This report includes a listing of students who are **included** in the report, which are those students that meet the above criteria and a listing of students who are **excluded** from the report, which are those students that meet some of the above criteria but not all. School districts should use these lists to verify the accuracy of data submitted for each student. The reports with aggregate numbers provide the results the State will use in all Statewide and district level aggregations for reporting and analysis.

The following reasonability checks are programmed into Section B, Report 14 of this VR10 report:

The total reported in every row of Section B, Report 14 are compared with the same total in the VR10 report from the 2007-08 school year. The total numbers for both years are displayed for your information. After the data are certified, school districts will be required to provide an explanation of any discrepancy of 10 students **and** 10 percent in any row between 2008-09 and 2007-08 totals. The request for an explanation does not mean a district or school cannot have a discrepancy of 10 students **and** 10 percent; it just means that the Department needs an explanation of possible circumstances or change in policy that may have caused such a discrepancy.

Directions: Please review list of **included** and **excluded** students that accompany this report and verify the accuracy of all data included for each student in these lists. The report tables below display the aggregate numbers of students that meet the criteria to be included in each cell of the tables below. The links below the numbers in each cell provide a list of students. **If any student information needs to be corrected, please resubmit your district files with the necessary corrections to the Regional Information Center (or to the data warehouse for large cities) within the verification time period.**
