

Computer Recycling for Education and Technology Enhancement

July 2013

**CREATE Annual Report
July 1, 2012-June 30, 2013**

The Computer Recycling for Education and Technology Enhancement (CREATE) Act became a law on July 2, 1996. The law was passed to promote computer literacy in order to produce a competitive workforce. A policy was created that surplus computer equipment, owned by the State, that may be of use in the educational system shall be made available to the educational institutions that may require the equipment.

The Commissioner of Education was instructed to establish guidelines governing the distribution of State owned surplus computer equipment to public schools, the Office of Children and Family Services, and public libraries. Other eligible applicants include public and private institutions for education and not-for-profit institutions serving individuals with disabilities, low-income individuals or senior citizens.

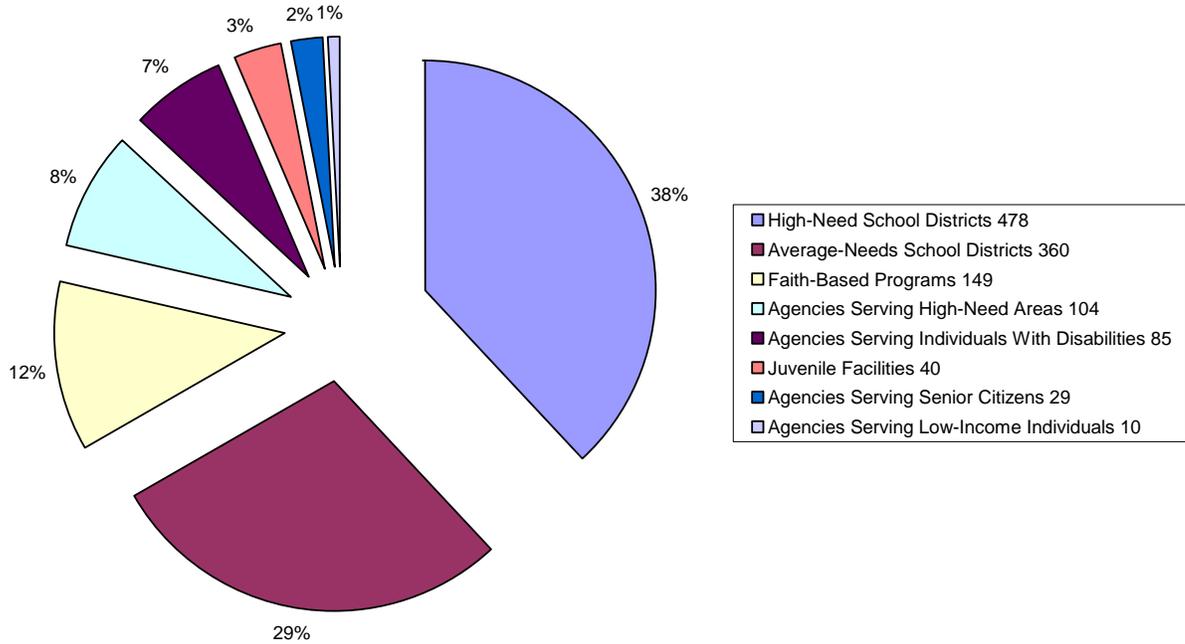

New applicants can submit an application throughout the year to be eligible to receive equipment. The application can be found at: <http://www.p12.nysed.gov/sss/ssac/AltEd/create/home.html>

During the course of the 2012-2013 school year, 1,255 computers were provided to 49 different school districts and educational entities for their educational programs. The list of donors included the New York State Department of Taxation and Finance, Unified Court System, SUC Oneonta, New York State Energy Research and Development Authority, New York State Office for the Aging, New York State Higher Education Services Corporation, New York State Department of Labor and the New York State Education Department.

Equipment continues to reach resource lean programs operated by high-need school districts. The need/resource capacity index, a measure of a district's ability to meet the needs of its students with local resources, is the ratio of the estimated poverty percentage to the Combined Wealth Ratio. A district with both estimated poverty and Combined Wealth Ratio equal to the State average would have a need/resource capacity index of 1.0.

The following chart and table provides information as to the agencies that received donations.

Distribution

Type of agency	Number of computers	Percentage of total number of computers
Agencies serving high-need areas	104	8
Agencies serving individuals with disabilities	85	7
Agencies serving low-income individuals	10	1
Agencies serving senior citizens	29	2
Average-need school districts	360	29
Faith-based programs	149	12
High-need school districts	478	38
Juvenile Facilities	40	3
Total	1255	100

The number of computers disseminated for the last five years is recorded in the following table:

Year	Number of computers	Number of educational entities receiving computers
2008-2009	2,590	56
2009-2010	1,060	45
2010-2011	1,677	46
2011-2012	1,659	50
2012-2013	1,255	49

Efforts are made to ensure that high quality performance computers are available for the entities receiving equipment. For the 2012-13 school year, approximately 73% of the computers were rated at Pentium 2.0 GHz or better. The majority of the equipment below this threshold was laptops, which are in high demand. Also in high demand were flat panel monitors and laser printers which were donated thru CREATE and are not reflected in the report.
