instructional capacity through activities such as coordinating school-based instructional support activities; leading study groups around standards, assessments, and instruction; serving in teacher leadership positions on school teacher teams; coaching and debriefing with teachers after classroom visits; assisting in the establishment of teachers' professional development goals; and modeling best practices in their classroom.

Master Teachers shall receive additional compensation in the amount of \$20,000 per year for the term of this agreement above the applicable teacher salary in accordance with the CBA.

Master Teachers will work an additional three days during the summer to be scheduled during the week preceding Labor Day according to a schedule and plan set and approved by the superintendent. Master Teachers will also work an additional four hours each month during the school year outside the contractual workday according to a schedule created by the Master Teacher and approved by the principal.

Master Teachers will be relieved from a minimum of one teaching period each day and will use this time as well as their professional periods to perform responsibilities associated with their position as a Master Teacher.

The Master Teacher will carry out the additional responsibilities associated with his/her position as a Master Teacher during the contractual workday and the additional four hours per month according to a plan created by the Master Teacher and reviewed and approved by the principal on a monthly basis.

Participation by other teachers in activities involving the Master Teacher will be done in accordance with the CBA.

Master Teachers will be selected and assigned in the following manner.

A UFT-DOE Joint Selection Committee consisting of an equal number of members selected by the Chancellor and by the UFT President will be established to screen and select qualified applicants to create a pool of eligible candidates. Postings will require an Effective or Highly Effective rating (or Satisfactory rating where applicable) in the prior school year for eligibility. The Joint Selection Committee may choose to have a process whereby incumbent Master Teachers may be renewed in the eligible pool through a modified screening and selection process.

Unless otherwise agreed to by the parties, the Joint Selection Committee will post for the pool in the spring and conduct the screening and selection process by July 1. Final selections for candidates will be made by the conclusion of the Open Market. The Joint Selection Committee will agree to a process whereby, if necessary, additional vacancies that arise during the school year can be filled from qualified candidates.

Principals will make selections of Master Teachers only from the pool of eligible candidates selected by the Joint Selection Committee. Individuals in the pool selected by a principal are not obligated to accept an offer for a Master Teacher position.

The Master Teacher position will be for a term of one year.

Model Teacher

In addition to their duties as a teacher, Model Teachers will take on additional responsibilities to support the instructional practice of other teachers in their school through activities such as establishing a laboratory classroom in their own class-

room; demonstrating lessons; exploring emerging instructional practices, tools or techniques; and reflecting on and debriefing a visit from a colleague.

Model Teachers shall receive additional compensation in the amount of \$7,500 per year for the term of this agreement above the applicable teacher salary in accordance with the CBA.

Model Teachers will work an additional two days during the summer to be scheduled during the week preceding Labor Day according to a schedule and plan set and approved by the superintendent. Model Teachers will also work an additional two hours each month during the school year outside the contractual workday according to a schedule created by the Model Teacher and approved by the principal.

Model Teachers will use their professional periods to perform responsibilities associated with their position as a Model Teacher. In elementary schools organized on a seven-period per day schedule, Model Teachers will be relieved of teaching for a minimum of two periods per week to perform responsibilities associated with their position as a Model Teacher. In elementary schools organized on an eight-period per day schedule, Model Teachers will be relieved of teaching for a minimum of one period per week in addition to their weekly professional period to perform responsibilities associated with their position as a Model Teacher. In addition to these two periods, Model Teachers in elementary schools may request that principals work with them to try to identify additional opportunities in the school day/year to perform responsibilities associated with the position.

The Model Teacher will carry out the additional responsibilities associated with their position as a Model Teacher during the contractual workday and the additional two hours per month according to a plan created by the Model Teacher and reviewed and approved by the principal on a monthly basis.

Participation by other teachers in activities involving the Model Teacher will be done in accordance with the CBA.

Model Teachers will be selected and assigned in the following manner:

A UFT-DOE Joint Selection Committee consisting of an equal number of members selected by the Chancellor and by the UFT President will be established to screen and select qualified applicants to create a pool of eligible candidates. Postings will require an Effective or Highly Effective rating (or Satisfactory rating where applicable) in the prior school year for eligibility. The Joint Selection Committee may choose to have a process where incumbent Model Teachers may be renewed in the eligible pool through a modified screening and selection process.

Unless otherwise agreed to by the parties, the Joint Selection Committee will post for the pool in the spring and conduct the screening and selection process by July 1 with final selections for candidates made by the conclusion of the Open Market. The Joint Selection Com-

mittee will agree to a process whereby, if necessary, additional vacancies that arise during the school year can be filled from qualified candidates.

Principals will make selections of Model Teachers only from the pool of eligible candidates selected by the Joint Selection Committee. Individuals in the pool selected by a principal are not obligated to accept an offer for a Model Teacher position.

The position will be for a term of one year.

General

Selection decisions for the position of Master Teacher, Model Teacher, and Teacher Ambassador (together, Teacher Leadership positions) shall not be grievable. This includes both the selection for the actual position by the principal or entry into the pool of qualified candidates as determined by the Joint Selection Committee.

Only tenured DOE teachers who have earned a rating of "Highly Effective," "Effective" or "Satisfactory," where applicable, in the prior school year will be eligible to serve in Teacher Leadership positions. A teacher earning any other rating is ineligible to continue to in the position. Additional criteria may be established by the Joint Selection Committee for each position. All DOE teachers, regardless of district, program or superintendency who meet the eligibility criteria, are eligible to apply.

Teachers selected for a Teacher Leadership position are expected to remain in that position for the entire school year. However, during the year should the teacher and principal mutually agree that a teacher will not continue in the Teacher Leadership position, the teacher will remain in the school as a teacher without the additional compensation or responsibilities associated with that Teacher Leadership position.

Should a teacher in a Teacher Leadership position be reassigned or go on a leave with pay he/she shall cease to earn the additional compensation.

Master Teachers and Model Teachers who have transferred from another school and who do not serve a second school year in the position or who by mutual agreement have ceased serving in the position during the school year, may at the end of the first school year return to the last school they served in provided there is a vacancy in their license area. If there is no vacancy then the teacher may return to the district/superintendency.

Other than the above provision, during or after the school year, any issue regarding a Teacher Leadership leaving their position and their school is subject to regular transfer procedures.

For the 2014-15 school year only, should the Chancellor implement Education Exchange Schools with Teacher Ambassador positions, then the Master Teacher and Model Teacher positions must also be in effect.

No later than August 1, 2014, the Chancellor will determine,

at his/her sole discretion, whether or not the Master Teacher and Model Teacher positions will be in effect for the 2014-15 school year. The Chancellor's determination shall be final and not grievable. Should the Chancellor choose to have Master Teacher and Model Teacher positions, the DOE will ensure creation of the Master Teacher and/or Model Teacher positions by a minimum of forty (40) schools at each of the levels: elementary, middle and high. The Chancellor shall have the discretion to increase the number of schools above the minimums at each level in differing amounts.

By August 1, for every subsequent school year, the Chancellor will make a determination whether or not the Teacher Leadership positions will be available for schools for the upcoming school year. The Chancellor's determination shall be final and not grievable. If the Chancellor determines in his or her discretion that Teacher Leadership positions will be created for that school year, then the Chancellor will ensure that at least 20% of the schools that create Master Teacher and/or Model Teacher positions will be at each of the levels: elementary, middle and high.

Should the Chancellor determine by August 1st that there will be no Master Teacher or Model Teacher positions in effect for the upcoming school year, any teacher who has been selected for a transfer to a Master Teacher or Model Teacher position in a different school shall have the right to remain in their current school and the teacher shall be treated as if the transfer never occurred.

For purposes of this agreement K-8 schools including those that have pre-K programs shall be considered elementary or middle schools and grades 6-12 schools shall be considered middle or high schools.

The UFT and DOE agree to revisit the existing position in the collective bargaining agreement of "Lead Teacher" prior to the 2015-16 school year to determine if it should be continued, modified or converted into other Teacher Leadership positions set forth in this agreement.

For purposes of this "General" Section, the term "teachers" shall refer to teachers, guidance counselors, social workers and school psychologists with respect to Teacher Ambassador.

8. SEXUAL MISCONDUCT

The parties agree to revise the definition of sexual misconduct in Article 21 of the collective bargaining agreement covering teachers and corresponding articles of other UFT-BOE collective bargaining agreements as follows:

Definitions

For purposes of this subdivision "student" shall mean a student or any minor. Sexual Misconduct, as used herein, shall not be construed to include nonsexual touching or other non-sexual conduct.

A. Sexual Misconduct is behavior that is intended to initiate, create, foster or advance a romantic or sexual relationship

by an employee with a student, whether physical, verbal, in writing or by electronic means, regardless of location. It includes:

- i. Any sexual physical contact, or touching, without a legitimate purpose, including any act of sexual penetration with an object or body part;
- ii. Exposing a student to drawings, photographs or other representations of a sexual nature, whether verbal, written, electronic or physical, without a legitimate purpose (this prohibition is not intended to preclude the use of depictions of nudity for legitimate purposes, for example, with reference to biology, health or art);
- iii. Providing a gift to a student, making sexual or romantic comments or discussing sexual acts with a student, for the purpose of initiating, creating, fostering or advancing a romantic or sexual relationship.

B. Sexual Misconduct also includes:

- i. Publishing, recreating or reproducing images of a sexual act involving a student;
- ii. Any act of public lewdness, as defined in section 245.00 of the Penal Law, or exposure, as defined in section 245.01 of the Penal Law, directed at a student, that occurs on or off of school grounds;
- iii. Possession or use of child pornography as defined by the Penal Law, unless the respondent can demonstrate that such possession was inadvertent;
- iv. Serious or repeated verbal abuse, as defined in the Chancellor's regulations, of a sexual nature;
- v. Any action involving the use of an imaging device that would constitute criminal conduct as defined under sections 250.40, 250.45 or 250.50 of the Penal Law;
- vi. Inducing or attempting to induce incapacitation or impairment of a student for the purpose of having sexual intercourse, sexual contact or for the purpose of creating pornographic images or materials, regardless of whether sexual activity actually takes place; and
- vii. Any action that would constitute criminal conduct under Article 130 of the Penal Law against a student.

9. EDUCATION LAW 3020-A MEDIATION & ARBITRATION

Mediation

1. In an effort to reduce a backlog of Education Law §3020-a cases the Board (DOE) and UFT shall meet to determine which §3020-a cases charged on or before June 30, 2014, shall be subject to mediation as set forth below. The parties shall commence mediation on or about, July 1, 2014.
2. The DOE and UFT shall agree on the number of neutrals to function as mediators. Neutrals shall mediate six (6) cases per day.

3. The employee (and the employee's representative, if any) and a representative of the DOE with authority to negotiate settlement agreements (subject to final supervisory approval) shall meet with the mediator. The mediator shall work informally to assist the charged employee and the DOE in reaching, if possible, a voluntary, negotiated resolution of the Education Law §3020-a charges. The mediator shall not decide the merits of the charges or impose a decision. No mediator shall be compelled to or voluntarily disclose (including in any subsequent proceedings under §3020-a of the Education Law) any information learned during mediation.
4. The DOE and UFT shall share equally all costs associated with the mediation.

Hearing Officers

1. The parties agree to seat a minimum of 25 hearing officers to hear all §3020-a cases. Should the parties fail to agree on the number of hearing officers by April 30th of preceding given school year and/or the Panel on which they will serve, either the DOE or UFT shall submit the matter to the Fact-Finding Panel consisting of Martin F. Scheinman, Howard Edelman, and Mark Grossman for binding arbitration to determine the number of hearing officers and/or the Panel on which they will serve that will sit for §3020-a cases the following school year. For the 2014-15 school year the parties have agreed to seat 25 hearing officers to hear §3020-a cases.
2. To select hearing officers, the parties shall, each year, following April 30th, exchange in good faith lists of no fewer than 10 hearing officers for consideration every other week. If the full panel is not seated by October 15th of that school year the DOE or UFT may request the Fact-Finding Panel consisting of Martin F. Scheinman, Howard Edelman, and Mark Grossman select the remaining hearing officers, subject to an individual hearing officer's agreement to serve, necessary to complete the panel of §3020-a hearing officers.

Teacher Performance Unit – Hearing Officer Dates

Hearing officers serving on the competence panel must agree to provide five (5) hearing dates (as defined in Article 21(G) (2)(a) of the Teachers' Collective Bargaining Agreement) per month for the months of September through June and two (2) hearing dates per month for the months of July and August.

10. DOE CALENDAR – EMERGENCY CLOSINGS

Article 6C of the Teachers' CBA and corresponding Articles of the other UFT-BOE CBAs shall be as amended to add the following:

The Board of Education ("DOE") and UFT recognize that due to emergency conditions (including, but not limited to snow closings) there may be situations where the DOE may fall short of the minimum number of instructional days required annually by the Education Law.

Prior to opening of each school year, the DOE and UFT agree to jointly determine those vacation days during designated recess periods which shall be used in the event that there is a need to make up days in order to meet the statutory minimum and the order in which such days would be used.

In no event shall the number of make-up days exceed the number needed to meet the minimum required by the Education Law.

11. USE OF SICK DAYS FOR ILL FAMILY MEMBERS

Revise Article 16(A)(11) of the Teachers' collective bargaining agreement and corresponding provisions of other UFT-DOE collective bargaining agreements to provide that employees will be allowed to use up to three (3) sick days per year for the care of ill family members.

12. DISCIPLINE FOR AUTHORIZED ABSENCES

Amend all UFT-DOE collective bargaining agreements to add the following:

No employee shall be disciplined, adversely rated or have any derogatory material placed in his/her file for taking an approved sabbatical for restoration of health, approved unpaid leave for restoration of health or a central DOE approved paid leave. Discipline for time and attendance is not a reflection of the employee's performance while at work.

13. RETURN FROM LEAVE OF ABSENCE

Amend Article 16E of the Teachers' CBA to add a new subsection 3:

Commencing with the beginning of the 2014-15 school year, employees on leaves of absence, for one school year or semester, through the end of the school year, must notify the DOE's Chief Executive Officer of the Division of Human Resources or his/her designee in a manner prescribed by the DOE on or before May 15th of their intent to either return to service or apply to extend their leave of absence for the following school year. Failure to comply with this deadline shall be deemed as a voluntary resignation from the DOE, except in cases where it can be demonstrated that special circumstances prevented the employee from notifying the DOE.

Notwithstanding this notification given to the Board (DOE), prior to the commencement of the school year an employee may return to service or apply to extend his/her leave if he/she can demonstrate relevant circumstances materially changed after May 15th provided that the employee acts expeditiously following the change in circumstances. An application to extend a leave made under these circumstances shall be granted under the same circumstances as one made on or before May 15th.

An employee on leave for a restoration of health shall be required to notify the DOE's Chief Executive Officer of the Division of Human Resources or his/her designee, in a manner prescribed by the DOE on or before May 15th, of his/her

medical status and any plans, if known, as to whether he or she intends to return to work the following school year. Failure to notify the DOE in writing by May 15th shall be deemed as a voluntary resignation from the DOE, except in cases where it can be demonstrated that special circumstances prevented the employee from notifying the DOE.

Whether special circumstances prevented an employee from notifying the DOE on or before May 15th, relevant circumstances materially changed after May 15th, or an employee acted expeditiously shall be subject to the grievance procedure, including binding arbitration.

14. NURSES

The parties agree that nurses are entitled to a 30-minute uninterrupted lunch period. Nurses in single-nurse schools whose lunch period is interrupted due to a medical emergency shall have their entire 30-minute lunch period rescheduled by their supervisor between the hours of 11:30 and 2:30. Should a nurse not be able to take a complete 30-minute uninterrupted lunch period during those hours, the nurse shall be entitled to one-half of his/her hourly rate of pay provided the nurse submits documentation to his/her supervisor in a timely manner with the relevant information about the medical emergency.

15. SCHOOL PSYCHOLOGISTS AND SOCIAL WORKERS PER SESSION

For Side Letter:

"This letter shall serve as the DOE's acknowledgment of Article 23.A.13 of the School Social Workers and Psychologists CBA. School Psychologists will have up to 20 hours of per session work per year available to them with supervisor approval only as to scheduling (which approval shall not be unreasonably denied) in order to assist in allowing them to fulfill their case management duties, without the necessity of posting such work."

16. ABSENT TEACHER RESERVE

For purposes of this agreement, ATRs shall be defined as all UFT-represented school based titles in excess after the first day of school, except paraprofessionals and occupational and physical therapists.

Severance Program

The employer shall offer a voluntary severance benefit (the "Severance Program") to ATRs who volunteer to resign/retire and who execute an appropriate release in a form prescribed by the Board (DOE) and subject to legal requirements.

The period during which ATRs may volunteer to separate from the DOE in accordance with the terms of the Severance Program shall commence on the 30th day and shall terminate at 5 p.m. on the 60th day following the Union's ratification of this Agreement.

Other than employees who have agreed in writing to resign from the DOE, employees who are ATRs as of June 1, 2014 who volunteer for the Severance Program shall receive a severance payment according to the following schedule:

One (1) week of pay for ATRs with three (3) years of service or more, but less than four (4) years of service, as of the date of ratification of this Agreement.

Two (2) weeks of pay for ATRs with four (4) years of service or more, but less than six (6) years of service, as of the date of ratification of this Agreement.

Three (3) weeks of pay for ATRs with six (6) years of service or more, but less than eight (8) years of service, as of the date of ratification of this Agreement.

Four (4) weeks of pay for ATRs with eight (8) years of service or more, but less than ten (10) years of service, as of the date of ratification of this Agreement.

Five (5) weeks of pay for ATRs with ten (10) years of service or more, but less than twelve (12) years of service, as of the date of ratification of this Agreement.

Six (6) weeks of pay for ATRs with twelve (12) years of service or more, but less than fourteen (14) years of service, as of the date of ratification of this Agreement.

Seven (7) weeks of pay for ATRs with fourteen (14) years of service or more, but less than sixteen (16) years of service, as of the date of ratification of this Agreement.

Eight (8) weeks of pay for ATRs with sixteen (16) years of service or more, but less than eighteen (18) years of service, as of the date of ratification of this Agreement.

Nine (9) weeks of pay for ATRs with eighteen (18) years of service or more, but less than twenty (20) years of service, as of the date of ratification of this Agreement.

Ten (10) weeks of pay for ATRs with twenty (20) years of service or more, as of the date of ratification of this Agreement.

For purposes of this Severance Program, one week of pay shall be defined as 1/52nd of an ATR's annual salary.

In the event that any ATR who volunteers to participate in the Severance Program returns to service with the DOE, the ATR shall repay the severance payment received pursuant to the above within six (6) months of the ATR's hiring to such position, through payroll deductions in equal amounts. This repayment provision shall not apply to ATRs who return to work as day-to-day substitute teachers.

Interviews

During the period September 15, 2014 through October 15, 2014 (and during the same period in each subsequent year to the extent this ATR Program is continued as set forth below), the employer will arrange, to the greatest extent reasonably possible, for interviews between ATRs and schools with applicable license-area vacancies within the district or borough to which the ATR is assigned. After October 15, ATRs may con-

tinue, at the DOE's discretion, to be sent to interviews within the district or borough for applicable license-area vacancies. An ATR that declines or fails to report to an interview, upon written notice of it, two or more times without good cause shall be treated as having voluntarily resigned his/her employment.

When an ATR is selected by a principal for a permanent placement in either the district or borough, the ATR shall be assigned to fill the vacancy in his/her license area, be placed on the school's table of organization and take his/her rightful place in seniority order. Schools may continue to hire ATRs on a provisional basis consistent with existing agreements between the parties. An ATR that fails to accept and appear for an assignment within two (2) work days of receiving written notice of the assignment without good cause shall be treated as having voluntarily resigned his/her employment.

Any school that selects an ATR for a permanent placement will not have that ATR's salary included for the purpose of average teacher salary calculation.

ATR in Districts 75 and 79 shall be sent for interviews only in the same borough, within their respective district, as the school to which they were previously assigned.

ATR in BASIS shall be sent for interviews only in the same borough as the school to which they were previously assigned.

Assignments of ATRs

After October 15, 2014, ATRs, except those who have been penalized (as a result of a finding of guilt or by stipulation) in conjunction with §3020-a charges with a suspension of 30 days or more or a fine of \$2,000 or more, will be given a temporary provisional assignment to a school with a vacancy in their license area where available. The DOE, at its sole discretion, may choose to assign ATRs to a temporary provisional assignment who have been penalized (as a result of a finding of guilt or by stipulation) in conjunction with §3020-a charges with a suspension of 30 days or more or a fine of \$2,000 or more.

The DOE shall not be required to send more than one ATR at a time to a school per vacancy for a temporary provisional assignment. These assignments will first be made within district and then within borough. For purposes of the ATR Program, ATRs shall also be given temporary provisional assignments to cover leaves and long term absences within their license area within district and then within borough. ATRs in Districts 75 and 79 shall be given temporary provisional assignments only in the same borough within their respective district as the school to which they were previously assigned.

All temporary provisional assignments for an ATR in BASIS will be within the same borough as the school to which they were previously assigned.

It is understood that at any time after a temporary provisional assignment is made, a principal can remove the ATR from this assignment and the ATR will be returned to the ATR pool and be subject to the terms and conditions of employment then

applicable to ATRs pursuant to the parties' collective bargaining agreement(s).

If a principal removes an ATR from an assignment to a vacancy in his/her license area because of problematic behavior as described below and the ATR is provided with a signed writing by a supervisor describing the problematic behavior, this writing can be introduced at an expedited §3020-a hearing for ATRs who have completed their probationary periods, as set forth below.

If, within a school year or consecutively across school years, two different principals remove an ATR who is on a temporary provisional assignment to a vacancy in his/her license area for problematic behavior and provide the ATR with a signed writing describing the problematic behavior, the ATR shall be subject to discipline up to and including discharge as provided below. The ATR will be returned to the ATR pool pending completion of the expedited ATR §3020-a procedure set forth below.

An ATR who has been placed back in the ATR pool will be in the rotation to schools unless he/she is again offered a temporary provisional assignment at another school. Rotational assignments or assignments to a school (as opposed to a vacancy in his/her license area) shall not form the basis of an incident of problematic behavior as described herein.

To the extent that the provisions of this section conflict with the provisions of the Memorandum of Agreement dated June 27, 2011, the provisions of this section shall govern.

ATR §3020-a Procedure

If, within a school year or consecutively across school years, an ATR has been removed from a temporary provisional assignment to a vacancy in his/her license area by two different principals because of asserted problematic behavior, a neutral arbitrator from a panel of arbitrators jointly selected for this purpose (the panel presently consisting of Martin F. Scheinman, Howard Edelman and Mark Grossman) shall convene a §3020-a hearing as soon as possible.

Based on the written documentation described above and such other documentary and/or witness evidence as the employer or the respondent may submit, the hearing officer shall determine whether the ATR has demonstrated a pattern of problematic behavior. For purposes of this program, problematic behavior means behavior that is inconsistent with the expectations established for professionals working in schools and a pattern of problematic behavior means two or more instances in a vacancy in the ATR's license area of problematic behavior within a school year or consecutively across school years. Hearings under this provision shall not exceed one full day absent a showing of good cause and the hearing officer shall issue a written decision within 15 days of the hearing date.

The parties agree that in order to accomplish the purpose of establishing an expedited §3020-a process, the following shall serve as the exclusive process for §3020-a hearings for ATRs that have been charged based on a pattern of problem-

atic behavior in accordance with this agreement.

- The ATR shall have ten (10) school days to request a hearing upon receipt of the §3020-a charges;
- At the same time as the ATR is charged, the Board (DOE) will notify the UFT as to where the ATR is assigned at the time charges are served;
- The employer shall provide the Respondent all evidence to be used in the hearing no more than five (5) school days after the employer receives the Respondent's request for a hearing;
- Within five (5) school days of receipt of the employer's evidence, the Respondent shall provide the employer with any evidence the Respondent knows at that time will be used in the hearing;
- The hearing shall be scheduled within five to ten (5-10) school days after the exchange of evidence is complete;
- The hearing time shall be allocated evenly between the parties, with time used for opening statements, closing statements and cross-examination allocated to party doing the opening statement, closing statement or cross-examination and with time for breaks allocated to the party requesting the break;
- The hearing officer shall issue a decision within 15 days of the hearing date.

For the purposes of charges based upon a pattern of problematic behavior under this section only, if the DOE proves by a preponderance of the evidence that the ATR has demonstrated a pattern of problematic behavior the hearing officer shall impose a penalty under the just cause standard up to and including discharge.

All hearing officer fees in excess of the SED rate shall be shared equally by the parties.

It is understood that allegations of conduct which would fall within the definition of sexual misconduct or serious misconduct as defined in the applicable collective bargaining agreements shall be addressed through the existing process in Article 21(G) of the Teachers CBA and corresponding articles of other UFT-BOE CBAs.

Term

This agreement with respect to the absent teacher reserve (referred to above as the "ATR Program") shall run through the end of the 2015-16 school year. At the end of that term, the parties must agree to extend the ATR Program and absent agreement, the parties shall return to the terms and conditions for ATR assignment as they exist in the 2007-2009 collective bargaining agreement(s) and memoranda of agreement entered into prior to ratification of this Agreement.

The parties agree and understand that the due process protections provided in this provision shall modify the provisions of Education Law § 3020-a and any other agreements between the parties.

17. HARD TO STAFF SCHOOL DIFFERENTIAL

In order to promote teacher retention and recruitment to high need schools which have staffing challenges, teachers who work and remain at designated Hard to Staff schools will be eligible to receive a Hard to Staff school annual salary differential. For each school year, the Chancellor shall have the sole discretion to determine the Hard to Staff schools that will be eligible and the amount of the differentiated compensation. The Chancellor will consult with the UFT prior to designating schools and the differential amount. The determinations as to the schools and amounts shall be final and not grievable. All teachers serving in these Hard to Staff designated schools, including transfers and new hires, shall be eligible to receive the same annual salary differential except as delineated below. The differential shall be paid in a lump sum by October 31 of the following school year. To receive the differential, teachers must have earned a rating of "Highly Effective", "Effective", or "Developing", or Satisfactory where applicable, and be in active service in, or be on an approved leave from, the designated Hard to Staff school at the time the lump sum payment is made in the fall of the following school year. Teachers who serve less than five months of cumulative active service at the school are not eligible to receive the differential. Teachers serving greater than five months but less than the full year shall receive a pro-rata share of the differential.

18. ARBITRATION DATES

Article 22C of the Teachers' CBA and corresponding Articles of the other UFT-BOE CBAs shall be amended to add the following:

The total number of arbitration dates shall be increased from 175 to 200 dates per year.

19. PROGRESSIVE REDESIGN OPPORTUNITY SCHOOLS FOR EXCELLENCE (PROSE)

Amend all UFT-BOE Collective Bargaining Agreements to add:

1. Mission

- a. To achieve success and outstanding results through a truly collaborative environment for all schools at all levels among the key stakeholders responsible for educating New York City's schoolchildren – teachers and other school-based staff, principals, and parents.
- b. To build this Partnership on a basis of collaboration and mutual respect that empowers school-based staff (including administrators) and enables students to learn, thrive, and achieve mastery.
- c. To treat instructional staff as professionals by empowering them and holding them responsible for providing the highest quality of teaching.
- d. To foster continuous innovation in the way that labor and management, principals, supervisors, and teachers and other school-based staff share information, share deci-

sion-making, and share accountability for student achievement and sound educational outcomes.

- e. To empower school-based staff to embrace new ways of teaching children, even if this means modifying certain existing regulations and work rules. This includes reexamining current instructional practice, such as the school day and school year, student assessment, evaluation, and class size.
- f. To leverage technology in instruction to engage students and improve professional development. This Partnership will use technology to improve the assessment of student learning, workforce engagement, and parent satisfaction.
- g. To use joint training and labor-management facilitators.
- h. To give existing schools the opportunity and flexibility to change certain rules and challenge the traditional way of doing things – provided they meet specific, measurable performance targets.
- i. To demonstrate creativity and innovation in the pursuit of educational excellence.

2. Joint PROSE Panel.

- a. Upon ratification of the successor collective bargaining agreements to the 2007-2009 collective bargaining agreements, a collaborative, decision-making Panel made up of an equal number of members selected by the UFT President and the Chancellor will invite school teams of UFT-represented employees and CSA-represented administrators to submit proposals for five years long for participation in the PROSE program where schools with real educator voice and decision making input and/or authority are permitted to design schools that work best for the students and communities they serve.
- b. The program will begin as soon as practicable, consisting of a mix of high- and low achieving schools, and a mix of elementary, middle, and high schools.
- c. The Panel will set a goal of implementing 200 PROSE Program schools over the next five years that will be overseen and report into the office of the Senior Deputy Chancellor.
- d. Proposals will be for a maximum of five years. The Panel may end a school's participation in the program only if the school is not succeeding.

3. How the Joint Panel screens and evaluates proposals.

- a. Proposals will be screened based on the extent to which they demonstrate:
 - i. Partnership between UFT-represented employees and CSA-represented administrators in decision-making;
 - ii. A proven record of previous collaboration and success (which includes, but is not limited to, academic success on assessments);

- iii. Creativity and flexibility in modifying DOE-regulations and CBA provisions as specified in paragraph (x) of this subsection;
- iv. A school community where many voices are listened to;
- v. Strong buy-in from both UFT-represented employees and CSA-represented administration;
- vi. A commitment to capacity-building and sustainability from the Board (DOE), UFT and CSA;
- vii. Jointly-designed and job-embedded professional development and training;
- viii. A five year commitment to the proposal;
- ix. Measurable, reportable performance targets (defined more broadly than academic success on assessments). If any school does not meet its targets, the panel may take away its PROSE status at the end of five years or sooner;
- x. Proposals may (but do not have to) include changes to articles of the Teachers' CBA and corresponding articles of other UFT-DOE CBAs that relate to (i) configuration of the existing work hours and/or work year (Article 6), including extending the school day and/or year, provided there is no diminution of annual salary; (ii) programs, assignments and teaching conditions in schools and programs (Article 7); professional support for new teachers (Article 8G); (iii) evaluation; (iv) professional development assignments and positions (Article 11 IV); (v) working conditions of per session teachers (Articles 15C2 and 15C4); (vi) Step 1 of the grievance process (Article 22B1a); and (vii) transfers to the school (Article 18A, paragraph 1, sentence 2). The Chancellor and UFT President may agree to other articles of the Teachers' CBA that schools may propose to change. Proposals may (but do not have to) include modifications to Chancellor's Regulations except those affecting student safety or implementing state and federal laws and regulations.

b. Proposals must include:

- i. Evidence of the school's current success, or if a group, at least one school in the group's success in providing a quality education to students. The Panel will consider multiple measures of success, not only academic measures. Schools that serve high-need students and schools without screened or selective admissions are especially encouraged to apply.
- ii. A list of the types of innovative, teacher-led practices that the school currently uses or is planning to use to promote student success. Examples could include: school-based staff selection procedures, UFT-represented employee representation on and powers of current school committees that positively influence the quality of instruction delivered to students, School-Based options for scheduling or other policies;

- iii. A specific description of how the school intends to use the contractual and regulatory flexibility of the PROSE program to provide employees with decision-making input and authority in the school and build on its successes during the duration of the plan. As part of their proposals, schools may choose to establish committees consisting of key school-based stakeholders to examine resource allocation, schedules, curriculum, technology, professional development, hiring, and parent engagement.
- vi. A proposed budget for the initial year, including both current budgetary resources and any requested supplementary funds. No such supplemental funds are guaranteed. The UFT and DOE will commit to pursuing additional outside funding to support innovative school plans, where feasible. The PROSE program is not contingent on securing additional outside funding.
- v. A mechanism for PROSE Program schools to regularly report their progress to the Panel including, but not limited to, annual goals and budgets.

4. How a school becomes a PROSE Program School.

- a. Applying schools must submit a proposal which has been approved by the School Leadership Team of their school.
- b. To be accepted, the UFT and DOE Panel members must agree to accept the proposal and allow a school's participation in the PROSE program. Once approved by the Panel (including any required revisions), a proposal is submitted to the school for adoption.
- c. The proposal may be implemented only upon ratification by sixty-five percent of all those UFT-represented employees voting and acceptance by the school's principal. Proposals may also be modified by the same ratification and approval process set forth in this subsection 4.
- d. UFT-represented employees who wish to transfer out of a school that has been approved to participate in the PROSE program may do so on the same basis as similarly situated employees, with the exception that teachers who wish to transfer out of the school for the 2014-15 school year may do so by October 15th without Principal release if they find another position in accordance with the applicable CBA.
- e. If accepted and approved as provided herein, the UFT, DOE and the applying school will implement the proposal as approved.
- f. Individual schools or groups of schools may apply; however, preference will be given to groups of schools which demonstrate a mix of types of schools. Where a group of schools apply, each school in the group must ratify the proposal by 65%, as provided herein, in order to participate.
- g. Participation in the PROSE program can be renewed at the expiration of the initial proposal term, in accordance with the Panel's approval, and with ratification by sixty-five percent of school's staff, and approval by the school's principal,

and a vote of the school leadership team.

- h. The Panel shall, as soon as practicable, implement the PROSE program, adopt application procedures, and accept proposals from schools.
- i. The DOE and UFT will collaborate in developing pre-application and post-application workshops to be delivered during the 2014-15 school year for applications which will be implemented after the 2014-15 school year.

5. New Schools.

- a. The DOE and the UFT will develop an alternative process for the creation of new schools that are proposed by either teachers and parents.
- b. These schools can be proposed in addition to the 200 PROSE Program Schools and if approved in accordance with the agreed upon procedures will have the same flexibility with regard to Chancellor's regulations and work rules as PROSE Program Schools.

20. MISCELLANEOUS

- a. Unless expressly stated otherwise, the provisions of this Agreement apply to the bargaining units and titles covered in paragraph 3 above and will be incorporated into the individual unit agreements as applicable.
- b. In the event any inconsistency exists between the terms contained in this Agreement and the expired collective bargaining agreements, this Agreement shall be determinative.

21. INTERIM AGREEMENTS

The agreements (annexed hereto collectively as APPENDIX B) reached during the term of the collective bargaining agreements effective October 13, 2007 to October 31, 2009 are to be included in the applicable successor agreements subject to such modifications as are required by this agreement and its Appendices.

22. RATIFICATION

This Agreement is subject to ratification by the Union, and adoption by the Board of Education

23. SAVINGS CLAUSE

In the event that any provision of this Agreement is found to be invalid, such invalidity shall not impair the validity and enforceability of the remaining provisions of this Agreement.

SCHOOL ALLOCATION MEMORANDUM NO. 41, FY 2016

DATE: June 11, 2015

TO: Community Superintendents
High School Superintendents
Borough Field Service Center Teams
School Principals

FROM: Raymond J. Orlando, Chief Financial Officer

SUBJECT: Priority and Focus School Allocations

ESEA Flexibility Waiver

In September 2011, the federal government announced an ESEA regulatory initiative, inviting states to request flexibility regarding specific requirements of the No Child Left Behind Act (NCLB) of 2001 in exchange for state-developed plans designed to improve educational outcomes for all students, close achievement gaps, increase equity, and improve the quality of instruction. The **New York State Education Department (NYSED)** received approval from the **U.S. Department of Education (USDOE)** for its flexibility waiver request, authorizing New York State to revise its accountability system and provide schools across New York State with flexibility in aligning resources to increase student outcomes. For additional information regarding specific provisions waived please visit: <http://www.p12.nysed.gov/esea-waiver/>

The waiver replaces the previous identification system and categories (Persistently Lowest-Achieving, Restructuring, Corrective Action, In Need of Improvement, In Good Standing, Rapidly Improving, and High Performing) with the new categories of Priority Schools, Focus Districts and Focus Schools, Local Assistance Plan Schools, and Reward Schools.

Effective 2012-13 through 2014-15 (with a renewal request submitted by NYSED to USDOE for 2015-16), the new system introduces more realistic performance targets and puts greater emphasis on student growth and college- and career-readiness, which aligns with the Chancellor's priorities.

The ESEA waiver grants flexibility in the following areas:

- 2013-14 Timeline for All Students Becoming Proficient
- School and District Improvement Requirements
- Highly Qualified Teacher Improvement Plans
- Schoolwide Program (SWP) Eligibility
- Use of School Improvement Grant (SIG) Funds
- Twenty-First Century Community Learning

- Determining Annual Yearly Progress (AYP) for each school and district (optional)
- Rank Order
- Supplementary Educational Services (SES)

This flexibility allows schools the opportunity to align resources and design programs that meet the specific needs of students to increase outcomes. It also **releases all Title I schools from the requirement of setting aside 5% and 10% of their allocation to support the highly qualified and professional development mandates**, though schools must continue to meet the Highly Qualified Teachers Federal mandates.

Allocation and Requirements

As per the ESEA Flexibility waiver, funds are to be reserved for Priority and Focus schools in support of allowable programs and activities approved by NYSED. The Title I reserve is based on the Title I borough appropriation, the number of identified schools in need of improvement as per NYSED's 2014-2015 accountability designation, and the resulting borough percentages that range from 5% to 8%. Four of the five boroughs were identified as having a need under the new regulation, and the per capita for each borough will remain the same as last year.

Borough	Manhattan	Bronx	Brooklyn	Queens	Staten Island
Per Capita	\$277.96	\$242.33	\$257.86	\$281.96	N/A

Reserves for non-Title I Priority and Focus schools will be based on their poverty count as per the Title I Allocation School Memorandum #8 and the above borough per capita. The allocation must support programs and activities detailed in the School Comprehensive Educational Plan (SCEP), and the allowable activities that appear in Appendix A. Schools will also need to identify the allowable activities with each item scheduled in Galaxy, as indicated in more detail below.

School Comprehensive Educational Plan (SCEP)

All Priority and Focus Schools are required to develop a School Comprehensive Educational Plan (SCEP). The SCEP is aligned with the [Framework for Great Schools](#) and the NYSED Diagnostic Tool for School and District Effectiveness (DTSDE) and will inform the District Comprehensive Improvement Plan (DCIP).

The required school plans should be based on the findings and recommendations contained in the most recent NYSED Integrated Intervention Team (IIT) Review, NYCDOE Quality Review, and other needs assessments.

Parent Engagement

Priority and Focus schools will receive an additional 1% of the Title I allocation for parent engagement activities. The 1% Priority and Focus Engagement set-aside is in addition to their parent involvement set-aside that is described in [Title I School Allocation Memorandum No. 8](#).

The primary objective of this additional set aside is to enable greater and more meaningful parent participation in the education of their children. New York State Education Department (NYSED) in consultation with the New York Comprehensive Technical Assistance Center has identified

Partnership Standards for School and Families which is aligned with the National PTA Standards for effective Parent Engagement. Based on these consultations, NYSED has created a menu of allowable activities to meet the set-aside requirements, which focus on:

- Fostering Communication: School and families engage in an open exchange of information regarding student progress, school-wide goals and support activities.
- Encouraging Parent Involvement: Parents have diverse and meaningful roles in the school community and their children's achievement.
- Creating Welcoming Schools: Creating a welcoming, positive school climate with the commitment of the entire school community.
- Partnering for School Achievement: School engages families in setting high expectations for students and actively partners with parents to prepare students for their next level.
- Collaborating Effectively: School community works together to make decisions about the academic and personal growth of students through school-wide goals. School fosters collaborations with community-based organizations to create a vibrant, fulfilling environment for students and families.

These Partnership Standards are also consistent with the sixth tenet of Family and Community Engagement of the Diagnostic Tool for School and District Effectiveness (DTSDE) and the Framework for Great Schools Element for Strong Family and Community Ties.

Public School Choice

Public School Choice is required for all Priority and Focus Schools. School districts must provide all students in identified schools with the option to transfer to another public school in good standing, and provide/pay for transportation to the receiving schools. A child who transfers may remain in the receiving school until the child has completed the highest grade in that school.

Expanded Learning Time (ELT)

Consistent with its approved ESEA Flexibility Waiver, NYSED requires that Priority Schools offer a minimum of 200 additional student contact hours as Expanded Learning Time (ELT) in addition to the current mandated length of 900 hours of instruction per year (25 hours per week) in grades K-6 and 990 hours of instruction per year (27.5 hours per week) in grades 7-12. NYSED describes ELT activities as enriching educational experiences that happen outside of the traditional classroom and blend skill acquisition, relationship building and fun to foster academic and social-emotional growth in students. Summer learning, afterschool programming, and extended-day ELT models, when well-implemented, play a critical role in supporting students in all grades and ensuring that they graduate from high school, college and career ready.

NYSED's standards for approval of an ELT program in a Priority School are as follows:

- The program must ensure the integration of academics, enrichment, and skill development through hands-on experiences that make learning relevant and engaging.
- The program must offer a range of activities that capture student interest and strengthen student engagement in learning so as to promote higher attendance, reduce risk for retention or drop out, and increase the likelihood of graduation.

- The program must actively address the unique learning needs and interests of all types of students, especially those who may benefit from approaches and experiences not offered in the traditional classroom setting.
- The program must contain components designed to improve student academic, social, and emotional outcomes, including opportunities for enrichment programs such as in music and art.
- Instruction in any core academic subject offered in the program must be delivered under the supervision of a teacher who is NYS certified in that particular content area.
- The ELT program may be either voluntary or compulsory. However, if the program is voluntary, its goal must be to serve at least fifty percent of eligible students.
- In Priority Schools that receive School Improvement Grant (SIG) or School Innovation Grant (SIF) funding, an ELT program that is voluntary must be offered to all students with the goal of serving at a minimum fifty percent (50%) of students.
- In Priority Schools that do not receive SIG or SIF funding, an ELT program that is voluntary must be offered to all students eligible for Academic Intervention Services (AIS), with the goal of serving at a minimum fifty percent (50%) of AIS-eligible students.

Important Notes and additional Information:

- **ELT Program Description:** All Priority Schools and Renewal Schools must complete the ELT Program Description section of their SCEP or RSCEP (Section VII) to demonstrate how they are meeting these requirements.
- **Supplemental Educational Services (SES):** As of FY 2012, the NYCDOE will no longer provide Supplemental Educational Services (SES). Priority Schools may choose to provide academic remediation or ELT from an array of contracted vendors. If a school chooses to contract with a vendor to provide ELT, they can use the Multiple Task Award Contract (MTAC) utility to get an appropriate vendor based on their needs.

Galaxy Requirements

As Priority and Focus funds are scheduled, schools will need to select one of the activity descriptions using “Program” drop-down field in Galaxy. This will demonstrate compliance with allowable activities, as described in **Appendix A: List of Galaxy Program Dropdown and Priority and Focus (PF) Allowable Activities**. The scheduling of funds must be aligned with the corresponding goals and action plans for each Framework for Great Schools element as detailed in the SCEP.

As Title I appropriations do not include increases for collective bargaining, tax levy funds will be provided for staff rolled over in Galaxy to FY 2016, and for per session, per diem, prep coverage and F status services scheduled in Galaxy in FY 2015 as of April 20, 2015. Funding for collective bargaining will be placed in the **TL CB School Staff** allocation category. Refer to SAM #39 for details.

The Priority and Focus School allocations, applicable to your school, will be placed in Galaxy in the using the allocation categories (AC) listed below and must be scheduled based on the Galaxy requirements associated with the AC:

Allocation Categories	Galaxy Requirements
Title I Priority/Focus SWP	Total amount tag using PF Program dropdown equals allocated amount <u>using various fund sources that are conceptually consolidated.</u>
Title I Priority/Focus TA Priority/Focus Schools (Non-Title I)	Title I Priority/Focus TA and Priority/Focus Schools (Non-Title I) – funds must only be used for P and F allowable activities and tag using P and F Program dropdown
Priority/Focus Parent Engagement Schools	Total amount tag using only allowable activities for PF Framework for Great City Schools Elements for Strong Family and Community Ties

Renewal Schools Benchmark Menu / EMS

Middle School of New York / Junior High-Intermediate-Middle

Overview

Through the School Renewal Program, the NYC Department of Education is working with school communities to transform Renewal Schools by providing additional resources and supports, while also setting clear goals for improvement to be met over three years. Superintendents, principals, and School Leadership Teams should review data, discuss key areas of focus, and select goals from this document to include in the School Renewal Plan.

Guidelines for Choosing Benchmarks

Leading Indicators

- Attendance is a mandatory leading indicator, with a benchmark to be met by 2015-16.
- In addition, choose two elements from the Framework for Great Schools, with benchmarks to be met by 2015-16. NYCDOE is developing indicators on the Framework elements based on data from Quality Reviews and the NYC School Survey. These benchmarks will be available in June 2015.

Student Achievement Benchmarks

- Choose three, with benchmarks to be met by 2016-17. These benchmarks are based on the "Meeting Target" values in your school's School Quality Guide, which was released in October 2014.*
- Metrics listed as "not applicable" cannot be chosen because the school is already "Meeting Target."

Leading Indicators	Baseline Level	Benchmark to be met by 2015-16	Increase Needed**
Attendance	90.4%	91.4%	1.0%
Choose two elements from the Framework as additional leading indicators:			
Rigorous Instruction	TBD	TBD	TBD
Collaborative Teachers	TBD	TBD	TBD
Supportive Environment	TBD	TBD	TBD
Effective School Leadership	TBD	TBD	TBD
Strong Family-Community Ties	TBD	TBD	TBD
Trust	TBD	TBD	TBD

Student Achievement Benchmarks	2013-14 Result	Progress target for 2014-15	Progress target for 2015-16	Benchmark to be met by 2016-17	Increase Needed**
Choose 3:					
Performance Index on State ELA Exam	64	65	67	70	6
Performance Index on State Math Exam	58	61	65	72	14
Average ELA Proficiency Rating	2.21	2.22	2.23	2.24	0.03
Average Math Proficiency Rating	2.20	2.22	2.24	2.28	0.08
Not applicable:					
9 th Grade Credit Accumulation of Former 8 th Graders	87.0%	NA	NA	79.0%	NA

* The Performance Index metrics do not appear in the School Quality Guide, but the benchmarks for those metrics were set by the same method that was used to produce "Meeting Target" values in the School Quality Guide.

** The increases needed for percentages are in percentage-point terms.

Renewal Schools Benchmark Menu / HS

High School of New York / High school

Overview

Through the School Renewal Program, the NYC Department of Education is working with school communities to transform Renewal Schools by providing additional resources and supports, while also setting clear goals for improvement to be met over three years. Superintendents, principals, and School Leadership Teams should review data, discuss key areas of focus, and select goals from this document to include in the School Renewal Plan.

Guidelines for Choosing Benchmarks

Leading Indicators

- Attendance and Progress Toward Graduation – Years 2 and 3* are mandatory leading indicators, with benchmarks to be met by 2015-16.
- In addition, choose two elements from the Framework for Great Schools, with benchmarks to be met by 2015-16. NYCDOE is developing indicators on the Framework elements based on data from Quality Reviews and the NYC School Survey. These benchmarks will be available in June 2015.

Student Achievement Benchmarks

- Choose three, with benchmarks to be met by 2016-17. These benchmarks are based on the “Meeting Target” values in your school’s School Quality Guide, which was released in October 2014.

Leading Indicators	Baseline Level	Benchmark to be met by 2015-16	Percentage Point Increase Needed
Attendance	79.0%	81.8%	2.8%
Progress Toward Graduation – Years 2 and 3	21.7%	46.7%	24.9%
Choose two elements from the Framework as additional leading indicators:			
Rigorous Instruction	TBD	TBD	TBD
Collaborative Teachers	TBD	TBD	TBD
Supportive Environment	TBD	TBD	TBD
Effective School Leadership	TBD	TBD	TBD
Strong Family-Community Ties	TBD	TBD	TBD
Trust	TBD	TBD	TBD

Student Achievement Benchmarks	2013-14 Result	Progress target for 2014-15	Progress target for 2015-16	Benchmark to be met by 2016-17	Percentage Point Increase Needed
Choose 3:					
4-Year Graduation Rate	27.3%	34.5%	45.4%	63.4%	36.1%
6-Year Graduation Rate	54.5%	58.0%	63.3%	72.0%	17.5%
Regents Completion Rate	23.5%	26.9%	32.0%	40.4%	16.9%
4-Year College Readiness Index	4.5%	5.5%	7.0%	9.5%	5.0%
College and Career Preparatory Course Index	5.7%	8.9%	13.7%	21.6%	15.9%

* “Progress Toward Graduation – Years 2 and 3” is the percentage of students in years two and three of high school who have (1) earned 10 or more credits in the most recent year of high school, (2) earned six or more credits in the four main subject areas, with at least three of those subject areas represented, in the most recent year of high school, and (3) have a total of two (for year two) or four (for year three) Regents requirements completed by the end of the school year. NYSAA-eligible students are excluded.

Guidance for Use of Expanded Learning Time

REVISED: June 9, 2015 with Additional Options 3, 4 & 5

Background

Research has shown that when used well, more learning time can lead to higher achievement, better attendance, and healthier attitudes and habits that put students on the path for success.

Therefore, we are committed to providing all students in Renewal Schools an opportunity to receive at least one additional hour of learning time, every day, beginning in the 2015-16 school year.

The DOE is using the umbrella term “Expanded Learning Time” (ELT) to refer to both the Renewal Hour and other after-school programming. School communities will work together to align their resources and provide one hour per day of supplemental academics and experiences that meet the individual needs of every student.

Approach

- At least one hour (or equivalent) of Expanded Learning Time offered to every student, known as the Renewal Hour.
- Staff members are not required to work an extra hour.
- Programming is data-driven by student needs.
- When ELT is offered before or after the regular school day, an additional hour will offer supplemental academic opportunities Monday through Thursday while the Friday Renewal Hour will focus on enrichment activities.
- For high schools, it is anticipated that, in general, the additional hour will be credit bearing unless it is used for Regents Review.
- As part of the Community Schools initiative, staff from community-based organizations (CBOs) can provide support throughout the school day, including during the Renewal Hour and afterwards. The Renewal Hour will be staffed by teachers and school-based staff.
- CBOs may also offer optional activities beyond the Renewal Hour.

Expanded Learning Time Scheduling Models

There are two basic models that schools can use to build in opportunities for students for the Renewal Hour of Expanded Learning Time (ELT):

- Integration into the regular student school day
- Offering the ELT before or after the regular school day

Here is additional guidance on how those models can be implemented with student and teacher schedules:

Additional Time Integrated In the School Day

The Renewal Hour of ELT can be incorporated into the day so that it can be offered in a seamless way – either at the start or end of the day just as an additional hour of time that can be regularly programmed over the course of the day. One way to achieve this option is through a staggered schedule for staff where some staff begin and end the day later (or earlier) than the other staff. A/B schedules and six day schedules are other options that can potentially create room for scheduling the additional hour. Sixth period coverage, consistent with collective bargaining agreements, can be used to supplement these approaches.

The CBO may provide additional services beyond the regularly scheduled day.

A staggered teacher schedule requires an SBO.

Additional Time After the Regular School Day

The Expanded Learning Time can also be offered after the regular day. In this approach, the school should determine the focus of the Renewal Hour, align program design for the additional time, and post for teachers appropriate to staff those assignments. For teachers in the school who are selected to work the ELT, the school may need to adapt its schedule to also incorporate the additional 155 minutes/week for Professional Development (PD), Parent Engagement (PE), and other Professional Work (OPW) for all staff. Below are five scheduling options for schools using this model; the first three require an SBO.

Option 1:

Under this option, the 155 minutes for Professional Development, Parent Engagement and other Professional Work is scheduled over four days at the start of the day so all staff participates at the same time regardless of whether they are working ELT or not. To change the configuration of the Professional Development, Parent Engagement, and Other Professional Work time in this way requires an SBO.

Day	Student School Day/ELT	ELT Teacher Work Day <i>(including ELT)</i>	Teacher (non-ELT) Work Day
MON	8:40 a.m.-3 p.m./3-4 p.m.	8-8:40 a.m. (PD)/8:40 a.m.-3 p.m. 3-4 p.m. (Renewal Hour)	8 a.m.-3 p.m. (PD 8-8:40 a.m.)
TUES	8:40 a.m.-3 p.m./3-4 p.m.	8-8:40 a.m. (PD)/8:40 a.m.-3 p.m. 3-4 p.m. (Renewal Hour)	8 a.m.-3 p.m. (PD 8-8:40 a.m.)
WED	8:40 a.m.-3 p.m./3-4 p.m.	8-8:40 a.m. (PE)/8:40 a.m.-3 p.m. 3-4 p.m. (Renewal Hour)	8 a.m.-3 p.m. (PE 8-8:40 a.m.)
THUR	8:40 a.m.-3 p.m./3-4 p.m.	8:05-8:40 a.m. (OPW)/8:40 a.m.- 3 p.m./3-4 p.m. (Renewal Hour)	8:05 a.m.-3 p.m. (OPW 8:05- 8:40 a.m.)
FRI	8:40 a.m.-3 p.m./3-4 p.m.	8:40 a.m.-3 p.m.	8:40 a.m.-3 p.m.

Option 2:

Under this option, the 155 minutes for Professional Development, Parent Engagement and Other Professional Work is scheduled according to the default model for non-ELT teachers (80 minute Monday, 75 minute Tuesday) but on a different schedule for the ELT teachers.

To change the configuration of the Professional Development, Parent Engagement, and Other Professional Work time in this way requires an SBO.

Day	Student School Day/ELT	ELT Teacher Work Day <i>(including ELT)</i>	Teacher (non-ELT) Work Day
MON	8 a.m.-2:20 p.m./2:20-3:20 p.m.	8 a.m.-2:20 p.m./2:20-3:20 p.m. (Renewal Hour) 3:20-4 p.m. (PD)	8 a.m.-3:40 p.m. (PD 2:20-3:40 p.m.)
TUES	8 a.m.-2:20 p.m./2:20-3:20 p.m.	8 a.m.-2:20 p.m./2:20-3:20 p.m. (Renewal Hour) 3:20 p.m. – 4 p.m. (PD)	8 a.m.-3:35 p.m. (PE/PW 2:20-3:35 p.m.)
WED	8 a.m.-2:20 p.m./2:20-3:20 p.m.	8 a.m.-2:20 p.m./2:20-3:20 p.m. (Renewal Hour) 3:20-4 p.m. (PE)	8 a.m.-2:20 p.m.
THUR	8 a.m.-2:20 p.m./2:20-3:20 p.m.	8 a.m.-2:20 p.m./2:20-3:20 p.m. (Renewal Hour) 3:20 p.m. - 3:55 p.m. (OPW)	8 a.m.-2:20 p.m.
FRI	8 a.m.-2:20 p.m./2:20-3:20 p.m.	8 a.m.-2:20 p.m.	8 a.m.-2:20 p.m.

Option 2 Variation:

A variation on the above schedule could be to have the ELT Teachers once or twice a month have their Monday ELT time covered by subs or other staff and instead have the ELT Teachers participate in the 80 minute Monday PD. In this way, at least occasionally, the 80 minute PD could include both ELT and non-ELT teachers. For example, if there is a special PD for particular grades/subjects where it is a priority to have all such teachers participate, the ELT teachers could be released from ELT that day and have their schedule for the balance of the week modified accordingly. This approach could follow a regular monthly or semi-monthly schedule so school teams could plan when all staff will be available for PD.

Option 3:

Under this option, the 155 minutes for Professional Development, Parent Engagement and other Professional Work remains as scheduled for Mondays and Tuesdays with the Parent Engagement and Other Professional Work integrated into the ELT time on Tuesdays.

To achieve this integration requires an SBO vote.

Day	Student School Day*/ELT	ELT Teacher Work Day <i>(including ELT)</i>	Teacher (non-ELT) Work Day
MON	8:20 a.m.-2:40 p.m.	8:20-a.m. - 2:40 p.m. (PD 2:40 – 4:00 p.m.)	8:20 a.m. - 2:40 p.m. (PD 2:40 – 4:00 p.m.)
TUES	8:20 a.m.-2:40 p.m./2:40-3:55	8:20 a.m.- 2:40 p.m./2:40 – 3:55 (ELT with integrated PE/OPW)	8:20 a.m.- 2:40 p.m. (PE/OPW: 2:40 - 3:55)
WED	8:20 a.m.-2:40 p.m./2:40-3:55	8:20 a.m.- 2:40 p.m./2:40 – 3:55 (ELT)	8:20 a.m.-2:40 p.m.
THUR	8:20 a.m.-2:40 p.m./2:40-3:55	8:20 a.m.- 2:40 p.m./2:40 – 3:55 (ELT)	8:20 a.m.-2:40 p.m.
FRI	8:20 a.m.-2:40 p.m./2:40-3:55	8:20 a.m.- 2:40 p.m./2:40 – 3:55 (ELT)	8:20 a.m.-2:40 p.m.

**The student school day start must fall in the range from 8:00 -8:20 for this model to work.*

Option 4:

Under this option, the 80 minutes for Professional Development remains as scheduled on Mondays for all staff. Parent Engagement and Other Professional Work on Tuesdays for those teachers working the ELT will be done before or after the day on Tuesday or on an alternative schedule subject to principal approval.

This option does not require an SBO vote.

Day	Student School Day*/ELT	ELT Teacher Work Day <i>(including ELT)</i>	Teacher (non-ELT) Work Day
MON	8:20 a.m.-2:40 p.m.	8:20 a.m. - 2:40 p.m. (PD 2:40 – 4:00 p.m.)	8:20-a.m. - 2:40 p.m. (PD 2:40 – 4:00 p.m.)
TUES	8:20 a.m.-2:40 p.m./2:40-3:55	8:20 a.m.- 2:40 p.m./2:40 – 3:55 (ELT). <i>PE and OPW scheduled before and/or after the day**.</i>	8:20 a.m.- 2:40 p.m. (PE/OPW: 2:40 - 3:55)
WED	8:20 a.m.-2:40 p.m./2:40-3:55	8:20 a.m.- 2:40 p.m./2:40 – 3:55 (ELT)	8:20 a.m.-2:40 p.m.
THUR	8:20 a.m.-2:40 p.m./2:40-3:55	8:20 a.m.- 2:40 p.m./2:40 – 3:55 (ELT)	8:20 a.m.-2:40 p.m.
FRI	8:20 a.m.-2:40 p.m./2:40-3:55	8:20 a.m.- 2:40 p.m./2:40 – 3:55 (ELT)	8:20 a.m.-2:40 p.m.

**The student school day start must fall in the range from 8:00 -8:20 for this model to work.*

***Alternative schedule to Tuesday PE/OPW can be scheduled subject to principal approval.*

Option 5:

Under this option, the 155 minutes for Professional Development, Parent Engagement and other Professional Work remains as scheduled for Mondays and Tuesdays with the ELT scheduled on Wednesday, Thursday and Friday afternoons and Saturday.

This option does **not** require an SBO vote.

Day	Student School Day/ELT	ELT Teacher Work Day <i>(including ELT)</i>	Teacher (non-ELT) Work Day
MON	8:20 a.m.-2:40 p.m.	8:20 a.m. - 2:40 p.m. (PD 2:40 – 4:00 p.m.)	8:20 a.m. - 2:40 p.m. (PD 2:40 – 4:00 p.m.)
TUES	8:20 a.m.-2:40 p.m.	8:20 a.m.- 2:40 p.m. (PE + OPW: 2:40 - 3:55)	8:20 a.m.- 2:40 p.m. (PE + OPW: 2:40 - 3:55)
WED	8:20 a.m.-2:40 p.m./2:40-3:20	8:20 a.m.- 2:40 p.m./2:40 – 3:20 (ELT)	8:20 a.m.-2:40 p.m.
THUR	8:20 a.m.-2:40 p.m./2:40-3:20	8:20 a.m.- 2:40 p.m./2:40 – 3:20 (ELT)	8:20 a.m.-2:40 p.m.
FRI	8:20 a.m.-2:40 p.m./2:40-3:20	8:20 a.m.- 2:40 p.m./2:40 – 3:20 (ELT)	8:20 a.m.-2:40 p.m.
SAT	9:00 a.m. – 12:00 p.m.	9:00 a.m. – 12:00 p.m. (ELT)	N/A

**The student school day start must fall in the range from 8:00 -8:20 for this model to work.*

Option 5 Variation:

A variation on the above schedule could be to have the ELT taught by teachers for one hour after school on Wednesdays and Thursdays, with no extra time on Fridays.

To Consider:

Schools will work with their Directors of School Renewal, Superintendents and SLTs to weigh different models of ELT for their school communities. Note that they are not mutually exclusive and schools can consider multiple approaches from the below list.

1. Schools on a shared campus may combine resources and staff to provide opportunities to all students in the building.
2. Students may attend College Now or participate in offsite internships.
3. CBOs, in close coordination with schools, may hire staff to offer tutoring, mentoring, SAT prep courses, activities that foster social-emotional learning growth, and a broad range of enrichment opportunities, including non-credit bearing internships, community service, book clubs, robotics, and other noncredit bearing activities throughout the school day. The supplemental Renewal Hour must still be provided by school staff, even when done so in conjunction with CBO partners.
4. CBO personnel cannot supplant school personnel in what are their exclusive job duties. CBO staff must provide services that *supplement* core instruction.
5. CBO partnerships may afford the opportunity to lower student to teacher ratios during the extended hour. Contractual class size maximums must be adhered to for teacher-led classes.
6. Mandated related services cannot be scheduled during the ELT.

Examples of acceptable supplemental academic classes/activities for the Renewal Hour:

K - 8		High School	
Must be teacher-led	Could be teacher or CBO staff-led	Must be teacher-led	Could be teacher or CBO staff-led
Additional, follow up support in core instructional subjects (ELA, Math, Social Studies, Science, etc.)	Book Clubs	Regents Prep	SAT Prep
	Science exploration (i.e. such as robotics)	Credit-bearing Courses	Non-credit bearing Internships
	Mentoring		
	Public speaking clubs		
Response to Intervention	One to one or small group (fewer than 5 students) tutoring		Homework help
	Digital arts and programming		
Small-group re-teaching	Drama and performing arts		College essay writing
	Homework help		

Examples of un-acceptable supplemental academic enrichment activities:

- Sports teams
- Arts and crafts
- Activities not aligned with school's instructional focus

The extra time for school staff will be staffed by posting, adhering to collective bargaining agreements, Chancellor Regulations, and DOE policy.

Attachment A Consultation and Collaboration Documentation Form

The U.S. Department of Education School Improvement Grant guidelines, under Section 1003 (g) require LEAs to consult and/or collaborate with various groups in the development of this SIG application. This form must be completed and submitted to NYSED as a part of this complete SIG application in order to document that appropriate consultation/collaboration has occurred or was attempted with constituency groups as follows:

1. Representatives of constituency groups who sign the form under their name/title are affirming that appropriate consultation has occurred. (The signature does not indicate agreement).
2. For representatives or constituency groups who have consulted with the LEA but whose signatures are unobtainable, supporting documentation providing evidence of consultation and collaboration efforts (e.g., meeting agendas, minutes and attendance rosters, etc.) must be maintained by the LEA and a summary of such documentation must be completed in the "Summary Documentation" box and submitted to NYSED on this form.

Principals Union President / Lead	Date	Summary Documentation if Signature is Unobtainable <small>If the signature of the constituent identified above is unobtainable, provide a summary and description of the supporting documentation that provides evidence of consultation and collaboration on the Priority School identified in this SIG application.</small>
Signature (in blue ink) <i>Heckler M. Chabell</i> Type or print name Heckler M. Chabell		
Teachers Union President / Lead 	Date 6/25/2015	Summary Documentation if Signature is Unobtainable If the signature of the constituent identified above is unobtainable, provide a summary and description of the supporting documentation that provides evidence of consultation and collaboration on the Priority School identified in this SIG application.
Signature (in blue ink) <i>Nick LeShai</i> Type or print name Nick LeShai, UFT Rep.		
Parent Group President / Lead 	Date 	Summary Documentation if Signature is Unobtainable If the signature of the constituent identified above is unobtainable, provide a summary and description of the supporting documentation that provides evidence of consultation and collaboration on the Priority School identified in this SIG application.
Signature (in blue ink) <i>O. Christian</i> Type or print name Oslin Christian		

New York City Department of Education

Organizational Chart

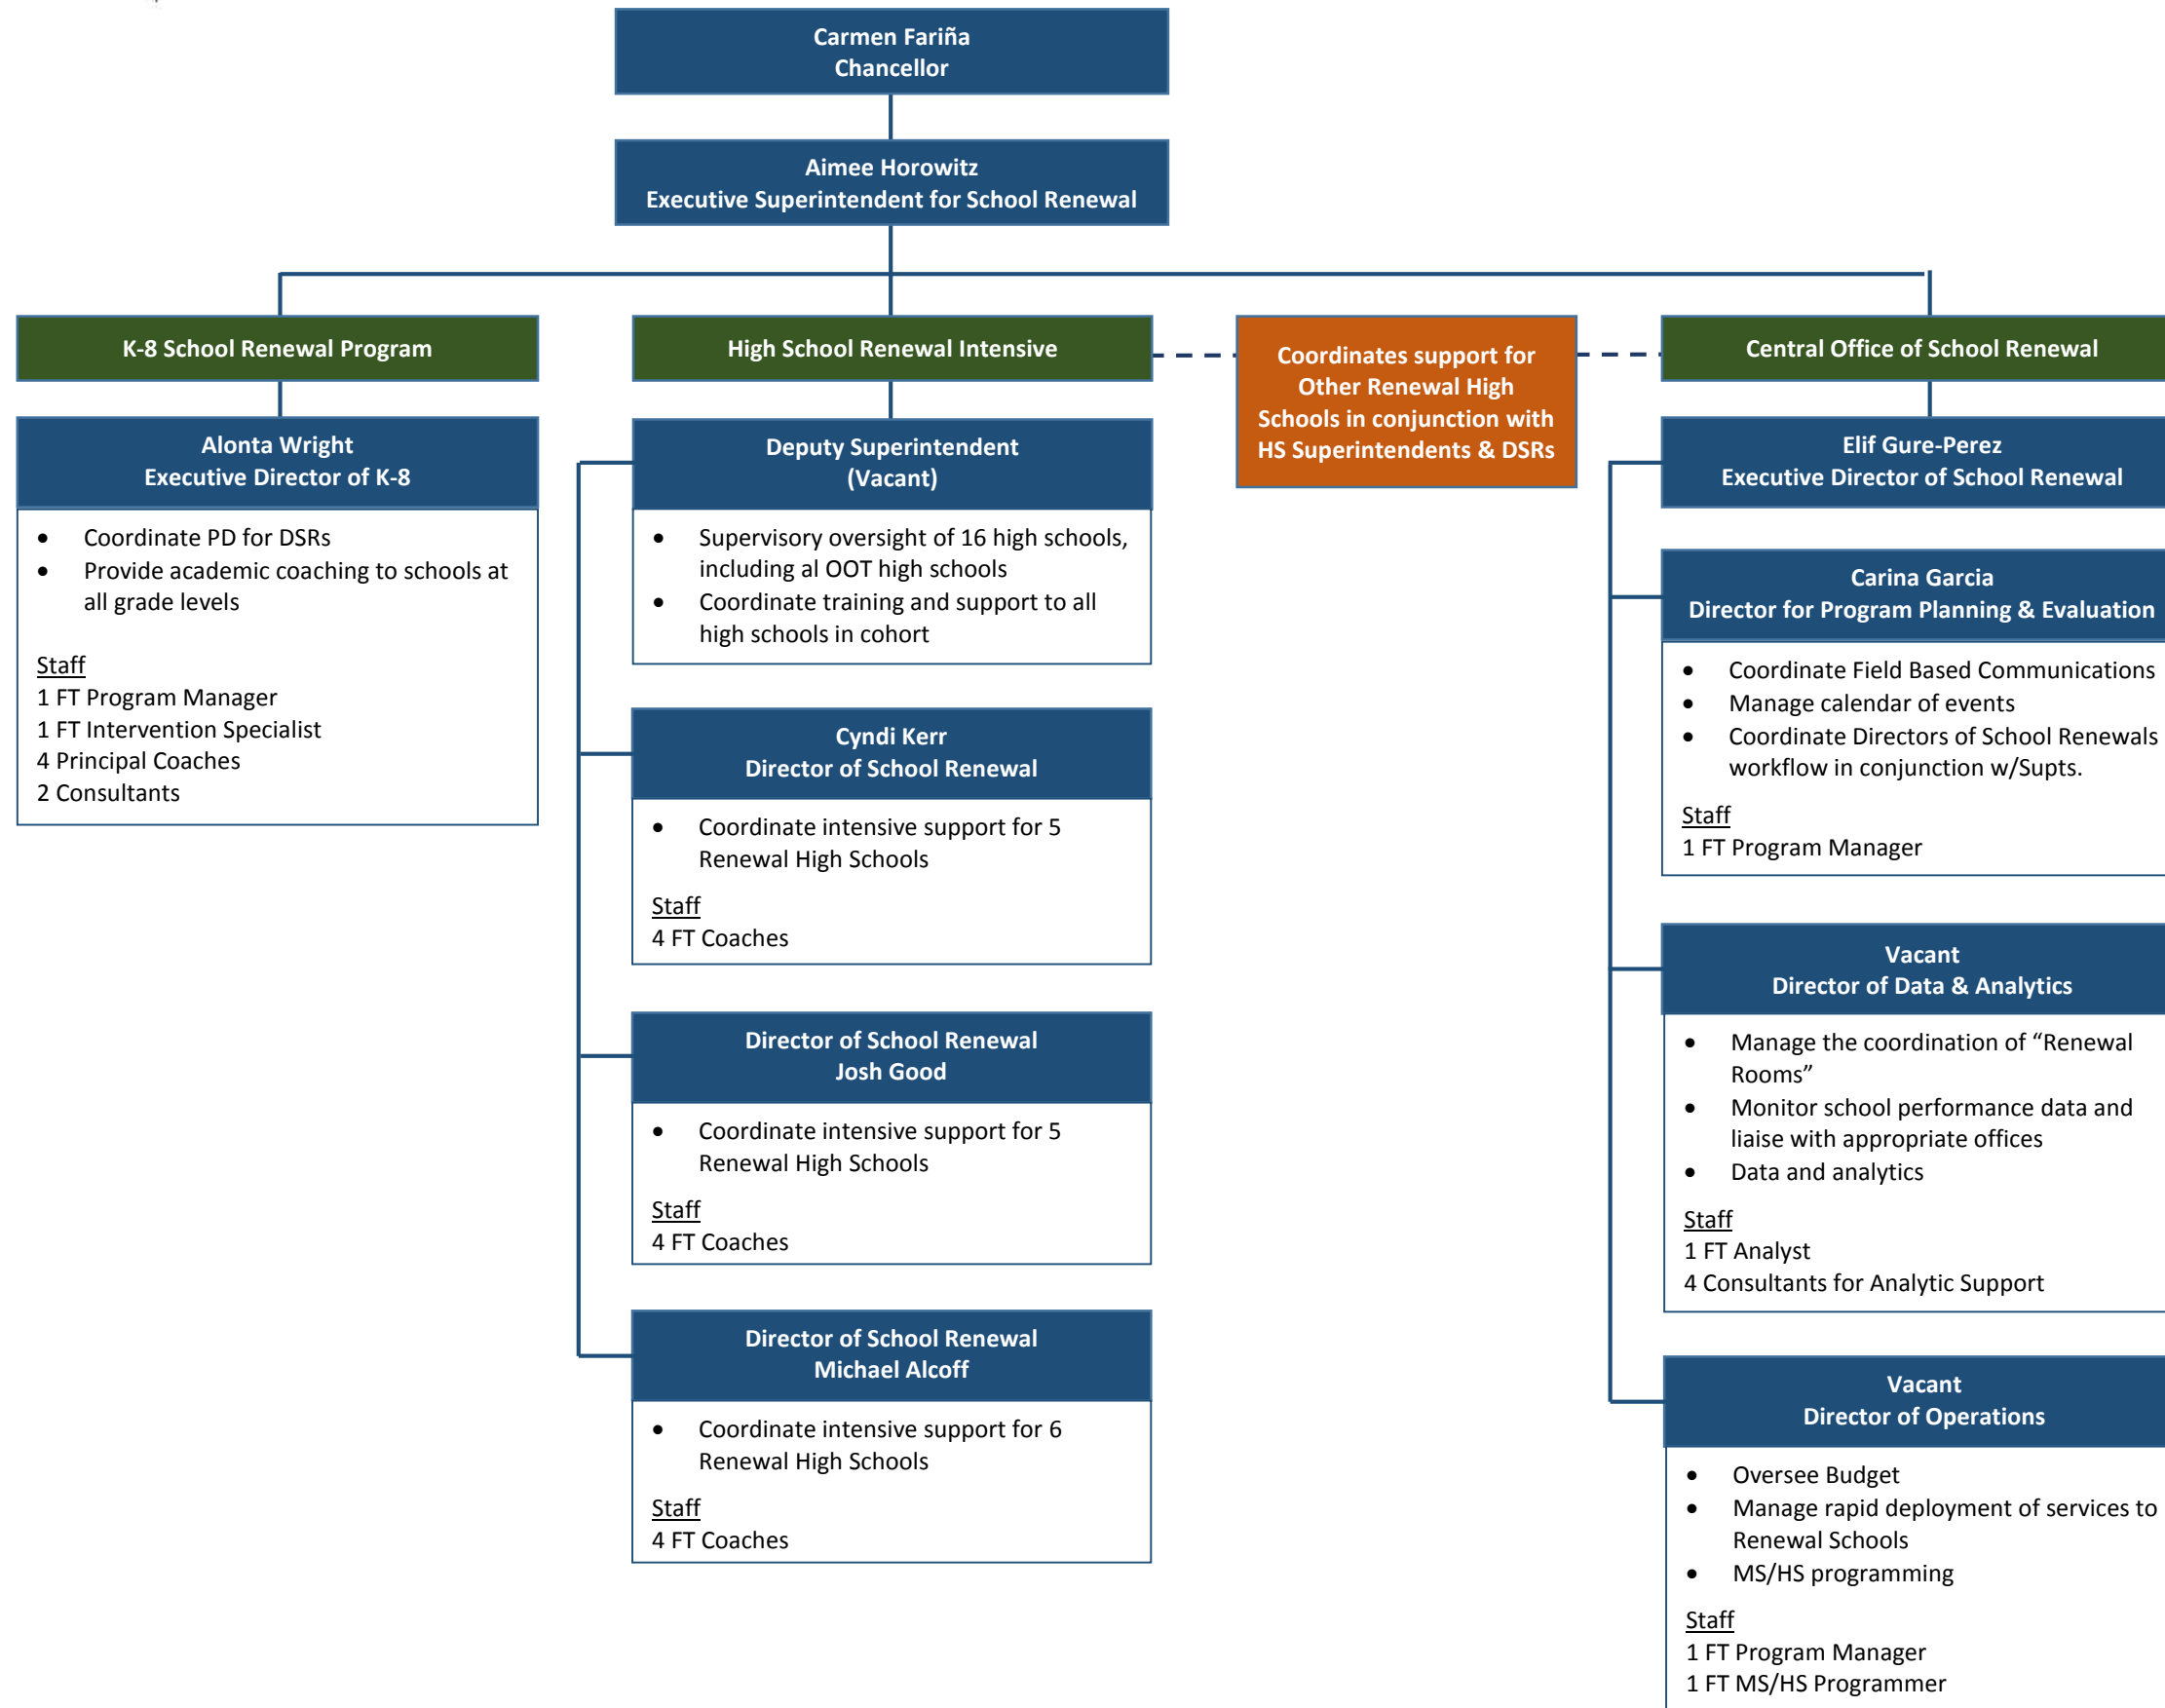

Stages of Development in a NYC Community School

	Stage 1: Exploring	Stage 2: Emerging	Stage 3: Maturing	Stage 4: Excelling
Summary of Key Features of Stages	<p>This stage is marked by optimism and curiosity about the work, and a belief that “if only” X was in place, things would be significantly different. The school team brainstorms about the benefits of a Community School strategy and its potential to serve as a mechanism to organize resources around student success.</p>	<p>This stage is marked by deepening collaboration among all stakeholders and defined community partnerships. The work begins by introducing Core Structures, such as formalizing a partnership with a lead CBO, hiring a dedicated Community School director, and securing base funding. Programs and services are developed based on a process of strategic data collection and analysis that engages parents as critical partners in the design of the Community School. This period is characterized by highs and lows, progress and frustration. To succeed in this stage, there needs to be the creation of and commitment to a shared vision and clear goals, as well as good communication processes, clarity of roles and responsibilities, responsiveness to needs, and regular celebration.</p>	<p>This stage is marked by steady, intentional progress. The vision of the Community School becomes clearer to all stakeholders, consequently there is broader support for it. Service utilization increases as interventions become more responsive to identified student needs, and quality of service delivery improves. Stakeholder relationships are based on mutual trust, there is intentional coordination of services and programmatic integration, and desired student outcomes are more likely to be met. To succeed in this stage, the Community School needs to engage in ongoing needs assessment to keep the vision and programs fresh, tend the relationships, continue to demonstrate added value, and attend to sustainability.</p>	<p>At this level the Community School is implementing quality programs that support the core instructional program. There is a school-wide focus on addressing the needs of the whole child through targeted and universal strategies. Through a model of authentic school-based governance, parents play a leadership role in the Community School and work together with school and CBO staff as advocates of quality education for all students. Strong relationships have been established between the school and community and the CBO is valued as a committed partner. To succeed in this stage the Community School needs to continue to provide innovative programming; to develop youth, parent and staff leaders to teach others best practices; and to incorporate sustainability strategies into the core operational structures of the Community School.</p>

The Capacities across the Stages of Development

	Exploring	Emerging	Maturing	Excelling
Coordination	Characterized by recognition that children and families have unmet needs, and that the school lacks the capacity to clearly identify these needs and to adequately coordinate the responses to them. Focus on how to get services and programs for children and families, both non-academic and academic enrichment.	Characterized by selection of a lead partner and hiring of a Community School director (CSD). After conducting an assets and needs assessment, the CSD identifies community partners and programs that align with needs, connects these to the right students and families, and creates systems for referral and follow-up.	Characterized by the intentional engagement of multiple partners and programs that respond to identified needs of students, school, families and community, and that improve the overall conditions for learning. The CSD sits on the School Leadership Team and systems are being implemented for referrals, follow-up, and accountability for all services and providers.	Characterized by a shift in role of schools as hubs of opportunity and civic engagement for students, families and neighborhood residents. System in place to ensure on-going, high quality service delivery that is comprehensive, responsive to need and demand, and seamlessly integrated with traditional school programming.
Collaboration	Characterized by recognition that children and families have multiple needs, and that schools need to partner with parents for students to succeed. Exploring how families and parents from diverse backgrounds can be engaged in their children's education and for building partnerships, but do not know how to proceed.	Characterized by effective organizing to engage families in planning, including regular monthly meetings and celebrations, and involving parents in decision making by introducing a ladder of engagement that taps into the wealth of knowledge and expertise that parents bring to bear on the work.	Characterized by the regular involvement and leadership of a wide range of stakeholders, including families and youth, in the ongoing development of the Community School. Parents as active members of the Community School Team and School Leadership Team. Parents serve as leaders of academic parent-teacher teams, and related other programs like parents as mentors and ambassadors of the work to the broader community.	Characterized by an authentic school-based governance structure and related processes that guarantee school leadership is soliciting families' and students' knowledge and skills in the work, and is working in partnership with parents and youth to support and share the responsibility for student learning. Permanent structures are in place that are anchored in positive youth development, and ensure that schools are welcoming and empowering to students, families and community members.
Connectedness	Characterized by recognition of the social and emotional needs of students, and their impact on students' feelings about school and ability to learn. Stakeholders agree that they want to create a school where all students attend regularly, and are able to learn and succeed.	Characterized by developing efforts to respond to the social and emotional needs of students. Attention is paid to creating a supportive school environment that provides positive adult-student and peer to peer relationships, as evidenced by small group instruction, student choice and mentoring. Physical and emotional safety is paramount. Alternatives to suspensions are considered.	Characterized by effective structures and programs in place to support social and emotional needs of students. These include partnerships with mental health providers, training for teachers in social/emotional learning, school-wide approaches including mentoring, student leadership opportunities, and restorative practices, and a school environment that is safe, nurturing and engaging.	Characterized by highly effective social and emotional learning supports for students and families, and a safe school environment which encourages positive adult-student and peer-to-peer relationships. Consistent discipline practices are employed by all adults throughout the school day. Students believe that staff care about and hold high expectations for them as learners and leaders, and all students are engaged in their own learning.
Continuous Improvement	Characterized by a growth mindset and an understanding that practices can always be improved to drive student academic success. There is an interest in working collaboratively and providing feedback across partner organizations to ensure strong instruction that is designed to provide personalized learning opportunities for student is in place.	The Community School Team uses ongoing needs and assets assessment to identify and drive school and student level outcomes. A data framework is implemented to inform staff meetings, case management, programming, performance, policies and resource allocation. Base funding is secured for the work.	Characterized by continuation of ongoing asset and needs assessment and the implementation of a feedback system so that partners can support one another in improving practice. The CSD is included in data inquiry conversations and policy and programming decisions. Student-level performance data is effectively shared with families to empower them to support student learning at home.	The Community School Team continually revisits its school and student-level outcomes, and it refines its indicators. The team collects and makes linkages between student-level academic and non-academic data and uses this data to tailor programming and instruction that is focused on results. Accountability for the outcomes and sustainability of the Community School work is shared by all stakeholders including CBO partners, families and school staff.

SCHOOL RENEWAL PROGRAM ORGANIZATION CHART
DRAFT – For Discussion Purposes – July 20, 2015

School Renewal Program Leadership Team			
Carmen Fariña, Chancellor			
Aimee Horowitz Executive Superintendent		Sharon Rencher Senior Advisor to the Chancellor for State Policy	Chris Caruso Executive Director of Community Schools
Alonta Wright Executive Director of K-8	Elif Gure Executive Director of School Renewal		

Staffing Summary:

- K-8 School Renewal Program = 3 FTE; 6 Leadership Coaches; 2 Consultants
- High School Renewal Intensive = 16 FTE
- Central Office of School Renewal = 9 FTE; 4 Consultants
- CSD & HS District-based DSRs = 26 FTE

Division of the Senior Deputy Chancellor
Office of State/Federal Education Policy and School Improvement Programs
Organization Chart – DRAFT – June 2015

External Partnerships for Leadership Programs:

For Teacher Leadership

- [New Leaders Emerging Leaders Program \(ELP\)](#), A year-long program for teachers who are looking to expand their leadership skill and put them into action by leading a team of teachers at their school. There were 20 teachers chosen across all five boroughs for the 2014-15 school year.

For Aspiring Assistant Principals or Principals

- [Bank Street Principals Institute \(PI\)](#), which prepares teachers and guidance counselors for leadership positions in NYCDOE schools with a strong focus on instructional leadership. The Bank Street Graduate School of Education's Principals Institute (PI) has graduated more than 30 cohorts of New York City leaders and has been cited by Stanford University researchers as an exemplary principal preparation program. PI has a strong focus on instructional leadership (including special education leadership) and includes an intensive advisory/internship component. Classes are scheduled in the evening and summers to allow participants to continue working. The program takes place over 18 months and leads to a master's degree in educational leadership, as well as New York State School Building Leader (SBL) certification. In 2014-15 there were three cohorts of Bank Street with approximately 50 participants.
- [Relay Graduate School of Education \(GSE\)](#), which serves as an entry point for teacher leaders interested in pursuing a path to school leadership with a specific focus on honing strong instructional and cultural leadership skills that drive better outcomes for students. The Relay GSE Instructional School Leadership Program (ISLP) offers a unique opportunity for high-potential teacher leaders and aspiring leaders who seek a rigorous, practice-based path to develop their instructional and cultural leadership skills and explore school leadership as a potential career. Created in partnership with DOE Cluster IV and Teach For America (TFA) NY, Relay GSE's two-year, job-embedded program is aligned with the New York City citywide instructional expectations and results in an eventual Master's in School Leadership and SBL program upon successful completion (pending NYSED approval). This rigorous program will emphasize practice and continuous improvement of the skills and mindsets needed to be an effective school leader. In 2014-15 there were 11 participants in the Relay GSE School Leadership Program.
- [Fordham University Accelerated Master's Program in Educational Leadership \(AMPEL\)](#) Prepares highly motivated individuals to become future visionary and instructional leaders, through an intensive but supportive one-year cohort model. For the 2014-15 school year there were 20 individuals in the Fordham AMPEL program.
- [New Leaders Aspiring Principals Program](#) which develops and supports individuals with some leadership experience to successfully lead schools through teamwork, simulated school projects, and a year-long principal internship and a national education curriculum. New Leaders Aspiring Principals Program provides resident principals with a solid academic foundation and real-world experience vital to success in transforming our country's lowest performing schools. New Leaders aims to train tomorrow's principals to turn around underperforming schools and the lives of the

students who attend them. Graduates of the program are considered to be some of the most highly qualified principal candidates in our partner cities. For the 2014-15 school year there were 9 participants in the New Leaders program.

- [NYC Leadership Academy \(NYCLA\) Aspiring Principals Program \(APP\)](#), which develops and supports individuals with some leadership experience to successfully lead low-performing schools through teamwork, simulated school projects, and a six-month principal internship. APP is a standards-based, 14-month leadership development program designed to prepare participants to lead instructional improvement efforts in New York City's high-need public schools—those marked by high poverty and low student achievement. Through a rigorous application process, APP selects a diverse and talented group of educators (including former assistant principals, teachers, coaches and guidance counselors) deeply committed to closing the achievement gap.
- [NYC Leadership Academy \(NYCLA\) Leadership Advancement Program \(LAP\)](#) LAP is an innovative leadership program with an intense focus on preparing teacher leaders to become school administrators. Successful completion of LAP, which includes completion of coursework and a part-time residency, earns candidates their School Building Leader (SBL) certification. Key program design elements include strengthening instructional prowess, deepening content knowledge, facilitating adult learning, managing teams, and a systematic approach to school improvement.

For Current Assistant Principals

- [Executive Leadership Institute \(ELI\) Advanced Leadership Program for Assistant Principals \(ALPAP\)](#) which prepares strong assistant principals with an opportunity to hone existing skills, and to acquire new skills needed for the position of principal. Advanced Leadership Program for Assistant Principals (ALPAP), sponsored by the Council of School Supervisors and Administrators (CSA) of the City of New York, is an innovative professional development program focused on the advanced leadership skills needed to serve as an effective principal. This program provides a venue for assistant principals who have effectively met the challenges of their administrative and supervisory roles and demonstrated a readiness to become principals, to explore the complex nature of decision-making and authentic leadership.

For Current Principals

- [Executive Leadership Institute \(ELI\) School Based Intermediate Supervisors Institute \(SBISI\)](#) is designed as a two-year leadership seminar series (Series I and II) to build, expand and enhance fundamental school leadership skills and knowledge through a wide variety of "nuts and bolts" strategies, engagement in critical thinking scenarios, and exploration of educational leadership-related literature

Internal Leadership Programs:

For Teacher Leadership

- [New Teacher Mentoring](#), The mentor's role is to promote the growth and development of new teachers to improve student learning by providing instructional coaching and non-evaluative feedback. The NYCDOE believes that one of

the first leadership opportunities for teachers is to become a new teacher mentor; there are new teacher mentor certification courses held throughout the school. In 2014-15 there were approximately 6,000 new teacher mentors across the five boroughs.

- [Teacher Leadership Program \(TLP\)](#) Strengthening content knowledge, coaching, and facilitative skills are the key elements of this program for teachers already serving in school-based leadership roles; TLP is an opportunity for teacher leaders to develop their facilitative and instructional leadership skills. It is designed to challenge and support teacher leaders across the city in developing the content knowledge and facilitative leadership skills needed to guide instructional improvements in schools. Upon completion of the program, teachers may choose to remain in teacher leadership roles within their schools or consider applying to a principal preparation program to further strengthen their leadership skills and prepare for roles as school leaders. For the 2014-15 school year there were 80 schools selected with 300 teacher leaders.
- [Peer Instructional Coach \(USDOE TIF Grant and NYSED STLE Grant\)](#) support their colleagues through coaching and intervisitations to improve instruction and student learning aligned to the Danielson Framework for Teaching
- Model [Teacher \(formerly Demonstration Teacher\) \(USDOE TIF Grant and NYSED STLE Grant\)](#) use their classrooms as a laboratory classroom to serve as a resource for colleagues' professional growth
- [Learning Partners Program \(LPP\) Model Teachers \(MTs\)](#) take on added responsibilities in accordance with the UFT-DOE contract to support the instructional practice of other teachers in their school through activities such as establishing their own class as a laboratory classroom, demonstrating lessons, exploring emerging instructional practices, tools or techniques, and reflecting on visits from colleagues. The NYCDOE supports MTs through on-going professional development to ensure their success as leaders in their schools. For the 2014-15 school year there were over 100 LPP Model Teachers across all five boroughs.

For Aspiring Assistant Principals or Principals

- [Leaders in Education Apprenticeship Program](#), which prepares teachers, guidance counselors, and assistant principals to take on school leadership positions within the NYCDOE. The Leaders in Education Apprenticeship Program (LEAP) is a 12-month, school-based, on-the-job principal preparation and leadership development program run by the New York City Department of Education (NYCDOE). The program focuses on further developing individuals who have a past of demonstrated leadership capacity and transforming them into the future leaders and school administrators for New York City public schools. LEAP is a unique model that develops school leaders within their current school environment and creates opportunities to harness existing relationships including those with current principals to promote leadership growth. LEAP utilizes multiple learning experiences in addition it provides apprentices with on-the-ground support and access to a trained and experienced LEAP Faculty Member to enhance the personalization of their leadership development. The LEAP model is aligned with the NYCDOE's instructional initiatives and priorities, and it is grounded in research and NYCDOE Quality Review (QR) leadership-based competencies. For the 2014-15 school year there were 89 LEAP apprentices represented across all five boroughs.

For Current Assistant Principals

- [Assistant Principal Institute](#), The Assistant Principal Institute (API) is a year-long program designed to prepare strong assistant principals for principal positions in one to three years. API is structured to support participants in the exploration of specific instructional questions and issues of interest. Through an inquiry model grounded in school-based study, API participants hone skills of low-inference observation and feedback, generative professional dialogue, collaborative problem-solving, and decision-making. This work supports assistant principals shift the lens through which they view schools, moving from the perspective they have in their current roles as APs, to thinking, seeing, and planning as a building principal would. In addition, participants will have the opportunity to refine a full range of leadership skills, with a strong focus on instructional and facilitative leadership. With the understanding that our assistant principals assume many roles, all of which are critical to ensuring strong outcomes for all of our students, API seeks to enhance our participants' growth and development in current positions as well as their preparation for the role of building principal. There are 60 participants in the API cohort for 2014-15.
- Learning Partners Program for Assistant Principals (LPPAP), is designed to build upon the leadership capacity of strong assistant principals working in Learning Partner Program and Showcase Schools, in order to prepare them for a principal role in 1-3 years, either as part of a succession plan for their current school or for schools identified by the Chancellor or other Senior Leadership.
- [New School Proposal Process](#), which supports new school principals in fully realizing the vision of opening a new school. There were 12 school leaders chosen for the New School process for 2014-15.

For Current Principals

- [Advanced Leadership Institute \(ALI\)](#) The New York City Department of Education's (DOE) Advanced Leadership Institute (ALI), in partnership with Baruch College, is a one-year leadership development program for high-performing principals, network, cluster, or central leaders. Taught by current DOE leaders, ALI combines theory with clinically-rich learning experiences to develop the knowledge, skills, and aptitudes necessary to effectively lead at the systems-level. Participants accepted into ALI will be eligible for a 60% reduction of SDL tuition fees through Baruch College. Those who meet and demonstrate success will receive a certificate of completion from the DOE and be considered for New York State (NYS) School District Leader (SDL) certification. Candidates who already hold School District Leader (SDL) certification are also eligible to apply. For the 2014-15 school year there were 22 participants in ALI.
- [Chancellor's Fellowship](#) The Chancellor's Fellowship is a leadership development opportunity for top talent at the New York City Department of Education (NYCDOE). The program is designed for exemplary principals and central leaders who are committed to public education and have a proven record of success. The Fellowship provides tangible tools and non-monetary rewards to our 'best and brightest' including professional development; executive coaching, career guidance and a network of peers and alumni. The Chancellor's Fellowship is a highly selective program for up to twelve participants. Chancellor's Fellows will be trained and provided opportunities in six competency categories that collectively define what it takes to be an effective system-level leader. Each Chancellor's Fellow will also receive a 360-degree review and five hours of executive coaching.

Recruitment for Pipeline Programs and Positions

- [Common Application](#) for Principal Preparation Programs
- Alumni Dinner Series, piloted school year 2014-15, , a series designed for sitting assistant principals who are graduates of Leadership Pathway Programs. These distinctive dinners are intended to provide assistant principals interested in moving to the next stop along the Principal Pipeline who will be pursuing principalships for the coming school year, with a unique learning experience and intimate exposure to key NYCDOE leadership. The Assistant Principal Alumni Dinner Series included presentations by Chancellor Carmen Fariña, Deputy Chancellors Phil Weinberg and Corinne Rello-Anselmi, and Senior Superintendent Laura Feijoo.
- [Leadership Pathways System \(LPS\)](#) is designed to support the NYCDOE's commitment to creating and sustaining a robust leadership pathway for all instructional staff. LPS facilitates the recruitment, development and placement of high-quality leaders who drive school improvement and student achievement.

NYCDOE staff are able to log in via any computer to access LPS for multiple reasons:

Pedagogical Staff (principals, APs, and teachers):

1. View Profile: the profile includes HR related data like years of experience, current and past titles, job locations, certifications, contact information, and participation in a NYCDOE leadership program;
2. Update Profile: profile users can add comments to their profile, upload cover letters and resumes, edit their contact information, and select their leadership interests whether it be for a new position or interest in a leadership program.

Hiring Managers (superintendents, senior NYCDOE leaders):

1. Search Profile: search for candidates based on years of experience, background, certification, candidate interests, affiliation with a NYCDOE leadership program, district, name, or school experience;
2. Save Profiles and Make Notes: hiring managers can utilize LPS to save individual profiles they would like to remember or save notes on particular candidates they want to remember and revisit in the future.
3. Search Schools: hiring managers can also search and view school level profiles to learn more about the schools in their district. Information on school profiles include school demographics, school improvement results, historical data on leadership changes, and school survey results.

Central Staff:

1. Reporting: Central staff is able to utilize the entire hiring manager and pedagogical staff features in addition to mass reporting functionality. Reports are helpful in tracking leadership development graduates, identifying lists of eligible candidates for principal roles, and identifying pedagogical staff that are eligible and ready for leadership development programs.

- [Principal Candidate Pool](#), developed and implemented the Principal Candidate Pool to positively impact student achievement by ensuring that strong leaders are considered for principal roles. The Principal Candidate Pool is one of the first steps before a candidate is eligible to apply for a principalship in New York City, as outlined in [Chancellors Regulation 30](#). The NYCDOE has been utilizing the centralized selective hiring process named, the Principal Candidate Pool, since 2008. In 2013, the process was overhauled to be aligned explicitly to the Quality Review Rubric – in addition to providing professional development to potential new school leaders. This process remains to be full scale in NYC and engrained in the culture of the NYCDOE. Prior to being eligible to apply for principal positions, all candidates must go through the principal candidate pool – or be historical principal candidate pool members. In addition to applying for the Principal Candidate Pool via the website, candidates in all of the NYCDOE pre-service training programs undergo the Principal Candidate Pool process by virtue of their training program – so that at the completion of their pre-service training they are eligible to apply for school leader positions.
- Beginning December 9, 2013, the NYCDOE launched an enhanced version of the Principal Candidate Pool process in order to meet the following objectives:
 1. Align the screening process to clear, high standards that are consistent with the expectations to which principals will be held accountable under 3012c
 2. Offer participants an opportunity to receive high quality professional development about the NYCDOE's expectations of principals
 Three professional developments and three on-demand performance assessments focused around the three categories of the [Quality Review rubric \(QR\)](#):
 - I. Instructional Core across Classrooms**
 - Curriculum (1.1)
 - Pedagogy (1.2)
 - Assessment (2.2)
 - II. School Culture**
 - Positive learning environment (1.4)
 - High expectations (3.4)
 - III. Structures for Improvement**
 - Leveraging resources (1.3)
 - Teacher support and supervision (4.1)
 - Goals and action plans (3.1)
 - Teacher teams and leadership development (4.2)
 - Monitoring and revising systems (5.1)
 3. Provide hiring managers with multi-dimensional information to help enhance strategic placement hiring decisions related to principals
- New Principal Onboarding and Support, including [New Principal Intensive](#)

The DOE has historically provided every first-year principal in the system with 72 hours of one-on-one coaching to support their successful transition into the role. In the past, this coaching was provided through an external contract; the contracted organization has as a team of coaches who are mostly retired DOE principals and superintendents. The Office of Leadership (OOL) launched a New Principal Support Pilot in September 2014 that currently supports 35 first-year principals. The new principals in our pilot receive a robust set of supports that are aligned to current DOE expectations, coordinated with their superintendents, and delivered by coaches with first-hand knowledge of the current challenges that DOE principals face. Each new principal receives the following:

1. **One-on-One Coaching** – OOL has hired three full-time coaches, all of whom served as a successful DOE principal within the last three years. Each coach works with 10-12 first-year principals, providing each one with at least 80 hours of individualized support. The coaching is grounded in the QR Rubric and the Framework for Great Schools, and is thus closely aligned to the DOE's current expectations for principals. In addition, our coaches work closely with their mentees' superintendents; they met with each new principal and his/her superintendent at the beginning of the year to discuss goals and expectations, and they provide them with quarterly updates about the content of their work together and next steps.
2. **Critical Friends Groups** – In addition to individualized coaching, every first-year principal in our pilot has the opportunity to participate in a Critical Friends Group (CFG) with a small group of new principals whose schools are in close geographic proximity. Each CFG meets about eight times per year and is led by a strong sitting principal whose school is close by. The CFGs give new principals an opportunity to connect with and feel supported by one another; our hope is that these relationships will endure far beyond the principals' first year.
3. **Conferences** – All of our new principals, coaches, and CFG leaders are invited to two full-day conferences each year. These conferences provide further opportunities to connect, as well as valuable professional learning designed to meet the identified needs of new principals.
4. **Online Resources** – We are working with DIIT to launch an online platform, housed on Weteachnyc.org that connects new principals to one another and to valuable central resources.

Recruitment of High-Quality Personnel:

- The 2014 teachers' contract has established an unprecedented career ladder for excellent teachers to support their colleagues' and student' learning through the introduction of [Teacher Leader Roles](#). Roles include Model Teachers, Master Teachers, and Teacher Incentive Fund (TIF) Teacher Leaders. During the 2014-15 school year, over 800 teacher leaders have been placed in nearly 350 schools, including over 100 Model Teacher positions. In addition to their duties as teachers, Model Teachers take on added responsibilities to support the instructional practice of other teachers in their school through activities such as establishing their own class as a laboratory classroom, demonstrating lessons, exploring emerging instructional practices, tools or techniques, and reflecting on visits from colleagues. The NYCDOE supports Model Teachers through on-going professional development to ensure their success as leaders in their schools. Master Teachers work closely with school leadership to define their role which could include, among other duties, supporting the development of

peers by facilitating instructional support activities, leading study groups, and facilitating coaching conversations with educators. TIF Teacher Leaders include Peer Instructional Collaborators, who support their colleagues through coaching and intervisitations to improve instruction and student learning aligned to the *Danielson Framework for Teaching*. Also, Demonstration Teachers use their classrooms as a laboratory classroom to serve as a resource for colleagues' professional growth. Lastly, the Interschool Teacher Development Coaches partner with teachers and school leaders to deepen their knowledge of *Advance*, assessment of student progress, and the *Framework for Teaching* to help them reflect and grow as they meet their students' needs; they support teacher teams across multiple schools in engaging in differentiated cycles of professional learning.

Enrollment

In the Foreign Language Academy of Global Studies, students with disabilities comprise 32% of the school's population, 10 percentage points higher than the percent of high school students with disabilities in the borough and on par with the percentage of students with disabilities at the school in 2013-14. English Language Learners comprise 22% of the school's population, 6 percentage points higher than the percent of high school English Language Learners in the borough. On average, 65% of incoming students scored a level 1 on the 2014 8th grade ELA/math exams, 10 percentage points higher than the average high school in the borough

Leadership

Leslie Miller Chislett has over twenty five years of experience as a teacher, instructional leader and school administrator. Her career has been distinguished by her passion for innovative teaching and learning models. Ms. Chislett began her career in the elementary classroom and soon became a literacy coach and enrichment teaching specialist in a K-8 school in Rochester, New York. Desiring to ensure authentic, rigorous learning experiences for all students, Ms. Chislett pursued a Masters of Education in Talent Development from the University of Connecticut and Certificate of Advanced Studies in Educational Leadership from Canisius College in Buffalo. After serving as an Assistant Principal in a large primary school, and directing gifted and enrichment programming on the district level in upstate New York, Ms. Chislett relocated to Colorado to serve as state director of gifted education. To pursue her growing passion for whole school reform models, Ms. Chislett became principal of an Expeditionary Learning Magnet School in need of improvement in Denver. In 2007, she relocated to New York City to serve as Assistant Principal at Bronx Expeditionary Learning High School, a new small school that she helped develop systems for improvement and an interdisciplinary curriculum. From there, Ms. Chislett became Director of Knowledge Sharing in the DOE's Division of Accountability and Performance where her work focused on disseminating promising practices Citywide through the ARIS Connect platform. As Chief Academic Officer for Cluster One, Ms. Chislett led professional development to support Common Core curriculum and assessment implementation. Most recently, as Director of Professional Development in the Office of School Quality, Ms. Chislett evaluated schools during the Quality Review and ITT processes. Desiring to again lead school change firsthand and join the Chancellor's School Renewal Initiative, Ms. Chislett assumed the principalship of FLAGS High School in August of 2014.

Throughout her career, Ms. Chislett has gained expertise that qualifies her to lead a Priority school being transformed through an innovation model. While overseeing educational innovations in the classroom, school, district and state level, she gained skill in communicating a vision for excellence, planning strategically, obtaining stakeholder buy-in, using data and evidence-based practices to inform practice, managing teams, and designing curriculum, assessment and professional development to result in student achievement. Ms. Chislett has led initiatives to build the capacity of teachers, school leaders, and superintendents through training, resource development, on-going support and accountability for improvement. Her breadth and depth of experience makes her the right leader to bring needed improvement to the FLAGS community.

During the first year of her leadership, Ms. Chislett has realigned resources to support school goals, created structures for professional collaboration that engage teachers in analyzing student performance on CCLS-aligned tasks, and improved school culture by implementing a peer leadership and advisory program. The impact of these initial changes has been a shift in student perception of their school as a positive safe place in

which they are known, increased attendance and advances in credit accrual for the freshman class. Expanded Learning Time has been implemented on a limited level and a vital CBO partnership has been forged with the Center for Supportive Schools.

Ms. Chislett has articulated a vision for Effective School Leadership in the 2015-16 RSCEP which incorporates the following targeted behaviors and results to make school reform comprehensive:

- Support stakeholders to understand the vision for school improvement, instructional focus and Community School purpose with a shared sense of urgency about achieving school-wide goals
- Effectively use evidence-based systems to examine and improve individual and school-wide practices in critical areas (curriculum, teacher effectiveness, family engagement, social and emotional health).
- Monitor interim checkpoints cited in the RSCEP using data-based tools and sources (such as NYC Schools Account, Progress Towards Graduation Tracker, School Performance Data Explorer, SKEDULA, STARS Scholarship reports, dashboard of social and emotional learning and attendance data) and communicate progress towards goals; make revisions as needed
- Foster shared accountability through data-based conversations and protocols that require teachers and other stakeholders to use an inquiry approach when examining data and to use data to substantiate progress or impact of our efforts.
- Make strategic decisions to organize resources concerning human, programmatic and fiscal capital so that school improvement and student goals are achieved.
- Conduct targeted and frequent classroom observations, support and track teacher development using student data, feedback and professional development, and hold faculty accountable for continuous improvement

Partnership

Center for Supportive Schools (CSS) will be the school's lead CBO partner. This organization will provide the school with:

- Solutions that will develop, disseminate, and develop peer leadership, advisory, and other evidence-based K-12 solutions that enable and inspire schools to more fully engage their students in learning.
- Solutions that better connect students to their school, motivate and equip students to make decisions responsibly, and accelerate academic achievement.
- CSS solutions enable and inspire students to become more engaged learners; develop positive social, emotional, and health behaviors; navigate pivotal transitions; and address the overwhelming stresses of youth.
