

## Smart Schools Investment Plan - Revised - 2021 Cambridge SSIP

SSIP Overview

---

Page Last Modified: 05/05/2022

**Institution ID**

80000035895

1. **Please enter the name of the person to contact regarding this submission.**

Anthony Cammarata

- 1a. **Please enter their phone number for follow up questions.**

5186772653 ext 1016

- 1b. **Please enter their e-mail address for follow up contact.**

anthony.cammarata@cambridgescd.org

2. **Please indicate below whether this is the first submission, a new or supplemental submission or an amended submission of an approved Smart Schools Investment Plan.**

First submission

3. **All New York State public school districts are required to complete and submit a District Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations. Districts that include investments in high-speed broadband or wireless connectivity and/or learning technology equipment or facilities as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.**

**By checking this box, you certify that the school district has an approved District Instructional Technology Plan survey on file with the New York State Education Department.**

District Educational Technology Plan Submitted to SED and Approved

4. **Pursuant to the requirements of the Smart Schools Bond Act, the planning process must include consultation with parents, teachers, students, community members, other stakeholders and any nonpublic schools located in the district.**

**By checking the boxes below, you are certifying that you have engaged with those required stakeholders.**

Parents

Teachers

Students

Community members

This plan has been identified as a Remote Learning Plan and meets the criteria per the SSBA Guidance to be submitted and reviewed on an expedited basis, therefore the district did not consult with certain stakeholder groups including parents, teachers, students, community members and/or nonpublic schools in the district prior to submission of the application.

5. **Did your district contain nonpublic schools in 2014-15?**

Yes

Yes, but they have all since closed, moved out of district or are declining use of SSBA funds

No

Smart Schools Investment Plan - Revised - 2021 Cambridge SSIP

SSIP Overview

Page Last Modified: 05/05/2022

6. Certify that the following required steps have taken place by checking the boxes below:

- The district developed and the school board approved a preliminary Smart Schools Investment Plan.
- The preliminary plan was posted on the district website for at least 30 days. The district included an address to which any written comments on the plan should be sent.
- The school board conducted a hearing that enabled stakeholders to respond to the preliminary plan. This hearing may have occurred as part of a normal Board meeting, but adequate notice of the event must have been provided through local media and the district website for at least two weeks prior to the meeting.
- The district prepared a final plan for school board approval and such plan has been approved by the school board.
- The final proposed plan that has been submitted has been posted on the district's website.
- This Plan has been identified as a Remote Learning Plan and meets the criteria per the SSBA Guidance to be submitted and reviewed on an expedited basis, therefore this plan has not met certain stakeholder engagement requirements including, consulting with nonpublic schools in advance of plan submission, having the school board conduct a hearing on the plan and/or posting the plan to the district website for a minimum of 30 days. This district will post the Remote Learning Plan to the district's website upon submission of the application.

6a. Please upload the proposed Smart Schools Investment Plan (SSIP) that was posted on the district's website, along with any supporting materials. Note that this should be different than your recently submitted Educational Technology Survey. The Final SSIP, as approved by the School Board, should also be posted on the website and remain there during the course of the projects contained therein.

CAMBRIDGE CSD\_Smart\_Schools\_Investment\_Plan\_2021.pdf

6b. Enter the webpage address where the final Smart Schools Investment Plan is posted. The Plan should remain posted for the life of the included projects.

<https://www.cambridgesd.org/site/handlers/filedownload.ashx?moduleinstanceid=56&dataid=11747&FileName=CCS%20Smart%20Schools%20Investment%20Plan%202021.pdf>

7. Please enter an estimate of the total number of students and staff that will benefit from this Smart Schools Investment Plan based on the cumulative projects submitted to date.

1,005

8. An LEA/School District may partner with one or more other LEA/School Districts to form a consortium to pool Smart Schools Bond Act funds for a project that meets all other Smart School Bond Act requirements. Each school district participating in the consortium will need to file an approved Smart Schools Investment Plan for the project and submit a signed Memorandum of Understanding that sets forth the details of the consortium including the roles of each respective district.

- The district plans to participate in a consortium to partner with other school district(s) to implement a Smart Schools project.

9. Please enter the name and 6-digit SED Code for each LEA/School District participating in the Consortium.

Partner LEA/District	SED BEDS Code
(No Response)	(No Response)

10. Please upload a signed Memorandum of Understanding with all of the participating Consortium partners.

(No Response)

11. Your district's Smart Schools Bond Act Allocation is:

\$914,980

12. Final 2014-15 BEDS Enrollment to calculate Nonpublic Sharing Requirement

	Public Enrollment	Nonpublic Enrollment	Total Enrollment	Nonpublic Percentage
Enrollment	865	0	865.00	0.00

## Smart Schools Investment Plan - Revised - 2021 Cambridge SSIP

## SSIP Overview

Page Last Modified: 05/05/2022

13. This table compares each category budget total, as entered in that category's page, to the total expenditures listed in the category's expenditure table. Any discrepancies between the two must be resolved before submission.

	Sub-Allocations	Expenditure Totals	Difference
School Connectivity	0.00	0.00	0.00
Connectivity Projects for Communities	0.00	0.00	0.00
Classroom Technology	538,060.00	538,060.00	0.00
Pre-Kindergarten Classrooms	0.00	0.00	0.00
Replace Transportable Classrooms	0.00	0.00	0.00
High-Tech Security Features	0.00	0.00	0.00
Nonpublic Loan	0.00	0.00	0.00
<b>Totals:</b>	<b>538,060</b>	<b>538,060</b>	<b>0</b>

Smart Schools Investment Plan - Revised - 2021 Cambridge SSIP

School Connectivity

Page Last Modified: 10/25/2021

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that:
  - sufficient infrastructure that meets the Federal Communications Commission’s 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or
  - is a planned use of a portion of Smart Schools Bond Act funds, or
  - is under development through another funding source.
 Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:
  1. Specifically codified in a service contract with a provider, and
  2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

(No Response)

- 1a. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.

By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2. **Connectivity Speed Calculator (Required).** If the district currently meets the required speed, enter “Currently Met” in the last box: **Expected Date When Required Speed Will be Met.**

	Number of Students	Required Speed in Mbps	Current Speed in Mbps	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	(No Response)	0.00	(No Response)	(No Response)	(No Response)

3. Describe how you intend to use Smart Schools Bond Act funds for high-speed broadband and/or wireless connectivity projects in school buildings.

(No Response)

4. Describe the linkage between the district's District Instructional Technology Plan and how the proposed projects will improve teaching and learning. (There should be a link between your response to this question and your responses to Question 1 in Section IV - NYSED Initiatives Alignment: "Explain how the district use of instructional technology will serve as a part of a comprehensive and sustained effort to support rigorous academic standards attainment and performance improvement for students.")

Your answer should also align with your answers to the questions in Section II - Strategic Technology Planning and the associated Action Steps in Section III - Action Plan.)

(No Response)

Smart Schools Investment Plan - Revised - 2021 Cambridge SSIP

School Connectivity

Page Last Modified: 10/25/2021

5. If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.

Please describe how you have quantified this demand and how you plan to meet this demand.

(No Response)

6. Smart Schools plans with any expenditures in the School Connectivity category require a project number from the Office of Facilities Planning. Districts must submit an SSBA LOI and receive project numbers prior to submitting the SSIP. As indicated on the LOI, some projects may be eligible for a streamlined review and will not require a building permit.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number
(No Response)

7. Certain high-tech security and connectivity infrastructure projects may be eligible for an expedited review process as determined by the Office of Facilities Planning.

Was your project deemed eligible for streamlined review?

(No Response)

8. Include the name and license number of the architect or engineer of record.

Name	License Number
(No Response)	(No Response)

9. Public Expenditures – Loanable (Counts toward the nonpublic loan calculation)

Smart Schools Investment Plan - Revised - 2021 Cambridge SSIP

Community Connectivity (Broadband and Wireless)

Page Last Modified: 10/25/2021

- Describe how you intend to use Smart Schools Bond Act funds for high-speed broadband and/or wireless connectivity projects in the community.

(No Response)

- Please describe how the proposed project(s) will promote student achievement and increase student and/or staff access to the Internet in a manner that enhances student learning and/or instruction outside of the school day and/or school building.

(No Response)

- Community connectivity projects must comply with all the necessary local building codes and regulations (building and related permits are not required prior to plan submission).

I certify that we will comply with all the necessary local building codes and regulations.

- Please describe the physical location of the proposed investment.

(No Response)

- Please provide the initial list of partners participating in the Community Connectivity Broadband Project, along with their Federal Tax Identification (Employer Identification) number.

Project Partners	Federal ID #
(No Response)	(No Response)

- Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.

Smart Schools Investment Plan - Revised - 2021 Cambridge SSIP

Classroom Learning Technology

Page Last Modified: 05/04/2022

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that sufficient infrastructure that meets the Federal Communications Commission’s 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or is a planned use of a portion of Smart Schools Bond Act funds, or is under development through another funding source. Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

1. Specifically codified in a service contract with a provider, and
2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

Cambridge Central School District is a K-12 building with a fiber optic backbone and 1-10 Gb capacity LAN that was installed using EXCEL funds. Our current internet download speeds are 200MB, which is supplied by our local WSWHE BOCES through the NERIC. This network consists of the following: 1-10 Gb internal network with single mode fiber optic backbone and Cat 6e cabling, 7 new Ethernet switch closets (13-48 port switches, 7-24 port switches including power over Ethernet), 746 network drops, 1 WAP Domain Controller, and 40 Wireless Access Points.-

- 1a. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.

By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2. **Connectivity Speed Calculator (Required).** If the district currently meets the required speed, enter “Currently Met” in the last box: **Expected Date When Required Speed Will be Met.**

	Number of Students	Required Speed in Mbps	Current Speed in Mbps	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	822	82.20	200	400	9/1/2019

3. If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.

Please describe how you have quantified this demand and how you plan to meet this demand.

The district completed a facilities project in the summer of 2020 that upgraded the wireless infrastructure expanding the wireless network which includes 1 wireless domain controller, Power Over Ethernet switches, and 40 wireless access points.

4. All New York State public school districts are required to complete and submit an Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner’s Regulations.

Districts that include educational technology purchases as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.

By checking this box, you are certifying that the school district has an approved Instructional Technology Plan survey on file with the New York State Education Department.

**Smart Schools Investment Plan - Revised - 2021 Cambridge SSIP**Classroom Learning Technology

---

Page Last Modified: 05/04/2022

- 5. Describe the devices you intend to purchase and their compatibility with existing or planned platforms or systems. Specifically address the adequacy of each facility's electrical, HVAC and other infrastructure necessary to install and support the operation of the planned technology.**

All of the devices we are planning to purchase will have sufficient electrical support as a result of our recent building projects which upgraded electrical service to areas of the school that required them. Also, our EXCEL project upgraded our technology infrastructure (network cabling, fiber backbone and switches, WAPs) which will support the use of the new classroom learning technology. This included UPS battery backup and climate control. The district facilities project which concluded in the summer of 2020 included the installation of a back up generator.

The devices we will purchase support the District's ongoing one-to-one device initiative for students, the District has implemented Chromebooks as an instructional tool for grades Pre-Kindergarten through 12th grade. The district plans to purchase 750 - Dell Chromebook 3100 2-in-1- 11.6" Chromebooks with 4 GB RAM with touchscreen capability to replace current end of life Chromebooks. They will be purchased with the Chrome OS Management license so that they can be added to the District's existing G Suite for Education domain. To support student learning activities, the District plans to upgrade the teachers' desktop computers and presentation illumination devices in the classrooms. The support staff computers will also be updated. The District plans to purchase 100 - 21.5 inch Dell OptiPlex 3280 All in One Series with 8 Gb memory, quoted at \$884 per unit, and 10 Apple 21.5 inch iMac computers with 8 Gb of memory quoted at \$1049 per unit. These devices will be used to replace our current desktops which were purchased and deployed in 2015 and are now reaching the end of their life. The district also plans to purchase 30 SMART Board 60755 interactive display LCD panels with an over board rail mounting system, quoted cost is \$5,164 including the mounting rails. Smartboards to be used as illumination monitors for teacher and student classroom presentation needs and are replacing our current Smartboards which were purchased in 2012 .

**Smart Schools Investment Plan - Revised - 2021 Cambridge SSIP**

## Classroom Learning Technology

Page Last Modified: 05/04/2022

6. **Describe how the proposed technology purchases will:**
- > **enhance differentiated instruction;**
  - > **expand student learning inside and outside the classroom;**
  - > **benefit students with disabilities and English language learners; and**
  - > **contribute to the reduction of other learning gaps that have been identified within the district.**

**The expectation is that districts will place a priority on addressing the needs of students who struggle to succeed in a rigorous curriculum. Responses in this section should specifically address this concern and align with the district's Instructional Technology Plan (in particular Question 2 of E. Curriculum and Instruction: "Does the district's instructional technology plan address the needs of students with disabilities to ensure equitable access to instruction, materials and assessments?" and Question 3 of the same section: "Does the district's instructional technology plan address the provision of assistive technology specifically for students with disabilities to ensure access to and participation in the general curriculum?")**

**In addition, describe how the district ensures equitable access to instruction, materials and assessments and participation in the general curriculum for both SWD and English Language Learners/Multilingual Learners (ELL/MLL) students.**

**Please note: If this plan has been identified as a Remote Learning Plan to be submitted and reviewed on an expedited basis, the district should explain how this plan will facilitate remote and hybrid learning, in lieu of responding to the question above.**

The Director of Special Education, special education teachers, and ESL teachers incorporate technology into the construction of individual education programs for students. Students with technology needs are offered Computer Assistive Technology as identified and outlined by their specific IEP's. The Director of Special Education works closely with the District Director of Technology, our local BOCES model schools program, and teachers to identify the best technology suited to aid a student's instruction. This is done as part of a student's annual review. Specific examples of the use of technology for differentiated instruction and by students with disabilities or English language learners include the use of tablets/chrome books for ESL students to help them with translations. Tablets/Chromebooks are also used to provide our struggling reading students access to literature with read aloud features, along with the use of apps that focus on math skills and decoding which are often areas where students struggle. Tablets are also utilized to help students become more organized and for planning, also for the QR reader, along with other programs in which students can hear stories read to them while they follow along with the book. Assessments, including STAR testing, iReady, and NYSAA are mandated to be on computer as well as audio books, text books (audio version and resources from the company); visual and manipulates are accessed through the SmartBoard; math skills and drill through interactive games/resources available on line; websites that provide reference materials; word processing (word prediction, spell check); text-to-speech for augmentative speech needs; life skills of accessing community and world information. Interactive whiteboards and panels are used daily for small group instruction and comprehension questions and displaying the text on the screen for easy reading, also to "flip" the classroom, and for stories and worksheets from the Foundations reading program. iPads are utilized for enrichment and are available for our 9th period students to use to strengthen their reading and for apps to assist with sight word recognition, reversals with letters and numbers and math fact mastery. Chrombooks are used for online spelling programs, reading programs and online phonics and math programs. Students can also do research using the school's databases, generate writing pieces, prepare for Regents exams, and for work based learning projects. By using the technology in our special needs classrooms, students can access the same curriculum as their peers, but without the constraints of not being able to read on level; seeing and hearing it in a visual/auditory form helps them meet with much more success.

7. **Where appropriate, describe how the proposed technology purchases will enhance ongoing communication with parents and other stakeholders and help the district facilitate technology-based regional partnerships, including distance learning and other efforts.**

Cambridge Central School believes it can enhance learning through effectively integrating technology into all aspects of the district's educational programs. The use of computers and other advanced technologies to promote technological literacy, enhance instruction, increase productivity, collaboration, and improve communication will benefit the entire school community. This can be accomplished by incorporating wireless communication where appropriate, continuing to use our mass communication systems (School Messenger) to expand our ability to communicate with parents in regards to school closing, mass messaging about school events, to conduct school district surveys, and to utilize the district website and social media platforms as a communication portal between the school and the community.

## Smart Schools Investment Plan - Revised - 2021 Cambridge SSIP

## Classroom Learning Technology

Page Last Modified: 05/04/2022

8. Describe the district's plan to provide professional development to ensure that administrators, teachers and staff can employ the technology purchased to enhance instruction successfully.

**Note: This response should be aligned and expanded upon in accordance with your district's response to Question 1 of F. Professional Development of your Instructional Technology Plan: "Please provide a summary of professional development offered to teachers and staff, for the time period covered by this plan, to support technology to enhance teaching and learning. Please include topics, audience and method of delivery within your summary."**

**Please note: If this plan has been identified as a Remote Learning Plan to be submitted and reviewed on an expedited basis, the district should provide a statement confirming that the district has provided or will provide professional development on these devices to its staff, in lieu of responding to the question above.**

The District recognizes the need to provide targeted, rigorous, and sustained professional development for staff and students to effectively support technology. The following means of staff development are critical to the success of the technology plan: Existing staff with expertise have been hired to present seminars on applicable software to enhance the curriculum. This model has been successful and will be continued. The District Technology Coordinator provides assistance to teachers and staff with implementation of technology integration into curriculum. Provide resources for teachers interested in the integration of technology into their curriculum area and assist them in generating projects in which technology can be used as a tool in education. The WSWHE BOCES Model Schools program is also a resource for technology integration. The plan includes exploring this service for use in staff development. The District runs after school professional development courses throughout the school year in technology that are facilitated by the Technology Coordinator and the Profession Support Provider staff. District Superintendent days are also used for professional development in educational technology. Provide ongoing instruction for all personnel as it applies to their roles in the district. Expect staff to serve as role models for the Cambridge community in the use of technology .

9. Districts must contact one of the SUNY/CUNY teacher preparation programs listed on the document on the left side of the page that supplies the largest number of the district's new teachers to request advice on innovative uses and best practices at the intersection of pedagogy and educational technology.

By checking this box, you certify that you have contacted the SUNY/CUNY teacher preparation program that supplies the largest number of your new teachers to request advice on these issues.

- 9a. Please enter the name of the SUNY or CUNY Institution that you contacted.

SUNY Plattsburgh

- 9b. Enter the primary Institution phone number.

518 792 5425

- 9c. Enter the name of the contact person with whom you consulted and/or will be collaborating with on innovative uses of technology and best practices.

Dr. Steve Danna

10. To ensure the sustainability of technology purchases made with Smart Schools funds, districts must demonstrate a long-term plan to maintain and replace technology purchases supported by Smart Schools Bond Act funds. This sustainability plan shall demonstrate a district's capacity to support recurring costs of use that are ineligible for Smart Schools Bond Act funding such as device maintenance, technical support, Internet and wireless fees, maintenance of hotspots, staff professional development, building maintenance and the replacement of incidental items. Further, such a sustainability plan shall include a long-term plan for the replacement of purchased devices and equipment at the end of their useful life with other funding sources.

By checking this box, you certify that the district has a sustainability plan as described above.

11. Districts must ensure that devices purchased with Smart Schools Bond funds will be distributed, prepared for use, maintained and supported appropriately. Districts must maintain detailed device inventories in accordance with generally accepted accounting principles.

By checking this box, you certify that the district has a distribution and inventory management plan and system in place.

Tablet Computers	284,250.00	0.00	284,250.00
Other Costs	(No Response)	0.00	0.00
<b>Totals:</b>	<b>538,060.00</b>	<b>0</b>	<b>538,060</b>

Smart Schools Investment Plan - Revised - 2021 Cambridge SSIP

Pre-Kindergarten Classrooms

Page Last Modified: 10/25/2021

1. Provide information regarding how and where the district is currently serving pre-kindergarten students and justify the need for additional space with enrollment projections over 3 years.

(No Response)

2. Describe the district’s plan to construct, enhance or modernize education facilities to accommodate pre-kindergarten programs. Such plans must include:

- Specific descriptions of what the district intends to do to each space;
- An affirmation that new pre-kindergarten classrooms will contain a minimum of 900 square feet per classroom;
- The number of classrooms involved;
- The approximate construction costs per classroom; and
- Confirmation that the space is district-owned or has a long-term lease that exceeds the probable useful life of the improvements.

(No Response)

3. Smart Schools Bond Act funds may only be used for capital construction costs. Describe the type and amount of additional funds that will be required to support ineligible ongoing costs (e.g. instruction, supplies) associated with any additional pre-kindergarten classrooms that the district plans to add.

(No Response)

4. All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Smart Schools Investment Plan - Revised - 2021 Cambridge SSIP

High-Tech Security Features

Page Last Modified: 10/25/2021

- Describe how you intend to use Smart Schools Bond Act funds to install high-tech security features in school buildings and on school campuses.

(No Response)

- All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Smart Schools plans with any expenditures in the High-Tech Security category require a project number from the Office of Facilities Planning. Districts must submit an SSBA LOI and receive project numbers prior to submitting the SSIP. As indicated on the LOI, some projects may be eligible for a streamlined review and will not require a building permit. Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number
(No Response)

- Was your project deemed eligible for streamlined Review?

- Yes
- No

- Include the name and license number of the architect or engineer of record.

Name	License Number
(No Response)	(No Response)

- Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.

Select the allowable expenditure type. Repeat to add another item under each type.	Item to be purchased	Quantity	Cost per Item	Total Cost
